Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.
You need to create a Start menu layout file. The solution must meet the following requirements:

≫ Contain an app group named Contoso Apps that has several pinned items. Contoso Apps must be locked from user modification.

≫ Ensure that users can customize other parts of the Start screen.

≫ Minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Actions	Answer Area
Deploy the start layout.	
Modify the StartLayoutCollection XML element.	
Modify the DefaultLayoutOverride XML element.	
Export the start layout to a file.	
On a reference computer, customize the Start menu.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
* 1. On a reference computer, customize the Start menu
* 2. Export the start layout to a file
* 3. Modify the Defaultlayoutoveride XML element
* 4. Deploy the start layout References:
https://docs.microsoft.com/en-us/windows/configuration/customize-and-export-start-layout

NEW QUESTION 2
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.
Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:

Reference:
https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10

NEW QUESTION 3
- (Exam Topic 4)
Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.
You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Add a task sequence step that adds a provisioning package.
B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
C. Add a custom command to the Unattend.xml file.

D. Add a configuration setting to Windows Deployment Services (WDS).
E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:
References:
Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.
https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im

NEW QUESTION 4
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10.
You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.
You need to remove the update from Computer1.
Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 5
- (Exam Topic 4)
You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 has a cellular connection and a Wi-Fi connection.
You want to prevent Computer1from using the cellular connection unless a you manually connects to the
cellular network. What should you do?
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

≫ Select the Network icon.
icon on the lower right corner of the taskbar, and then select thceellular network
≫ Clear the Let Windows manage this connection check box.
Reference:
https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings

NEW QUESTION 6
- (Exam Topic 4)
You have 20 computers that run Windows 11.
You need to enable Windows Sandbox on the computers.
How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Enable-WindowsOptionalFeature
To Enable Windows 10 Sandbox with PowerShell,
* 1. Open PowerShell as Administrator.
* 2. Type or copy-paste the following command:
Enable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -All -Online

* 3. When prompted to restart the computer, type Y, and press Enter.
* 4. The change can be undone with the following command:
* 5. Disable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -Online Box 2: "Containers-DisposableClientVM"
https://learn.microsoft.com/en-us/windows/security/threat-protection/windows-sandbox/windows-sandbox-over

NEW QUESTION 7
- (Exam Topic 4)
You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes.
You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive.
What should you do?

A. Run cipher.exe and specify the /rekey parameter
B. Run cipher.exe and specify the /adduser parameter
C. Run manange-bde.exe and specify the -off parameter
D. Run manage-bde.exe and specify the -unlock parameter

Answer: D

Explanation:
https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/

NEW QUESTION 8
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.
But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

CONTOSO\Administrator

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.
Username: Contoso/Administrator
Password: Passw0rd!
The following information is for technical support purposes only:
Lab Instance: 10921597

| Tasks	Computers

Client1

Client2

Client3

DC1

You need to ensure that Client3 starts in safe mode automatically the next time the computer restarts. After completing the task, you must NOT restart Client3. To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
* 1. From Client3, open the System Configuration utility by pressing the Windows & R keys simultaneously to display the Run box .
* 2. Type "msconfig" into the box, and then click OK.

Run

Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.

Open: msconfig

OK   Cancel   Browse...

* 3. In the "System Configuration" window, switch to the "Boot" tab.
* 4. Enable the "Safe Boot" check box, and then make sure the "Minimal" option below that is selected. Click the "OK" button when you're done.

* 5. You will be prompted to Restart or Exit without restart. Click Exit without restart.

NEW QUESTION 9
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.
What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

| User1 only |
| User1 and User2 only |
| User1, User2, and User3 only |
| User1, User2, User3, and User4 |

Users who can move File1.txt to D:\Folder3:

| User1 only |
| User1 and User2 only |
| User1, User2, and User3 only |
| User1, User2, User3, and User4 |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files

NEW QUESTION 10
- (Exam Topic 4)
Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question In this section, you will NOT be able to return to It. As a result these question will not appear In the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin®contoso.com that is m the local Administrators group on each computer.
You sign m to Compute1 by using admin®contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer?.
Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventwr.exe. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 10
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.
The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.
You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:
➢ Administrators
➢ Device Owners
➢ Authenticated Users
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can join all the computers to the domain.	○	○
User2 can join a maximum of 10 computers to the domain.	○	○
User3 can join all the computers to the domain.	○	○

A. Mastered

B. Not Mastered

Answer: A

Explanation:
Box 1: No
User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.
Box 2: No
User2 is a member of the Authenticated Users group which has the Add workstations to domain user right.
User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.
Box 3. Yes
User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 14
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	○	○
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	○	○
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10)

NEW QUESTION 17
- (Exam Topic 4)
Your network contains the segments shown in the following table.

Name	Domain controller connectivity	Internet connectivity
Segment1	Yes	Yes
Segment2	No	Yes

You have computers that run Windows 10 and are configured as shown in the following table.

Name	Shared folder	Share permission	Active Directory joined	Connected to
Computer1	Share1	Everyone: Full control	Yes	Segment1
Computer2	Share2	Everyone: Full control	Yes	Segment2
Computer3	Share3	Everyone: Full control	No	Segment1

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

Computer	Domain	Private	Public
Computer1	Allowed	Not allowed	Not allowed
Computer2	Allowed	Allowed	Not allowed
Computer3	Not applicable	Allowed	Allowed

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	O	O
You can access Share2 from Computer3.	O	O
You can access Share3 from Computer1.	O	O

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	O	●
You can access Share2 from Computer3.	O	●
You can access Share3 from Computer1.	●	O

NEW QUESTION 22
- (Exam Topic 4)
You have a computer that runs Windows 10. You need to configure a picture password. What should you do? D18912E1457D5D1DDCBD40AB3BF70D5D

A. From Control Panel, configure the User Accounts settings.
B. From the Settings app, configure the Sign-in options.
C. From the Local Group Policy Editor, configure the Account Policies settings.
D. From Windows PowerShell, run the Set-LocalUser cmdlet and specify the InputObject parameter.

Answer: B

NEW QUESTION 27

- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.
Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	Not applicable
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	○	○
User2 has the Recycle Bin on the desktop.	○	○
User1 has the Recycle Bin on the desktop.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text Description automatically generated

NEW QUESTION 32
- (Exam Topic 4)
You have a Microsoft Azure Active Directory (Azure AD) tenant.
Some users signs in to that computer by using Windows hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD.
User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

Sign-in options

***Some settings are hidden or managed by your organization.**
Windows Hello

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

See how it works and find compatible devices.

You open device Manager and confirmed that all the hardware works correctly.
You need to ensure that user1 can use Windows Hello for Business facial recognition to sign in to the computer.
What should you do first.

A. Purchase an infrared (IR) camera.
B. Install a virtual TPM driver.
C. Enable UEF Secure Boot.
D. Upgrade the computer to windows 10 Enterprise.

Answer: D

NEW QUESTION 37
- (Exam Topic 4)
You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.
You need to generate catalog files and answer files for the deployment.
What should you use for each file? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Catalog file:
- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

Answer file:
- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
References:
https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo

NEW QUESTION 38
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.
You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.
Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 42
- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. A user named Mia Hamm has a computer named Computer1. Mia Hamm reports that when she logs on to
Computer1, she cannot access servers on the network but she can access computers on the internet.
You run the ipconfig command on Computer1 and receive the following output.

You successfully ping the default gateway, the DNS servers, and the DHCP server. You need to resolve the connectivity problem on Computer1.
Which setting should you configure? To answer, select the appropriate options in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface Description automatically generated
The preferred DNS server is located on the internet as it has a public IP Address. The local DNS server should be the preferred DNS server. We could manually change the preferred and alternate DNS server addresses or we could select the "Obtain DNS server address automatically" option to have the DNS servers configured through DHCP.

NEW QUESTION 44
- (Exam Topic 4)
You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.
Solution: On Computers you allow incoming ICMPv6 traffic in Windows Defender Firewall. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 45
- (Exam Topic 4)
You install Windows 10 Pro on a computer named CLIENT1.
You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.
What should you use?

A. the sc command
B. Task Manager
C. Services
D. the sfc command

Answer: A

NEW QUESTION 47
- (Exam Topic 4)
You have a computer that runs Windows 10.
You discover that Windows updates are failing to install on the computer.
You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

A. Get–LogProperties
B. Get–WindowsErrorReporting
C. Get–WindowsUpdateLog
D. Get–WinEvent

Answer: C

Explanation:
 References:
https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdatelog?view=win10-ps

NEW QUESTION 49
- (Exam Topic 4)
You need to ensure that User1 can add a third-party driver package for a printer to the driver store of the computer. The solution must use the principle of the least privilege.
To which local group should you add User 1, and what should User1 run? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Group:

- Administrators
- Device Owners
- Power Users
- Backup Operators

Run:

- Add-PrinterDriver
- Add-WindowsDriver
- pnputil.exe
- print.exe

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION 54
- (Exam Topic 3)
You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

A. Install the Remote Server Administration Tool (RSAT) optional features.
B. Run the winrm quickconfig command.
C. Set the Windows Management Service Startup type to Automatic and start the service.
D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:
https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms

NEW QUESTION 58
- (Exam Topic 2)
You need to meet the technical requirements for EFS on ComputerA. What should you do?

A. Run certutil.exe, and then add a certificate to the local computer certificate store.
B. Run cipher.exe, and then add a certificate to the local computer certificate store.
C. Run cipher.exe, and then add a certificate to the local Group Policy.
D. Run certutil.exe, and then add a certificate to the local Group Policy.

Answer: D

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea

NEW QUESTION 61
- (Exam Topic 1)
You need to ensure that User10 can activate Computer10. What should you do?

A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and thenredeploy Computer10.
C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice

NEW QUESTION 65
- (Exam Topic 1)
You need to implement a solution to configure the contractors' computers.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:
- Microsoft Deployment Toolkit (MDT)
- Windows AutoPilot
- Windows Configuration Designer
- Windows Deployment Services (WDS)

File type to create:
- CAB
- PPKG
- WIM
- XML

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd

NEW QUESTION 70
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile.
On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.
Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Actions
Run scanstate.exe and specify the C:\Users subfolder.
Run loadstate.exe and specify the C:\Users subfolder.
Run scanstate.exe and specify the C:\Windows.old subfolder.
Run loadstate.exe and specify the C:\Windows.old subfolder.
Run usmutils.exe and specify the C:\Users subfolder.
Run usmutils.exe and specify the C:\Windows.old subfolder.

Answer Area	
First action:	Action
Second action:	Action

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works

NEW QUESTION 71
- (Exam Topic 4)
You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.
The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	○	○
From Computer2, User2 can access Share1.	○	○
From Computer2, User3 can access Share1.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.
Box 1: Yes
Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.
Box 2: Yes
Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.
Box 3: Yes
The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.
Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2. However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.
Reference:
https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by

NEW QUESTION 73
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile.
You create a taskbar modification file named LayoutModification.xml.
You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

A. C:\Users\Public\Public Desktop
B. C:\Windows\ShellExperiences
C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:
https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop

NEW QUESTION 78
- (Exam Topic 4)
You have a workgroup computer that runs Windows 10. You create a local user named User1.
User1 needs to be able to share and manage folders located in a folder named C:\Share by using the Shared Folders snap-in. The solution must use the principle of least privilege.
To which group should you add User1?

A. Device Owners
B. Users
C. Power Users
D. Administrators

Answer: D

NEW QUESTION 79
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains a computer named Compurter1 that runs Windows 10.
The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.
Which two user can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. User 1
B. User 2
C. User 3
D. User 4
E. User 5

Answer: CE

NEW QUESTION 83
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a laptop named Computer1 that runs Windows 10.
When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.
Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

A. Yes
B. No
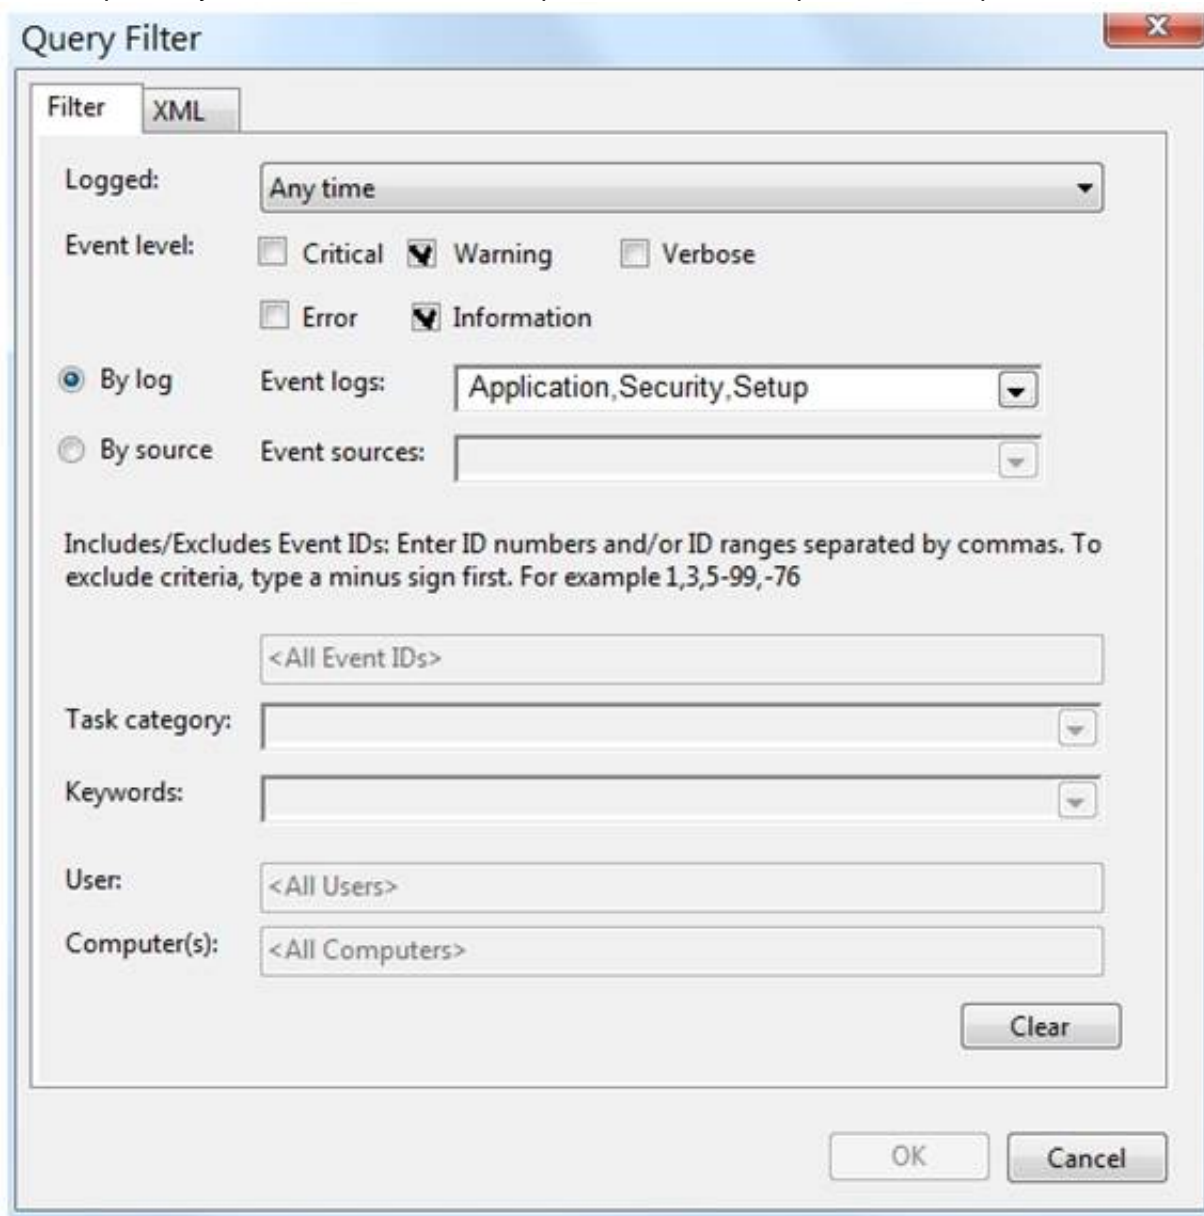

Answer: B

NEW QUESTION 84
- (Exam Topic 4)
Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10 and are joined to the domain.
On Computer1, you create an event subscription named Subscription1 for Computer2 as shown in the Subscription1 exhibit. (Click the Subcription1 tab.)

Subscription1 is configured to use forwarded events as the destination log.
On Computer1, you create a custom view named View1 as shown in the View1 exhibit. (Click the View1 tab.)

Create Custom View

| Filter | XML |

Logged: Any time

Event level: ☑ Critical ☑ Warning ☐ Verbose
☑ Error ☐ Information

◉ By log Event logs: Application,System,Forwarded Events

○ By source Event sources:

Includes/Excludes Event IDs: Enter ID numbers and/or ID ranges separated by commas. To exclude criteria, type a minus sign first. For example 1,3,5-99,-76

<All Event IDs>

Task category:

Keywords:

User: <All Users>

Computer(s): <All Computers>

Clear

OK Cancel

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	○	○
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	○	○
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	○	☑
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	○	☑
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	☑	○

NEW QUESTION 88
- (Exam Topic 4)
You have a computer that runs Windows 8.1.
When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.
You need to view the setup logs on the computer. Which folder contains the logs?

A. \$Windows.~BT\Sources\Panther\
B. \Windows\Logs
C. \Windows\Temp
D. \$Windows.~BT\Inf

Answer: A

Explanation:
 References:
https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo

NEW QUESTION 89
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.
But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks   **Computers**

Client1

Client2

Client3

DC1

You need to ensure that C:\Scripts\Configure.ps1 runs every time a user sign in to Client2.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Go to the Start menu, type "Task Scheduler" and select it from the search results.

Task Scheduler can also be accessed in the Control Panel under Administrative Tools. In the right side of the Task Scheduler menu, under Actions, select "Create Task."
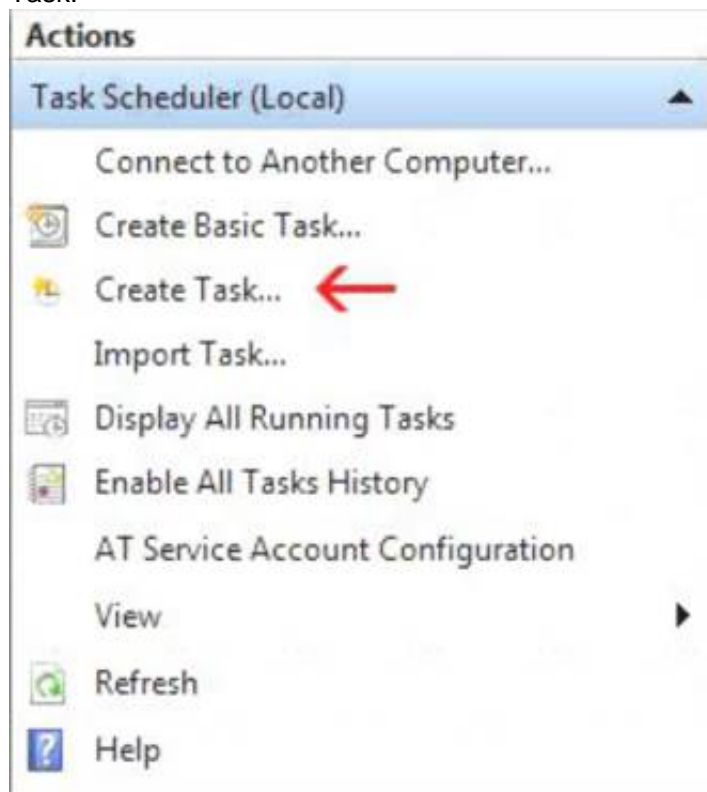

On the General tab, enter a name and description for the task you're creating. Check the box "Run with highest privileges."
Once you have filled out a name and description, click the "Triggers" tab, and then click "New."
In this menu, under "Begin the task:" select "At log on." Choose which user you would like the task to run for at log on. For our purposes, Any user.
Configure any of the applicable advanced settings you would like.
After you are finished configuring the new trigger, click OK and then select the "Actions" tab. Click "New" to make a new action.
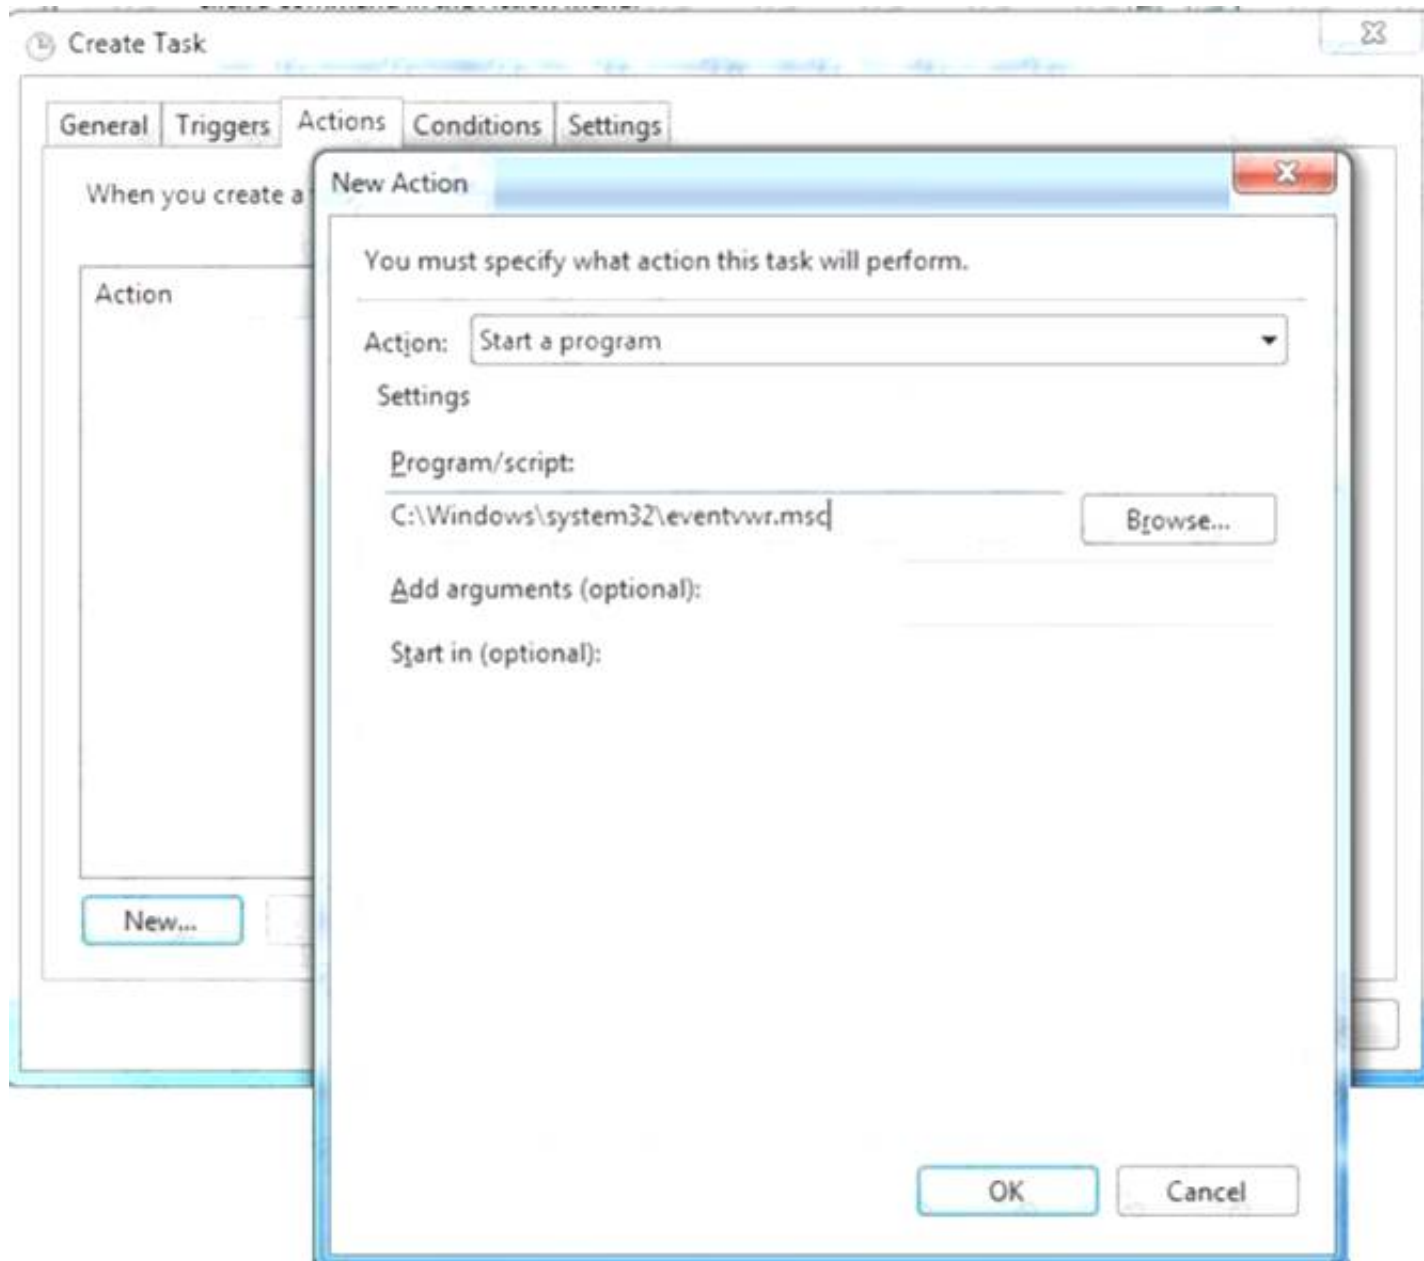

Choose "Start a program" under the Action menu and then click "Browse" to point to C:\Scripts\Configure.ps1.
Click OK to exit out of the Actions menu. The "Conditions" and "Settings" tabs can be left alone.
Click OK on the Create Task menu, and you are finished. Reference:
https://www.howtogeek.com/138159/how-to-enable-programs-and-custom-scripts-to-run-at-boot/

NEW QUESTION 93
- (Exam Topic 4)
User1 is a member of the Administrators group on a computer that runs Windows 10.
When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
D. From an elevated command prompt, run cacls.exe c:\secretdata /g user1:F.

Answer: B

Explanation:

Reference:
https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f

NEW QUESTION 94
- (Exam Topic 4)
Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.
Server1 contains a share named Backup. All users can read and write data in Backup.
On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

➤ Backup Destination:\\Server1\Backup

➤ What do you want to back up?:Local Disk (D:), Include a system image of drives: System Reserved, (C:)

➤ Schedule: Daily at 23:00
You need to identify how many backups will be available on Thursday at 17:00.
What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:
- One backup that uses ZIP files
- One backup that uses a VHDX file
- Three backups that use ZIP files
- Three backups that use VHDX files

System image backups of drive C:
- One backup that uses ZIP files
- One backup that uses a VHDX file
- Three backups that use ZIP files
- Three backups that use VHDX files

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10https:/

NEW QUESTION 98
- (Exam Topic 4)
You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2.
You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

A. Run the Set-NetIPInterface –InterfaceAlias Interface1 –InterfaceMetric 1 command.

B. Run the Set-NetAdapterBinding –Name Interface2 –Enabled $true –ComponentID ms_tcpip – ThrottleLimit 0 command.
C. Set a static IP address on Interface 1.
D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:
References: https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+ https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps

NEW QUESTION 103
- (Exam Topic 4)
Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users.
None of the new computers are activated.
You need to activate the computers without connecting the network to the Internet. What should you do?

A. Make use of the Volume Activation Management Tool (VAMT).
B. Make use of the Key Management Service (KMS).
C. Make use of the Windows Process Activation Service.
D. Run the Get-WmiObject -query cmdlet.

Answer: B

Explanation:
You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.
Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.
Reference:
https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi

NEW QUESTION 106
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.
You need to meet the following requirements:

≫ Provide a user named Jon Ross with the ability to modify the permissions of C:\Folder1.

≫ Ensure that the principle of least privilege is maintained.
What should you do?
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

≫ In Windows Explorer, right-click the C:\Folder1 folder, and then click Properties.
≫ Click on the Security tab, and then click Edit.
≫ In the Permissions dialog box, add Jon Ross.
≫ Specify the Allow Modify permissions for the Jon Ross.
≫ Click OK twice to close the Security dialog box.
≫ Click OK twice to close the Properties dialog box.

        EnterprisePrtAuthority :
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Microsoft Edge is configured by using: ▼

a Group Policy object (GPO)
Microsoft Intune
the Internet Explorer Administration Kit (IEAK)

The computer is: ▼

enrolled in Microsoft Intune
managed by using Microsoft System Center Configuration Manager
joined to an on-premises Active Directory domain

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.
The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:
https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd
https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04

NEW QUESTION 110
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group2

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:
- User2: Deny Write
- Group1: Allow Read
- Group2: Allow Modify

Folder1 is shared as Share1$. Share1$ has the following configurations:
- Everyone: Allow Full control
- Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can list files in \\Computer1\Share1$.	○	○
User2 can list files in \\Computer1\Share1$.	○	○
If User3 connects to \\Computer1 from File Explorer, Share1$ will be visible.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
YES, YES, NO
References:
https://www.varonis.com/blog/ntfs-permissions-vs-share/
http://www.ntfs.com/ntfs-permissions-file-advanced.htm
https://docs.microsoft.com/en-us/windows-server/storage/dfs-namespaces/enable-access-based-enumeration-on

NEW QUESTION 113
- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.
What should you use?

A. Computer Management
B. dsregcmd.exe
C. the Settings app
D. netdom.exe

Answer: C

Explanation:
You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About
References: https://aadguide.azurewebsites.net/aadjoin/

NEW QUESTION 116
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10.
A service named Application1 is configured as shown in the exhibit.

Application1 (Local Computer)

General | Log On | Recovery | Dependencies

Log on as:

○ Local System account
☐ Allow service to interact with desktop

● This account: Service1   [Browse...]
  Password: ••••••••
  Confirm password: ••••••••

[OK] [Cancel] [Apply]
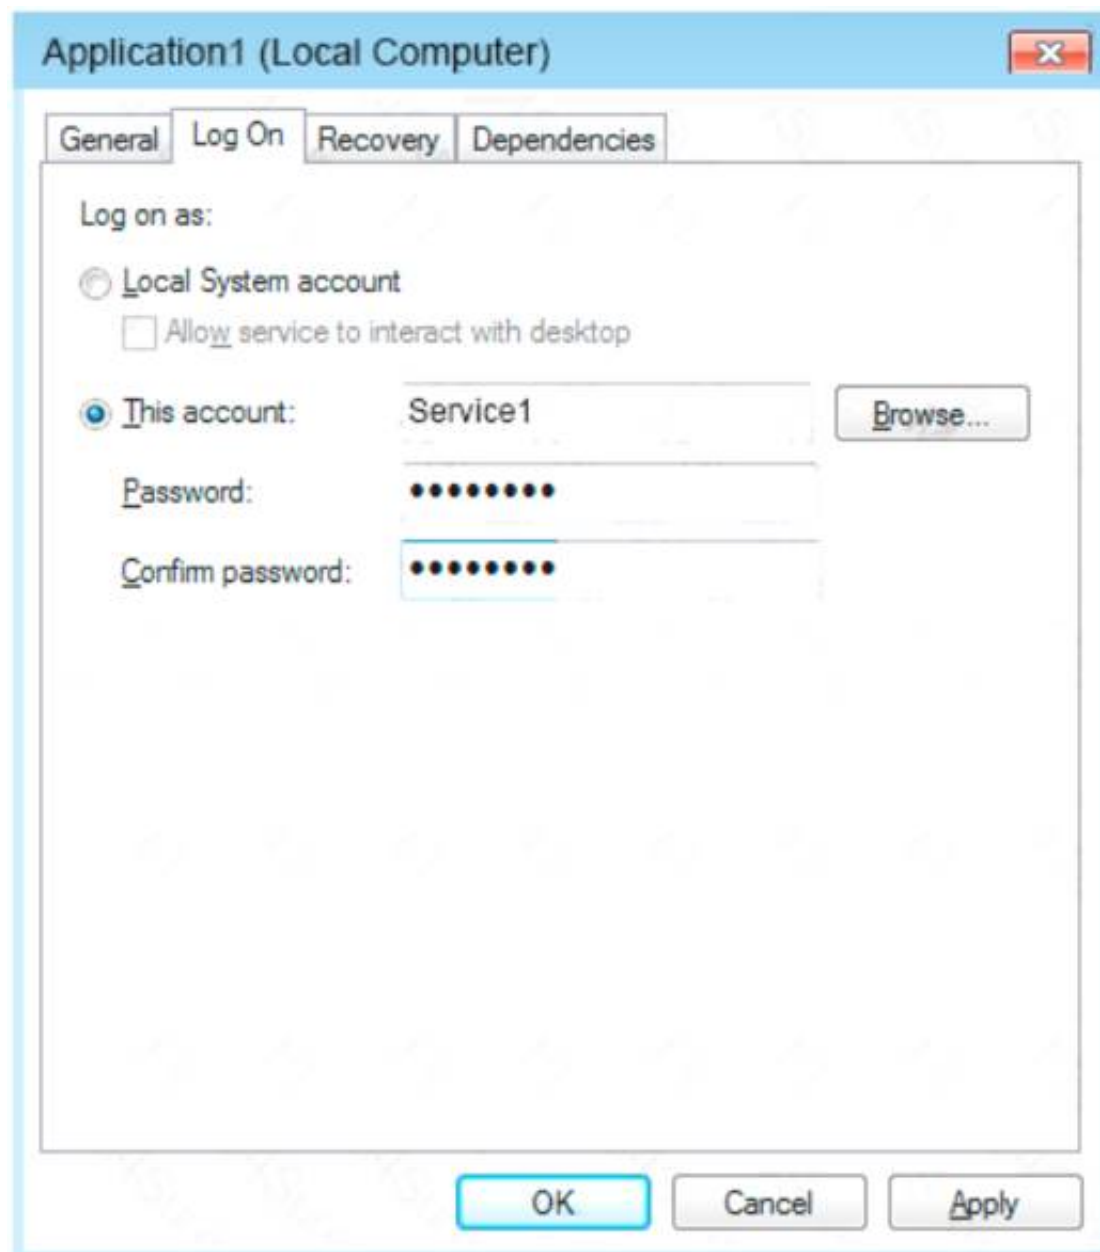

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.
You need to ensure that the identity used by Application1 cannot be used by a user to sign in to sign in to the desktop on Computer1. The solution must use the principle of least privilege.
Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall

NEW QUESTION 117
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3.
You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
* 1. Go to Control Panel -> System and Security -> Windows Firewall.
* 2. Click on the Advanced settings link in the left-hand side.
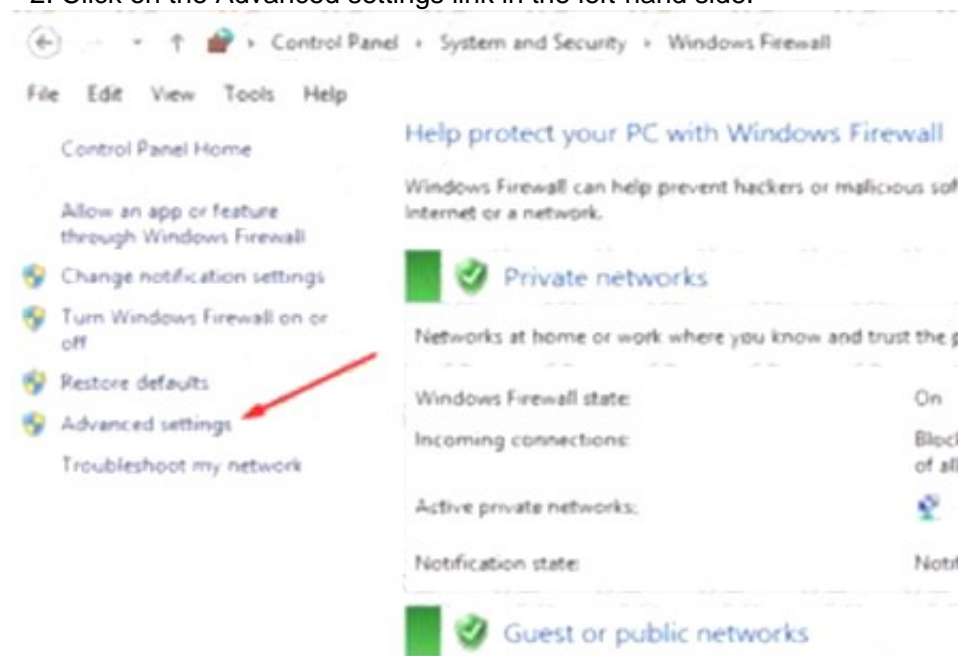

* 3. Enable COM+ Network Access (DCOM-In).

* 4. Enable all the rules in the Remote Event Log Management group.

Tasks	Computers

Client1

Client2

Client3

DC1

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

› Open Server Manager.

› From Tools menu, select Active Directory Users and Computers

› Double click at your domain on the left and then select Builtin.

› Open Remote Desktop Users on the right pane.

› At Members tab, click Add.

› Type the AD users that you want to give Remote access to the RDS Server and click OK.

› After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.
* 1. Open Group Policy Editor. To do that:
* a. Simultaneously press the Windows + R keys to open run command box.

* b. Type gpedit.msc and press Enter.
* 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings >
Local Policies > User Rights Assignment.
* 3. At the right Pane: double click at Allow log on through Remote Desktop Services.
* 4. Click Add User or Group.
* 5. Type remote and then click Check Names.
* 6. Select the Remote Desktop Users and click OK.
* 7. Click OK at 'Select users, computers…' window.
* 8. Finally click OK again and close Group Policy Editor.

NEW QUESTION 121
- (Exam Topic 4)
A user has a computer that runs Windows 10.
When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.
You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix  . :
Description . . . . . . . . . . : Ethernet 1
Physical Address. . . . . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . . . . . . : Yes
Autoconfiguration Enabled . . . : Yes
Link-local IPv6 Address . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . . . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . . . . . . : 255.255.255.0
Lease Obtained. . . . . . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . . . . : 192.168.0.1
DHCP Server . . . . . . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . . . . . . : 536891574
DHCPv6 Client DUID. . . . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . . . . . . : 131.107.10.60
                                  192.168.0.3
NetBIOS over Tcpip. . . . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

A. the DNS servers
B. the IPv4 address
C. the subnet mask
D. the default gateway address

Answer: A

NEW QUESTION 125
- (Exam Topic 4)
You have a Windows 10 image that was updated to the latest version of Windows 10. You plan to create a new WinPE bootable ISO file.
You obtain the latest WinPE source files.
You need to create the new ISO file to support PowerShell scripting.
Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Commands

| makewinpemedia |
| copype |
| drvload |
| dism |
| wpeutil |

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Copype Makewinpemedia dism

NEW QUESTION 129
- (Exam Topic 4)
Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

```

NEW QUESTION 132

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains computers that run Windows 10. The computers are configured as shown in the following table.

Name	Version	Organizational unit (OU)
Computer1	1909	Devices/OU1
Computer2	1909	Devices/OU2
Computer3	20H2	Devices/OU2

You have a Group Policy Object (GPO) named GPO1 that has the settings shown in the following exhibit.

A domain administrator links GPO1 to OU2.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Computer1 will install Windows 10, version 2004.	○	○
Computer2 will install Windows 10, version 2004.	○	○
Computer3 will install Windows 10, version 2004.	○	○

A. Mastered
B. Not Mastered

NEW QUESTION 136
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.
Computer1 has apps that are compatible with Windows 10.
You need to perform a Windows 10 in-place upgrade on Computer1.
Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the

NEW QUESTION 141
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 contains the folders shown in the following table.

Name	File system	BitLocker Drive Encryption (BitLocker)
C:\Folder1	NTFS	Disabled
D:\Folder2	NTFS	Enabled
E:\Folder3	FAT32	Disabled

You include Folder1, Folder2, and Folder3 in the Documents library.
You configure File History to run every 15 minutes, and then turn on File History.
For each of the following statements, select Yes if the statement in true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Folder1 is protected by File History.	O	O
Folder2 is protected by File History.	O	O
Folder3 is protected by File History.	O	O

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Folder1 is protected by File History.	O	O
Folder2 is protected by File History.	O	O
Folder3 is protected by File History.	O	O

NEW QUESTION 146
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.
You need to protect a folder named D:\Folder1 by using File History. What should you do?

A. From File Explorer, modify the Security settings of D:\Folder1
B. From File Explorer, add D:\Folder1 to the Documents library
C. From the Settings app, configure the Recovery settings
D. From File History in Control Panel, configure the Select drive settings

Answer: B

NEW QUESTION 149
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.
The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer1 has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.
Which two users can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. User1
B. User2
C. User3
D. User4
E. User5

Answer: DE

NEW QUESTION 154
- (Exam Topic 4)
You have a computer that runs Windows 10 Home.
You need to upgrade the computer to Windows 10 Enterprise as quickly as possible. The solution must retain the user settings.
What should you do first?

A. Run the scanscace command.
B. Perform an in-place upgrade to Windows Pro.
C. Install the latest feature updates.
D. Run the sysprep command.

Answer: B

Explanation:

References:
https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths

NEW QUESTION 158
- (Exam Topic 4)
Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.
The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.
You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

A. From the Settings app, modify the Delivery Optimizations settings.
B. Configure the network connections as metered connections.
C. Configure the computers to use BranchCache in hosted cache mode.
D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache

NEW QUESTION 162
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.
User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer.
Use User3's credentials instead. References:
https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g

NEW QUESTION 167
- (Exam Topic 4)
A user has a computer that runs Windows 10.The user has access to the following storage locations:
≫ A USB flash drive
≫ Microsoft OneDrive
≫ OneDrive for Business
≫ A drive mapped to network share
≫ A secondary partition on the system drive
You need to configure Back up using File History from the Settings app.
Which two storage locations can you select by using File History? Each correct answer presents complete solution.
NOTE: Each correct selection is worth one point.

A. OneDrive for Business
B. OneDrive
C. the USB flash drive
D. the secondary partition on the system drive
E. the drive mapped to a network share

Answer: CE

NEW QUESTION 168
- (Exam Topic 4)
You need to create a virtual machines shown in the following table:

Name	Operating system	Requirement
VM1	64-bit version of Windows 8.1 Pro	Start from a floppy disk.
VM2	32-bit version of Windows 10 Pro	Start from the network.
VM3	64-bit version of Windows 10 Pro	Start from an SCSI VHD.

Which generations should you use for each virtual machine? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

VM1:
- Generation 1 only
- Generation 2 only
- Generation 1 or generation 2

VM2:
- Generation 1 only
- Generation 2 only
- Generation 1 or generation 2

VM3:
- Generation 1 only
- Generation 2 only
- Generation 1 or generation 2

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 171
- (Exam Topic 4)
You have a Microsoft 365 Enterprise E3 license.
You have a computer named Computer1 that runs Windows 10.
You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

A. Sync your settings in the Settings app
B. the File Explorer desktop app
C. the Microsoft OneDrive desktop app
D. Default apps in the Settings app

Answer: C

NEW QUESTION 173
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a laptop named Computer1 that runs Windows 10.
When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.
Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type netsh wlan show profiles in the Command Prompt to manage and delete wireless
network profiles.
References:
https://kb.netgear.com/29889/How-to-delete-a-wireless-network-profile-in-Windows-10

NEW QUESTION 176
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10 and has an application named App1. You need to use Performance Monitor to collect data about the processor utilization of App1. Which performance object should you monitor?

A. Process
B. Processor Performance
C. Processor Information
D. Processor

Answer: A

Explanation:
References:
https://www.cse.wustl.edu/~jain/cse567-06/ftp/os_monitors/index.html

NEW QUESTION 179
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.
You sign in to Computer1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.
References:
https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power

NEW QUESTION 180
- (Exam Topic 4)
Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All

computers in the domain run Windows 10 Enterprise.
You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.
Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.
Reference:
https://support.microsoft.com/en-us/help/17128/windows-8-file-history

NEW QUESTION 182
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10.
You test Windows updates on Computer1 before you make the updates available to other users at your company.
You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.
Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
 References:
https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win

NEW QUESTION 186
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.
Computer1 has apps that are compatible with Windows 10.
You need to perform a Windows 10 in-place upgrade on Computer1.
Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Use Microsoft Deployment Toolkit (MDT) instead.

NEW QUESTION 187
- (Exam Topic 4)
You have a computer that runs Windows 10. A feature update is installed automatically. You need to roll back the feature update.
Up to how many days after the feature update is installed can you roll back the installation, and what should you use to perform the roll back? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

To roll back the feature update, use:

Go back to the previous version of Windows 10
Reset this PC option
Uninstall an update in Control Panel

The rollback can be performed up to:

7 days after
10 days after
35 days after

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Table Description automatically generated

NEW QUESTION 189
- (Exam Topic 4)
You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files.
You need to restore the corrupt system files. Which command should you run?

A. scanstate
B. sfc
C. chlcdslc
D. chkntfs

Answer: B

Explanation:
References:
https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-syste

NEW QUESTION 194
- (Exam Topic 4)
You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues.
You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

A. In Windows Administrative Tools, open Performance Monitor
B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
C. In Windows Administrative Tools, open Resource Monitor
D. In the Setting ap
E. open Update and Security Then open Windows Security and select Firewall and Network protection

Answer: C

NEW QUESTION 199
- (Exam Topic 4)
You have a computer that runs Windows 10 and is joined to Azure Active Directory (Azure AD). You attempt to open Control Panel and receive the error message shown on the following exhibit.
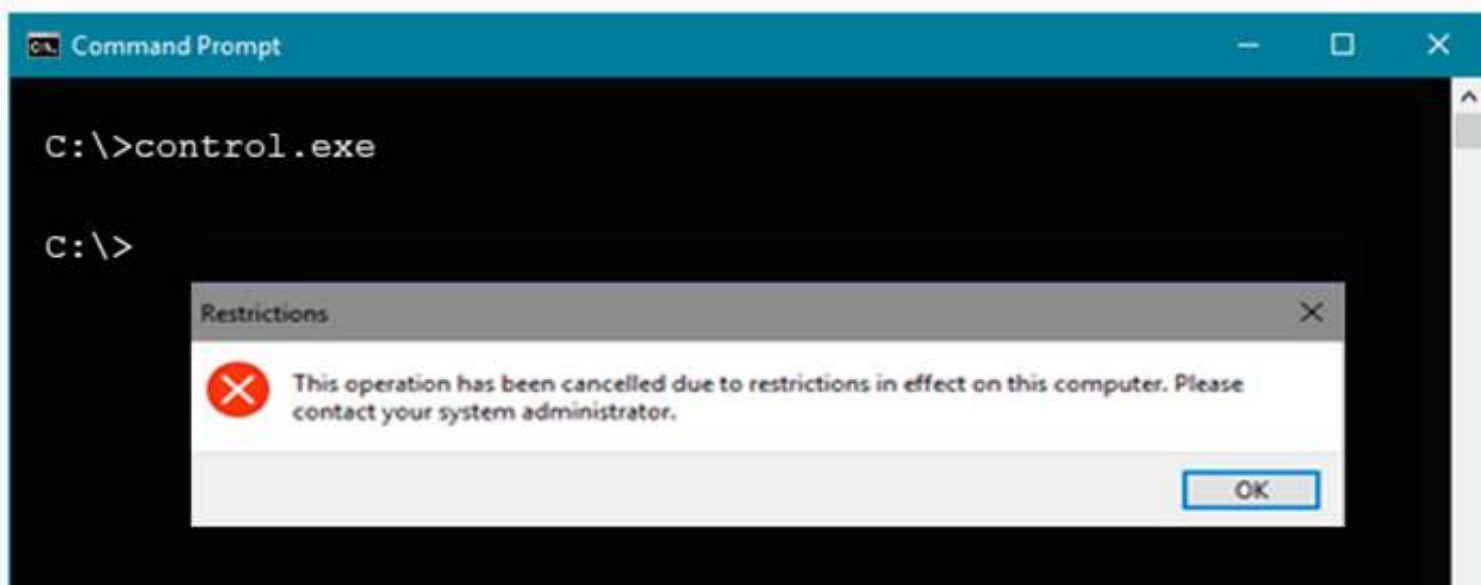

You need to be able to access Control Panel.
What should you modify?

A. the PowerShell execution policy
B. the Local Group Policy
C. the Settings app
D. a Group policy preference

Answer: B

Explanation:

References:
https://windows10skill.com/this-operation-has-been-cancelled-due-to-restrictions-in-effect-on-this-pc/

NEW QUESTION 204
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You deploy Windows 10 to a computer named Computer1.
Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.
You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.
Reference:
https://support.microsoft.com/en-za/help/17128/windows-8-file-history

NEW QUESTION 206
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Admins
User2	Backup Operators

The domain contains a computer named Computer1. Computer1 contains the users shown in the following table.

Name	Member of
User3	Administrators
User4	Users

On Computer1, you create a restore point named RP1.
Which users can restore RP1 on Computer1? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Can restore RP1 on Computer1 while Windows is running:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

Can restore RP1 if Computer1 restarts by using Advanced startup:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
Reference:

NEW QUESTION 209
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.
You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).
You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

A. From PowerShel
B. run the Gec-GPO cmdlet.
C. From PowerShel
D. run the Gec-GPOReporc cmdlet.
E. From Microsoft Edge, open edge://policy.
F. From Microsoft Edge, open edge://settings.

Answer: C

Explanation:
The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.
To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.

NEW QUESTION 211
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Backup Operators, Users
User2	Device Owners, Users
User3	Users

The Users group has Modify permissions to a folder named D:\Folder1. User3 creates a file named File1.docx in Folder1.
Which users can take ownership of File1.docx?

A. Administrator and User1 only
B. Administrator only
C. Administrator, User1, and User2
D. Administrator and User2 only

Answer: B

Explanation:
Only a member of the Administrator's group can take ownership of a file or folder.

NEW QUESTION 214
- (Exam Topic 4)
You have the computer shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Pro	Preview Build - Fast
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Long-term

You plan to configure deployment rings for Windows 10 quality and feature updates.
What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Maximum number of days you can defer
installing quality updates:

| 7 days |
| 30 days |
| 180 days |
| 365 days |

Computers that support installing feature
updates from Windows Update:

| Computer1 only |
| Computer2 only |
| Computer3 only |
| Computer1 and Computer2 only |
| Computer1, Computer2, and Computer3 |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 218
- (Exam Topic 4)
You have a computer that runs Windows 10. The computer contains two local user accounts named User1 and User2. User2 is a member of the local Administrators group.
User1 performs the actions shown in the following table.

Time	Name	Action
9:00 AM	C:\Users\User1\Documents\File1.docx	Create a file.
9:01 AM	D:\Folder1\File2.txt	Create a file.
10:10 AM	C:\Users\User1\Documents\File1.docx	Save the file.
10:14 AM	D:\Folder1\File2.txt	Save the file.
10:19 AM	D:\Folder1\File2.txt	Save the file.
10:25 AM	D:\Folder1\File2.txt	Save the file.

User2 performs the actions shown in the following table.

Time	Action
9:49 AM	Sign in.
9:50 AM	Add D:\Folder1 to the Documents library.
10:00 AM	Turn on File History and configure File History to save copies of files every 20 minutes.
10:05 AM	Create a restore point.
10:06 AM	Sign out.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can use File History to restore File1.docx to the contents contained in the file at 10:05 AM.	○	○
User1 can use File History to restore File2.txt to the contents contained in the file at 10:15 AM.	○	○
User1 can use File History to restore File2.txt to the contents contained in the file at 10:20 AM.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION 220
- (Exam Topic 4)
You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune.
You need to recommend a solution for help desk administrators that meets the following requirements:

> The administrators must assist users remotely by connecting to each user's computer.

> The remote connections must be initiated by the administrators. The users must approve the connection.

> Both the users and the administrators must be able to see the screen of the users' computer.

> The administrators must be able to make changes that require running applications as a member of each computer's Administrators group.
Which tool should you include in the recommendation?

A. Remote Desktop
B. Intune
C. Remote Assistance
D. Quick Assist

Answer: B

Explanation:
