Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks. You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 2

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

▼

/Image:

▼

/Add-Package /PackagePath:"E:\x64\langpacks\Microsoft-Windows-Client-Language-Pack_x64_fr-fr.cab"

Add-WindowsCapability
Add-WindowsFeature
Dism.exe
Setup.exe

"C:\Mount"
"C:\Mount\Windows"
"C:\Windows"
"D:\Folder1\Image1.wim"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 3

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:

References:

NEW QUESTION 4

- (Exam Topic 4)

Your company purchases 20 laptops that use a new hardware platform. In a test environment, you deploy Windows 10 to the new laptops. Some laptops frequently generate stop errors.

You need to identify the cause of the issue. What should you use?

- A. Reliability Monitor
- B. Task Manager
- C. System Configuration
- D. Performance Monitor

Answer: A

Explanation:

NEW QUESTION 5

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 6

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 7

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks

Computers

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Start button, then select Settings > Update & Security > Windows Update.
- Under Update settings, select Advanced options.
- From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference: <https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 8

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

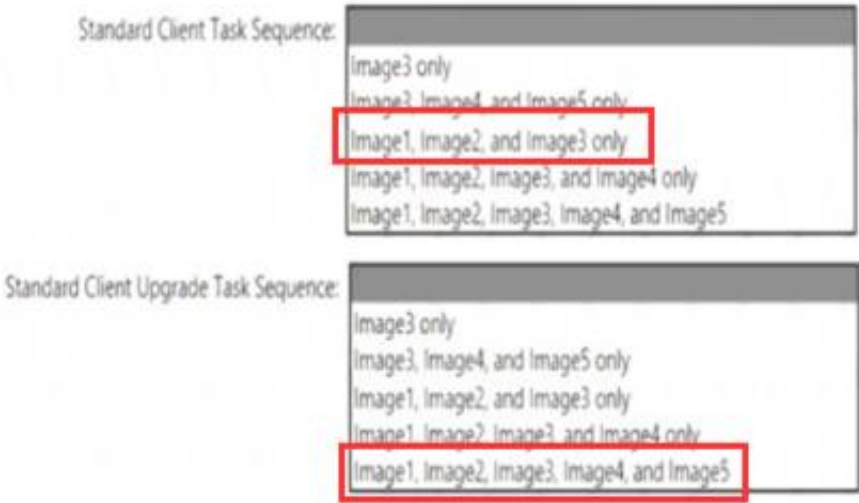

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 9

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 10

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

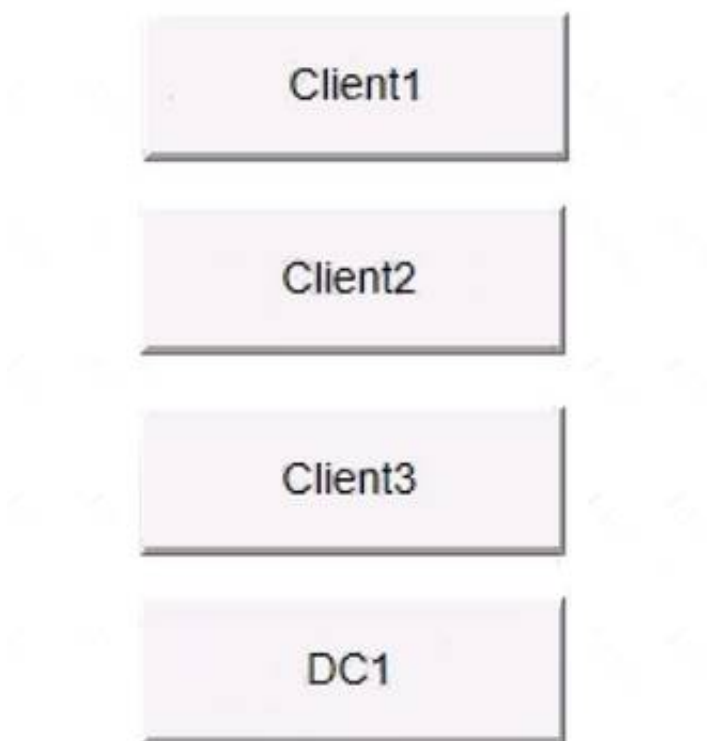

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- After creating File1.txt in Folder1, right-click the file and select Properties.
- Access the Security tab, click Disable inheritance
- Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- Click OK
- Back on the Security tab select Edit to change permissions.
- Click Add, then enter User1 in the Enter the object names to select section.
- Click Check Names, and then click OK.
- Check only the Read box in the Allow column.
- Click apply, Ok, and OK

NEW QUESTION 10

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com that uses Key Management Service (KMS) for activation.

You deploy a computer that runs Windows 10 to the domain. The computer fails to activate.

You suspect that the activation server has an issue. You need to identify which server hosts KMS.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 12

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators.

What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as User2 and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

Answer: B

Explanation:

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

NEW QUESTION 14

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event: ➤ Log: System

- Source: Kernel-General
- Event ID: 16

You need to modify the settings of Action1. What should you use?

- A. the Settings app
- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

Answer: C

Explanation:

An Event Viewer task is created and modified in Event Viewer. References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 19

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will

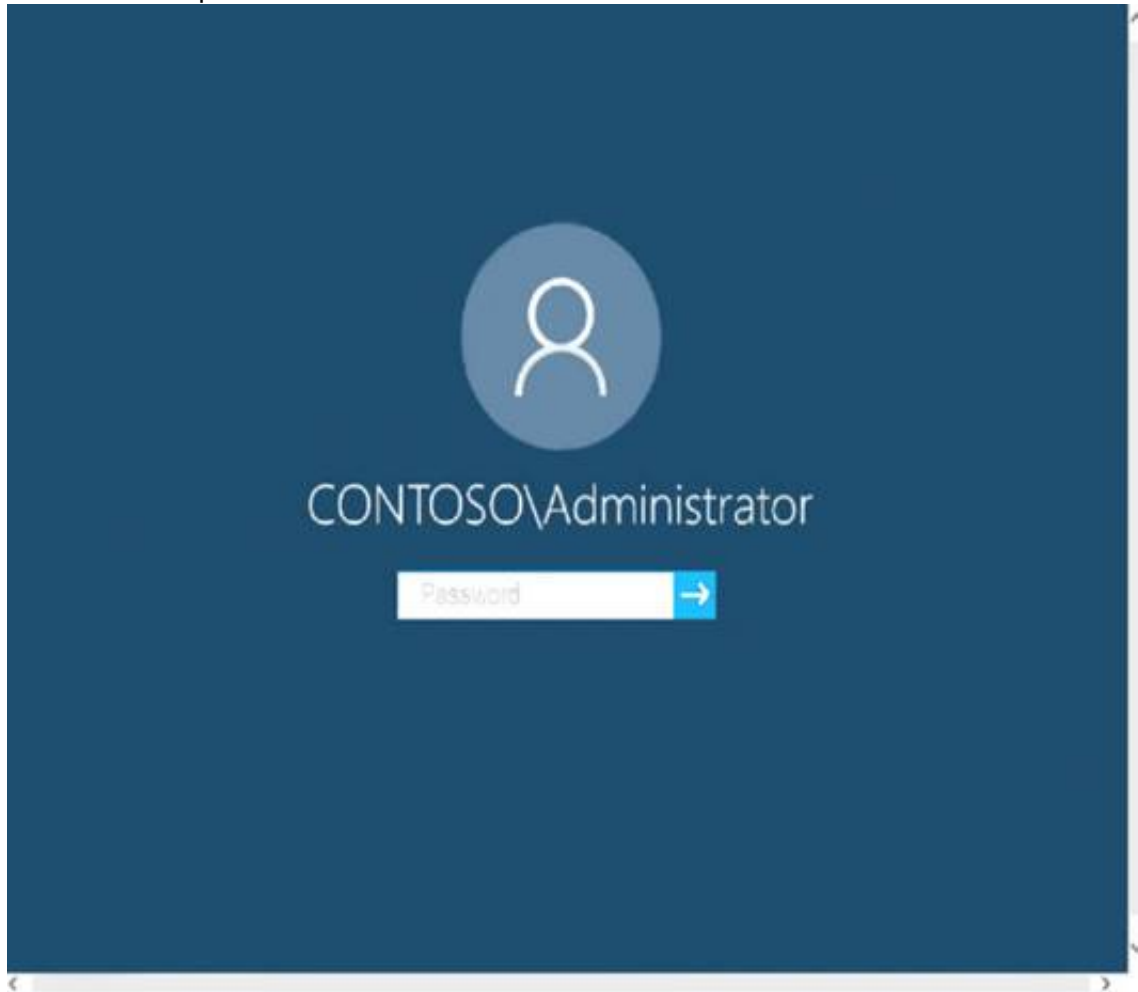

be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

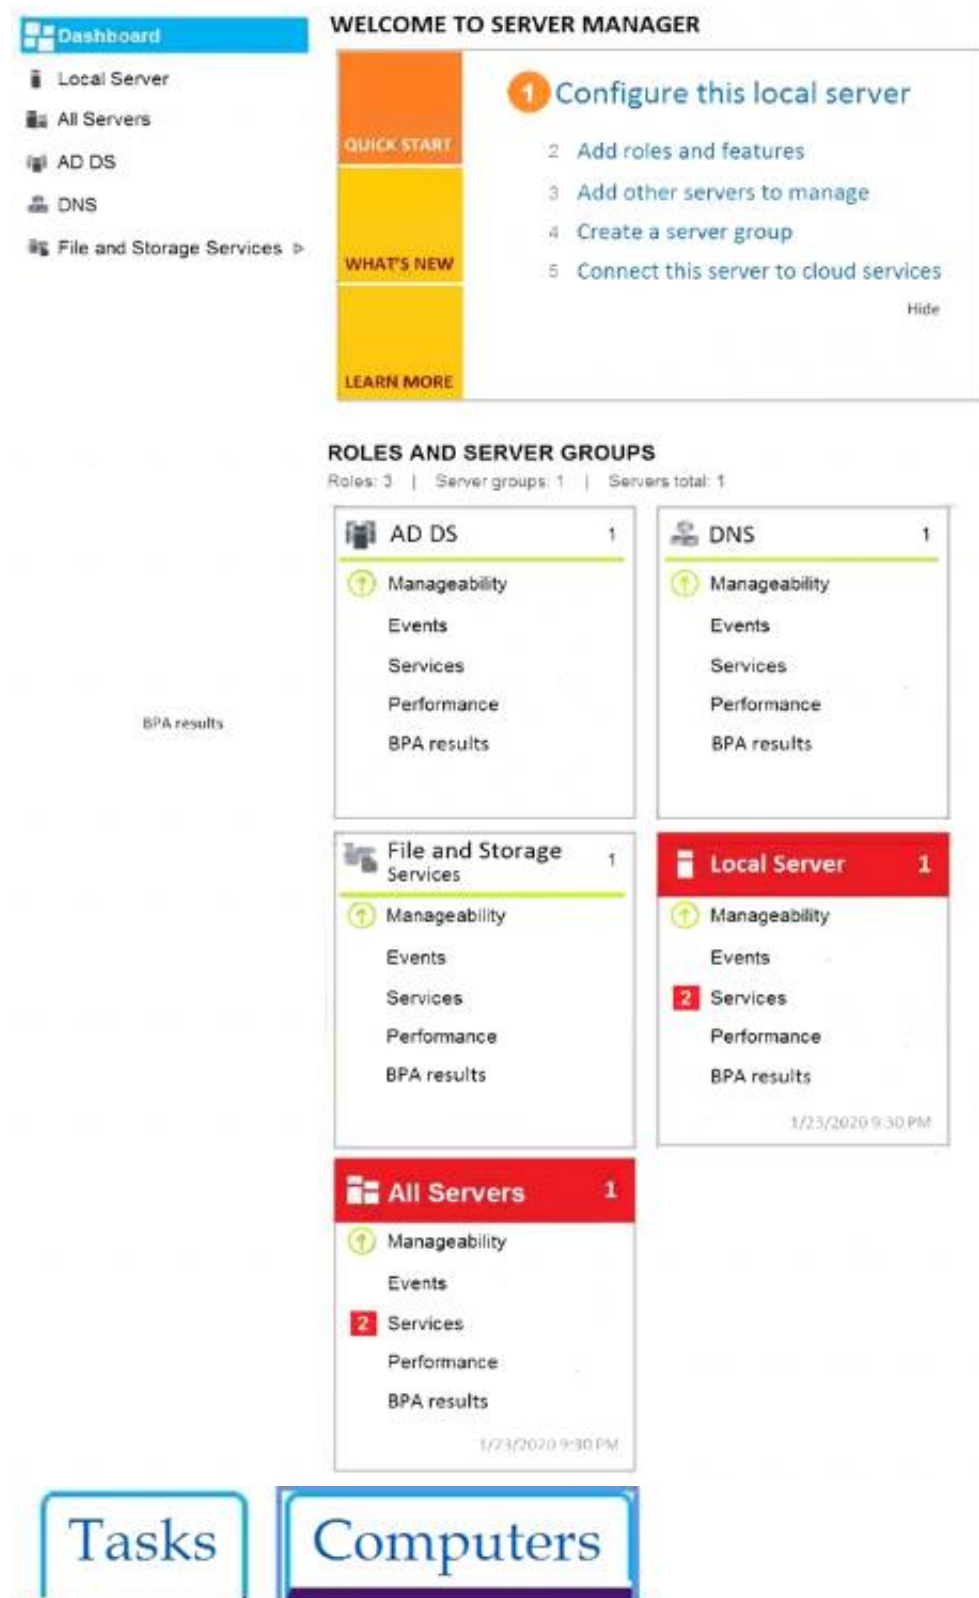

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.

- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

<https://www.windowscentral.com/how-take-ownership-files-and-folders-windows-10> <https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

NEW QUESTION 21

- (Exam Topic 4)

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

What should you do?

- A. From Network & Internet in the Settings app, set a data limit.
- B. From Accounts in the Settings app, turn off Sync settings.
- C. From Network & Internet in the Settings app, set the network connections as metered connections.
- D. From Update & Security in the Settings app, pause updates.

Answer: D

NEW QUESTION 26

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

NEW QUESTION 28

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting

- C. Get-WindowsUpdateLog
- D. Get-WinEvent

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

NEW QUESTION 31

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released. From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 34

- (Exam Topic 4)

You have a computer that runs Windows 8.1. You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

NEW QUESTION 39

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.
 New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser?view=powershell-5.1>

NEW QUESTION 44

- (Exam Topic 4)

Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2

Computer contains the shared folders shown in the following table.

Name	Path	Access-based enumeration
Share1\$	D:\Folder1	Disabled
Share2	D:\Folder2	Enabled

The shared folders have the permissions shown in the following table.

Name	Security permission	Sharing permission
Share1\$	Group1: Read Group2: Full control	Everyone: Read Group2: Full control
Share2	Group2: Full control	Everyone: Read Group2: Full control

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to \\Computer1, Share1\$ is visible.	<input type="radio"/>	<input type="radio"/>
When User2 connects to \\Computer1\Share1\$, the contents of D:\Folder1 are accessible.	<input type="radio"/>	<input type="radio"/>
When User1 connects to \\Computer1\Share2, the contents of D:\Folder2 are accessible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Share1\$ is a hidden share (dollar sign appended) so the share will never be visible. Box 2: Yes

User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.

Box 3: No

User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

NEW QUESTION 46

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, Press Windows+R
- Type lusrmgr.msc
- Right click Groups and click New Group.
- Type in the Group name and a description.
- Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- Click Create and Close.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- Click/tap on the Add User or Group button.

- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

NEW QUESTION 50

- (Exam Topic 3)

On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1, User11, and User13 only
- B. Admin1 only
- C. Admin1, User11, and User12 only
- D. Admin1, User11, User12, and User13
- E. Admin1 and User11 only

Answer: D

NEW QUESTION 52

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 59

- (Exam Topic 1)

You need to recommend a solution to configure the employee VPN connections. What should you include in the recommendation?

- A. Remote Access Management Console
- B. Group Policy Management Console (GPMC)
- C. Connection Manager Administration Kit (CMAK)

D. Microsoft Intune

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-access/vpn/always-on-vpn/deploy/vpn-deploy>

NEW QUESTION 60

- (Exam Topic 1)

An employee reports that she must perform a BitLocker recovery on her laptop. The employee does not have her BitLocker recovery key but does have a Windows 10 desktop computer.

What should you instruct the employee to do from the desktop computer?

- A. Run the manage-bde.exe –status command
- B. From BitLocker Recovery Password Viewer, view the computer object of the laptop
- C. Go to <https://account.activedirectory.windowsazure.com> and view the user account profile
- D. Run the Enable-BitLockerAutoUnlock cmdlet

Answer: C

Explanation:

References:

<https://cedlonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

NEW QUESTION 62

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

NEW QUESTION 65

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer is in a workgroup. The computer is used to provide visitors with access to the Internet.

You need to configure the computer to meet the following requirements:

- Always sign in automatically as User1.
- Start an application named App1.exe at sign-in.

What should you use to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Always sign in automatically as User1:

Group Policy preferences
BCDEdit
Registry Editor
MSConfig

Start an application named App1.exe at sign-in:

Group Policy preferences
BCDEdit
Registry Editor
MSConfig

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<http://www.itexpertmag.com/server/complete-manageability-at-no-extra-cost>

NEW QUESTION 69

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

NEW QUESTION 71

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 11.
You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
- Unused Microsoft OneDrive content
- Non-critical files for Microsoft Defender Antivirus The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all.
You may need to drag the split bar between panes or scroll to view content.

Tools

Cleanup recommendations

Disk Cleanup

Disk Management

Storage Sense

File types

Unused apps: Tool

Unused OneDrive content: Tool

Non-critical files for Microsoft Defender Antivirus: Tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tools

Unused apps: Disk Cleanup

Unused OneDrive content: Disk Management

Non-critical files for Microsoft Defender Antivirus: Cleanup recommendations

NEW QUESTION 74

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile.
You create a taskbar modification file named LayoutModification.xml.
You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

NEW QUESTION 79

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 82

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Service2, and Services
- C. Service2, Service3, and Service6
- D. Services only

Answer: C

Explanation:

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.

Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

NEW QUESTION 84

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows%\BT\Sources\Panther\
- B. Windows\Logs
- C. Windows\Temp
- D. %Windows%\BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlogs>

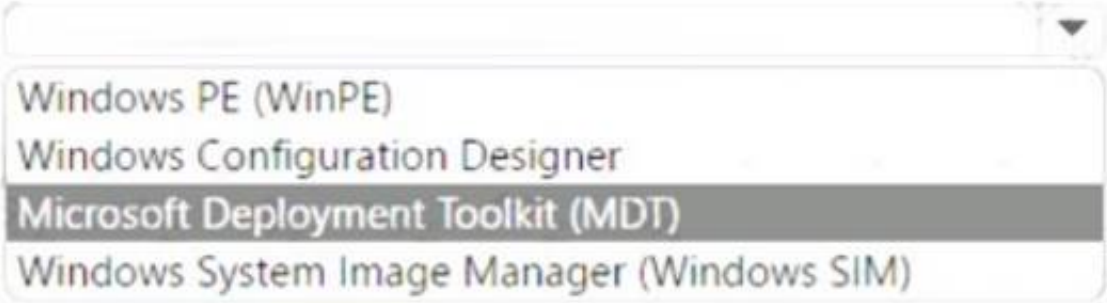

NEW QUESTION 85

- (Exam Topic 4)

You plan to install Windows 10 on a new computer by using an answer file. You need to create the answer file.

Which tool should you use to create the answer file, and which file is required by the tool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to create the answer file: 

File required by the tool: 

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 86

- (Exam Topic 4)
User1 is a member of the Administrators group on a computer that runs Windows 10.
When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run `cacls.exe c:\secretdata /g user1:F`.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

NEW QUESTION 90

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named UserA.

You have two computers named Computer1 and Computer2 that run Windows 10 and are joined to contoso.com.

You need to ensure that UserA can connect to Computer2 from Computer1 by using Remote Desktop. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On Computer1, modify the registry.
- B. On Computer2, modify the registry.
- C. On Computer1, modify the properties of UserA.
- D. On Computer1, enable Remote Desktop.
- E. On Computer2, modify the properties of UserA.
- F. On Computer 2, enable Remote Desktop.
- G. On Computer2, add the Everyone group to the Remote Desktop Users group.
- H. On Computer1, add the Everyone group to the Remote Desktop Users group.

Answer: EFG

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

NEW QUESTION 92

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10.

Name	Member of
Admin1	Network Configuration Operators
Admin2	Power Users
User1	Administrator

User1 joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 94

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2. You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface –InterfaceAlias Interface1 –InterfaceMetric 1 command.
B. Run the Set-NetAdapterBinding –Name Interface2 –Enabled \$true –ComponentID ms_tcpip – ThrottleLimit 0 command.
C. Set a static IP address on Interface 1.
D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:

References: <https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

NEW QUESTION 99

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

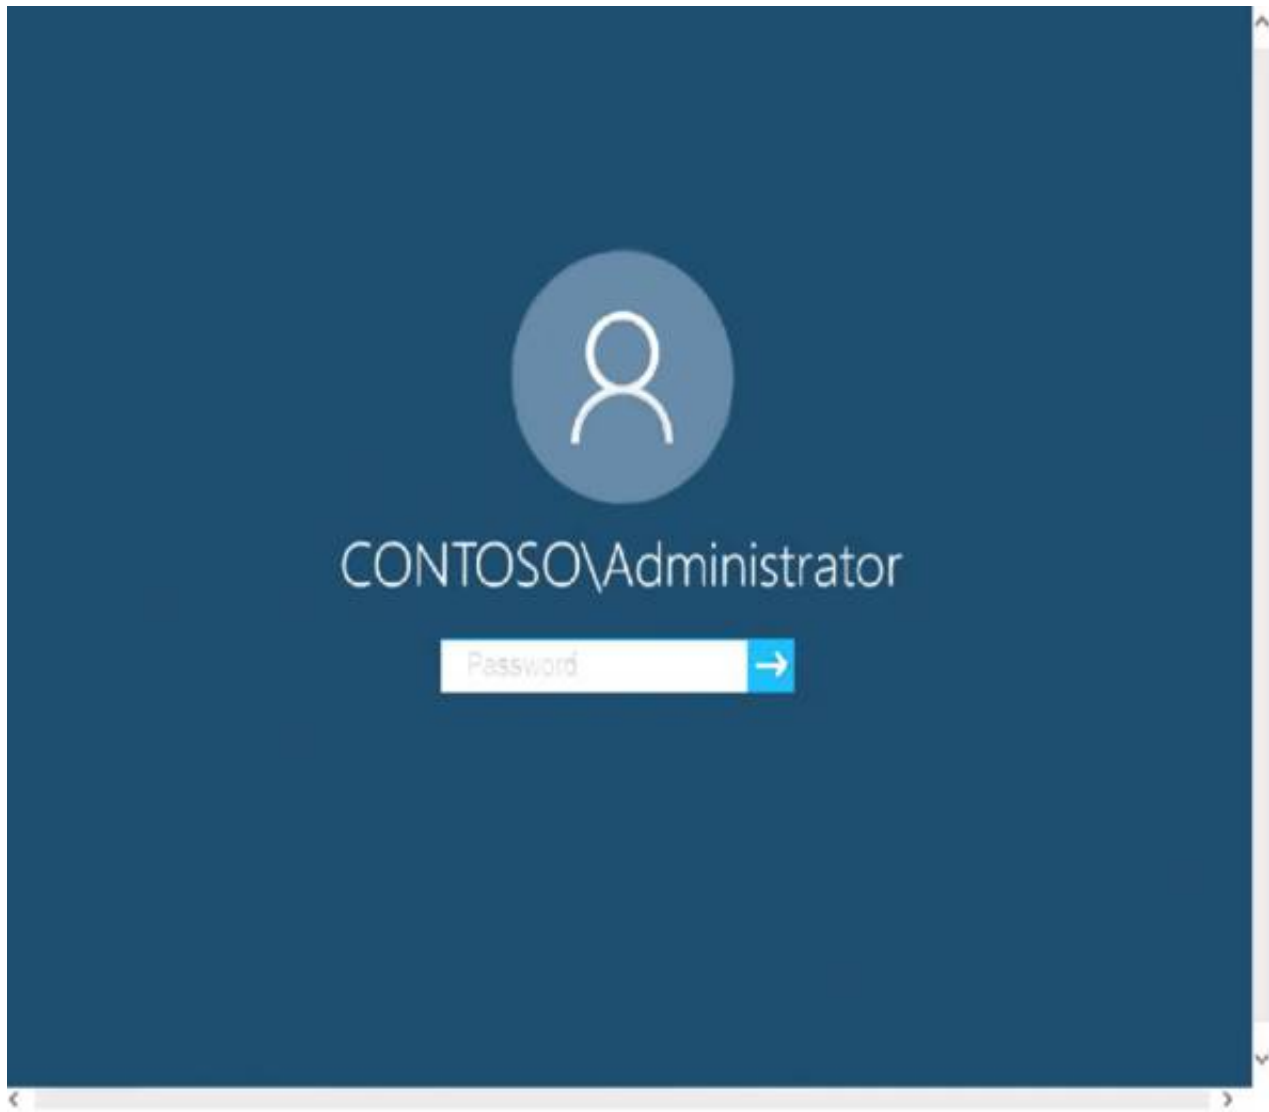

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

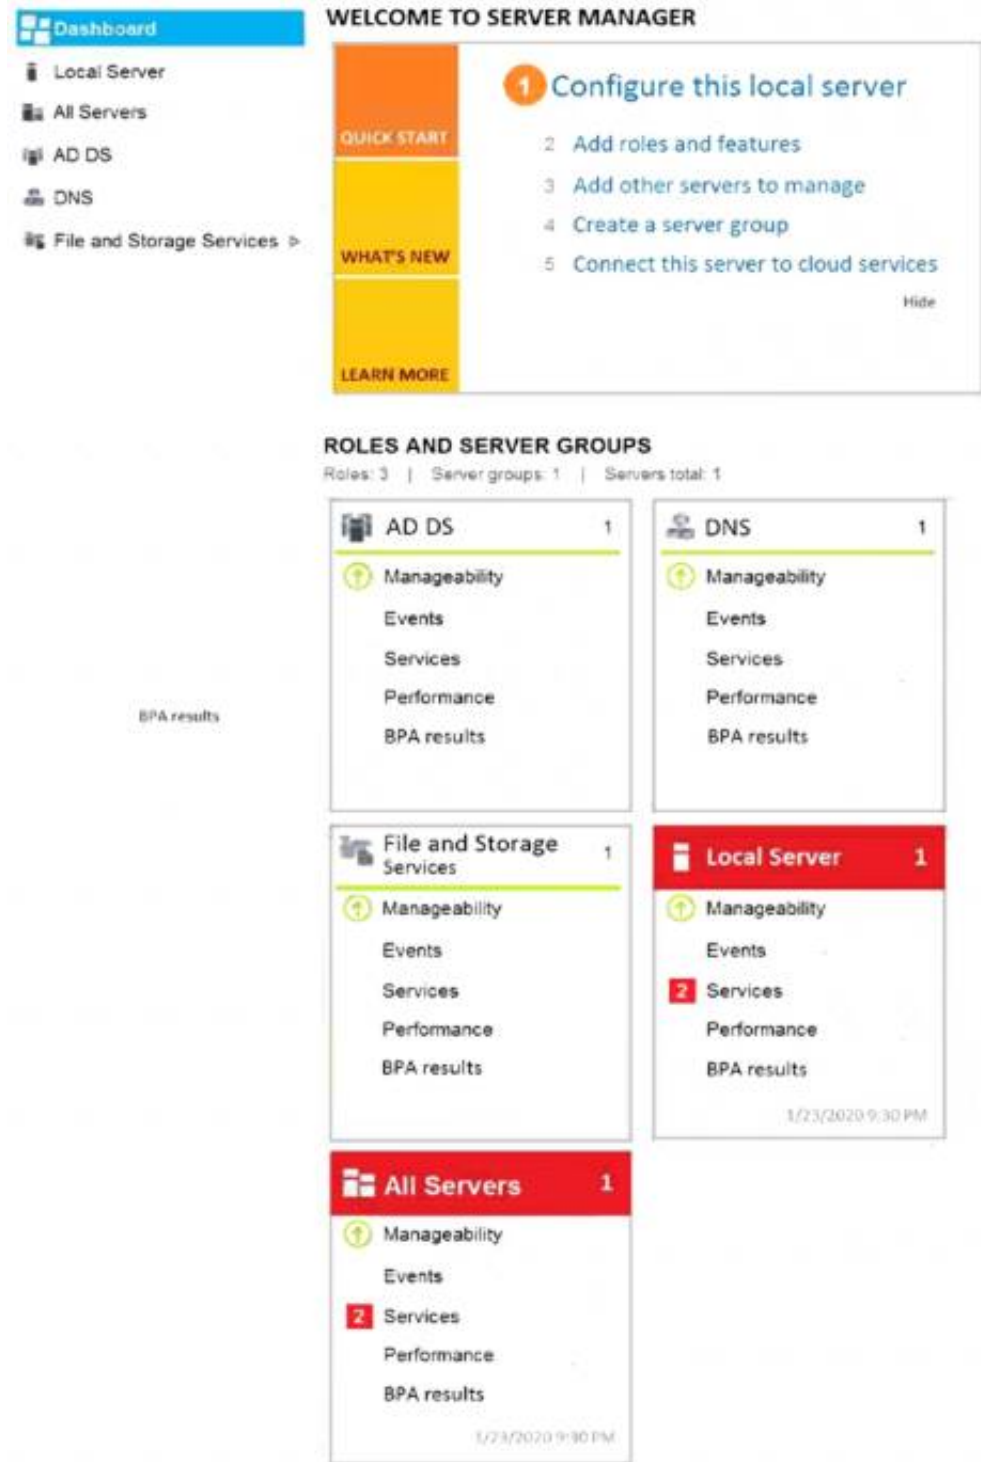

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:
 To enter your password, place your cursor in the Enter password box and click on the password below.
 Username: Contoso/Administrator
 Password: Passw0rd!
 The following information is for technical support purposes only: Lab Instance: 11145882

Tasks Computers

A web service installed on Client1 is used for testing.
 You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To create an inbound port rule

- > In the navigation pane, click Inbound Rules.
- > Click Action, and then click New rule.
- > On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- > On the Program page, click All programs, and then click Next.
- > On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- > On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- > On the Action page, select Allow the connection, and then click Next.
- > On the Profile page, select the network location types to which this rule applies, and then click Next.
- > On the Name page, type a name and description for your rule, and then click Finish.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>
https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers

NEW QUESTION 102

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 106

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to configure User Account Control (UAC) to prompt administrators for their credentials. Which settings should you modify?

- A. Administrators Properties in Local Users and Groups
- B. User Account Control Settings in Control Panel
- C. Security Options in Local Group Policy Editor
- D. User Rights Assignment in Local Group Policy Editor

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 111

- (Exam Topic 4)

You need to Windows 10 to 20 new laptops.

The laptops will be recommend a solution to lock the laptop when the users leave their laptop for an extended period.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the settings app, configure the Dynamic lock settings.
- B. From the Settings app, configure the lock screen settings.
- C. Enable Bluetooth discovery.
- D. From the Settings app, configure the Screen timeout settings
- E. Pair the Android device the laptop.
- F. From Sign-in option, configure the Windows hello settings.

Answer: BE

Explanation:

<https://support.microsoft.com/en-us/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 114

- (Exam Topic 4)

Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users.

None of the new computers are activated.

You need to activate the computers without connecting the network to the Internet. What should you do?

- A. Make use of the Volume Activation Management Tool (VAMT).
- B. Make use of the Key Management Service (KMS).
- C. Make use of the Windows Process Activation Service.
- D. Run the Get-WmiObject -query cmdlet.

Answer: B

Explanation:

You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.

Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

NEW QUESTION 119

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

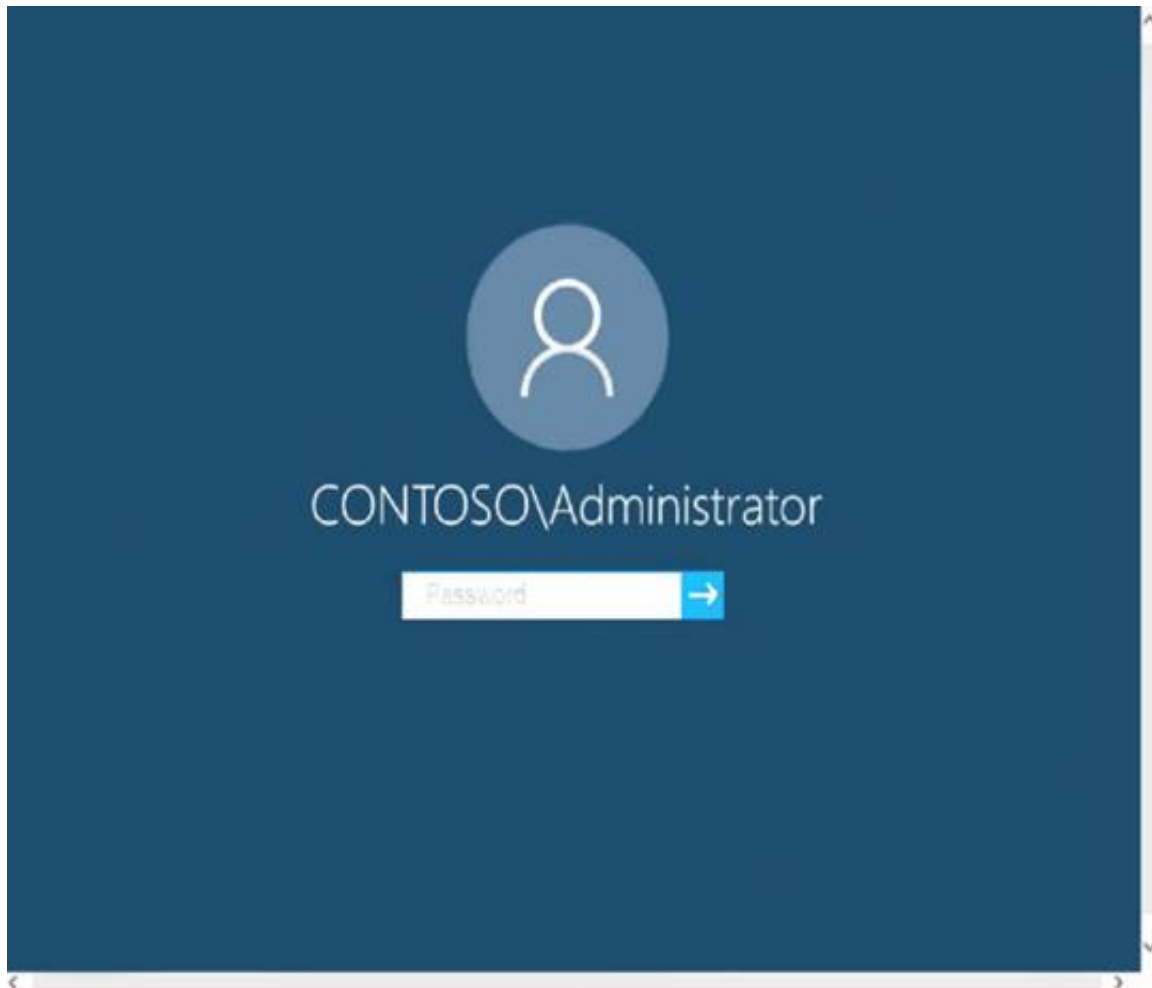

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

You need to ensure that you can successfully ping DC1 from Client3 by using the IP4 address of DC1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > On Client3, press Windows+R to access Run.
- > Type cmd and click OK to access the command prompt.
- > Type ipconfig and press Enter to check that you have a valid IP address.
- > On Client3, press Windows+R to access Run.
- > Type cmd and click OK to access the command prompt.
- > Type "ping" and the IP address of the Domain Controller (e.g. "ping 172.16.1.43").

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Microsoft Edge is configured by using:

▼

a Group Policy object (GPO)
 Microsoft Intune
 the Internet Explorer Administration Kit (IEAK)

The computer is:

▼

enrolled in Microsoft Intune
 managed by using Microsoft System Center Configuration Manager
 joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.

The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:
 VPN1 must connect to a server named vpn.contoso.com.
 Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, click on the Start button and go to settings.
- Select Network & Internet.
- Select VPN on the left-hand side
- Click on the Add a VPN connection button.
- Next, select the VPN provider—This will almost always be Windows (built-in).
- Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).
- Add in your username and password as provided by your IT technician.
- Click Save when done.
- Closeout the PC settings windows.

NEW QUESTION 130

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.
 The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only

- B. Printed and Printer3 only
- C. Printed, Printer2. and Printer3 only
- D. Printed, Printer3, and Printer4 only
- E. Printed, Printer2, Printer3, and Printer4

Answer: E

NEW QUESTION 132

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Commands

dism.exe

cotype.cmd

mount.exe

diskpart.exe

Answer Area

Prepare a WinPE working directory: Command

Mount and unmount a WinPE image: Command

Add scripting support to a WinPE image: Command

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Cotype.cmd Dism.exe Mount.exe

NEW QUESTION 136

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

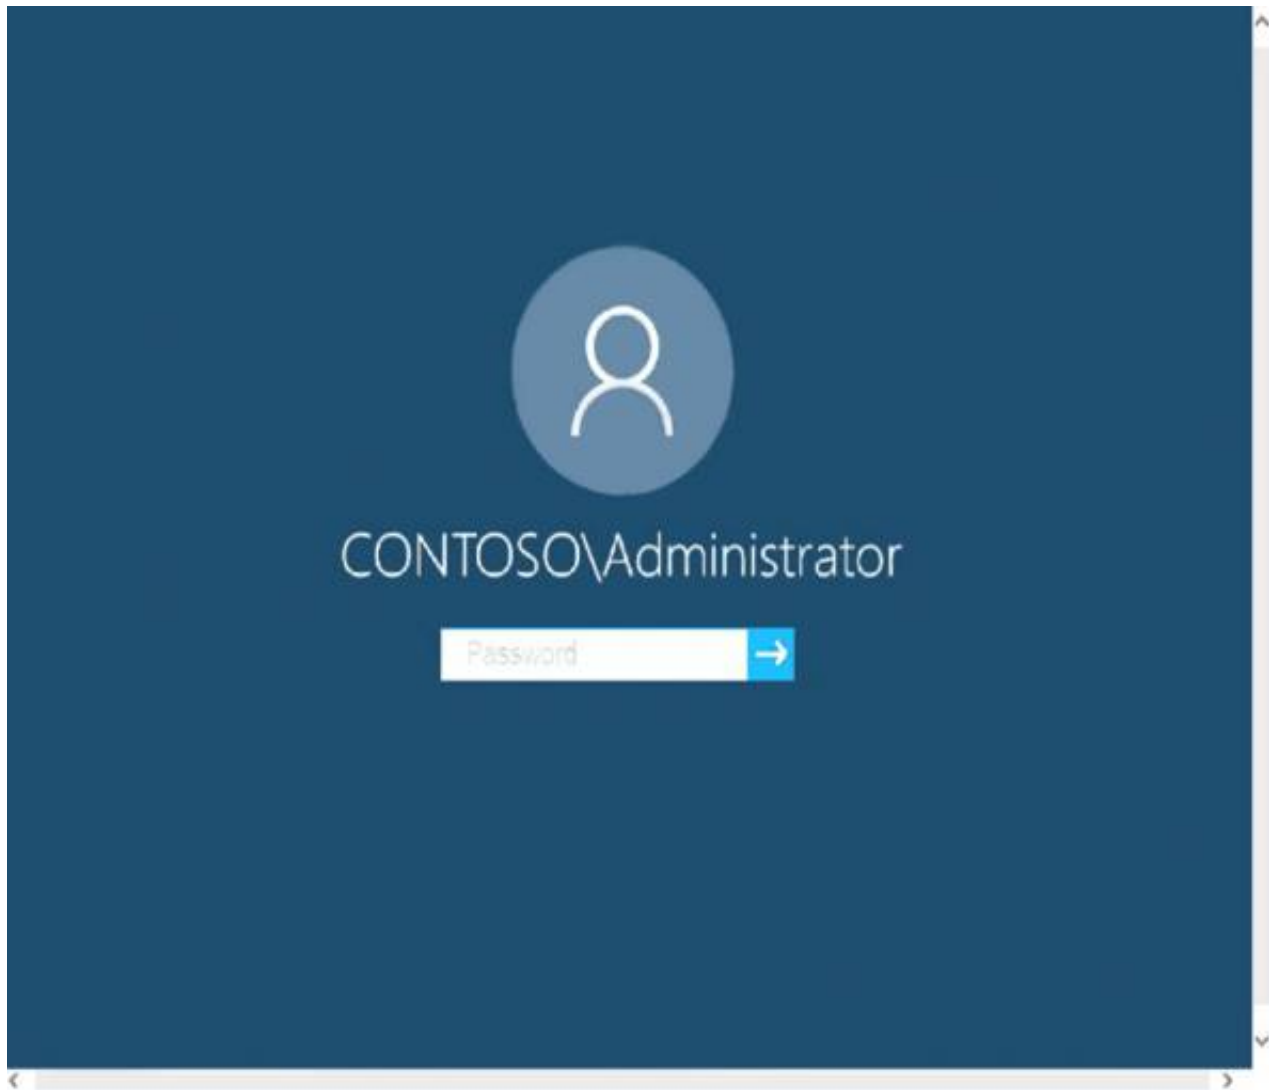

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

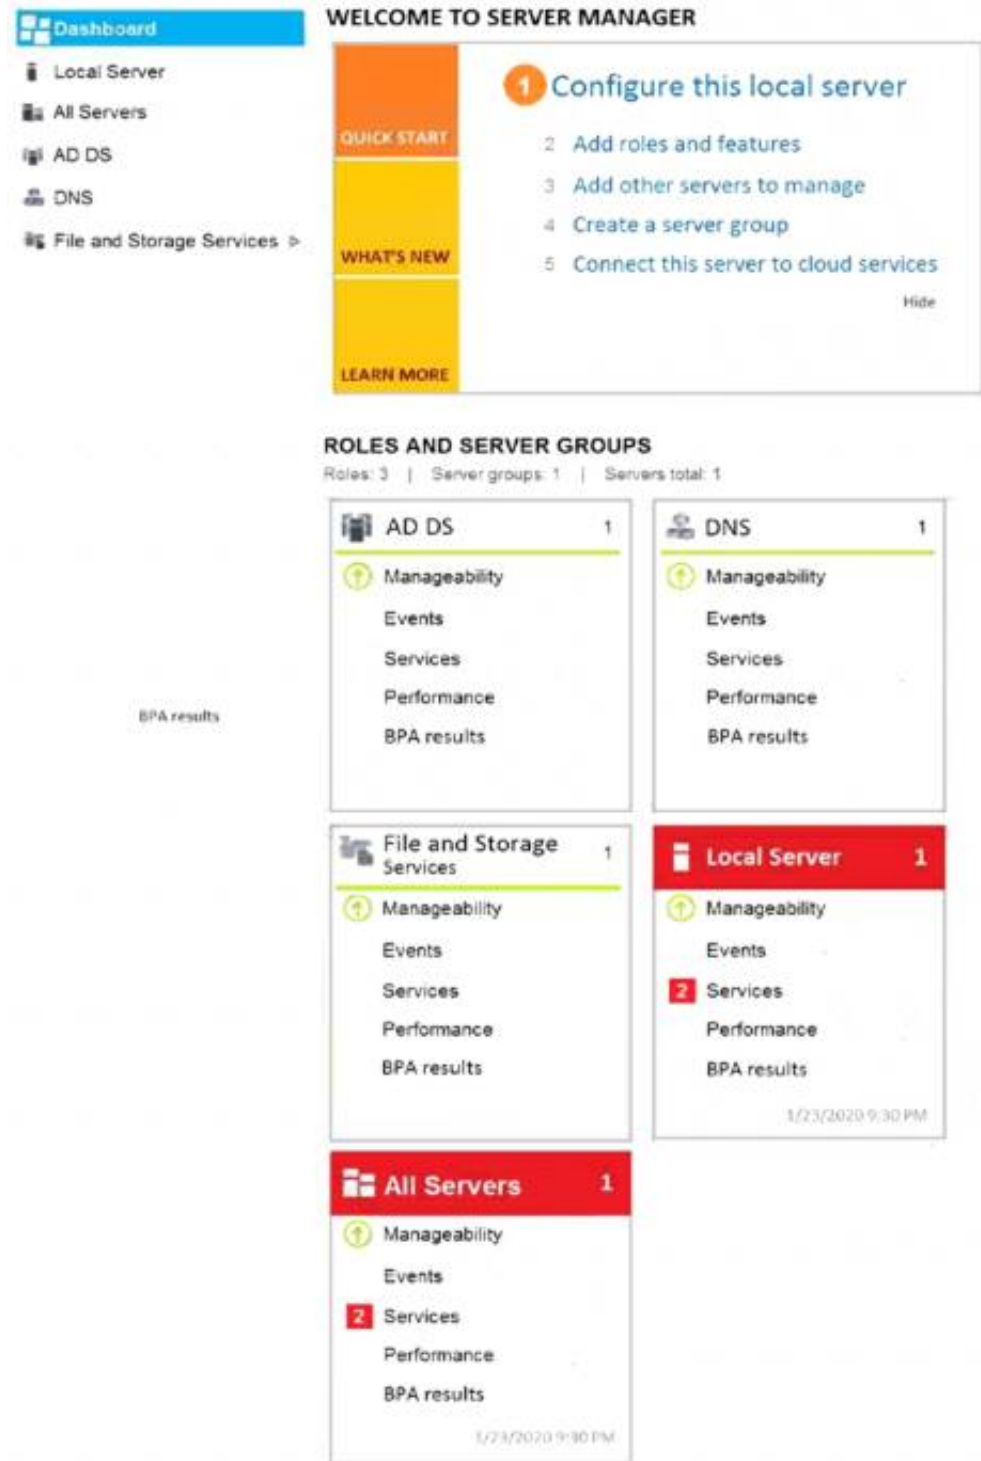

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:
 To enter your password, place your cursor in the Enter password box and click on the password below.
 Username: Contoso/Administrator
 Password: Passw0rd!
 The following information is for technical support purposes only: Lab Instance: 11145882

Tasks Computers

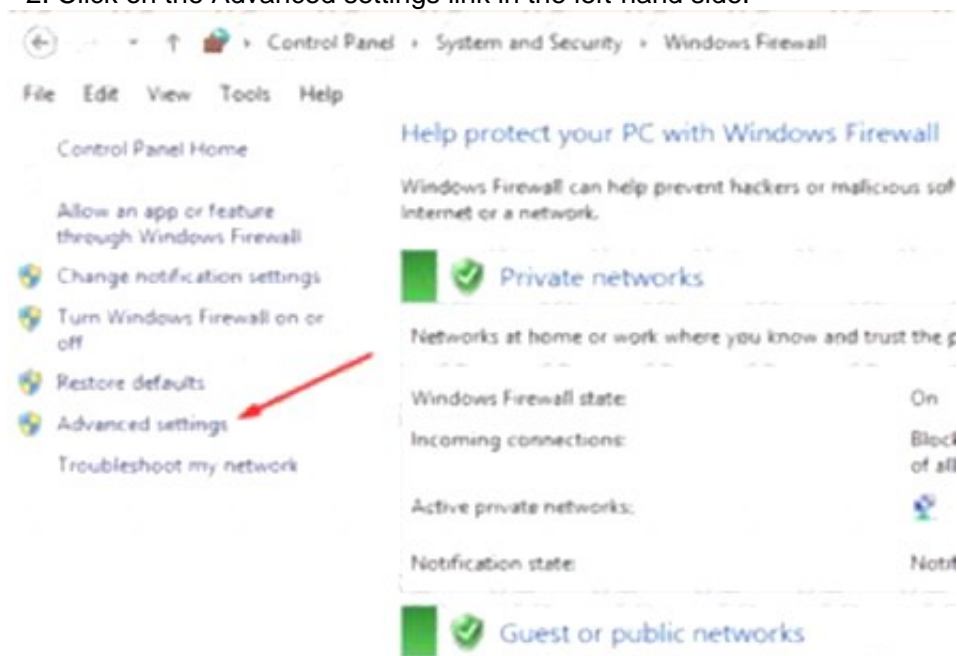

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3. You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Go to Control Panel -> System and Security -> Windows Firewall.
- * 2. Click on the Advanced settings link in the left-hand side.

- * 3. Enable COM+ Network Access (DCOM-In).

- * 4. Enable all the rules in the Remote Event Log Management group.

NEW QUESTION 137

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```

Connection-specific DNS Suffix  . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi. . . . . : Enabled
  
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 140

- (Exam Topic 4)

You have a Windows 10 image that was updated to the latest version of Windows 10. You plan to create a new WinPE bootable ISO file.

You obtain the latest WinPE source files.

You need to create the new ISO file to support PowerShell scripting.

Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Commands

makewinpemedia

cotype

drvload

dism

wpeutil

NEW QUESTION 141

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VMI. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	Not applicable
Base2	VHDX	Fixed size	Not applicable
Disk1	VHD	Dynamically expanding	Not applicable
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	Not applicable
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VMI. You need to identify the following:
 Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VMI is running.

What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only**
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word, website Description automatically generated

NEW QUESTION 145

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 148

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:

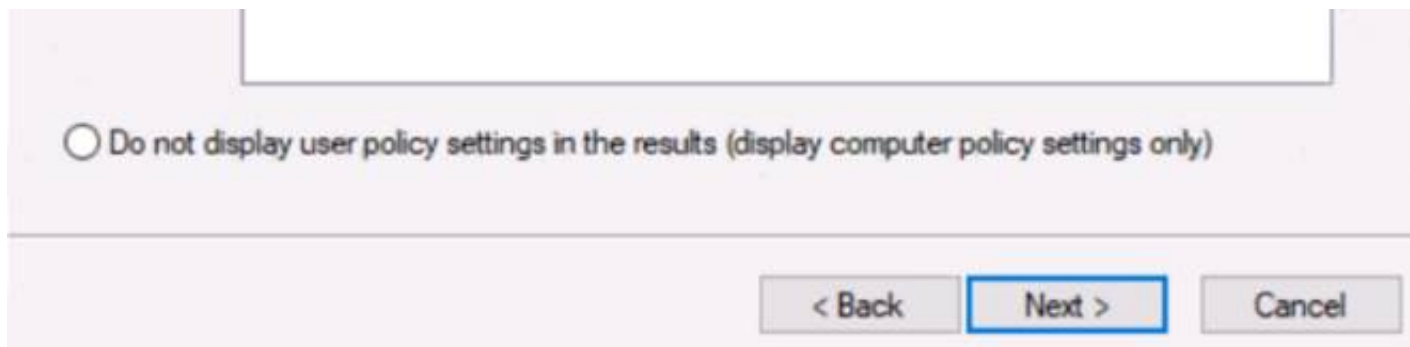

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

NEW QUESTION 153

- (Exam Topic 4)

You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

☐ Do not display user policy settings in the results (display computer policy settings only)

< Back Next > Cancel

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

Answer: D

NEW QUESTION 158

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

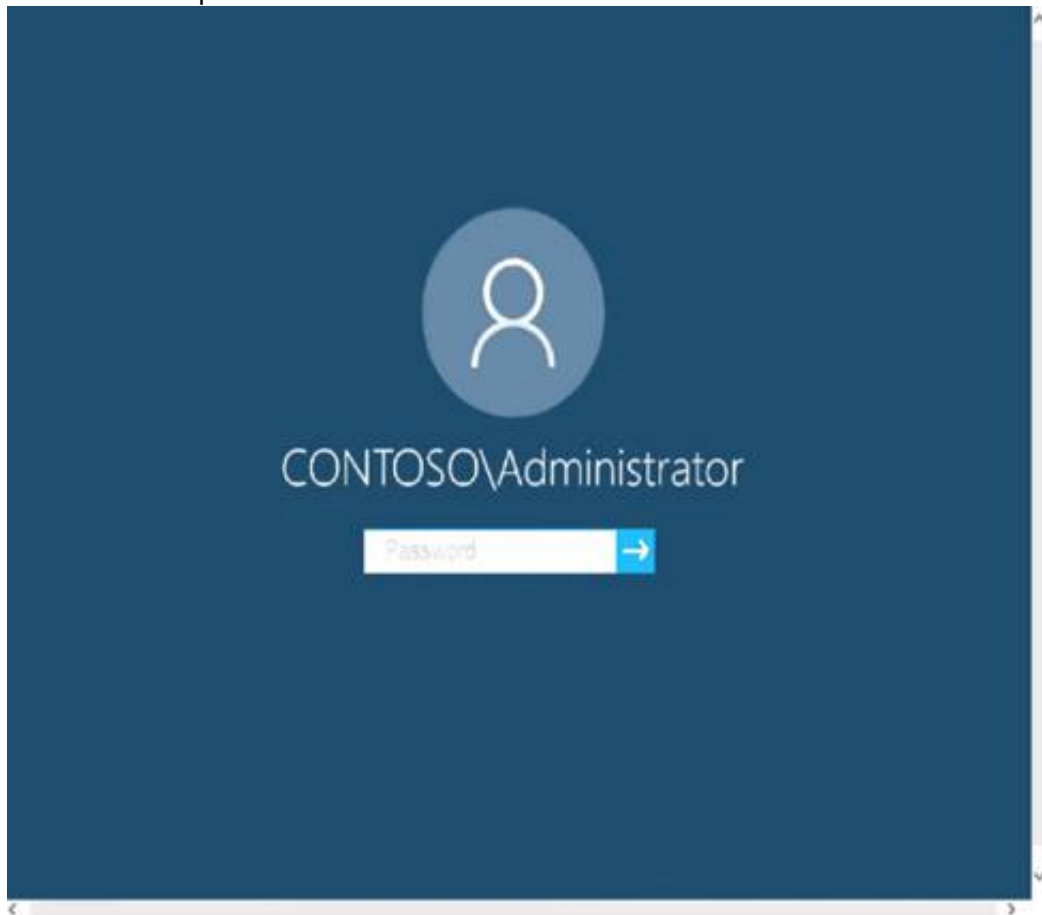

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You have already prepared Client1 for remote management.
 You need to forward all events from the Application event log on Client1 to DC1.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Configuring the event source computer

* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

winrm qc -q

* 2. Start group policy by running the following command:

%SYSTEMROOT%\System32\gpedit.msc

- * 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.
 - * 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.
 - * 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied:
gpupdate /force
Configuring the event collector computer
 - * 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:
winrm qc -q
 - * 2. Run the following command to configure the Event Collector service:
wecutil qc /q
 - * 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:
wecutil cs configurationFile.xml
- Reference:
<https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the>

NEW QUESTION 162

- (Exam Topic 4)

You have a computer that is configured as shown in the following exhibit.

```
C:\Users\user-a>ipconfig /all

Windows IP Configuration

Host Name . . . . . : DESKTOP-8FF1SK7
Primary Dns Suffix . . . . . :
Node Type . . . . . : Hybrid
IP Routing Enabled . . . . . : No
WINS Proxy Enabled . . . . . : No

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . . . . . :
Description . . . . . : Microsoft Hyper-V Network Adapter
Physical Address . . . . . : 00-15-5D-00-04-56
DHCP Enabled . . . . . : Yes
Autoconfiguration Enabled . . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5c1c:443f:c050:1e14%4(Preferred)
Autoconfiguration IPv4 Address . . . . . : 169.254.30.20(Preferred)
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . :
DHCPv6 IAID . . . . . : 50337117
DHCPv6 Client DUID . . . . . : 00-01-00-01-23-62-12-AF-00-15-5D-00-04-56
DNS Servers . . . . . : fec0:0:0:ffff::1%1
                       : fec0:0:0:ffff::2%1
                       : fec0:0:0:ffff::3%1
NetBIOS over Tcpip . . . . . : Enabled
```

What can the computer connect to?

- A. all the local computers and the remote computers within your corporate network only
- B. all the local computers and the remote computers, including Internet hosts
- C. only other computers on the same network segment that have automatic private IP addressing (APIPA)
- D. only other computers on the same network segment that have an address from a class A network ID

Answer: B

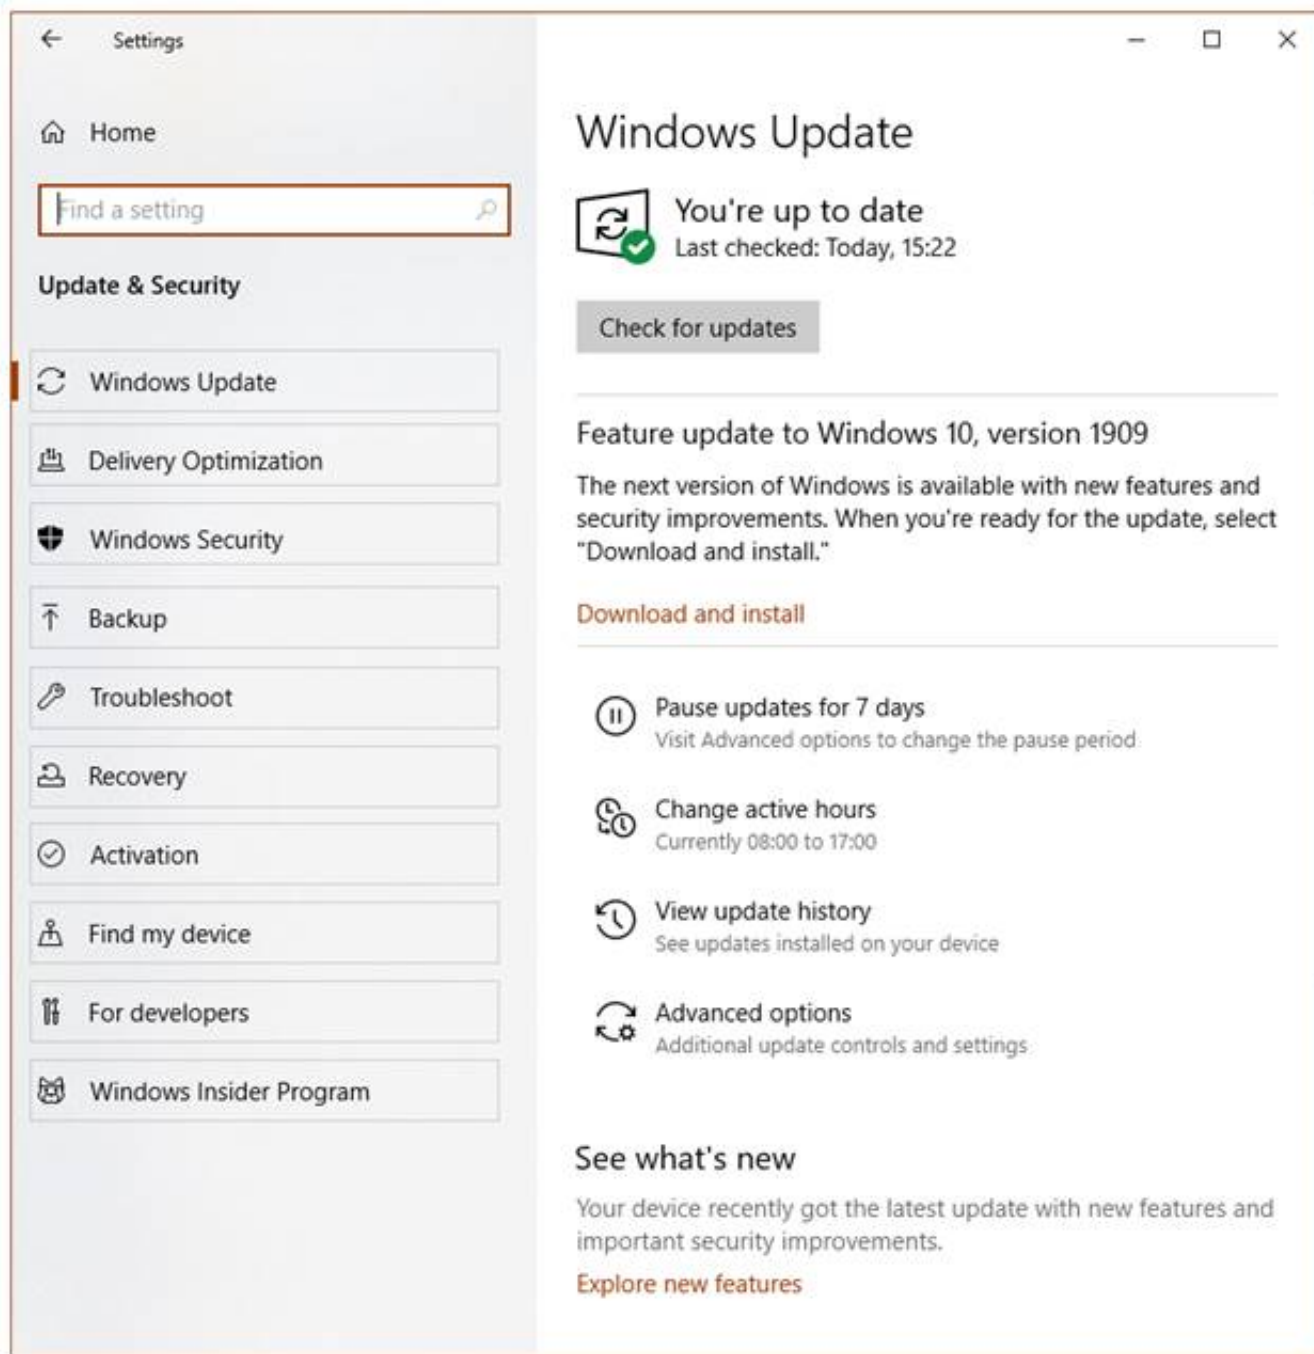

NEW QUESTION 167

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 169

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group1
User4	Users
Admin1	Administrators

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
- B. 2
- C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 172

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.
You sign in to Computer1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-7>

NEW QUESTION 177

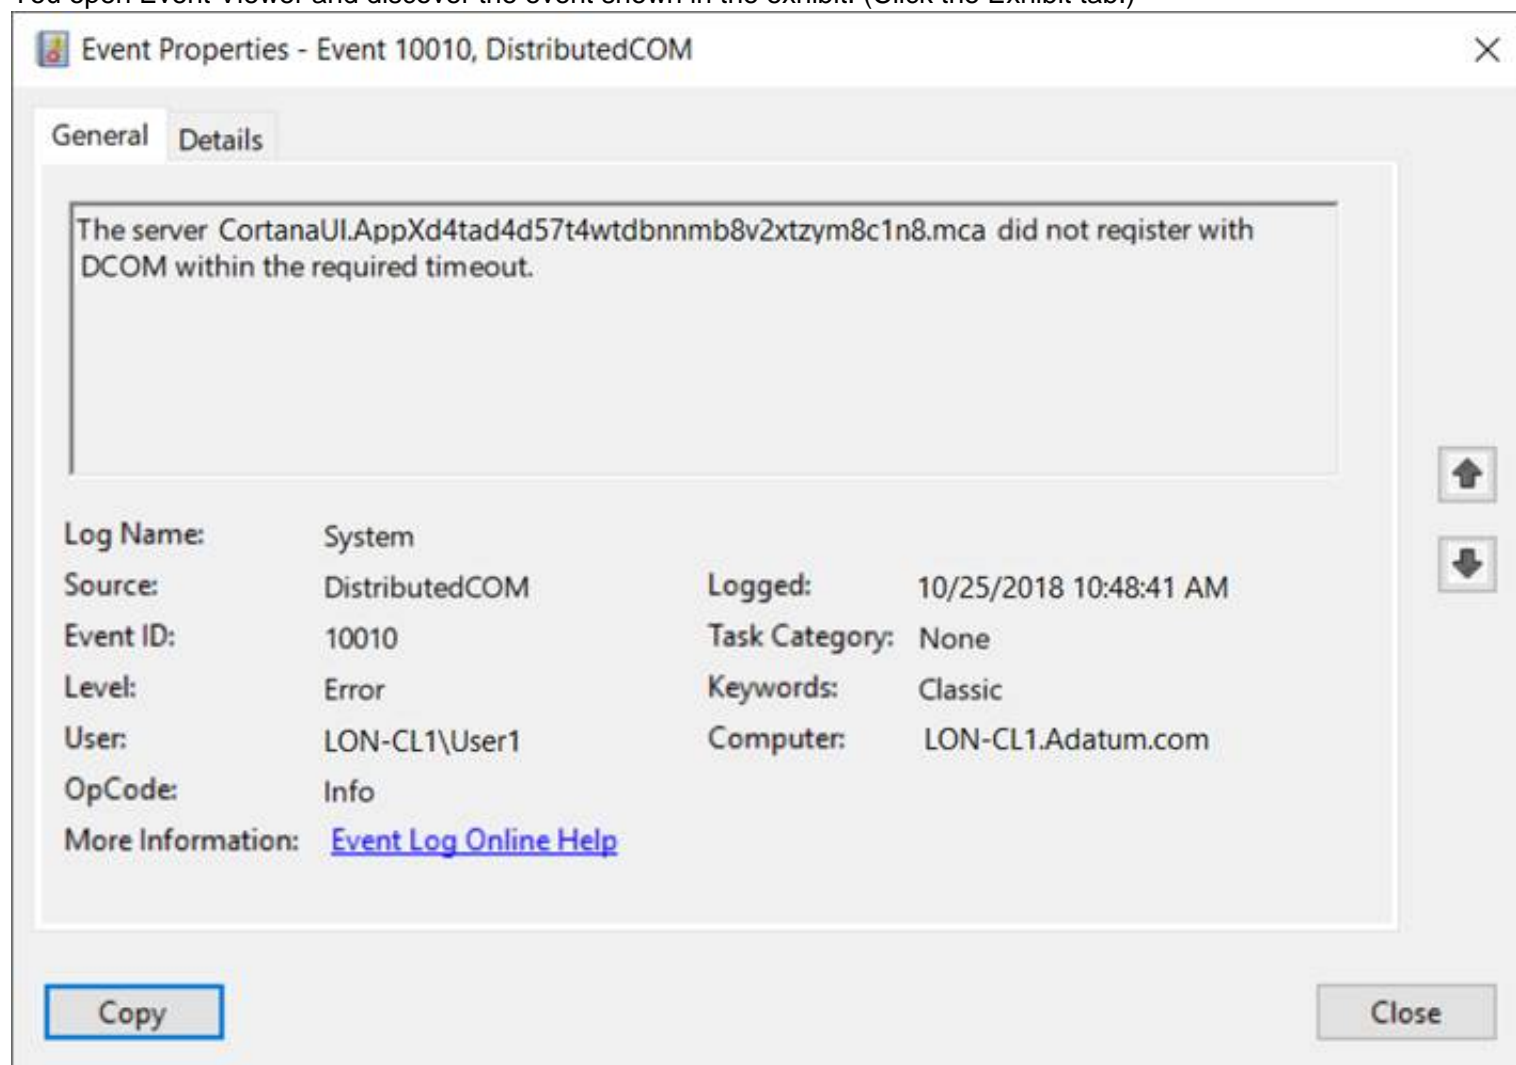

- (Exam Topic 4)

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

- > User: User1
- > Logged: Any time
- > Event logs: System
- > Computer: LON-CL1
- > Event IDs: 10000 – 11000
- > Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.

You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

Answer: A

Explanation:

References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 180

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled.

You need to configure a Windows Sandbox environment. The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values

https://answers.microsoft.com/en-us/windows/forum/windows_10/how-to-create-a-system-image-in-windows-10

NEW QUESTION 192

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.
- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

Answer: B

Explanation:

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

NEW QUESTION 193

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts.

Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

Answer: D

Explanation:

<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

NEW QUESTION 197

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 201

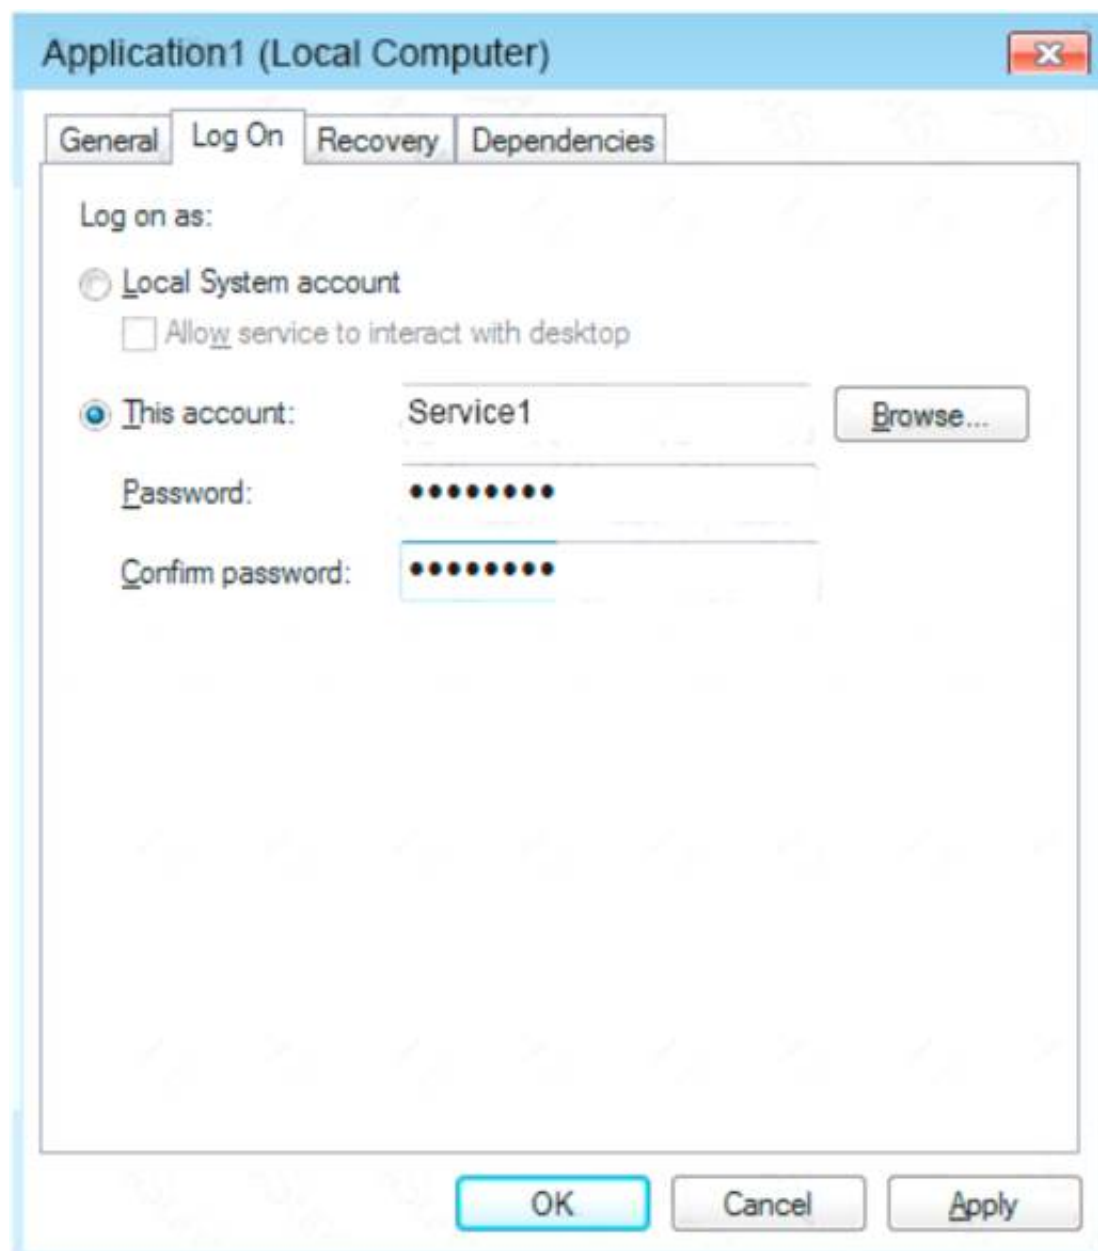

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/win32/services/localsystem-account>

NEW QUESTION 206

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover a known compatibility issue between a feature update and a device driver on the computers. You need to test the installation of the feature update on a test computer.

Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Automatic Updates detection frequency
- B. Disable safeguards for Feature Updates
- C. Select the target Feature Update version
- D. Reschedule Automatic Updates scheduled installations

Answer: B

Explanation:

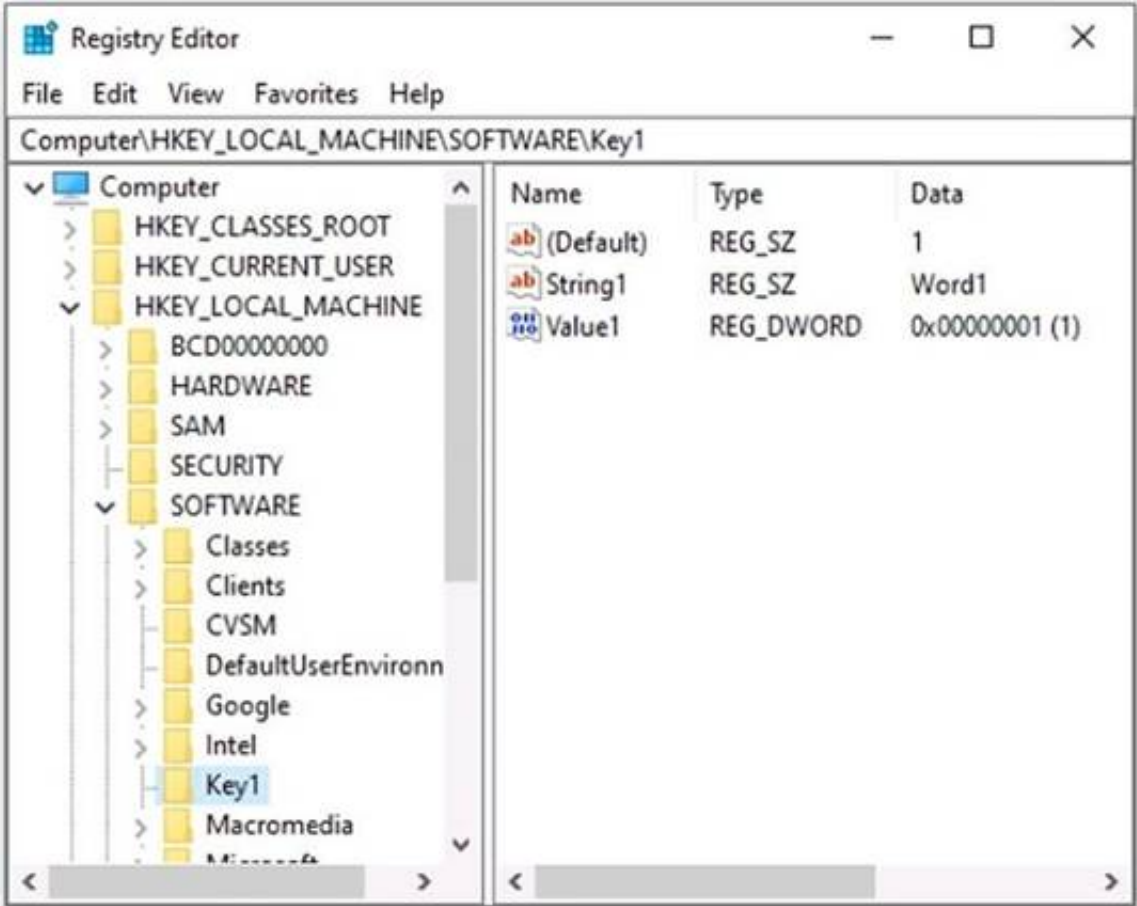

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/safeguard-opt-out>

NEW QUESTION 209

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a registry key named Key1 that has the values shown in the exhibit. (Click the Exhibit tab.).

You have a Registration Entries (.reg) file named File1.reg that contains the following text.
Windows Registry Editor Version 5.00 [HKEY_LOCAL_MACHINE\SOFTWARE\Key1]
"String1"=
@="2"
You need to identify the effect of importing File1.reg to Computer1.
What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

String1 will:

	▼
be deleted	
have a value of –	
have a value of Word1	
have no value	

Value1 will:

	▼
be deleted	
have a value of 1	
have a value of 2	
have no value	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: String1 will be deleted.
To delete a value, append equals and then minus to the value. For example: "String1"=Box 2: Value1 will have a value of 1
@="2" sets the default value to 1 but Value1 already has a DWORD value.
A DWORD (32-bit) value is a hexadecimal value. Value1 is 0x00000001 which is 1. References:
<https://www.computerhope.com/issues/ch000848.htm> <https://www.computerperformance.co.uk/vista/reg-create/>

NEW QUESTION 214

- (Exam Topic 4)
You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues.
You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

Answer: C

NEW QUESTION 216

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Computer1 initiates communication to Computer2, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>
Computer2 can establish communications to Computer3.	<input type="radio"/>	<input type="radio"/>
If Computer3 initiates communication to Computer1, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications.

Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

NEW QUESTION 221

- (Exam Topic 4)

You sign in to a computer that runs Windows 10 Pro.

You need to ensure that after a restart, the computer starts automatically in Safe Mode with Networking. What should you use to configure the restart options?

- A. bootcfg
- B. BCDEdit
- C. Windows System Image Manager (Windows SIM)
- D. bootrec

Answer: B

Explanation:

Reference:

<https://www.lifewire.com/how-to-force-windows-to-restart-in-safe-mode-2625163>

NEW QUESTION 226

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You restart Computer1 by using Advanced startup and select Boot log.

In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

Answer: B

Explanation:

Reference:

<https://winaero.com/enable-boot-log-windows-10/>

NEW QUESTION 229

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

Answer: C

NEW QUESTION 230

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

- A. slmgr /upk
- B. Sec-RDLICENSEConfiguration -Force
- C. Sec-MsolLicense -AddLicense
- D. slmgr /ato

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

NEW QUESTION 232

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 234

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains 70 remote users.

The remote users work from various locations.

Recently, each remote user purchased a personal computer that runs Windows 10 Home.

You need to configure the VPN settings on the computers automatically by using the least amount of administrative effort.

What should you use?

- A. an unattend answer file
- B. a Group Policy Object (GPO)
- C. Windows Autopilot
- D. a provisioning package

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 238

- (Exam Topic 4)

You have 100 computers that run Windows 10 and are members of an Active Directory domain.

Two support technicians named Tech1 and Tech2 will be responsible for monitoring the performance of the computers.

You need to configure the computers to meet the following requirements:

- Ensure that Tech1 can create and manage Data Collector Sets (DCSs).
- Ensure that Tech2 can start and stop the DCSs.
- Use the principle of least privilege.

To which group should you add each technician? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tech1:

▼

Event Log Readers

Performance Log Users

Performance Monitor Users

Remote Management Users

Tech2:

▼

Event Log Readers

Performance Log Users

Performance Monitor Users

Remote Management Users

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 242

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.
You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.
Solution: From PowerShell, you run `$env:Path += ";d:\scripts"`. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about_environment_varia
