

Exam Questions PL-100

Microsoft Power Platform App Maker

<https://www.2passeasy.com/dumps/PL-100/>

NEW QUESTION 1

- (Topic 4)
You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You must also be able to connect to one or more industry data sources. You need to configure the data sources. What should you do?

- A. Create a business process flow.
- B. Create a data policy template.
- C. Create a UI flow.
- D. Use an existing data connector.

Answer: D

Explanation:

In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

Note:
Add data source

- * 1. In the center pane, select connect to data to open the Data pane.
- * 2. Select Add data source.
- * 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.
- * 4. Select New connection to display a list of connections.
- * 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

* 6. Select Create to both create the connection and add it to your app.
Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection>

NEW QUESTION 2

DRAG DROP - (Topic 4)
DRAG DROP
You are designing a new model-driven app for salespeople at a company.

The company requires that all new line-of-business apps must use a much native functionality as possible to avoid having developers maintain code. You need to determine how to implement the app s business logic. Which method should you use? To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may NOTE: Each correct selection is worth one point.

| Methods | Answer Area | Requirement | Method |
|------------------------|-------------|--|--------|
| Business rules | | Validate the postal code format based on the state or province entered by a user. | |
| Power Automate flows | | Ensure that the app can communicate with other business applications by using existing connectors. | |
| Business process flows | | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Methods

Business rules

Power Automate flows

Business process flows

Answer Area

Requirement

Validate the postal code format based on the state or province entered by a user.

Ensure that the app can communicate with other business applications by using existing connectors.

Method

Business rules

Power Automate flows

NEW QUESTION 3

- (Topic 4)

A large construction company has 120 departments. Each department has a Microsoft Teams channel. The company creates training content for each department. All training content for a department is hosted in the channel for that department You must create a chatbot for the company that helps employees find relevant training. Employees must not be able to modify the chatbot. You need to create the chatbot

Which three actions should you perform"* Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a bot for each departmental channel.
- B. Create one training bot for organization-wide deployment.
- C. Create an entity for each department
- D. Create a topic for each department.
- E. Create a topic for each trade.

Answer: BCD

NEW QUESTION 4

DRAG DROP - (Topic 4)

A company uses a canvas app. The finance team and sales team require access to the canvas app. You must perform the following actions:

- Add members of the sales team to the app as users.
- Add members of the finance team to the app as co-owners.

The app must be shareable with current and future team members. You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort. Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Group types

Security group

Distribution group

Dynamic group

Answer Area

Activity

Add members of the sales team to the app as users.

Add members of the finance team to app as co-owners.

Group type

Dynamic group

Security group

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group types

Security group

Distribution group

Dynamic group

Answer Area

Activity

Add members of the sales team to the app as users.

Add members of the finance team to app as co-owners.

Group type

Dynamic group

Security group

NEW QUESTION 5

DRAG DROP - (Topic 4)

You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app. You need to configure the elements of the data source.

Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data elements

Table

View

Record reference

Answer Area

Data

Time-off dates for all employees

Employee ID number

Data element

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 6

DRAG DROP - (Topic 4)

A company has the following divisions: wholesale and retail.
The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.
You need to ensure that each user sees data only for the team to which the user is assigned.
How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Options

Power BI Service

Power BI Desktop

Common Data Service

Power Platform Admin center

Answer Area

Action

Option

Create the team as a role.

Option

Add members to the role.

Option

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power BI Desktop
You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.
To define security roles, follow these steps.
? Import data into your Power BI Desktop report, or configure a DirectQuery connection.
? From the Modeling tab, select Manage Roles.
? From the Manage roles window, select Create.
? Etc.
Box 2: Power BI Service
After you save your report in Power BI Report Server, you manage security and add or remove members on the server.
* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.
* 2. In Power BI Report Service, select the ellipsis (...) next to the report.
* 3. Select Manage > Row-level security.

Properties

Data sources

Scheduled refresh

Row-level security

Security

+ Add Member

Delete

Search...

Edit

Group or user ^

On the Row-level security page, you add members to a role you created in Power BI Desktop.

NEW QUESTION 7

DRAG DROP - (Topic 4)

You are an app and report maker. You provide visualizations for two departments in an organization.
Each department requires department-specific visualizations:

| Department | Requirement |
|-------------|--|
| Department1 | Provide unstructured answers to free text survey questions. |
| Department2 | Chart real-time data in columns that groups complaints by category, urgency, and status. |

You need to create the visualizations.
Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Chart types

Multi-series

Tag

Stacked column

Requirement

Unstructured answers to free text survey questions.

Real-time column chart that groups complaints by category, urgency, and status.

Chart type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Tag
Box 2: Multi-series
Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 8

DRAG DROP - (Topic 4)
: 186 DRAG DROP
A company uses Power Apps.
The company requites a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.
Which connector types should you use? To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Connector types

Standard

Custom

Answer Area

Sources

SharePoint list

Microsoft 365 mailbox

SOAP API

Connector type

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 9

- (Topic 4)
You create a weekly report app as a canvas app. The data source for the app is a Microsoft SharePoint list.
The file that contains the weekly report must be attached to each submission made in the app. Employees must modify the report through the canvas app after the initial submission.
The manager must be notified by email when an employee updates the report. You need to create cloud flows.
Which SharePoint trigger should you use?

- A. When an item is created
- B. When an item or file is modified
- C. When a file is created (properties only)

D. When a file is created in a folder

Answer: B

NEW QUESTION 10

HOTSPOT - (Topic 4)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model- driven app.

You need to ensure all users can see the tiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Step | Setting |
|---|--|
| Allow addition of Power BI visualization tiles. | <div><div></div><div>▼</div><div>Power Platform Environment settings</div><div>Power Apps settings</div><div>Power BI Service settings</div><div>Power BI Desktop settings</div></div> |
| Add tiles to a dashboard. | <div><div></div><div>▼</div><div>Create a personal dashboard</div><div>Create a Power BI dashboard.</div><div>Create a system dashboard.</div></div> |
| Allow users to view tiles. | <div><div></div><div>▼</div><div>Share tile and share dashboard.</div><div>Share report and share dashboard.</div><div>Share tile and publish dashboard.</div><div>Share report and publish dashboard.</div></div> |

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

? In the Power Platform admin center, select an environment.

? Select Settings > Product > Features.

? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.

? Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

? Open your app and go to Dashboards.

? Select an existing personal dashboard or select New to create one.

? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.

? Add new Power BI tile.

? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.

? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.

? Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must

same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

NEW QUESTION 10

- (Topic 4)

You are an app maker. You are creating a canvas app. You do not have access to Power BI.

You need to add charts to the app.

Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. pie

B. area

C. funnel

D. column

E. line

Answer: ADE

Explanation:

You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:

* 1. On the Home tab, add a screen.

* 2. On the Insert tab, select Charts, and then select Column Chart.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart>

NEW QUESTION 13

- (Topic 4)

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors.

You need to verify that the focused border thickness is set to a value greater than zero. Which section of the App checker results should you check?

- A. Rules
- B. Performance
- C. Accessibility
- D. Runtime

Answer: C

Explanation:

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity.

Issues include:

? Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 14

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.

You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Objects | Requirement | Object |
|---------------------|--|--------|
| Entity | Reuse the custom control for multiple canvas apps. | |
| Component | | |
| Component library | Receive input data through a custom property. | |
| Component framework | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library

Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.

By creating a component library, app makers easily share and update one or more components with other makers.

Component libraries are containers of component definitions that make it easy to: Discover and search components.

Publish updates.

Notify app makers of available component updates.

Box 2: Component

A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 15

- (Topic 2)

You need to connect to the data source for the Job Setup app. What should you do?

- A. Configure a scheduled synchronization with the Common Data Service database
- B. Configure SQL Server database permissions
- C. Create a stored procedure that retrieves time records for a specific employee
- D. Configure an on-premises data gateway

Answer: D

Explanation:

Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a

gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference>

NEW QUESTION 20

- (Topic 2)

You need to implement logic in the app for lost sales. What should you do?

- A. Create a business process flow.
- B. Define a business rule for the Sales Log edit form.
- C. Set the required field property of the Won/Lost field to Required.
- D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:

Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

? Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 21

- (Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to true
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to false
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to false
- G. Export the app as an unmanaged solution.

Answer: C

Explanation:

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 24

- (Topic 4)

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.

A Power Automate flow monitors social media channels to identify high-impact trends. When the Power Automate flow identifies the trends, consistently formatted and

standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process.

What should you use?

- A. AI Builder
- B. Common Data Service business process flows
- C. Adaptive cards
- D. Integrated approval flows

Answer: A

Explanation:

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."

Jim Parker: Web and Collaboration Services Manager

Reference:

<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

NEW QUESTION 25

- (Topic 4)

A company uses Power Apps. The company creates a solution that contains the following items:

- environment setting
- flow that accesses Microsoft Dataverse
- plug-in with an unsecure configuration
- environment variable with a default value

The company plans to import solutions manually.
You need to document the solution component type that prompts for user input. Which component type should you document?

- A. Environment variable
- B. Environment setting
- C. Connection reference

Answer: D

NEW QUESTION 28

DRAG DROP - (Topic 4)

You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app.
Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

| Tools | Requirement | Tools |
|----------------------------------|---|-------------|
| <div>Business rule</div> | Guide a user through the set of steps needed for onboarding a new employee. | <div></div> |
| <div>Power Automate</div> | Make date of birth mandatory when creating a new employee record. | <div></div> |
| <div>Business process flow</div> | Implement an approval flow for expense reports submitted by employees. | <div></div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Business process flow
A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.
Box 2: Business rule Box 3: Power Automate
A Power Automate flow does not have any visual components like a business process flow.
Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

NEW QUESTION 31

HOTSPOT - (Topic 4)

A coworker creates a canvas app.
The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1
},
{
    Tool: "Screwdriver",
    Quantity: 2
})
```

You are updating the canvas app.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

| Answer Area | Yes | No |
|---|-----------------------|-----------------------|
| The formula will update multiple records in a data source named Toolbox if the records exist. | <input type="radio"/> | <input type="radio"/> |
| A local collection is created to store data if a data source named Toolbox does not already exist. | <input type="radio"/> | <input type="radio"/> |
| If a collection named Toolbox exists the formula will clear any existing records before making any changes. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: No

Records are added, not updated.

Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source.

Box 3: No

No records are cleared.

NEW QUESTION 36

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Add Power Apps to Power BI using Power Apps for Power BI visualization. Does the solution meet the goal?

A. Yes

B. No

Answer: A

NEW QUESTION 39

- (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.

You need to package the components you create.

Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types

Managed

Unmanaged

Segmented

Answer Area

Component

Canvas app created in production and used only in production.

Tables created in prototype to allow only new views added in production.

Solution type

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Solution types

Managed

Unmanaged

Segmented

Answer Area

NEW QUESTION 41

DRAG DROP - (Topic 4)

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.

The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.

You need to create the spreadsheet.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Export the custom view to an Excel template

Answer Area

>

<

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Timeline
Description automatically generated with low confidence
Step 1: Export the custom view to an Excel dynamic pivot table
You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.
Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series
Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table
Step 4: Save the spreadsheet and upload it back to the system.

NEW QUESTION 45

DRAG DROP - (Topic 4)
You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional
Users must be able to filter the dashboard. You need to determine how to apply the filters.
Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Dashboard types

Standard

Interactive

Power BI embedded

Answer Area

Requirement

Filter all dashboard elements using a timeframe.

Display data from multiple tables and views.

Dashboard type

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Dashboard types

Standard

Standard

NEW QUESTION 46

- (Topic 4)
You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Update the column length in the production environment. Does the solution meet the goal?

- A. Yes
B. No

Answer: B

NEW QUESTION 51

DRAG DROP - (Topic 4)

You are deploying solutions from development environments into test environments. You need to gather solution information. What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Options

View the history

Show dependencies

View solution layers

Run the Solution checker

Answer Area

Scenario

Find the deployment outcome

Determine, in which version, a type change occurred

Determine if any components are missing

Action

Action

Action

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: View the history
The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.
Box 2: View solution layers
The see solution layers' feature allows you to view all component changes that occur due to solution changes over time. Within a solution layer, you can drill down to view specific changed and unchanged property details for a component.
The see solution layers' feature:
? Let's you see the order in which a solution changed a component.
? Let's you view all properties of a component within a specific solution, including the changes to the component.
Box 3: Show dependencies
As a result of dependency tracking the following behaviors are enforced:
? Export of a solution warns the user if there are any missing components that could cause failure when importing that solution in another system.

NEW QUESTION 54

DRAG DROP - (Topic 4)

You are creating a Power Automate cloud flow.
The data in the flow must perform the following actions:
• Return the first character of a string of text.
• Convert an array to a single string. You need to manipulate the data.
Which data operations should you use? To answer, drag the appropriate data operations to the correct changes. Each data operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION 57

HOTSPOT - (Topic 4)

You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.
The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:
• Update the Microsoft Dataverse record.
• Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.
Which components should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Update the Microsoft Dataverse record.

Evaluate whether the Microsoft Dataverse record should be updated.

Component

NEW QUESTION 58

- (Topic 4)

A company delivers products to multiple communities. The company creates a canvas app connected to a Common Data Service database. The app tracks communities to see where Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms. You need to create the community field. Which type of field should you create?

- A. local option set
 B. text
 C. global option set
 D. text area

Answer: C

Explanation:

Can use a global option set, no need to use localized option sets.

Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:
<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

NEW QUESTION 62

- (Topic 4)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
 B. Connection
 C. Microsoft Dataverse customization
 D. Power Automate cloud flow

Answer: D

NEW QUESTION 64

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera.

Proposed solution:

- ? Create a Category Classification custom model in AI Builder.
- ? Train the model with pictures of bicycles and then publish the trained model.
- ? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes

B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:
<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 69

DRAG DROP - (Topic 4)

You have an existing Power Apps environment.
You need to create a Common Data Service database for the environment.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select Create my database

Configure currency and language settings

Configure database collation settings

Set the environment type to **Production**

Select an existing environment

Answer Area

>

<

^

v

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Select an existing environment Add a database in the admin center:
* 1. In the admin center, in the left navigation pane, select Environments.
* 2. Select the environment to which you want to add the database.
Step 2: Select Create my database
* 3. Select + Add database
Step 3: Configure currency and language settings
* 4. Enter the following, and then select Add.

| Setting | Description |
|-----------------------------|---|
| Language | The default language for this environment. |
| Currency | The base currency used for reporting. |
| Enable Dynamics 365 apps | Select Yes and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service. |
| Deploy sample apps and data | Select Yes to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select No for Enable Dynamics 365 apps for this setting to appear. |
| Security group | Select a security group to restrict access to this environment. |

NEW QUESTION 70

- (Topic 4)

A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal

- C. SQL Server Management Studio
- D. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to-one) relationships:

? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal

? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships>

NEW QUESTION 75

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create an Object Detection custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain.

Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 78

- (Topic 4)

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.

You are not able to activate the flow. You need to troubleshoot the issue.

What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

NEW QUESTION 80

- (Topic 4)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.

What should you conclude?

- A. The default solution does not contain all components and customizations from all solutions in the environment.
- B. The prefix used when creating components as part of the default solution can be set to a specific value.
- C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

? The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations>

NEW QUESTION 85

- (Topic 4)

A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.

You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.

You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table
- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

Explanation:

Dataverse for Teams is the “lite” version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.

Reference:

<https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/>

<https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data>

NEW QUESTION 86

HOTSPOT - (Topic 4)

Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.

You need to design the app.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement | Action |
|---|--|
| Enter notes related to wildlife records. | <div><div>▼</div><div><div>Enable the Wildlife entity and annotation entity for mobile offline.</div><div>Enable the attachments entity and the annotation entity for mobile offline.</div><div>Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity.</div><div>Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.</div></div></div> |
| Enter wildlife details as related records. | <div><div>▼</div><div><div>Allow feedback on the Wildlife Details entity.</div><div>Enable the Wildlife Details entity for mobile offline.</div><div>Enable change tracking on the Wildlife Details entity.</div><div>Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.</div></div></div> |
| Indicate that an animal requires medical attention. | <div><div>▼</div><div><div>Create a business rule.</div><div>Create a business process.</div><div>Create a Power Automate flow.</div></div></div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Enable the Wildlife entity and the annotation entity for mobile offline

Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user's device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users' changes are seamlessly synchronized back to the cloud.

Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline.

Box 3: Create a business process.

Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

Note: Power Automate includes several types of processes, each designed for a different purpose:

? Automated flows. Create a flow that performs one or more tasks automatically

? Button flows.

? Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.

? Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

? Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions.

NEW QUESTION 87

- (Topic 4)

You create a model-driven app for a company. The app will be used to manage events that the company organizes.

The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role

are set to User access.
All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.
You need to configure the MarketingTeam and OtherEmployees security roles.
Which three actions should you perform? Each correct selection presents a part of the
NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
- B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
- C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
- D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
- E. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.
- F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 88

- (Topic 4)
You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

- A. Power BI dashboard on a model-driven form.
- B. Power BI tile on a model-driven form.
- C. Power BI dashboard on a model-driven dashboard.
- D. Power BI tile on a model-driven dashboard.

Answer: D

NEW QUESTION 91

- (Topic 4)
A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.
Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. When a file is created trigger
- B. Get direct reports action
- C. Wait for an approval action
- D. When an item or a file is modified trigger
- E. When an item is created trigger
- F. Assign manager action
- G. Start and wait for an approval action
- H. Get manager action

Answer: AFG

NEW QUESTION 96

DRAG DROP - (Topic 4)
You are designing a canvas app that will be used by all users including users who have
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Outcomes

Not visible to any users

Visible to sighted users only

Visible to screen-reader users only

Visible to both sighted and screen-reader users

Answer Area

Action

Set the values for the X and Y properties of a control to move the control off-screen.

Set the Color and other related properties of a control to transparent.

Set the Height and Width properties of a control to 1.

Outcome

Outcome

Outcome

Outcome

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Outcomes

Not visible to any users

Visible to sighted users only

Visible to screen-reader users only

Visible to both sighted and screen-reader users

Answer Area

Action

Set the values for the X and Y properties of a control to move the control off-screen.

Set the Color and other related properties of a control to transparent.

Set the Height and Width properties of a control to 1.

Outcome

Visible to sighted users only

Visible to screen-reader users only

Not visible to any users

NEW QUESTION 99

DRAG DROP - (Topic 4)
A company uses Power Automate.
The company requires three cloud flows for the following:

• Send email notifications to a team member after an expense request is approved.
• If a document is uploaded to OneDrive. forward the document as an email attachment.
• Send an email at 4:00 PM on Fridays to remind team members to submit timesheets. You need to create the cloud flows.
Which cloud flow types should you create? To answer, drag the appropriate cloud flows to the correct activities. Each cloud flow may be used once, more than once, or not at all. You
NOTE: Each correct selection is worth one point.

| Cloud flows | | Activity | Cloud flow |
|-------------|--|---|------------|
| Automated | | Send notifications after expense request approvals. | |
| Scheduled | | Forward new OneDrive documents as attachments. | |
| Instant | | Send timesheet reminder emails at 4:00 PM on Fridays. | |

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

| Cloud flows | | Activity | Cloud flow |
|-------------|--|---|------------|
| Automated | | Send notifications after expense request approvals. | Instant |
| Scheduled | | Forward new OneDrive documents as attachments. | Automated |
| Instant | | Send timesheet reminder emails at 4:00 PM on Fridays. | Scheduled |

NEW QUESTION 104

- (Topic 4)
A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.
Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.
B. In Advanced tools, select Monitor.
C. Ask the coworker to add you to their team.
D. Select the chatbot and then select the Share button.

Answer: AB

NEW QUESTION 109

- (Topic 4)
A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
B. View
C. Column
D. Tab

Answer: C

NEW QUESTION 113

DRAG DROP - (Topic 4)
A company uses Power Apps. You design the interface for a new model-driven app.
Users must interact with data from records related to the primary record form in the following ways:

- Use related business process flows.
 - Display primary and related form columns.
- You need to configure the forms without using additional customizations.

Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct answer is worth one point.

| Form types | | Requirement | Form type |
|-----------------------------|--|--|-----------|
| Quick view form | | Use related business process flows. | |
| Main form dialog | | Display related columns along with other primary form columns. | |
| Quick create form | | | |
| Main form component control | | | |

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Form types

Quick view form

Main form dialog

Quick create form

Main form component control

Answer Area

Requirement

Use related business process flows.

Display related columns along with other primary form columns.

Form type

Main form component control

Quick view form

NEW QUESTION 115

DRAG DROP - (Topic 4)

You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an entity in the new solution.

Enter the entity Display Name and use the existing prefix.

Add a new solution.

Enter the entity Display Name and modify the prefix to **xyz**.

Add a new publisher with the prefix **xyz**.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Create an entity in the new solution.

Enter the entity Display Name and use the existing prefix.

Add a new solution.

Enter the entity Display Name and modify the prefix to **xyz**.

Add a new publisher with the prefix **xyz**.

Answer Area

Add a new publisher with the prefix **xyz**.

Add a new solution.

Create an entity in the new solution.

Enter the entity Display Name and modify the prefix to **xyz**.

NEW QUESTION 116

DRAG DROP - (Topic 4)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field.

You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add TeamA to the field security profile.

Create a field security profile and set all the permissions for the custom attribute to **Yes**.

Add TeamB to the field security profile.

Create a field security profile and set all the permissions for the custom attribute to **No**.

Enable field-level security for the field.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

? Enable field security on one or more fields for a given entity.

? Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 118

HOTSPOT - (Topic 4)

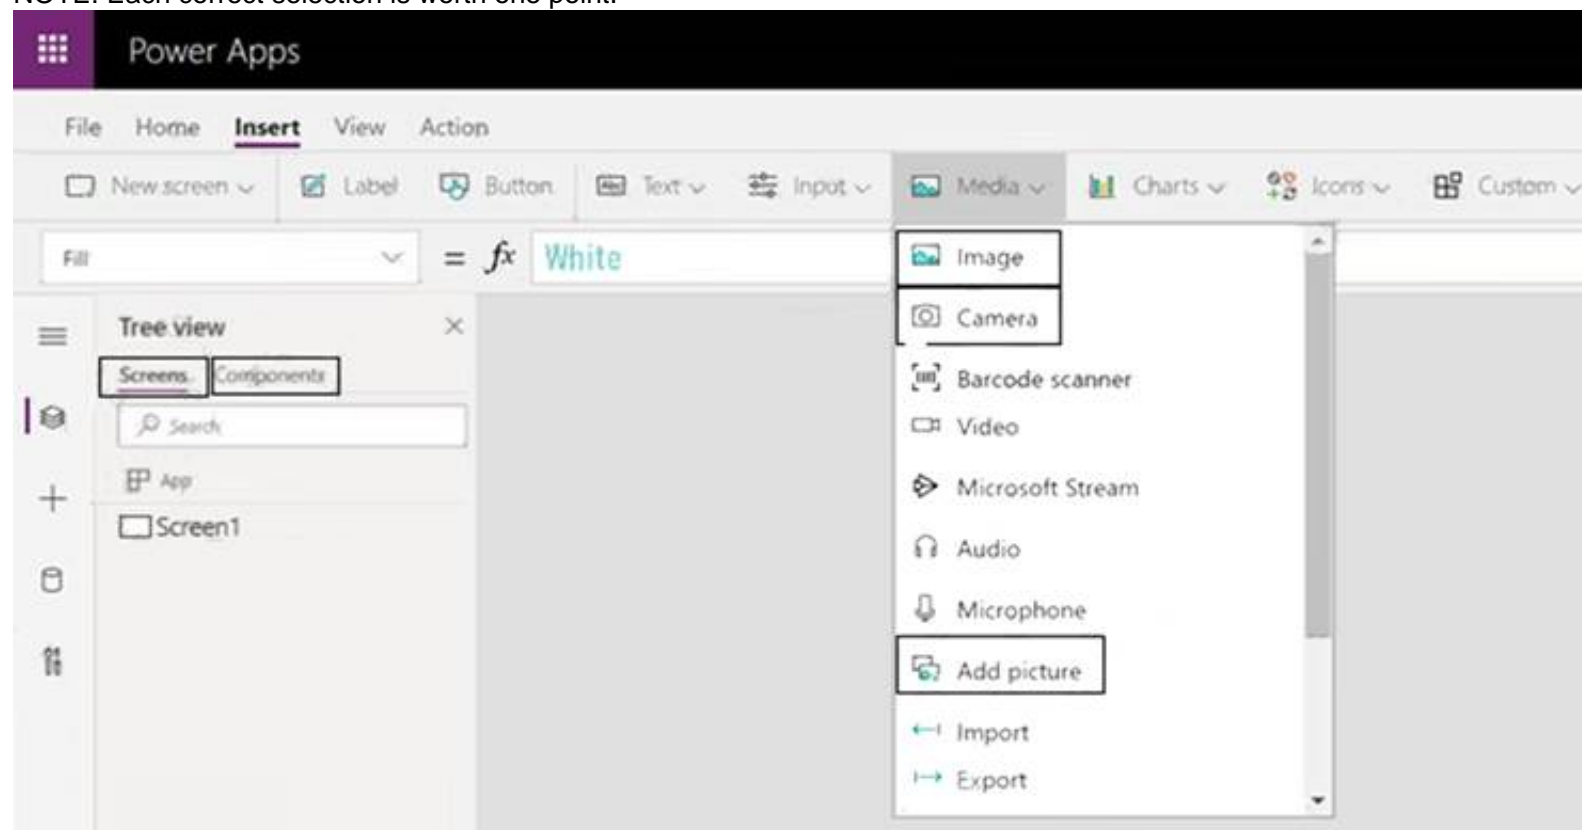

You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.

When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.

You need to design phone-based and web-based versions of the app.

Which app type and media control should you use? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

App Type: Screens

To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.

Media Type: Camera

Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.

Tap or select the camera control to capture a picture from the camera.

The most recently captured picture is available through the Photo property. With this property, the images can be:

- ? Viewed with the Image control. Use the Image control to view the captured image.
- ? Temporarily put in a variable or a collection.
- ? Stored in a database.
- ? Transmitted as a base64 encoded text string.

NEW QUESTION 121

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated goal. Some solutions might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

NEW QUESTION 122

HOTSPOT - (Topic 4)

HOTSPOT

The customer service team of a company uses a model-driven app to log customer interactions. The app contains two tables: one to track customer interactions and one to track products.

The team requires an interactive dashboard to display the activities. The dashboard must display the products that have the most complaints. Each chart must display the associated data.

You need to create the dashboard-

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

| Activity | Feature |
|---|--|
| Display customer interactions and products. | Single-stream dashboard Multi-stream dashboard Single-stream dashboard Standard dashboard |
| Display charts with associated data. | Default Chart Show Chart Only Display Chart Selection Default Chart |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

| Activity | Feature |
|---|-------------------------|
| Display customer interactions and products. | Single-stream dashboard |
| Display charts with associated data. | Default Chart |

NEW QUESTION 125

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

| Field name | Data type | Criteria for follow up |
|---------------------------|--------------|------------------------|
| Name | Text | No |
| Degree | Text | Yes |
| First available hire date | Date | Yes |
| Initial impression | Integer 0-10 | Yes |
| Resume | Picture | No |
| Not currently viable | Boolean | Yes |
| Follow up | Boolean | NA |

If a candidate is currently unqualified for a job position but would eventually qualify based immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a custom action that has defined dataflows.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

NEW QUESTION 127

- (Topic 4)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.

You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center
- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

Answer: C

Explanation:

- ? Find accessibility issues
- ? In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- ? App checker icon.
- ? In the menu that appears, select Accessibility.
- ? A list of issues appears, sorted first by severity and then by screen.
- ? Select the arrow next to an item to show details about it.
- ? Accessibility checker details.
- ? Select the back arrow to return to the list of items.
- ? If you decide to address an issue, select it to open the affected property.
- ? After you change one or more properties, select Re-check to update the list of issues.

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk

NEW QUESTION 130

DRAG DROP - (Topic 4)
DRAG DROP

A company uses Power Automate. You manage two cloud flows named A and B. Users must perform the following activities:

- Manage the properties of cloud flow A.
- Manually trigger cloud flow B

You need to set up privileges for the business users by using the principle of least privilege Which privilege types should you grant for each activity? To answer, drag the appropriate privilege types to the correct activities. Each privilege type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

| Privilege types | Answer Area | Activity | Privilege type |
|--------------------------------|-------------|--|----------------|
| Microsoft Power Platform Admin | | Manage the properties of cloud flow A. | |
| Co-owner | | Manually trigger cloud flow B. | |
| Run-only | | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Privilege types | Answer Area | Activity | Privilege type |
|--------------------------------|-------------|--|----------------|
| Microsoft Power Platform Admin | | Manage the properties of cloud flow A. | Co-owner |
| Co-owner | | Manually trigger cloud flow B. | Run-only |
| Run-only | | | |

NEW QUESTION 132

HOTSPOT - (Topic 4)

A company is creating new app for use by technicians.
Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices.
Which design element should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

| Requirement | Design element |
|---|---|
| Create an app that does not specify a screen size in the design | <div>▼</div> <div>Phone form factor</div> <div>Tablet form factor</div> <div>Blank canvas app</div> <div>Model-driven app</div> |
| Lock the screen size for an app that needs to be set to a specific resolution | <div>▼</div> <div>Aspect ratio</div> <div>Orientation</div> <div>Image positioning</div> <div>Display mode</div> |

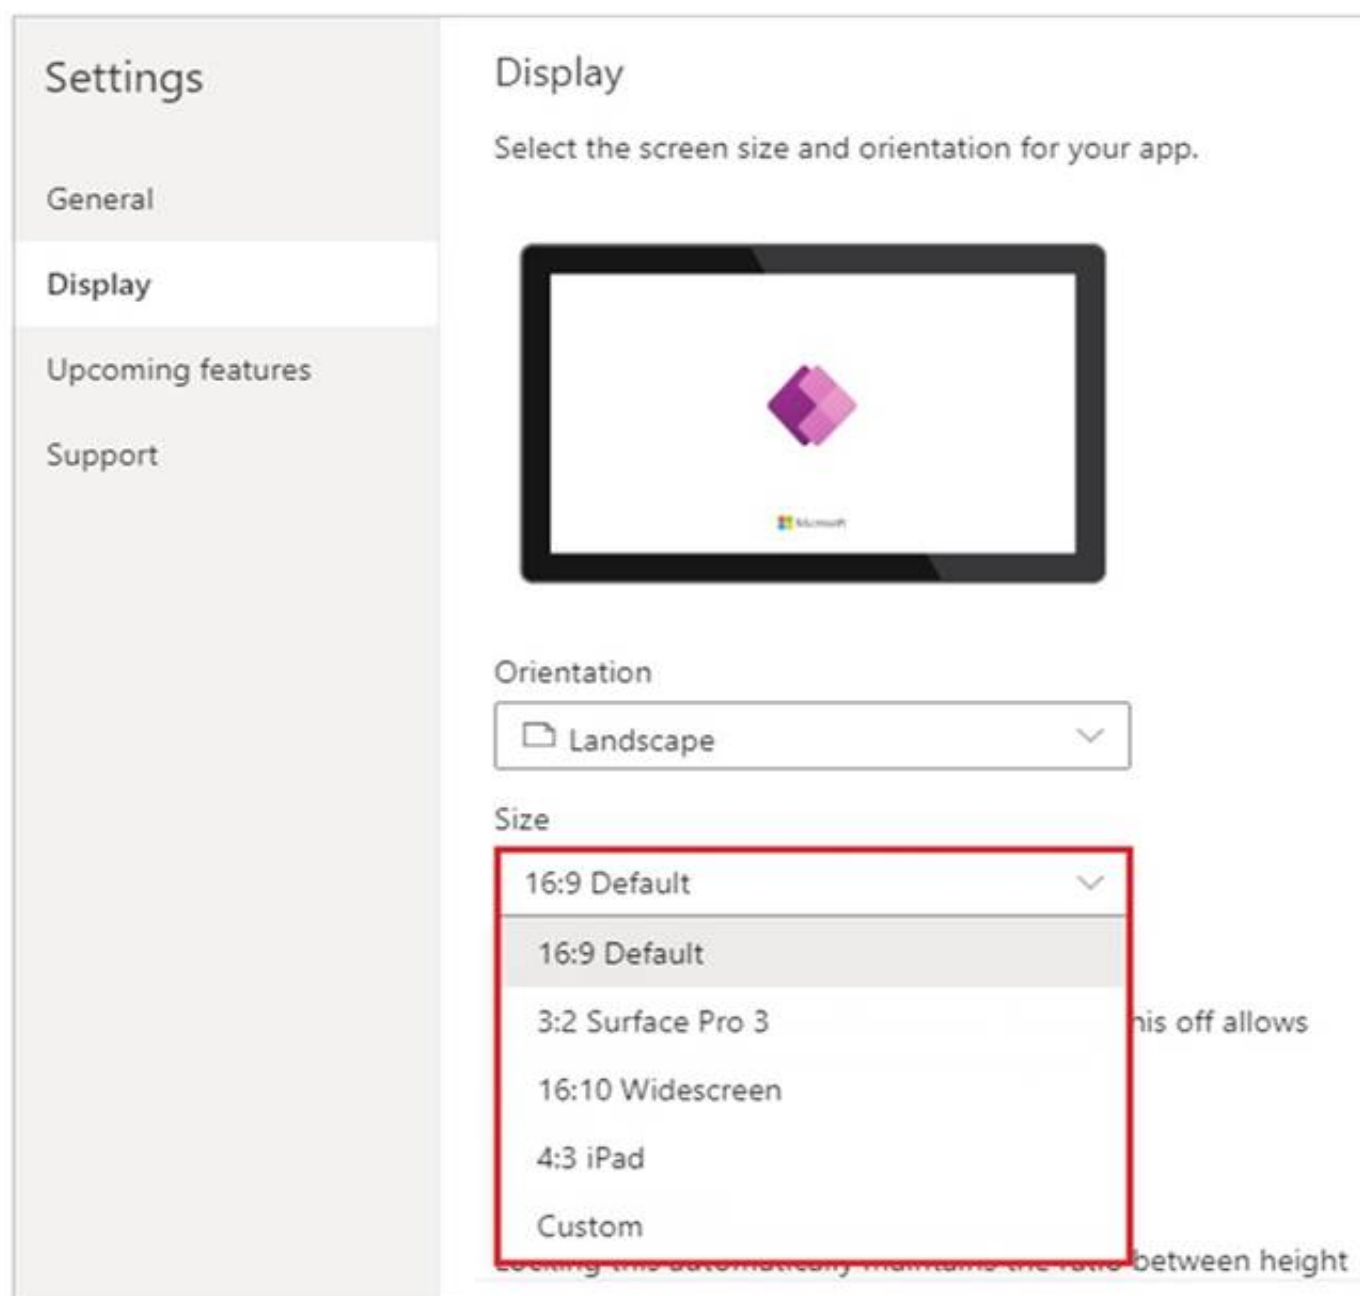

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Tablet form factor Box 2: Aspect version
Customize a canvas app by changing its screen size.

- ? Sign in to Power Apps.
- ? Open the app to edit.
- ? Select Settings.
- ? Select Display.
- ? (Tablet apps only) Under Aspect ratio, perform either of these steps:
- ? Select the ratio that matches the target device for this app.
- ? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.

NEW QUESTION 135

HOTSPOT - (Topic 4)

A company is building a canvas app.

A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

| Display name | Relationship name | Related table | Relationship type | Type | Customizable |
|----------------|---------------------------|---------------|-------------------|----------|--------------|
| Company Name | contact_customer_contacts | Contact | Many-to-one | Managed | Yes |
| Connected From | contact_connections1 | Connection | One-to-many | Managed | Yes |
| Owning Team | Team_contacts | Team | Many-to-one | Standard | Yes |

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

▼

Use a grid for the Contact table and a grid for the Connection table

Use a single field for the Contact table and a grid for the Connection table

Use a grid for the Contact table and a single field for the Connection table

Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

▼

Use a grid for the Contact table and a grid for the Team table

Use a single field for the Contact table and a grid for the Team table

Use a grid for the Contact table and a single field for the Team table

Use a single field for the Contact table and a single field for the Team table

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.
 Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

NEW QUESTION 138

HOTSPOT - (Topic 4)

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code.

Sales associates must be able to act on the specific data displayed in dashboards. You need to create the dashboards.

Which type of dashboards should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement | Type of dashboard |
|--|---|
| Ensure that all sales associates can view the dashboard. | <div>▼</div> <div>User</div> <div>System</div> |
| Ensure that sales associates can interact with data from the dashboards. | <div>▼</div> <div>Standard</div> <div>Multi-stream</div> <div>Single-stream</div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: User

Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.

Box 2: Single-stream

The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier 2 service leads or managers, who monitor fewer, but more complex or escalated cases.

NEW QUESTION 143

DRAG DROP - (Topic 4)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require

| Groups | Comments | Requirements |
|----------------------|--|--|
| Reception area staff | Users will access the app only from desktop devices in the office. | Users must be able to access contacts and display activities as a doughnut chart. |
| Medical staff | Users will access the app from tablet devices. | Users must be able to access activities and business process flows. |
| Cleaning staff | Users will access the app only from mobile phone devices. | Users must be able to interact with a checklist to mark cleaning tasks as completed. |

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| App types | Answer Area | | | | | | | | |
|----------------------|---|-------|----------|----------------------|----------|---------------|----------|----------------|----------|
| Canvas app | <table border="1"> <thead> <tr> <th>Group</th> <th>App type</th> </tr> </thead> <tbody> <tr> <td>Reception area staff</td> <td>App type</td> </tr> <tr> <td>Medical staff</td> <td>App type</td> </tr> <tr> <td>Cleaning staff</td> <td>App type</td> </tr> </tbody> </table> | Group | App type | Reception area staff | App type | Medical staff | App type | Cleaning staff | App type |
| Group | App type | | | | | | | | |
| Reception area staff | App type | | | | | | | | |
| Medical staff | App type | | | | | | | | |
| Cleaning staff | App type | | | | | | | | |
| Model-driven app | | | | | | | | | |
| Embedded canvas app | | | | | | | | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 144

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps and Microsoft Dataverse.

The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:

- Share model-driven apps in multiple Microsoft Dataverse environments.
- Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.

You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the

appropriate security roles to the correct requirements. Each security the may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Security roles

System Customizer

Microsoft Power Platform Administrator

Environment Maker

Answer Area

Requirement

Share in all Microsoft Dataverse environments.

Share in one environment and view only table records they create.

Security role

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

System Customizer

NEW QUESTION 149

- (Topic 4)

You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.

You plan to deploy the solution to Canada.

You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. View results in the Service Trust portal.
B. Check the results of the Solution checker.
C. Identify regulations for the region where the tenant resides.
D. Identify all regulations for the region where the Common Data Service database resides.
E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:

A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.

D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

Reference:

https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal

NEW QUESTION 150

- (Topic 4)

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values.

You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Collect

- B. Patch
- C. Navigate
- D. Set
- E. UpdateContext

Answer: BCE

Explanation:

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables: UpdateContext

Navigate Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

NEW QUESTION 151

HOTSPOT - (Topic 4)

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Task | Method |
|---|---|
| Connect to the ERP system. | <div><div></div><div>Use a Data Gateway</div><div>Use a Custom Connector</div><div>Use a Service Content Pack</div></div> |
| Create the relationship between the employee file and the work estimates. | <div><div></div><div>Create a composite model</div><div>Create an aggregated table</div><div>Create entity relationships in the CDS Solution Explorer</div></div> |
| Create calculations for work remaining, remaining budget. | <div><div></div><div>Create a Data Analysis Expressions formula</div><div>Create an aggregated table</div><div>Create a modeling view</div></div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer.

Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

NEW QUESTION 155

- (Topic 4)

A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Chores
- B. Choice
- C. Text
- D. Lookup

Answer: D
