Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1
DRAG DROP - (Topic 4)
You have a basic user security role in a lest environment. You create a canvas app without customization in the environment.
You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them m the correct order.

Actions		Answer Area
Add the app to the solution.		
Export the solution.		
Send the solution to production administrators.		
Select the canvas app in the Maker portal.		
Export the package.		
Send the package to production administrators.		

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions		Answer Area
Add the app to the solution.		Select the canvas app in the Maker portal.
Export the solution.		
Send the solution to production administrators.		Export the package.
Select the canvas app in the Maker portal.		
Export the package.		Send the package to production administrators.
Send the package to production administrators.		

NEW QUESTION 2
DRAG DROP - (Topic 4)
You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.
You need to pick the appropriate solution type for each requirement.
Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once,
more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Requirement	Solution type
Edit existing components of the solution.	Unmanaged
Add new components to the solution.	Unmanaged
Export the solution.	Managed

Box 1: Unmanaged
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any
of the components of the solution.
Box 2: Unmanaged
Box 3: Managed
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting
restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the
Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be
manipulated.

NEW QUESTION 3
DRAG DROP - (Topic 4)
A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.
You are creating an app to manage requests for new products.
The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not
allow for misspellings.
Only two new tables should be created in Microsoft Dataverse:
? Products: Holds the products that can be requested.
? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.

You need to identify the data types to use when building the table columns in Dataverse.
Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Data types	Answer Area	
	Scenario	**Data types**
Lookup	Create a column in the Products table that displays the category of the product	Data type
Choice	Create a column in the Products table for the product ID of the product	Data type
Text	Create a column in the Requests table that allows the user to select form a list of available products	Data type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Text
Text columns can contain text characters. This column type has several format options that will change the presentation of the text.
Box 2: Lookup
When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.
Box 3: Choice
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 4
- (Topic 4)
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
B. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
C. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
D. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
E. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form to First(Accounts).Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
F. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Ne
G. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
H. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
I. Add a display form to Screen_AccountDetail.Set the data source of the form to Account
J. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Answer: AD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 5
- (Topic 4)
You are an app designer for a hotel.
The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.
Where should you create the environment?

A. Power Platform Admin center
B. Power Apps Maker portal
C. Dynamics 365 Admin center

Answer: A

Explanation:
Manage environment in the Power Platform admin center. Reference:
https://docs.microsoft.com/en-us/power-platform/admin/create-environment

NEW QUESTION 6
DRAG DROP - (Topic 4)
A company uses a canvas app.

The finance team and sales team require access to the canvas app. You must perform the following actions:
• Add members of the sales team to the app as users.
• Add members of the finance team to the app as co-owners.
The app must be shareable with current and future team members.
You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.
Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Group types	Answer Area		
Security group		**Activity**	**Group type**
Distribution group		Add members of the sales team to the app as users.	Dynamic group
Dynamic group		Add members of the finance team to app as co-owners.	Security group

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Group types	Answer Area		
Security group		**Activity**	**Group type**
Distribution group		Add members of the sales team to the app as users.	Dynamic group
Dynamic group		Add members of the finance team to app as co-owners.	Security group

NEW QUESTION 7
- (Topic 4)
You create a canvas app.
You need to make the app available to other people in your company.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Grant access to individual users in your company.
B. Share the app with a Microsoft Exchange distribution list.
C. Grant access to a Microsoft Teams team.
D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:
After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it.
Specify each user by name, or specify a security group in Azure Active Directory.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app

NEW QUESTION 8
DRAG DROP - (Topic 4)
You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps.
Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.
You need to configure the elements of the data source.
Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Data elements	Answer Area		
Table		**Data**	**Data element**
View		Time-off dates for all employees	
Record reference		Employee ID number	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Data elements	Answer Area		
Table		**Data**	**Data element**
View		Time-off dates for all employees	Record reference
Record reference		Employee ID number	View

NEW QUESTION 9
DRAG DROP - (Topic 4)
You create an app with multiple screens.
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.
You need to create a reusable gallery that displays information based on the current record.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions	Answer Area
Add a gallery control.	
Add an input property.	
Create a component.	
Add a screen.	
Create a form.	
Add an output property.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
- Create a component
- Add an input property
- Add a gallery control
From https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component step 10 and 11

NEW QUESTION 10
DRAG DROP - (Topic 4)
You are an app and report maker. You provide visualizations for two departments in an organization.
Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.
Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Multi-series	Unstructured answers to free text survey questions.	
Tag		
Stacked column	Real-time column chart that groups complaints by category, urgency, and status.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Tag
Box 2: Multi-series
Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 10
- (Topic 4)
You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team.
Where must you configure this restriction?

A. Dashboard
B. Report

C. Dataset
D. Settings

Answer: C

Explanation:
Restrict access to the dataset.
Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.
Reference:
https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but- useful

NEW QUESTION 15
- (Topic 4)
Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.
You are leaving for a vacation. Another maker will continue customizing the app in your absence.
You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.
What should you export?

A. ununmanaged solution that includes all customizations
B. the default solution
C. a managed solution that includes all customizations
D. the app

Answer: A

Explanation:
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-

NEW QUESTION 16
DRAG DROP - (Topic 4)
You are developing a Power BI report for a company.
The Power BI report must display company performance metrics in Power BI service. The report must include three fields in a visualization. The data for the report exists in a dataset.
The company will display the report on a large television screen during team meetings. You need to create the report.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Select a dataset
Sign in to your Power BI online account, or sign up, if you don't have an account yet. Open the Power BI service.
Get some data and open it in report view.
Box 2: Create a report
Use that data to create visualizations and save it as a report. Box 3: Add a visualization to the report
Box 4: Add the report to a new dashboard
Visualizations (known as visuals for short) display insights that have been discovered in the data. A Power BI report might have a single page with one visual or it might have pages full of visuals. In the Power BI service, visuals can be pinned from reports to dashboards.

NEW QUESTION 21
DRAG DROP - (Topic 4)
You create a canvas app for a store.
The logo must appear as the background image for the app. A loading spinner must display on the screen as the app loads.
You need to add the features to the app.
What should you modify? To answer, drag the appropriate form areas to the correct requests. Each form area may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Screen areas	Feature request	Screen area
Form Gallery	Add logo.	
Screen	Add loading spinner.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Screen
You can add an image to a screen in several different ways. One way is to upload an image to the app, go to the Media tab, and then click on the image to add it to a screen.
Note: Configure graphical elements in your app, including images, photos, and elements of a pen control.
BackgroundImage – The name of an image file that appears in the background of a screen. Applies to the Screen control.
Box 2: Screen
Out Of Box Canvas App, provide a property called LoadingSpinner and LoadingSpinnerColor.
LoadingSpinner property is used to displaying a Canvas App OOB Loader Image unless your screen finishes loading.
Click on the Screen in your Canvas App and then You'll be able to see LoadingSpinner and LoadingSpinnerColor Property.

NEW QUESTION 25
- (Topic 4)
A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.
The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Dataflow
B. Business process flow
C. Power BI Desktop
D. Data gateway

Answer: AD

Explanation:
The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.
Can use the Power Platform dataflows to load entity in CDS with the option to transform data.
Reference:
https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplatform-dataflows-in-power-apps/

NEW QUESTION 30
DRAG DROP - (Topic 4)
DRAG DROP
A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint.
You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source.
You need to shore the app with the users.
What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Actions		Answer Area	Component	Action
Send all users an email invitation.			Canvas app	
Enable Can use permission.			SharePoint connection	
Set the users as co-owners.				
Enable Can edit permission.				

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions		Answer Area	Component	Action
Send all users an email invitation.			Canvas app	Send all users an email invitation.
Enable Can use permission.			SharePoint connection	Enable Can use permission.
Set the users as co-owners.				
Enable Can edit permission.				

NEW QUESTION 35
DRAG DROP - (Topic 4)
DRAG DROP
A company is creating Power Apps apps for their customer service team.
You must create a final released solution to export to their test environment that cannot be changed in the new environment.
You need to determine the types of solutions to use.
Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution type		Answer Area	
Managed		**Condition**	**Solution type**
Unmanaged		Assign a publisher for the first time	Solution type
		Export the solution	Solution type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Unmanaged
Unmanaged solutions are used in development environments while you make changes to your application.
Box 2: Managed
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 36
- (Topic 4)
You are an app maker. You are creating a canvas app. You do not have access to Power BI.
You need to add charts to the app.
Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. pie
B. area
C. funnel
D. column
E. line

Answer: ADE

Explanation:
You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:
* 1. On the Home tab, add a screen.
* 2. On the Insert tab, select Charts, and then select Column Chart.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart

NEW QUESTION 39
DRAG DROP - (Topic 4)
DRAG DROP
A company uses Microsoft Power Platform. Users create charts based on specific needs in
You create a solution in a development environment. You rebuild personal charts of the users inside the solution. All charts must appear on one page.
You need to create a single page that includes all charts without switching to classic. Which three steps should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 41
DRAG DROP - (Topic 4)
DRAG DROP
A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file.
You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 46
HOTSPOT - (Topic 4)
A company uses Microsoft Dataverse to store holiday employee request data.
An HR manager needs a report that displays overview information about the employee requests.
You need to design a report that visualizes request data over time and type.
Which Microsoft Power BI functionalities should you use to complete each step? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Step	Functionality
Create additional relationships between tables	Model view ▼
	Model view
	Data view
	Report view
Change the data type of a column	Data view ▼
	Model view
	Data view
	Report view
Design visuals	Report view ▼
	Model view
	Data view
	Report view
Choose data for import	Navigator ▼
	Data view
	Report view
	Navigator

NEW QUESTION 47
DRAG DROP - (Topic 4)
A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.
You need to create a solution for the apps.
Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Objects

Entity

Component

Component library

Component framework

Requirement

Reuse the custom control for multiple canvas apps.

Receive input data through a custom property.

Object

[ ]

[ ]

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Component library
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.
By creating a component library, app makers easily share and update one or more components with other makers.
Component libraries are containers of component definitions that make it easy to: Discover and search components.
Publish updates.
Notify app makers of available component updates.
Box 2: Component
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 48
- (Topic 4)
A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

A. Lookup
B. Choice
C. Choices
D. Text

Answer: A

NEW QUESTION 53
- (Topic 3)
You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

A. Gallery
B. Combo box
C. Custom component
D. Choices

Answer: D

NEW QUESTION 57
- (Topic 3)
You need to design the data model for the cooking classes.
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data	Component
Dish	Microsoft SharePoint document ▼
	Custom table
	Microsoft SharePoint document
	Global choice
Student type	Connection role ▼
	Connection role
	Custom column
	Lookup column

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Data	Component
Dish	Microsoft SharePoint document ▼
	Custom table
	Microsoft SharePoint document
	Global choice
Student type	Connection role ▼
	Connection role
	Custom column
	Lookup column

NEW QUESTION 59
DRAG DROP - (Topic 3)
You need to select a design approach for the required features.
Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types

Microsoft Power Platform portal page
Power Apps canvas app
Power Virtual Agents chatbot

Answer Area

Requirement	App type
Record student attendance start and end times.	
Ensure that instructors can upload menus.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

App types

| Microsoft Power Platform portal page |
| Power Apps canvas app |
| Power Virtual Agents chatbot |

Answer Area

Requirement	App type
Record student attendance start and end times.	Microsoft Power Platform portal page
Ensure that instructors can upload menus.	Power Apps canvas app

NEW QUESTION 62
HOTSPOT - (Topic 2)
You need to resolve the issues found during testing.
Which option should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Option
Testers see all time entries.	▼ Hierarchical security / Security group / Security role
Testers are able to edit existing time entries.	▼ Control property / Field-level security / Security role
Managers cannot see required information.	▼ Access team template / Field-level security / Hierarchical security

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Box 1: Security role
Scenario: Employees must only be able to access their own time tracking records from the app.
Testers report that they can see time entries in the Time Tracker app, not just their own.
Box 2: Field-level security
Scenario: Employees must only be able to modify time records for the current and previous day.
Testers report that they can edit any existing time entries.
Box 3: Hierarchical security
You use field security tables to apply field-level security, which restricts field access to specified users and teams.

NEW QUESTION 65
- (Topic 1)
You need to resolve the issue for User1.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Option
Submit a status report.	▼ Dynamics 365 mobile app / Power Apps Studio / Power Apps mobile app / Azure mobile app
Edit an existing status report.	▼ Azure SQL Database / Connector / SQL Lite DB / Collections

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
Box 1: Power Apps mobile app Scenario:
User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report.
The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.
You can build offline capabilities in your PowerApps app so your app users can access some data or save some data even when they don't have an internet connection.
Box 2: Connector
Scenario: Azure SQL Database is used to store other data
Use the SQL Server connector to connect to SQL Server, in either Azure or an on- premises database, so that you can manage your data with create, read, update, and delete operations.

NEW QUESTION 67
- (Topic 1)
You need to provide all app components of the application to Tailwind Traders. What should you do?

A. Package the application and flow components into a single solution for export.
B. Run the app checker and flow checker prior to publishing each component for export.
C. Export each component separately but use the same version number for each component.
D. Publish the application and flow solutions at the same time before exporting each one.

Answer: B

Explanation:
Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.
Reference:
https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-includes-rules-canvas-apps-flows

---

NEW QUESTION 69
- (Topic 1)
You publish the first version of the app and solution on November 1, 2020. You need to create the version numbers for the app and the solution.
Which version numbers should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: 1.0.0.0
When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
A solution's version has the following format: major.minor.build.revision. An update must have a higher major, minor, build or revision number than the parent solution. For example, for a base solution version 3.1.5.7, a small update could be a version 3.1.5.8 or a slightly more signficant update could have version 3.1.7.0. A substantially more significant update could be version 3.2.0.0.
Box 2: 20.11.1.1
Scenario:
? You must use the following version control numbering scheme:
- Major: The last two digits of the year the app is packaged
- Minor: Two digits that represent the month when the app is packaged
- Build: A number that is incremented to represent significant changes to the app
- Revision: The incremented revision for a package
New versions of the application must completely replace previous versions of the app.

NEW QUESTION 71
DRAG DROP - (Topic 1)
You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.
Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools

| Solution Checker |
| App Checker |
| Object Detector |
| Preview the app |

Answer Area

Requirement	Tool
Accessibility	Tool
Deployment	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: App Checker
Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse.
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.
Box 2: Solution Checker
Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.
Use solution checker to validate your model-driven apps in Power Apps.

NEW QUESTION 74
DRAG DROP - (Topic 1)
You need to modify the app design to meet the accessibility needs of the sales associates.
Which properties should you configure? To answer, drag the appropriate properties to the correct restrictions. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Properties

| TabIndex |
| DisplayMode |
| AccessibleLabel |
| Tooltip |

Restriction — **Property**

| Design for User2 | |
| Design for User3 | |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
 Graphical user interface, text, application Description automatically generated
Box 1: AccessibleLabel
Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.
User2 is visually impaired and cannot see images. AccessibleLabel is a label for screen readers.
An empty value for Image, Icon, and Shape controls will hide the controls from screen reader users.
Box 2: TabIndex
User3 is unable to use a mouse.
TabIndex determines if the control participates in keyboard navigation.
Keyboard navigation is an important aspect of any app. For many, the keyboard is more efficient than using touch or a mouse. The navigation order should:
Mirror what is seen visually.
Only have a tab stop at controls that are interactive.
Follow either an intuitive across and then down "Z" order or a down and then across "reverse-N" order.

NEW QUESTION 79
HOTSPOT - (Topic 1)
You need to create a flow for sending required emails to the regional manager.
How should you create the flow? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Option	Type

Flow type to use ▼

Instant
Automated
Business Process
Scheduled

Trigger to start flow ▼

HTTP Webhook
Power Apps
Common Data Service when a record is created
Office 365 Outlook Send an email

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user
interface, text, application, email Description automatically generated
Box 1: Business Process
Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.
Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.
Box 2: Common Data Service when a record is created
The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:
? When a row is created, updated, or deleted
? When an action is performed
? When a flow step is run from a business process flow

NEW QUESTION 84
- (Topic 4)
You are creating a canvas app for a company.
The app must access data from a private web service that is provided by the company. You need to set up the connector.
Which connector type should you use?

A. Custom
B. Standard
C. First-party
D. Premium

Answer: A

NEW QUESTION 85
HOTSPOT - (Topic 4)
A coworker creates a canvas app.
The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1
},
{
    Tool: "Screwdriver",
    Quantity: 2
}
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	○	○
A local collection is created to store data if a data source named Toolbox does not already exist.	○	○
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Records are added, not updated.
Box 2: Yes
The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)
DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.
Item(s) - Required. One or more records or tables to add to the data source.
Box 3: No
No records are cleared.

NEW QUESTION 87
DRAG DROP - (Topic 4)
A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components

Column
Table
Row
Data source

Answer Area

Data	Component
Excel data	Component
Customer data	Component
Customer identifier	Component
Product data	Component

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Table
Box 2: Data source Box 3: Column
Box 4: Row

NEW QUESTION 92
- (Topic 4)
You have a Power Platform solution that uses Common Data Service.

You need to secure all fields that support field-level security. Which field can you secure?

A. createdon
B. accountid
C. owninguser
D. description

Answer: D

Explanation:
Which fields can be secured?
Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.
ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser
createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION 95
- (Topic 4)
You create a new solution publisher and include a publisher prefix value.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You can change contact details of a publisher after you create the publisher
B. When you change a solution publisher prefix, you can change the schema name for existing components
C. You can change the schema name of a publisher after creating the publisher
D. You can add a component from one solution to another solution that has a different publisher

Answer: AD

Explanation:
Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution- publisher

NEW QUESTION 96
- (Topic 4)
In a Common Data Service database, you create a canvas app and a custom entity. The
app also reads data from the Account entity in the Common Data Service database.
Entity access permissions will be controlled by the Common Data Service User security role. You create a Common Data Service solution.
You need to replicate the changes to a new Common Data Service database.
Which two components should you include with the canvas app? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Custom entity
B. Account entity
C. Common Data Service User security role
D. Sitemap

Answer: BC

NEW QUESTION 98
- (Topic 4)
A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use.
Sales users only want to see information for their own region. Sales users must call sales
leads within a week of receiving a lead.
You need to recommend a solution for sales users.
Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Instruct users to create personal views that filter by region.
B. Instruct users to filter the view by region.
C. Configure the definition for each view to sort by region.
D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 103
DRAG DROP - (Topic 4)
DRAG DROP
You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.
You need to make the chatbot available to all users in your organization.
Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them m the correct order.

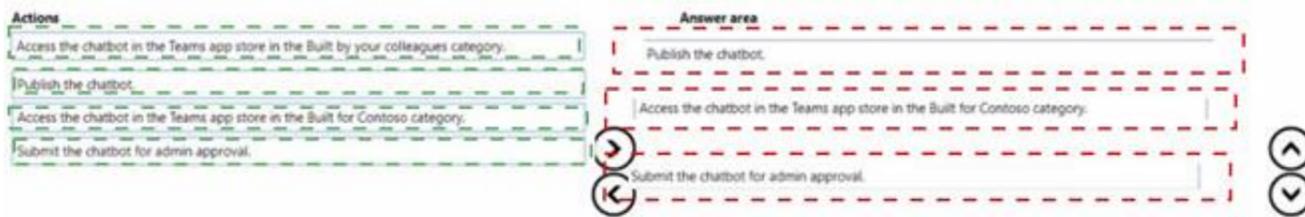

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 107
DRAG DROP - (Topic 4)
You store data about products in two Microsoft Excel worksheets. The data contains duplicate rows.
You need to consolidate data from the two worksheets into a Microsoft Dataverse custom table.
In which order should you perform the actions? To answer, move all actions from the list of

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Upload the worksheets to OneDrive
A data source needs to be specified. The data needs to be available. Step 2: Create a dataflow
Step 3: Create queries for the worksheets
You can shape your data selection into a form that works best for your table using a Power Query editing experience, similar to the Power Query Editor in Power BI Desktop.
Step 4: Add conditional columns to perform checks on the data Step 5: Append the output of the queries

NEW QUESTION 112
DRAG DROP - (Topic 4)
You use Microsoft Dynamics 365 Sales.
Business processes must use data from multiple applications. You need to implement the correct type of automation.
Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 116
- (Topic 4)
You create a canvas app that uses the following resources:
• Power Automate cloud flow

• Custom connector
• Microsoft Dataverse customization
• Connection
You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

A. Custom connector
B. Connection
C. Microsoft Dataverse customization
D. Power Automate cloud flow

Answer: D

NEW QUESTION 119
- (Topic 4)
You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.
After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.
You need to determine why the background color changed.
What are two possible causes for the background color change? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You recently changed the Office 365 theme.
B. You exported a managed copy of the solution and imported the solution as an unmanaged solutio
C. You modified the canvas app in the unmanaged solution.
D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
E. You chose a different theme from the Theme menu inside the canvas app.

Answer: AC

Explanation:
A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.
C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.
Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding

NEW QUESTION 124
- (Topic 4)
You create a canvas app.
You need to ensure that there are no screen reader issues in the app.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 125
- (Topic 4)
The postal service uses a system based on the Microsoft Database to manage the delivery of packages.
To improve the delivery service, the management requires the delivery staff to use personal cell phones to communicate the location and the exact time of each delivery.
You need to design a solution. What should you do?

A. Create a button flow with user input for the delivery time and location
B. Create a UI flow that sends the delivery time and location
C. Create a button flow with full address and timestamp trigger tokens

Answer: B

Explanation:
Button trigger tokens are data points that are known and available to the device on which a button flow is running. These tokens change based on factors such as the current time or the geographic location of the device at a given moment.
Note: For example, if you are running a button flow on a smart phone, it is likely that the phone knows the time at your current location as well as the date and your current address. In this context, the time, date and address where the phone is located are all determined at the time the button flow runs. They are automatically available for use in any button flows that are executed on the device. You can use these trigger tokens to build useful flows that will minimize repetitive tasks such as providing your location to someone or tracking how much time you spent on a particular job/service call.
Reference:
https://docs.microsoft.com/en-us/power-automate/introduction-to-button-trigger-tokens

NEW QUESTION 127
- (Topic 4)
A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Power Platform Admin center
B. Power Apps Maker portal
C. SQL Server Management Studio
D. Visual Studio Code

Answer: BC

Explanation:
There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to- one) relationships:
? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n- relationships

NEW QUESTION 132
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:
? Create an Object Detection custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
To train an object detection model to recognize your objects, you have to gather images that contain those objects.
The first thing you'll do when you create an AI Builder object detection model is to define its domain.
Upload images
Then Train and publish your object detection model
The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prediction-overview https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps

NEW QUESTION 134
HOTSPOT - (Topic 4)
HOTSPOT
Users in your company vote on color choices for marketing materials by using the following canvas app:

Enter new color:

Marine blue

Add color

Color Options

○ Sky blue
● Dark blue
○ Marine blue

Clear Selection

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection
You need to implement the functionality.
Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Action	Power Fx formula
User selects **Add color**.	If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))
	If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))
	If(Value(txtColor.Text) <>"", Collect(ColorList, txtColor.Text))
	If(Value(txtColor.Color) <>"", Collect(ColorList, txtColor.Color))
User selects **Clear Selection**.	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)
	Reset(radioselector); Clear(ColorList)
	Reset(radioselector); Refresh(ColorList)
	Revert(radioselector); Remove(ColorList)
	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects **Add color**.	If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))
	If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))
	If(Value(txtColor.Text) <>"", Collect(ColorList, txtColor.Text))
	If(Value(txtColor.Color) <>"", Collect(ColorList, txtColor.Color))
User selects **Clear Selection**.	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)
	Reset(radioselector); Clear(ColorList)
	Reset(radioselector); Refresh(ColorList)
	Revert(radioselector); Remove(ColorList)
	Revert(radioselector); ClearCollect(ColorList, txtColor.Value)

NEW QUESTION 136
- (Topic 4)
A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.
You are not able to activate the flow. You need to troubleshoot the issue.
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You are not assigned the Power Platform Admin role.
B. You placed all connectors into the Business group within the DLP policy.
C. You placed all connectors into the Non-Business group within the DLP policy.
D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION 139
DRAG DROP - (Topic 4)
You perform repeatable tasks using software installed on a home computer. The operating system includes Microsoft Power Automate Desktop.
You need to decide which tasks to automate using Power Automate Desktop.
Which tasks can you automate? To answer, drag the appropriate can automate responses to the correct tasks. Each can automate response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content
NOTE: Each correct selection is worth one point.

Options		Answer Area		
Yes	No		Task	Can automate
			Move files from one folder to another, rename them, and put into archive.	
			When an email arrives, save attachments from Outlook to your OneDrive folder.	
			Read product prices from an online shop and add them to an Excel file.	
			Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Options		Answer Area		
Yes	No		Task	Can automate
			Move files from one folder to another, rename them, and put into archive.	Yes
			When an email arrives, save attachments from Outlook to your OneDrive folder.	Yes
			Read product prices from an online shop and add them to an Excel file.	Yes
			Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.	Yes

NEW QUESTION 142
DRAG DROP - (Topic 4)
You plan to create apps for a company.
You need to identify the Power Platform tools required.
What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Tools	Answer Area		
Power Virtual Agents bot	**Requirement**		**Tool**
Power Automate	Create an app with a customized user interface that allows users to quickly create support tickets.		Tool
Canvas app	Create an app that uses a guided business process to navigate through all records associated with a support ticket.		Tool
Model-driven app	Send an email to a customer support manager every time a support ticket is created.		Tool
	Create an automated chat tool that guides a customer through the support ticket creation process.		Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Canvas App
Box 2: Model-driven app
Model-driven app design is a component-focused approach to app development. Model- driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.
Box 3: Power Automate
Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.
Box 4: Power Virtual Agents bot
When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 144
- (Topic 4)
You are creating a model-driven app that allows users to create and edit a list of existing accounts.
You need to display a list of all active accounts. Which user interface components should you use?

A. view
B. gallery
C. data table
D. form

Answer: A

Explanation:
Imagine that you have a collection of data (such as a list sales orders, a set of service tickets, or a directory of contacts), and that you want to show this data in your Microsoft PowerApps app in a tabular format, where each column represents a field and each row represents a record. In the past, you might have been able to roughly simulate this visualization, although the process required some effort. However, we've been listening to your requests and are happy to announce that you can now quickly and easily achieve this very typical visualization by using the new Data table control that has been recently added to PowerApps.
Reference:
https://powerapps.microsoft.com/fr-fr/blog/introducing-the-data-table-control/

NEW QUESTION 147
- (Topic 4)
You create a model-driven app for a company. The app will be used to manage events that the company organizes.
The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.
All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.
You need to configure the MarketingTeam and OtherEmployees security roles.
Which three actions should you perform? Each correct selection presents a part of the
NOTE: Each correct selection is worth one point.

A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
E. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.
F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 150
- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Microsoft Power BI report querying Excel file using its path. Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 151
- (Topic 4)
You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.
You need to ensure that you can transfer the flow to another environment. What should you do?

A. Add the flow to the default solution of the development environment and export as a managed solution.
B. Change the environment for the flow.
C. Add the flow to the existing solution.
D. Add the flow to the default solution of the production environment.

Answer: A

Explanation:
It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.
Exporting our Solution
After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the …, selecting Export.
Reference:
https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/

NEW QUESTION 156
- (Topic 4)
Engineers in an organization plan to attend an international product show.
The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.
You need to provide a button flow to streamline the process.
Which two AI Builder models should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Language detection
B. Sentiment analysis
C. Category classification
D. Business card reader
E. Form processing

Answer: AD

Explanation:
International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return"en"instead of"en-US". The response for languages that can't be detected isunknown.
Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps

NEW QUESTION 159
HOTSPOT - (Topic 4)
HOTSPOT
A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:
* Create a model-driven app.
* Design navigation for the app
* Show an approval name field on the form if the amount is greater than $1,000.
Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 164
HOTSPOT - (Topic 4)
A state planning department stores demographic data in a local SQL Server database.
The department uses a local report server to analyze the data for land development purposes.
You need to create a visual to display the demographic data.
Which component should you use? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Component
Visual control.	Filled map ▼
	Filled map
	Shape map
	ArcGIS map
Mandatory data for the visual control.	Latitude and Longitude ▼
	Location
	Latitude and Longitude
	Data Category

NEW QUESTION 166
DRAG DROP - (Topic 4)
You are designing a canvas app that will be used by all users including users who have
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Outcomes

Not visible to any users
Visible to sighted users only
Visible to screen-reader users only
Visible to both sighted and screen-reader users

Answer Area

Action	Outcome
Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Set the Color and other related properties of a control to transparent.	Outcome
Set the Height and Width properties of a control to **1**.	Outcome

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Outcomes

Not visible to any users
Visible to sighted users only
Visible to screen-reader users only
Visible to both sighted and screen-reader users

Answer Area

Action	Outcome
Set the values for the X and Y properties of a control to move the control off-screen.	Visible to sighted users only
Set the Color and other related properties of a control to transparent.	Visible to screen-reader users only
Set the Height and Width properties of a control to **1**.	Not visible to any users

NEW QUESTION 170
- (Topic 4)
DRAG DROP
A company uses Power Apps and Microsoft Dataverse.
The company has three solutions that you must move to a target environment:
• One solution is created for security roles. You must be able to add roles to the solution in the target environment
• One solution is created for table additions and modifications. Table structures must be updated in the solution in the target environment.
• One solution is for customizations. The custom actions must not be modified in the solution in the target environment
You need to create the solutions.
Which type of solutions should you create? To answer, drag the appropriate solutions to the correct requirements- Each solution may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 175
HOTSPOT - (Topic 4)

A company uses several forms for biannual performance evaluations. The company several performance areas that have a score of 1-10. A paragraph explains the score.

The company must scan completed performance evaluations into a Common Data Service entity by using a Power Apps app. The information in the documents must automatically map to entities and convert into quantifiable information.

If any key phrases in the scored topics cause concern, the company must follow a series of actions to prepare for a follow up.

You need to extract the information and perform the actions when the evaluations are scanned.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Convert the evaluations from images to data	AI Builder Power BI Dataflows Business rules
Convert a form processing variable to an integer	Initialize variable Add dynamic content Append to string variable Extract entities and their types from text
Use the flow action to convert a form processing variable to an integer	Scope Do until Condition Apply to each

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: AI Builder
The object detection component of AI Builder for PowerApps takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.
Box 2: Extract entities and their types from text
The Entity extraction prebuilt model identifies and classifies key elements from text into pre-defined entities. You can use the prebuilt model out of the box in power apps and power automate.
Box 3: Scope
Scope is a simple way to put similar actions and conditions together like a Stage.

NEW QUESTION 177
- (Topic 4)
You create a canvas app named Hardware Order that suggests computer hardware to customers.
A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.
You need to configure the business rule.
Which two actions should you perform? Each correct answer presents part of the complete solution.
NOTE: Each correct selection is worth one point.

A. Set the scope of the business rule to Entity.
B. Add a Recommendation action and configure it to enter the order type.
C. Set the scope of the business rule to All Forms.
D. Use the following condition expression:(OrderType Does not begin with [test]) AND (Modified By Does not contain data)

Answer: AD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 182
HOTSPOT - (Topic 4)
A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

Share Company App

Enter a name, email address, or Everyone

Shared with   Sort by Name ⌄

BJ Bill Jones
Owner

JS Jim Smith   ✕
Co-owner

✔ **PU** Power Users   ✕
User

Power Users

This User can use this app

☐ Co-owner

Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

Jim Smith

This User can use this app

☑ Co-owner

Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	○
When using the canvas app, a member of the Power Users group can see version 4.	○	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	○
If Jim Smith edits the canvas app he will be editing version 4.	○	○

A. Mastered
B. Not Mastered

Answer: A
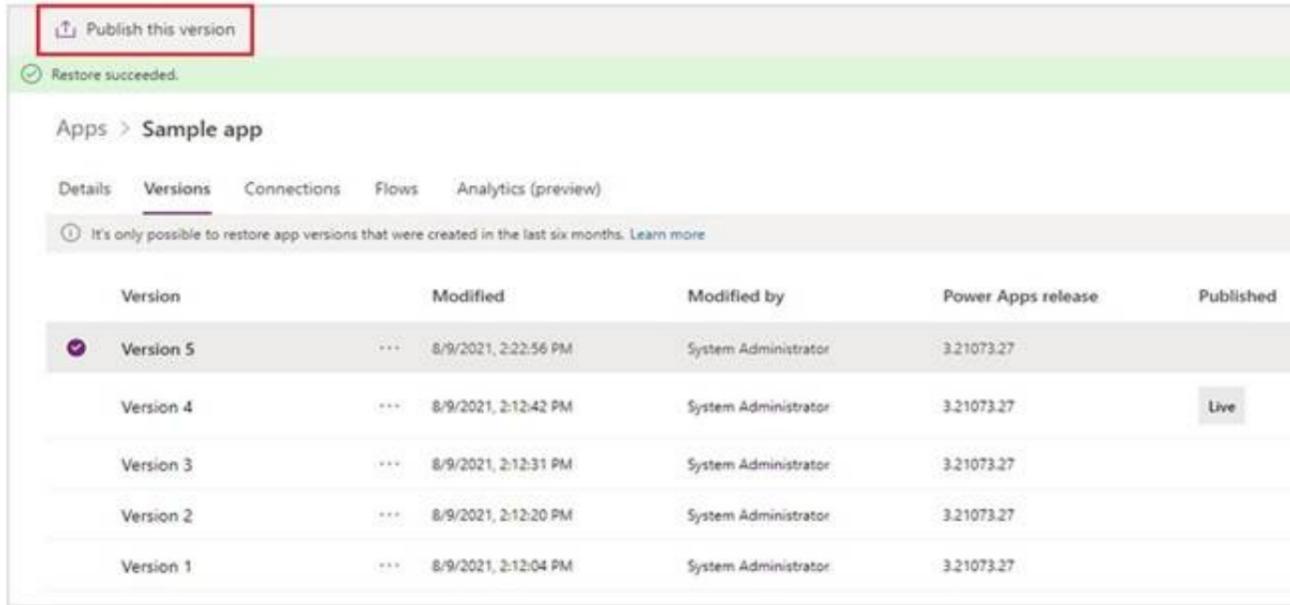

Explanation:
Box 1: No
They can only use the app.
Box 2: Yes
Box 3: No
You would need to publish Version 2 to make it live.
Note: If you want to publish the restored version, select Publish this version, and then select Publish this version when prompted to confirm.

Notice the published restore version that shows up as Live.

Box 4: Yes
The most recent version of any app is available only to those who have edit permissions for it.

NEW QUESTION 185
- (Topic 4)
You create a personal view.
You need to ensure that other users can access the view. What should you do?

A. Email the users a link to the view.
B. Set the view as the default view.
C. Share the view with the users.
D. Assign the view to the users.

Answer: C

NEW QUESTION 189
HOTSPOT - (Topic 4)
HOTSPOT
The customer service team of a company uses a model-driven app to log customer interactions. The app contains two tables: one to track customer interactions and one to track products.
The team requires an interactive dashboard to display the activities. The dashboard must display the products that have the most complaints. Each chart must display the associated data.
You need to create the dashboard-
Which features should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 192
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Create a custom action that has defined dataflows.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Common Data Service workflow with a PowerQuery on the data entity.
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows

NEW QUESTION 195
- (Topic 4)
You are creating an employee directory canvas app. The app must display name, address,
and a photo of each employee. You need to select a control type that will display the

A. Address input
B. List box
C. Gallery
D. Data table

Answer: C

NEW QUESTION 200
HOTSPOT - (Topic 4)
A company is building a Power Apps app to track key project tasks.
Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.
For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.
How should you configure the app? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Question	Response

Where do you enter the formula to change the button color?

On the RiskStatus slider.
On the RiskLevel button.
In the variables of the Power Apps app.
On the OnStart property of the Power Apps app.

Which formula should you use?

If (RiskStatus.Value > 75) (return Red;)
If (RiskStatus.Value > 75, Red, Green)
If (RiskStatus.Value > 75 ? Red : Green)
RiskLevel.Fill = RiskStatus.Value > 75 ? Red : Green;

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: On the RiskLevel button.
On the RiskLevel button fill property.
Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;
Most every type of control in a Power App, has a Fill property, for the fill color.

NEW QUESTION 202
HOTSPOT - (Topic 4)
HOTSPOT
Inspectors for a city building department use a Microsoft Teams channel, inspectors use SharePoint to view construction bylaws, rules, and regulations.
The city clerk email inspectors links to new bylaw proposal, inspectors vote on the proposals and provide additional feedback.
You need to demonstrate to the city clerk how they can automate the process
Which option should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Flow element	Option
Type of flow.	Cloud flow Desktop flow Business process flow
Trigger type.	Manually trigger a flow. For a selected message in Microsoft Teams. For a selected file in SharePoint. When a flow is run from a business process flow.
Flow step to replace emailing the links.	Get changes for an item in SharePoint. Post an adaptive card to a channel and wait for a response. Post a choice of options to a user in Teams. Send an email with options.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 205

- (Topic 4)
You are designing an interactive report for a model-driven app. The report will use more than five million records. The query that retrieves data for the report requires more than five minutes to complete.
You need to create the report. Which option should you use?

A. Interactive dashboard
B. Power BI
C. Standard dashboard

Answer: B

NEW QUESTION 209

- (Topic 4)
A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

A. Flow button for mobile
B. Power Apps step with trigger conditions
C. New Microsoft Outlook task
D. Condition step

Answer: A

NEW QUESTION 211

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.
Development and testing must be performed using production data. Multiple testers must be used at each testing stage.
You need to provision and configure new environments for development and testing. Solution:
? Provision a trial environment named T1 and a sandbox environment named S1.
? Copy the production environment to T1 and S1.
? Use T1 for development and S1 for testing.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Using trial environments, companies and customers can try out new features and solutions. Do not use a trial environment for development.
A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/trial-environments https://docs.microsoft.com/en-us/power-platform/admin/sandbox-environments

NEW QUESTION 214

- (Topic 4)
A company is using Microsoft Power Platform and Microsoft Teams to approve work contracts.
A manager must view all approved contracts in the past year that the company sent or received. The manager must approve any pending contracts. The solution must minimize effort.

You need to recommend a solution for the company. What should you recommend?

A. Create a Microsoft Teams team with a tab that exposes all approvals.
B. Install the Microsoft Teams approvals app.
C. Embed a Power Apps app within a Microsoft Teams channel.
D. Create a Power BI dashboard that includes all approval requests.
E. Embed a SharePoint list into a Microsoft Teams channel.

Answer: B

NEW QUESTION 217
DRAG DROP - (Topic 4)
You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types
Canvas app
Model-driven app
Embedded canvas app

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

A. Mastered
B. Not Mastered

Answer: A

Explanation:

App types
Canvas app
Model-driven app
Embedded canvas app

Answer Area

Group	App type
Reception area staff	Canvas app
Medical staff	Embedded canvas app
Cleaning staff	Model-driven app

NEW QUESTION 219
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app.
Solution:
? Add a display form to Screen_AccountDetail.
? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
? Set the data source of the form to Accounts.
? Set the Item property of the form to Selected.
? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
If you add a Display form control, the user can display all fields of a record or only the fields that you specify.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form- detail

NEW QUESTION 222
- (Topic 4)
You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.
You plan to deploy the solution to Canada.
You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the
solution.
NOTE: Each correct selection is worth one point.

A. View results in the Service Trust portal.
B. Check the results of the Solution checker.
C. Identify regulations for the region where the tenant resides.
D. Identify all regulations for the region where the Common Data Service database resides.
E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:
A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.
D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.
Reference:
https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust- portal

NEW QUESTION 227
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:
? Create a Prediction custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead create an Object Detection custom model
Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prediction-overview

NEW QUESTION 232
- (Topic 4)
A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able 10 provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

A. Chores
B. Choice
C. Text
D. Lookup

Answer: D
