

# Exam Questions MD-101

Managing Modern Desktops (beta)

<https://www.2passeasy.com/dumps/MD-101/>

**NEW QUESTION 1**

- (Exam Topic 4)

You use the Antimalware Assessment solution in Microsoft Azure Log Analytics.

From the Protection Status dashboard, you discover the computers shown in the following table.

Name	Issue
Computer1	No real time protection
Computer2	Not reporting

You verify that both computers are connected to the network and running.

What is a possible cause of the issue on each computer? To answer, drag the appropriate causes to the correct computers. Each cause may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Possible Causes	Answer Area
The Microsoft Monitoring Agent is uninstalled.	<div style="display: flex; flex-direction: column; gap: 20px;"> <div style="display: flex; align-items: center;"> <div style="margin-right: 10px;">Computer1:</div> <div style="border: 1px dashed gray; padding: 10px; flex-grow: 1;">Possible Cause</div> </div> <div style="display: flex; align-items: center;"> <div style="margin-right: 10px;">Computer2:</div> <div style="border: 1px dashed gray; padding: 10px; flex-grow: 1;">Possible Cause</div> </div> </div>
The Microsoft Windows Malicious Software Removal Tool is installed.	
Windows Defender Application Guard is misconfigured.	
Windows Defender is disabled.	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/ga-ie/azure/security-center/security-center-install-endpoint-protection>

**NEW QUESTION 2**

- (Exam Topic 4)

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains Windows 10 devices that are managed by using Microsoft Endpoint Configuration Manager.

You plan to deploy Microsoft 365 Apps for enterprise to the devices by using Configuration Manager. You create a Configuration.xml file as shown in the following exhibit.

```
<Configuration ID="67e*0d4f-814a-4466-9e3c-1388d66a527c">
  <Add OfficeClientEdition="64" Channel="Current" OfficeMgmtCOM="TRUE">>
    <Product ID="0365ProPlusRetail">
      <Language ID="MatchOS" />
      <ExcludeApp ID="Access" />
      <ExcludeApp ID="Groove" />
      <ExcludeApp ID="Lync" />
      <ExcludeApp ID="Publisher" />
    </Product>
  </Add>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
  <Property Name="SCLCacheOverride" Value="0" />
  <Property Name="AUTOACTIVATE" Value="0" />
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="DeviceBasedLicensing" Value="1" />
  <RemoveMSI />
  <AppSettings>
    <Setup Name="Company" Value="Contoso.com" />
  </AppSettings>
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="\\Server1\Office" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

Microsoft 365 Apps for enterprise will be installed from [answer choice]

New Microsoft Office feature updates will be available to devices [answer choice]

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/deployoffice/office-deployment-tool-configuration-options> <https://docs.microsoft.com/en-us/deployoffice/overview-update-channels#semi-annual-enterprise-channel-overv>

**NEW QUESTION 3**

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- > Platform: Windows 10
- > Protected apps: App1
- > Exempt apps: App2
- > Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.  
 Which devices will apply Policy1?

- A. Device1, Device2, Device4, and Device5
- B. Device1, Device4, and Device5 only
- C. Device4 and Device5 only
- D. Device1, Device3, Device4 and Device5

**Answer:** A

**Explanation:**

Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2. Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

**NEW QUESTION 4**

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Group
Device1	Windows 10	Group1, Group2
Device2	Android	Group2
Device3	iOS	Group2, Group3

You create device configuration profiles in Intune as shown in the following table.

Name	Platform	Minimum password length
Profile1	Windows 10 and later	4
Profile2	Android	5
Profile3	iOS	6
Profile4	Android	7
Profile5	iOS	8

You assign the device configuration profiles to groups as shown in the following table.

Group	Profile
Group1	Profile3
Group2	Profile1, Profile2, Profile4
Group3	Profile3, Profile5

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes**

**No**

Device1 must have a minimum password length of seven characters.

Device2 must have a minimum password length of seven characters.

Device3 must have a minimum password length of six characters.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

If a compliance policy evaluates against the same setting in another compliance policy, then the most restrictive compliance policy setting applies.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

**NEW QUESTION 5**

- (Exam Topic 4)

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices. You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy
- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

**NEW QUESTION 6**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.

- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

**Answer:** D

**Explanation:**

Just install, and use Defender for Endpoint on Mac. Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

**NEW QUESTION 7**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the computers shown in the following table.

Name	Azure AD join type	Enrolled in Microsoft Intune	Operating system	Processor type
Computer1	Azure Active Directory (Azure AD) registered	Yes	Windows 10 Pro	x64
Computer2	Azure Active Directory (Azure AD) joined	No	Windows 8.1	x86

You plan to use Windows Autopilot.  
 You need to ensure that the computers support automatic registration in Windows Autopilot.  
 What should you do for each computer? To answer, select the appropriate options in the answer area.

**Computer1:**

- Delete the Azure AD registration.
- Join the computer to Azure AD.
- Remove the computer from Intune.
- Upgrade the operating system to Windows 10 Enterprise.

**Computer2:**

- Enroll the computer in Intune.
- Remove the computer from Azure AD.
- Upgrade to an x64 processor.
- Upgrade the operating system to Windows 10 Enterprise.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Join the computer to Azure AD.  
 You can deploy hybrid Azure AD-joined devices by using Intune and Windows Autopilot. Box 2: Upgrade the operating system to Windows 10 Enterprise  
 The device to be enrolled must follow these requirements:  
 Use Windows 11 or Windows 10 version 1809 or later.  
 Reference: <https://docs.microsoft.com/en-us/mem/autopilot/windows-autopilot-hybrid>

**NEW QUESTION 8**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.  
 You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 and Device3 only
- B. Device3 only
- C. Device2 only
- D. Device 1, Device2, and Device3

**Answer:** B

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

**NEW QUESTION 9**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD)

You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computer.

What should you use?

- A. Roaming user profiles
- B. Folder Redirection
- C. The Microsoft SharePoint Migration Tool
- D. Enterprise State Roaming

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs>

**NEW QUESTION 10**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: From the Microsoft Endpoint Manager admin center, you create a device compliance policy and assign the policy to the computers. After 24 hours, you view the Device compliance report in Intune.

Does this meet the goal?

- A. Yes
- B. No

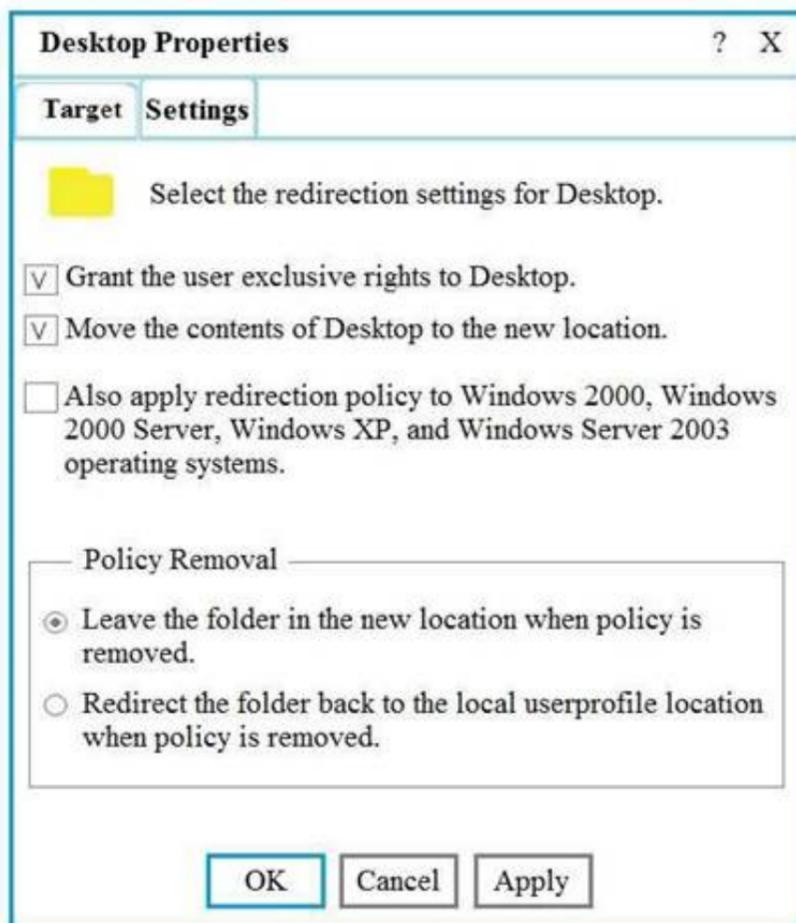

**Answer:** B

**NEW QUESTION 10**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10.

Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

**Answer:** BC

**Explanation:**

The OneDrive Known Folder Move Group Policy objects won't work if you previously used Windows Folder Redirection Group Policy objects to redirect the Documents, Pictures, or Desktop folders to a location other than OneDrive. Remove the Windows Group Policy objects for these folders before you enable the OneDrive Group Policy objects. The OneDrive Group Policy objects won't affect the Music and Videos folders, so you can keep them redirected with the Windows Group Policy objects. For info about Windows Folder Redirection, see Deploy Folder Redirection with Offline Files."

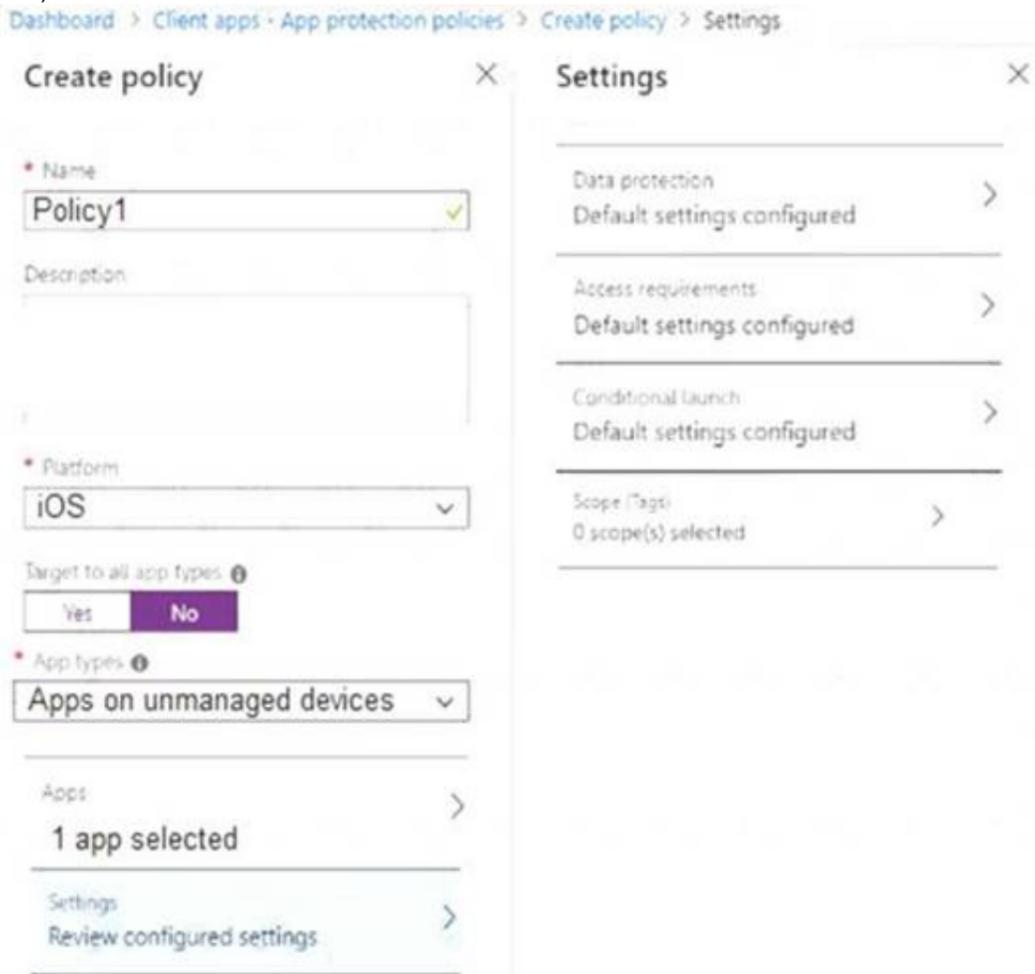

**NEW QUESTION 13**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

Users have iOS devices that are not enrolled in Microsoft 365 Device Management.

You create an app protection policy for the Microsoft Outlook app as shown in the exhibit. (Click the Exhibit tab.)

You need to configure the policy to meet the following requirements:

- > Prevent the users from using the Outlook app if the operating system version is less than 12.0.0.
- > Require the users to use an alphanumeric passcode to access the Outlook app.

What should you configure in an app protection policy for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Prevent the users from using Outlook if the operating system version is less than 12.0.0:

	▼
Access requirements	<input type="checkbox"/>
Conditional launch	<input type="checkbox"/>
Data protection	<input type="checkbox"/>
Scope	<input type="checkbox"/>

Require the users to use an alphanumeric passcode to access Outlook:

	▼
Access requirements	<input type="checkbox"/>
Conditional launch	<input type="checkbox"/>
Data protection	<input type="checkbox"/>
Scope	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/app-protection-policy-settings-ios>

**NEW QUESTION 16**

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
On Server1:
Import the Deployment Image Servicing and Management (DISM) PowerShell module.
Import the WindowsAutopilotIntune Windows PowerShell module.
Install the Windows Assessment and Deployment Kit (Windows ADK).
Install the Windows Deployment Services server role.
```

```
Add to the MDT deployment share:
Windows 10 image and package only
Windows 10 image and task sequence only
Windows 10 image only
Windows 10 image, task sequence, and package
```

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:  
 Open an elevated Windows PowerShell prompt and enter the following command: Install-WindowsFeature -Name WDS -IncludeManagementTools WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All  
 Box 2: Windows 10 image and task sequence only Create the reference image task sequence  
 In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.  
 Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

**NEW QUESTION 19**

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com that syncs to Azure Active Directory (Azure AD). Azure AD contains the users shown in the following table.

Name	Source	Member of
User1	Azure AD	Group1
User2	Windows Active Directory	Group2

You assign Windows 10 Enterprise E5 licenses to Group1 and User2. You add computers to the network as shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10 Pro	Azure AD
Computer2	Windows 10 Pro	Active Directory
Computer3	Windows 8.1	Active Directory

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes**                      **No**

- If User1 signs in to Computer1, Computer1 will be upgraded to Windows 10 Enterprise E5 automatically.  Yes       No
- If User2 signs in to Computer2, Computer2 will be upgraded to Windows 10 Enterprise E5 automatically.  Yes       No
- If User2 signs in to Computer3, Computer3 will be upgraded to Windows 10 Enterprise E5 automatically.  Yes       No

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

**NEW QUESTION 24**

- (Exam Topic 4)

You use Windows Defender Advanced Threat Protection (Windows Defender ATP) to protect computers that run Windows 10. You need to assess the differences between the configuration of Windows Defender ATP and the Microsoft recommended configuration baseline. Which tool should you use?

- A. Windows Defender Security Center
- B. Windows Analytics
- C. Windows Defender ATP Power BI app
- D. Microsoft Secure Score

**Answer:** D

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/overview-securesco>

**NEW QUESTION 28**

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 500 laptops that run Windows 8.1 Professional. The users of the laptops work from home.

Your company uses Microsoft Intune, the Microsoft Deployment Toolkit (MDT), and Windows Configuration Designer to manage client computers.

The company purchases 500 licenses for Windows 10 Enterprise.

You verify that the hardware and applications on the laptops are compatible with Windows 10.

The users will bring their laptop to the office, where the IT department will deploy Windows 10 to the laptops while the users wait.

You need to recommend a deployment method for the laptops that will retain their installed applications. The solution must minimize how long it takes to perform the deployment.

What should you include in the recommendation?

- A. an in-place upgrade
- B. a clean installation by using a Windows Configuration Designer provisioning package
- C. Windows AutoPilot
- D. a clean installation and the User State Migration Tool (USMT)

**Answer:** A

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios#in-place-upgrade>

**NEW QUESTION 30**

- (Exam Topic 4)

You have a server that runs the Microsoft Deployment Toolkit (MDT). You have computers that run Windows 8.1 or Windows 10.

You have a Microsoft 365 tenant. Microsoft 365 Enterprise E5 licenses are assigned to all users.

You need to recommend a strategy to install Windows 10 on the Windows 8.1 computers. The installation must retain the user files, settings, and supported applications. What should you recommend?

- A. Refresh the Windows 8.1 computers by using Windows 10 and use the User State Migration Tool (USMT).
- B. Perform an in-place upgrade of Windows 8.1 to Windows 10.
- C. Refresh the Windows 8.1 computers by using Windows 10 and use Windows Autopilot white glove service to finalize the installation.
- D. Refresh the Windows 8.1 computers by using Windows 10 and use Windows Autopilot user-driven mode.

**Answer:** B

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-m365>  
<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

**NEW QUESTION 35**

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Endpoint Manager admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use:

Workbooks
Log Analytics
Endpoint analytics
Security baselines

Minimum number of devices:

1
5
10
25

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/analytics/scores#understanding-scores>

**NEW QUESTION 40**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.

The research department has several computers that have specialized hardware and software installed. You need to prevent the video drivers from being updated automatically by using Windows Update.

Solution: From the Windows Update settings in a Group Policy object (GPO), you enable Do not include drivers with Windows Updates.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

**Explanation:**

References:

[https://www.stigviewer.com/stig/microsoft\\_windows\\_server\\_2012\\_member\\_server/2013-07-25/finding/WN12](https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12)

**NEW QUESTION 41**

- (Exam Topic 4)

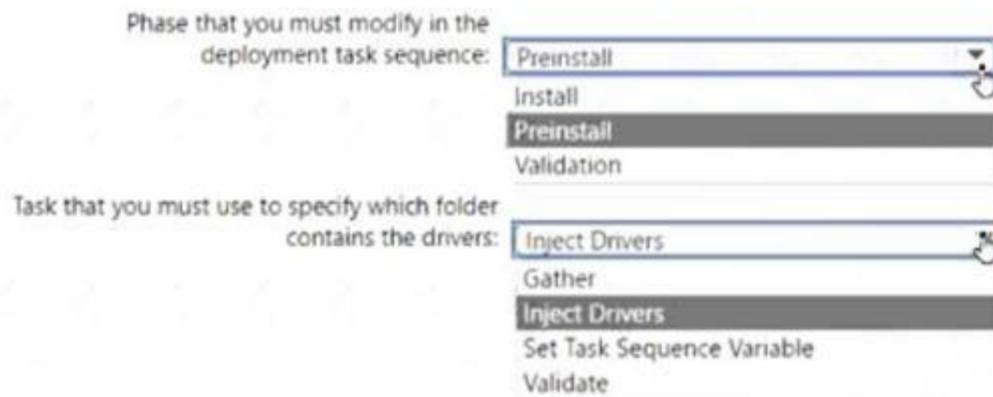

You manage a Microsoft Deployment Toolkit (MDT) deployment share named DS1. OS! contains an

Out-of-Box Drivers folder named Windows 10 x64 that has subfolders in the format of (make name)\ (model name).

You need to modify a deployment task sequence to ensure that all the drivers in the folder that match the make and model of the computers are installed without using PnP detection or selection profiles.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Preinstall PREINSTALL

Completes any tasks that need to be done (such as creating new partitions) before the target operating system is deployed.

Box 2: Inject Drivers Inject Drivers

This task sequence step injects drivers that have been configured for deployment to the target computer.

The unique properties and settings for the Inject Drivers task sequence step type are:

\* Property: TypeSet this read-only type to Inject Drivers.

\* Settings

Install only matching drivers: Injects only the drivers that the target computer requires and that match what is available in Out-of-Box Drivers

Install all drivers: Installs all drivers

Selection profile: Installs all drivers in the selected profile

Reference: <https://docs.microsoft.com/en-us/mem/configmgr/mdt/toolkit-reference>

**NEW QUESTION 45**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-deployment-scenarios-and-tools>

**NEW QUESTION 46**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune. You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. To configure Microsoft Defender Antivirus, create a device configuration profile and configure theEndpoint protection settings.
- B. To configure Microsoft Defender Firewall, crate a device configuration profile and configure the Device restrictions settings.
- C. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configureWindows Defender Firewall with Advanced Security.
- D. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configureWindows Defender Antivirus settings.
- E. To configure Microsoft Defender Antivirus, create a device configuration profile and configure theDevice restrictions settings.
- F. To configure Microsoft Defender Firewall, create a device configuration profile and configure theEndpoint protection settings.

**Answer:** AF

**Explanation:**

F: With Intune, you can use device configuration profiles to manage common endpoint protection security features on devices, including:

- > Firewall
- > BitLocker
- > Allowing and blocking apps
- > Microsoft Defender and encryption Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-security-policy#create-an-endpoint-security-polic>

**NEW QUESTION 47**

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant, a Microsoft System Center Configuration Manager (Current Branch) environment, and a Microsoft 365 subscription.

You have computers that run Windows 10 as shown in the following table.

Name	Managed by Configuration Manager	Domain membership
Computer1	Yes	Active Directory-joined
Computer2	Yes	Hybrid Azure AD-joined
Computer3	Yes	Azure AD-joined

You plan to use Microsoft 365 Device Management.

Which computers support co-management by Configuration Manager and Device Management?

- A. Computer1, Computer2, and Computer3
- B. Computer3 only
- C. Computer1 and Computer2 only
- D. Computer2 only

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/overview>

**NEW QUESTION 50**

- (Exam Topic 4)

Your company has an infrastructure that has the following:

- > A Microsoft 365 tenant
- > An Active Directory forest
- > Microsoft Store for Business
- > A Key Management Service (KMS) server
- > A Windows Deployment Services (WDS) server
- > A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

- Azure Active Directory admin center
- Microsoft Store for Business
- Volume Activation Management Tool console
- Windows Deployment Services console

Required information from each computer:

- Device serial number and hardware hash
- MAC address and computer name
- Volume License Key and computer name

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

**NEW QUESTION 52**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Random Delay. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

**NEW QUESTION 53**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Link your managed Google Play account to Intune.
- C. Configure the Partner device management settings.
- D. Add a certificate connector.

**Answer:** B

**Explanation:**

Connect your Intune account to your Managed Google Play account.

Managed Google Play is Google's enterprise app store and sole source of applications for Android Enterprise in Intune. You can use Intune to orchestrate app deployment through Managed Google Play for any Android Enterprise scenario (including personally-owned work profile, dedicated, fully managed, and corporate-owned work profile enrollments).

Reference: <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/enrollment/connect-intune-android-enterprise>

**NEW QUESTION 58**

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant and computers that run Windows 10.

The company uses Microsoft Intune to manage the computers. The Azure AD tenant has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	None

The device type restrictions in Intune are configured as shown in the following table:

Priority	Name	Allowed platform	Assigned to
1	Policy1	Android, iOS, Windows (MDM)	None
2	Policy2	Windows (MDM)	Group2
3	Policy3	Android, iOS	Group1
Default	All users	Android, Windows (MDM)	All users

User3 is a device enrollment manager (DEM) in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll a Windows device in Intune.	<input type="radio"/>	<input type="radio"/>
User2 can enroll a Windows device in Intune.	<input type="radio"/>	<input type="radio"/>
User3 can enroll an iOS device in Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

No, Yes, No

Policy 1 - Priority 1 (Android, iOS, Windows) Applied to None Policy 2 - Priority 2 (Windows) Applied to Group 2 Policy 3 - Priority 3 (Android) Applied to Group 1  
 User 1 is in G1, so they cannot enroll Windows devices. User 2 is in both G1 & G2, G2 has P2 with a Pri.2 which means, even though they are in G1, G1 has a pri.3, so P3 will not apply User 3 is not a member of any group so the Default will apply. Policy 1 is assigned to NONE, default is assigned to All users, therefore they can NOT enroll iOS as default is only Android & Win.

References:

<https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-android>

**NEW QUESTION 60**

- (Exam Topic 4)

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share.

User1 signs in to Computer1 and performs the following tasks:

- > Configures screen saver to start after five minutes of inactivity
- > Modifies the default save location for Microsoft Word
- > Creates a file named File1.docx on the desktop
- > Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/folder-redirection-rup-overview>

**NEW QUESTION 61**

- (Exam Topic 4)

You are licensed for Microsoft Endpoint Manager.

You use Microsoft Endpoint Configuration Manager and Microsoft Intune.

You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

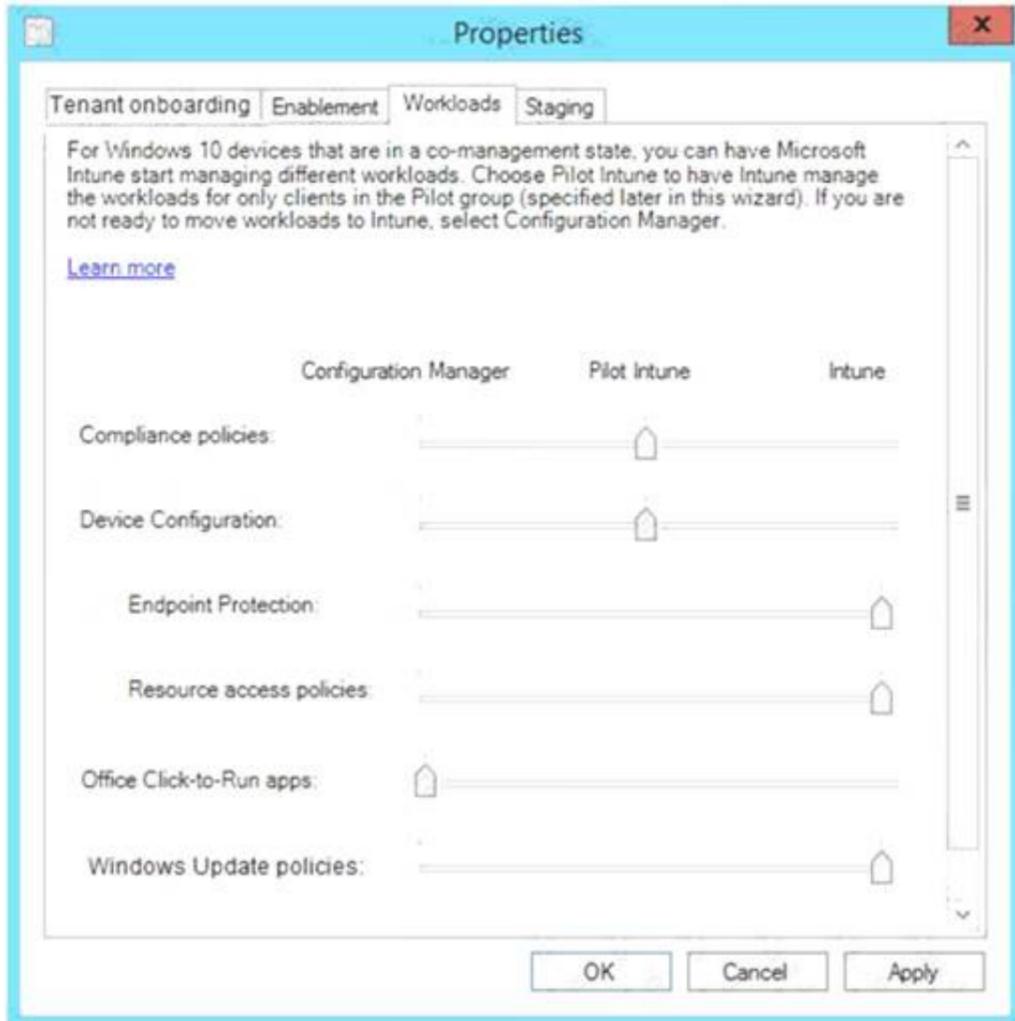

In Configuration Manager, you enable co-management and configure the following settings:

- > Automatic enrolment in Intune: Pilot
- > Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- > Compliance policies: Collection2
- > Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Statements**

**Yes**

**No**

You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device1.

You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device2.

You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device3.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads>

**NEW QUESTION 65**

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

### Delivery Optimization

Windows 10 and later

Basics **Configuration settings** Assignments

If you already configured and deployed Delivery Optimization download mode in Windows 10 update rings, before you begin, go to Software updates – Windows 10 update rings and migrate your existing settings.

**NEW QUESTION 70**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure Enterprise State Roaming. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settingsrefere>

**NEW QUESTION 72**

- (Exam Topic 4)

You use Windows Admin Center to remotely administer computers that run Windows 10.

When connecting to Windows Admin Center, you receive the message shown in the following exhibit.

## This site is not secure

This might mean that someone's trying to fool you or steal any info you send to the server. You should close this site immediately.

 [Go to your Start page](#)

Details

Your PC doesn't trust this website's security certificate.

Error Code: DLG\_FLAGS\_INVALID\_CA

[Go on to the webpage](#) (Not recommended)

You need to prevent the message from appearing when you connect to Windows Admin Center. To which certificate store should you import the certificate?

- A. Personal
- B. Trusted Root Certification Authorities
- C. Client Authentication Issuers

**Answer:** A

**Explanation:**

Reference:

<https://social.technet.microsoft.com/Forums/en-US/6b3abb8e-007e-4047-bd30-2946b9c3aaba/windows-admin-c>

**NEW QUESTION 75**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

References:

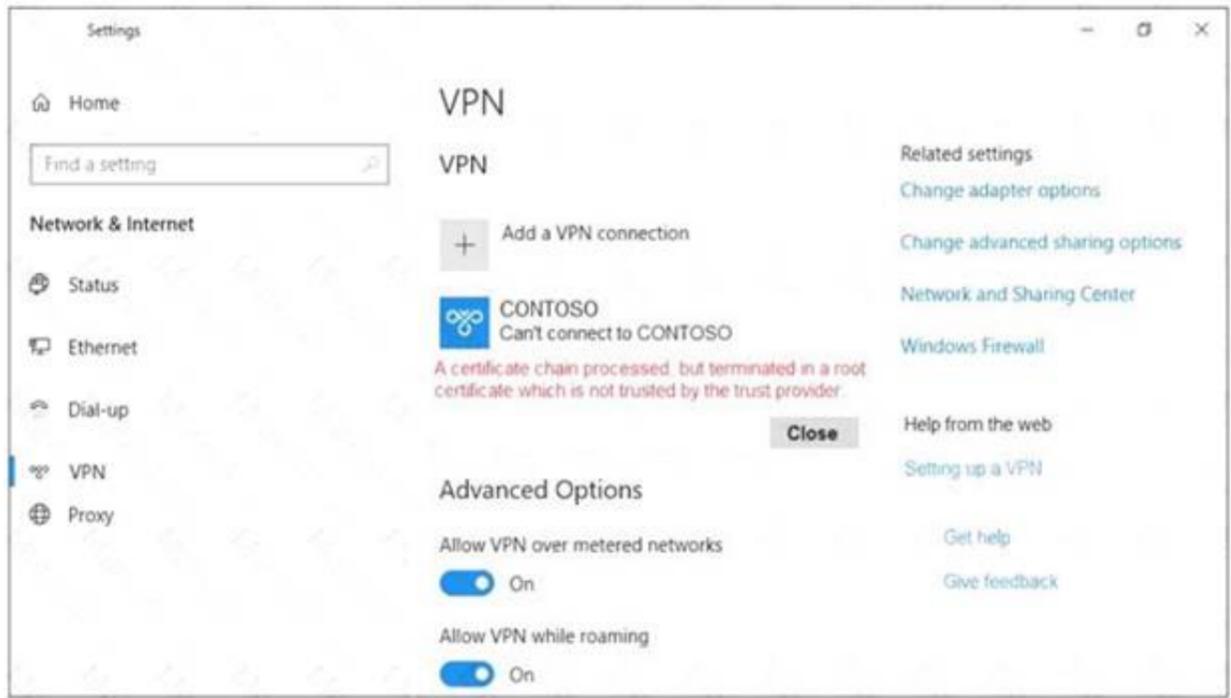

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

**NEW QUESTION 80**

- (Exam Topic 4)

You are configuring an SSTP VPN.

When you attempt to connect to the VPN, you receive the message shown in the exhibit. (Click the Exhibit tab.)

What should you do to ensure that you can connect to the VPN?

- A. Change the VPN type
- B. Generate a computer certificate from the root certification authority (CA)
- C. Install the root certificate

**Answer:** B

**NEW QUESTION 83**

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed in three sites as shown in the following table.

MDT instance name	Site	Default gateway
MDT1	New York	10.1.1.0/24
MDT2	London	10.5.5.0/24
MDT3	Dallas	10.4.4.0/24

You use Distributed File System (DFS) Replication to replicate images in a share named Production. You configure the following settings in the Bootstrap.ini file.

```
[Settings] Priority=DefaultGateway, Default [DefaultGateway] 10.1.1.1=NewYork 10.5.5.1=London
[NewYork] DeployRoot=\\MDT1\Production$ [London] DeployRoot=\\MDT2\Production$ KeyboardLocale=en-gb
[Default]
DeployRoot=\\MDT3\Production$ KeyboardLocale=en-us
```

You plan to deploy Windows 10 to the computers shown in the following table.

Name	IP address
LT1	10.1.1.240
DT1	10.5.5.115
TB1	10.2.2.193

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
TB1 will download the image from MDT3.	<input type="radio"/>	<input type="radio"/>
DT1 will have a KeyboardLocale of en-gb.	<input type="radio"/>	<input type="radio"/>
LT1 will download the image from MDT1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Text Description automatically generated

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/build-a-distributed-environment-fo>

**NEW QUESTION 85**

- (Exam Topic 4)

You have computers that run Windows 8.1 or Windows 10. All the computers are enrolled in Microsoft Intune, Endpoint Configuration Manager, and Desktop Analytics. Co-management is enabled for your environment.

You plan to upgrade the Windows 8.1 computers to Windows 10.

You need to identify which Windows 8.1 computers do NOT have supported Windows 10 drivers.

What should you use?

- A. the General Hardware Inventory report in Configuration Manager
- B. the List of devices in a specific device category report in Configuration Manager
- C. Deployment plans in Desktop Analytics
- D. the Device compliance report in Intune

**Answer: C**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/about-deployment-plans>

**NEW QUESTION 87**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You are assigned the User administrator role.

An Azure AD security group named Group1 was deleted five days ago. You need to restore Group1.

What should you do?

- A. Modify the group expiration policy.
- B. From Deleted groups, restore Group1.
- C. Manually recreate Group1.
- D. Ask a global administrator to restore Group1.

**Answer: B**

**NEW QUESTION 92**

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant.

You configure a Windows Autopilot deployment profile as shown in the following exhibit.

**Create profile**  
 Windows Autopilot deployment profiles

---

\* Name  
 AutoPilot1 ✓

Description  
 Optional

By default, this profile can only be applied to Autopilot devices synced from the Autopilot service. [Learn More.](#)  
 Convert all targeted devices to Autopilot  
 Yes No

\* Deployment mode ⓘ  
 User-Driven

\* Join to Azure AD as ⓘ  
 Azure AD joined

---

Out-of-box experience (OOBE) Defaults configured >

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

To apply the profile to a new computer, you must first

<input type="text"/>	▼
join the device to Azure AD enroll the device in Microsoft Intune import a CSV file into Windows Autopilot	

When the Windows Autopilot profile is applied to a computer, the computer will be

<input type="text"/>	▼
joined to Azure AD only registered in Azure AD only joined to Active Directory only joined to Active Directory and registered in Azure AD	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

**NEW QUESTION 96**

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains 500 computers that run Windows 11 and are enrolled in Microsoft Endpoint Manager. You need to manage the deployment of monthly security updates. The solution must meet the following requirements:

- Updates must be deployed to a group of test computers for quality assurance.
- Updates must be deployed automatically 15 days after the quality assurance testing. What should you create in the Microsoft Endpoint Manager admin center?

- A. an update ring
- B. a security baseline
- C. a feature update policy
- D. a device configuration profile

**Answer:** A

**NEW QUESTION 101**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 10 Readiness scenario.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 102**

- (Exam Topic 4)

You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.

You have a computer named Computer1 that runs Windows 10. You need to view the events collected from Computer1.

Which query should you run in Log Analytics?

- A. Event| where Computer == "Computer1"
- B. ETWEvent| where SourceSystem == "Computer1"
- C. ETWEvent| where Computer == "Computer1"
- D. Event| where SourceSystem == "Computer1"

**Answer:** A

**Explanation:**

Reference:

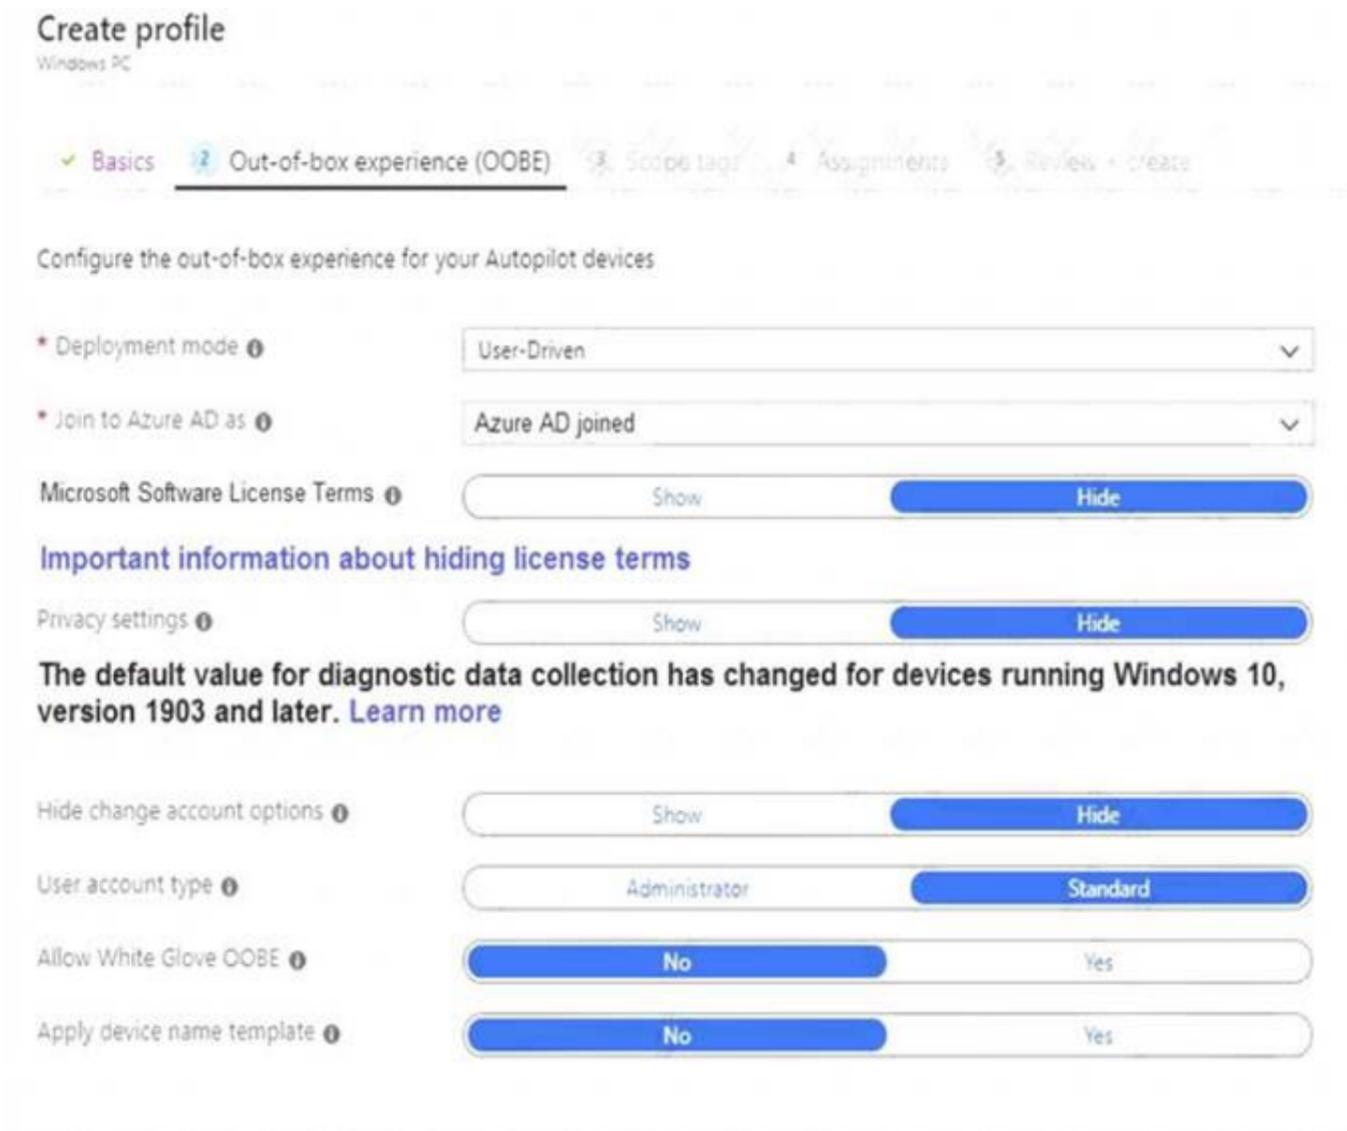

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

**NEW QUESTION 104**

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You are creating a Windows Autopilot deployment profile named Profile1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

Users who deploy a device by using Profile1 [answer choice].

- are prevented from modifying any desktop settings
- can create additional local users on the device
- can modify the desktop settings for all device users
- can modify the desktop settings only for themselves

Users can configure the [answer choice] during the deployment.

- computer name
- Cortana settings
- keyboard layout

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/user-driven#:~:text=Windows%20Au> <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/white-glove>

**NEW QUESTION 105**

- (Exam Topic 4)  
 You have following types of devices enrolled in Microsoft Intune:

- Windows 10
- Android
- iOS

For which types of devices can you create VPN profiles in Microsoft Endpoint Manager?

- A. Windows 10 and Android only
- B. Windows 10, Android, and iOS
- C. Windows 10 only
- D. Windows 10 and iOS only
- E. Android and iOS only

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/vpn-settings-android>

**NEW QUESTION 107**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 8.1 and use local user profiles. You deploy 10 new computers that run Windows 10 and join the computers to the domain. You need to migrate the user profiles from the Windows 8.1 computers to the Windows 10 computers. What should you do?

- A. From the Windows 8.1 computer of each user, run imagex.exe/capture, and then from the Windows 10 computer of each user, run imagex.exe/apply.
- B. Configure roaming user profiles for the user
- C. Instruct the users to first sign in to and out of their Windows 8.1 computer and then to sign in to their Windows 10 computer.
- D. From the Windows 8.1 computer of each user, run scanstate.exe, and then from the Windows 10 computer of each user, run loadstate.exe.
- E. Configure Folder Redirection for the user
- F. Instruct the users to first sign in to and out of their Windows 8.1 computer, and then to sign in to their Windows 10 computer.

**Answer:** C

**Explanation:**

The ScanState command is used with the User State Migration Tool (USMT) 10.0 to scan the source computer, collect the files and settings, and create a store.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax> <https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-loadstate-syntax>

**NEW QUESTION 110**

- (Exam Topic 4)

You have a Microsoft 365 subscription. You plan to use Conditional Access policies. You need to identify which scenarios the policies will support. Which two scenarios should you identify? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Enforce multi-factor authentication (MFA) when users access a Microsoft Office 365 service.
- B. Force users to renew an expired SSL certificate.
- C. Force users to update Windows Defender definition files before they sign in to Microsoft Office 365.
- D. Block users from using legacy authentication when signing in to Microsoft Exchange Online.
- E. Force users to install the latest Windows and Microsoft Office updates before they sign in to Office 365.

**Answer:** AD

**Explanation:**

A: Conditional Access allows administrators to control what Office 365 apps users can gain access to based on if they pass/fail certain conditions. These conditions are enforced by building a policy (or multiple policies) to control how users access your Office 365 resources.

Cloud Apps- What apps do you want to control? Conditional Access does not need to apply to all of Office 365, you can be more granular and just control access to specific apps – E.g. Exchange Online.

Access can be allowed to Office 365 with the following conditions:

- \* Require multi-factor authentication – User is allowed in but will need to complete additional security to log in.
- \* Etc.

D: The easiest way to block legacy authentication across your entire organization is by configuring a Conditional Access policy that applies specifically to legacy authentication clients and blocks access.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/block-legacy-authentication><https://do>

**NEW QUESTION 111**

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 10 deployment tasks. MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 10 in-place upgrade on several computers that run Windows 8.1. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. |

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

**NEW QUESTION 113**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

**NEW QUESTION 114**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Group1 is a member of Group3.

You are creating a file named Kiosk.xml that specifies a lockdown profile for a multi-app kiosk. Kiosk.xml contains the following section.

```
<Configs>
  <Config>
    <UserGroup Type="LocalGroup" Name="Group3" />
    <DefaultProfile Id="{9A2A490F-10F6-4764-974A-43B19E722C23}"/>
  </Config>
</Configs>
```

You apply Kiosk.xml to Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The lockdown profile applies to User1.	<input type="radio"/>	<input type="radio"/>
The lockdown profile applies to User2.	<input type="radio"/>	<input type="radio"/>
The lockdown profile applies to User3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

<https://docs.microsoft.com/en-us/windows/configuration/lock-down-windows-10-to-specific-apps#config-for-gr>

**NEW QUESTION 118**

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group4	Security group

You are creating a compliance policy named Compliance1.

Which objects can you specify in Compliance1 as additional recipients of noncompliance notifications?

- A. Group1, Group2, Group3, Group4, and Admin1
- B. Group1, Group2, Group3, and Group4 only
- C. Group3, Group4, and Admin1 only
- D. Group1, Group2, and Group3 only
- E. Group3 and Group4 only

**Answer:** D

**Explanation:**

Reference:

<https://www.ravenswoodtechnology.com/microsoft-intune-compliance-notifications/> <https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

**NEW QUESTION 121**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You start Computer1 from the Windows 10 installation media and use the Install option. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 122**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to ensure that users can only enroll devices that meet the following requirements:

- > Android devices that support the use of work profiles.
- > iOS devices that run iOS 11.0 or later.

Which two restrictions should you modify? To answer, select the restrictions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Home > Devices > Enroll devices > All Users >

Edit restriction

Device type restriction

- 1 Platform settings
- 2 Review + save

Specify the platform configuration restrictions that must be met for a device to enroll. Use compliance policies to restrict devices after enrollment. Define versions as major.minor.build. Version restrictions only apply to devices enrolled with the Company Portal. Intune classifies devices as personally-owned by default. Additional action is required to classify devices as corporate-owned. [Learn more.](#)

Type	Platform	versions	Personally owned	Device manufacturer
Android Enterprise (work profile)	Allow Block	Allow min/max range: Min Max	Allow Block	Manufacturer name here
Android device administrator	Allow Block	Allow min/max range: Min Max	Allow Block	Manufacturer name here
iOS/iPadOS	Allow Block	Allow min/max range: Min Max	Allow Block	Restriction not supported
macOS	Allow Block	Restriction not supported	Allow Block	Restriction not supported
Windows (MDM)	Allow Block	Allow min/max range: Min Max	Allow Block	Restriction not supported

Review + save Cancel

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Android device administrator, Platform: Block Restrict devices running on the following platforms: Android device administrator  
 Android Enterprise work profile  
 iOS/iPadOS  
 macOS  
 Windows

Note: If you allow both Android platforms for the same group, devices that support work profile will enroll with a work profile. Devices that don't support it will enroll on the Android device administrator platform. Neither work profile nor device administrator enrollment will work until you complete all prerequisites for Android enrollment.

Box 2: iOS/iPadOS, Allow min/max Range: Min

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 125

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

The Active Directory domain contains 200 computers that run Windows 10. The computers are managed by using Microsoft System Center Configuration Manager (Current Branch).

You need to pilot co-management for only five of the computers.

What should you create first?

- A. a domain local distribution group in Active Directory
- B. an Intune Connector for Active Directory
- C. a device collection in Configuration Manager
- D. a dynamic device group in Azure AD

Answer: C

Explanation:

The Pilot Intune setting switches the associated workload only for the devices in the pilot collection.

Note: When you enable co-management, you'll assign a collection as a Pilot group. This is a group that contains a small number of clients to test your co-management configurations. We recommend you create a suitable collection before you start the procedure. Then you can select that collection without exiting the procedure to do so.

<https://docs.microsoft.com/en-us/configmgr/comange/tutorial-co-manage-new-devices>

NEW QUESTION 127

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- > Creates a VPN connection to the corporate network
- > Installs a Microsoft Store app named App1
- > Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained and the passphrase will be retained
<input type="checkbox"/>	Retained but the passphrase will be reset

App1 will be:

<input type="checkbox"/>	Reinstalled at sign-in
<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained

The VPN connection will be:

<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained and the credentials will be cached
<input type="checkbox"/>	Retained but the credentials will be reset

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

**NEW QUESTION 131**

- (Exam Topic 4)

You have a Microsoft 365 tenant

You have devices enrolled in Microsoft intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Endpoint Manager admin center, review the Setting compliance report.
- B. From the Microsoft Endpoint Manager admin center, review the Noncompliant devices reporter.
- C. From the Microsoft Endpoint Manager admin center, review Device compliance report.
- D. From the Azure Active Directory admin center, review the Conditional Access Insights and Reporting workbook.

Answer: B

Explanation:

The Noncompliant devices report provides data typically used by Helpdesk or admin roles to identify problems and help remediate issues. The data found in this report is timely, calls out unexpected behavior, and is meant to be actionable.

Note: Compliance reports help you understand when devices fail to meet your compliance configurations and can help you identify compliance-related issues in your organization.

Open the compliance dashboard

Open the Intune Device compliance dashboard:

> Sign in to the Microsoft Endpoint Manager admin center.

> Select Devices > Overview > Compliance status tab.

When the dashboard opens, you get an overview with all the compliance reports. In these reports, you can see and check for:

Overall device compliance Per-policy device compliance Per-setting device compliance Threat agent status

Device protection status View compliance reports

In addition to using the charts on Compliance status, you can go to Reports > Device compliance.

> Sign in to the Microsoft Endpoint Manager admin center.

> Select Devices > Monitor, and then from below Compliance select the report you want to view. Some of the available compliance reports include:

Device compliance Noncompliant devices

Devices without compliance policy Setting compliance

Policy compliance Noncompliant policies (preview)

Windows health attestation report Threat agent status

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-monitor>

**NEW QUESTION 134**

- (Exam Topic 4)

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager. You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device profile type:

Administrative Templates
Device restrictions
Endpoint protection
PKCS certificate

Setting:

Apps from store only
Developer unlock
Enable Dynamic Virtualization
Trusted app installation

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

**NEW QUESTION 139**

- (Exam Topic 4)

You install a feature update on a computer that runs Windows 10. How many days do you have to roll back the update?

- A. 5
- B. 10
- C. 14
- D. 30

**Answer:** B

**Explanation:**

Microsoft has changed the time period associated with operating system rollbacks with Windows 10 version 1607, decreasing it to 10 days. Previously, Windows 10 had a 30-day rollback period.

References:

<https://redmondmag.com/articles/2016/08/04/microsoft-shortens-windows-10-rollback-period.aspx>

**NEW QUESTION 140**

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune. You need to enable self-service password reset on the sign-in screen. Which settings should you configure from the Microsoft Intune blade?

- A. Device configuration
- B. Device compliance
- C. Device enrollment
- D. Conditional access

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows>

**NEW QUESTION 144**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM) You need to deploy the Microsoft Office 365 ProPlus suite to all the computers. What should you do?

- A. From Microsoft Azure Active Directory (Azure AD), add an app registration.
- B. From the Device Management admin center, add an app.
- C. From the Device Management admin center, create a Windows 10 device profile.
- D. From Microsoft Azure Active Directory (Azure AD), add an enterprise application

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/mdm/enterprise-app-management#application-ma>

**NEW QUESTION 149**

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- > MDM user scope: Group1
- > MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

**NEW QUESTION 150**

- (Exam Topic 4)

You use Microsoft Intune to manage Windows updates.

You have computers that run Windows 10. The computers are in a workgroup and are enrolled in Intune. The computers are configured as shown in the following table.

Name	Tag	Member of
Computer1	None	Group1
Computer2	Tag2	Group2
Computer3	Tag3	Group3

On each computer, the Select when Quality Updates are received Group Policy setting is configured as shown in the following table.

Name	State	Configuration
Computer1	Not configured	Not applicable
Computer2	Enabled	Deferral period of 5 days
Computer3	Disabled	Not applicable

You have Windows 10 update rings in Intune as shown in the following table.

Name	Quality update deferral period (days)	Scope (Tags)	Assignment
Ring1	2	Tag1	Group1
Ring2	7	Tag2	Group2
Ring3	14	Tag2	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 152

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains devices enrolled in Microsoft Intune. You need to create Endpoint security policies to enforce the following requirements:

- > Computers that run macOS must have FileVault enabled.
- > Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.
- > Computers that run Windows 10 must have Microsoft Defender Application Control enabled.

Which Endpoint security feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
Account protection	Computers that run macOS must have FileVault enabled: <input type="text"/>
Attack surface reduction (ASR)	Computers that run Windows 10 must have Microsoft Defender Application Control enabled: <input type="text"/>
Disk encryption	Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled: <input type="text"/>
Endpoint detection and response (EDR)	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Disk encryption

Computers that run macOS must have FileVault enabled.

Intune supports macOS FileVault disk encryption. FileVault is a whole-disk encryption program that is included with macOS. You can use Intune to configure FileVault on devices that run macOS 10.13 or later.

Box 2: Attack surface reduction (ASR)

Computers that run Windows 10 must have Microsoft Defender Application Control enabled. Attack surface reduction profiles include:

\* Application control - Application control settings can help mitigate security threats by restricting the applications that users can run and the code that runs in the System Core (kernel). Manage settings that can block unsigned scripts and MSIs, and restrict Windows PowerShell to run in Constrained Language Mode.

Note: Attack surface reduction rules target certain software behaviors, such as: Launching executable files and scripts that attempt to download or run files

Running obfuscated or otherwise suspicious scripts

Performing behaviors that apps don't usually initiate during normal day-to-day work

Box 3: Account protection  
 Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.

The account protection policy is focused on settings for Windows Hello and Credential Guard, which is part of Windows identity and access management. Note: Microsoft Defender Credential Guard protects against credential theft attacks. It isolates secrets so that only privileged system software can access them. Reference: <https://learn.microsoft.com/en-us/mem/intune/protect/encrypt-devices-filevault> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-account-protection-policy> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-asr-policy>

**NEW QUESTION 156**

- (Exam Topic 4)

Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business. You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

**Answer:** AC

**Explanation:**

Reference:

<https://community.windows.com/en-us/stories/windows-sign-in-options> <https://fossbytes.com/how-to-unlock-windows-10/>

**NEW QUESTION 161**

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD). There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune. You plan to implement Windows Defender Exploit Guard.

You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

▼

Security & Compliance in Microsoft 365

Windows Configuration Designer

Windows Defender Security Center

Distribution method:

▼

An Azure policy

A Group Policy object (GPO)

An Intune device compliance policy

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

**NEW QUESTION 166**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 8.1 and the users shown in the following table.

Name	Domain group membership	Local group membership
User1	Domain Users, Domain Admins	Administrators
User2	Domain Users, Remote Management Users	Users
User3	Domain Users	Administrators
User4	Domain Users	Remote Management Users

You plan to use the Microsoft Assessment and Planning (MAP) Toolkit to collect inventory data. The MAP Toolkit has the following configurations:

- > Inventory scenario: Windows computers
- > Discovery method: Use Active Directory Domain Services (AD DS)

You need to identify which user to use for the MAP Toolkit inventory discovery. The solution must use principle of least privilege. What should you identify?

- A. User3
- B. User1
- C. User4
- D. User2

**Answer:** A

**Explanation:**

Reference:

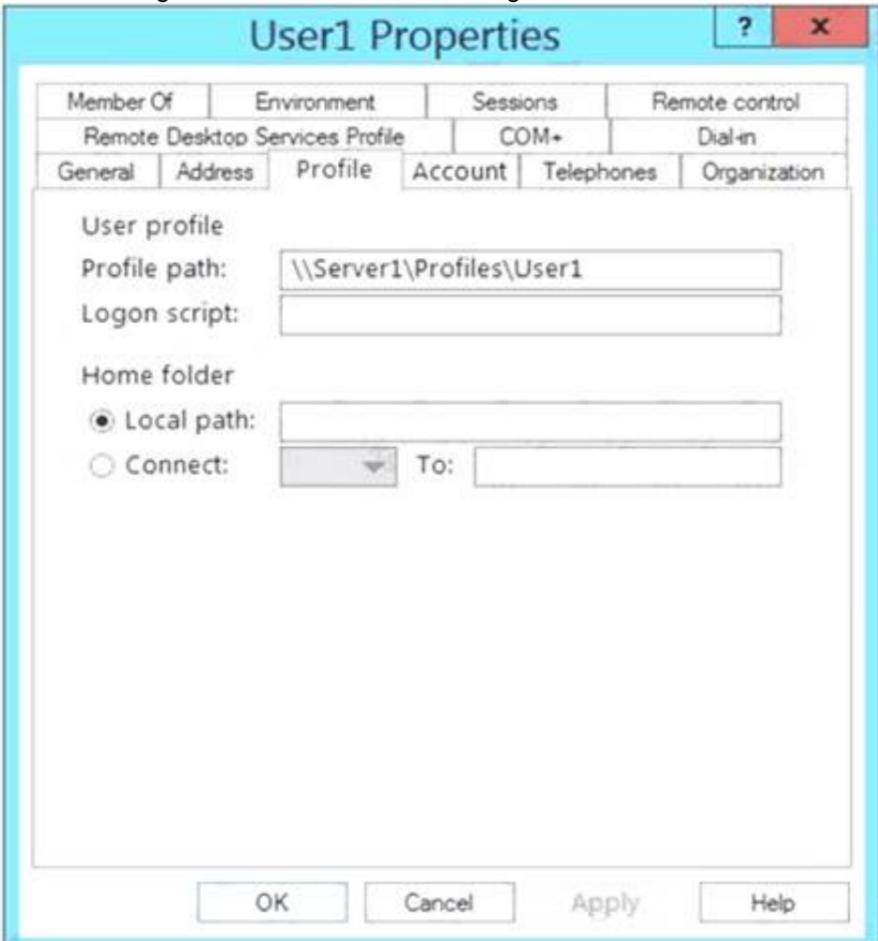

<https://social.technet.microsoft.com/wiki/contents/articles/17808.map-toolkit-choose-a-discovery-method.aspx>

**NEW QUESTION 170**

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes No**

On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Text, letter Description automatically generated

A mandatory user profile is a roaming user profile that has been pre-configured by an administrator to specify settings for users. Settings commonly defined in a mandatory profile include (but are not limited to): icons that appear on the desktop, desktop backgrounds, user preferences in Control Panel, printer selections, and more. Configuration changes made during a user's session that are normally saved to a roaming user profile are not saved when a mandatory user profile is assigned.

The .man extension causes the user profile to be a read-only profile. Reference:  
<https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

**NEW QUESTION 171**

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?

NOTE: Each correct selection is worth one point.

Standard Client Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Image1, Image2, Image3, Image4, and Image5. All images.

Standard Client Task Sequence

Standard Client task sequence. The most frequently used task sequence. Used for creating reference images and for deploying clients in production.

Box 2: Image1, Image2, Image3, and Image4 only. Exclude image5 with applications.

Standard Client Upgrade Task Sequence

Standard Client Upgrade task sequence. A simple task sequence template used to perform an in-place upgrade from Windows 7, Windows 8, or Windows 8.1 directly to Windows 10, automatically preserving existing data, settings, applications, and drivers.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/get-started-with-the-microsoft-dep>

**NEW QUESTION 176**

- (Exam Topic 4)

You have 10 computers that run Windows 7 and have the following configurations:

- > A single MBR disk
- > A disabled TPM chip
- > Disabled hardware virtualization
- > UEFI firmware running in BIOS mode
- > Enabled Data Execution Prevention (DEP) You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.

Which two actions should you perform? Each correct answer presents part of the solution.  
 NOTE: Each correct selection is worth one point.

- A. Convert the MBR disk to a GPT disk
- B. Enable the TPM chip.
- C. Disable DEP
- D. Enable hardware virtualization
- E. Convert the firmware from BIOS to UEFI.

**Answer:** AE

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/boot-to-uefi-mode-or-legacy-biosmod>

**NEW QUESTION 180**

- (Exam Topic 3)

User1 and User2 plan to use Sync your settings.

On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

User1:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

User2:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:  
<https://www.jeffgilb.com/managing-local-administrators-with-azure-ad-and-intune/>

**NEW QUESTION 183**

- (Exam Topic 3)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Devke2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

**Answer Area**

Device1:

- 1
- 2
- 3
- 4
- 5

Device2:

- 1
- 2
- 3
- 4
- 5

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, table Description automatically generated

**NEW QUESTION 186**

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Text Description automatically generated

**NEW QUESTION 188**

- (Exam Topic 3)

You implement Boundary1 based on the planned changes.

Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1, Device2, and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

**NEW QUESTION 190**

- (Exam Topic 3)

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only
- C. User1, User2, User3, and User4
- D. User1, User3, and User4 only
- E. User3 and User4 only

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business> <https://docs.microsoft.com/en-us/microsoft-store/assign-apps-to-employees>

**NEW QUESTION 195**

- (Exam Topic 3)

Which devices are registered by using the Windows Autopilot deployment service?

- A. Device1 only
- B. Device3 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3

**Answer:** C

**Explanation:**

Scenario: Windows Autopilot Configuration Assignments

Included groups: Group1 Excluded groups: Group2 Device1 is member of Group1.

Device2 is member of Group1 and member of Group2. Device3 is member of Group1.

Group1 and Group2 have a Membership type of Assigned.

Exclusion takes precedence over inclusion in the following same group type scenarios. Reference: <https://learn.microsoft.com/en-us/mem/intune/apps/apps-inc-exl-assignments>

**NEW QUESTION 200**

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

A screenshot of a computer Description automatically generated with medium confidence

**NEW QUESTION 201**

- (Exam Topic 2)

You need to meet the technical requirements for the new HR department computers.  
 How should you configure the provisioning package? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

**Specify ComputerName as:**

<input type="checkbox"/>	"HR" + RAND(4)
<input type="checkbox"/>	"HumanResources-" + RAND(????)
<input type="checkbox"/>	HR-%RAND:4%
<input type="checkbox"/>	HR-????
<input type="checkbox"/>	HumanResources-%RAND:4%

**Specify AccountOU as:**

<input type="checkbox"/>	CN=Computers, CN=HR, DC=Contoso, DC=com
<input type="checkbox"/>	Computers/HumanResources/Contoso.com
<input type="checkbox"/>	Contoso.com/HR/Computers
<input type="checkbox"/>	OU=Computers, OU=HR, DC=Contoso, DC=com

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

**NEW QUESTION 206**

- (Exam Topic 2)

You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

**Answer:** C

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

**NEW QUESTION 209**

- (Exam Topic 2)

You are evaluating which devices are compliant.  
 For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 211**

- (Exam Topic 2)

You need to meet the requirements for the MKG department users. What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business
- B. Download the APPX file for App1 from Microsoft Store for Business
- C. Add App1 to the private store
- D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business
- E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

**NEW QUESTION 212**

- (Exam Topic 4)

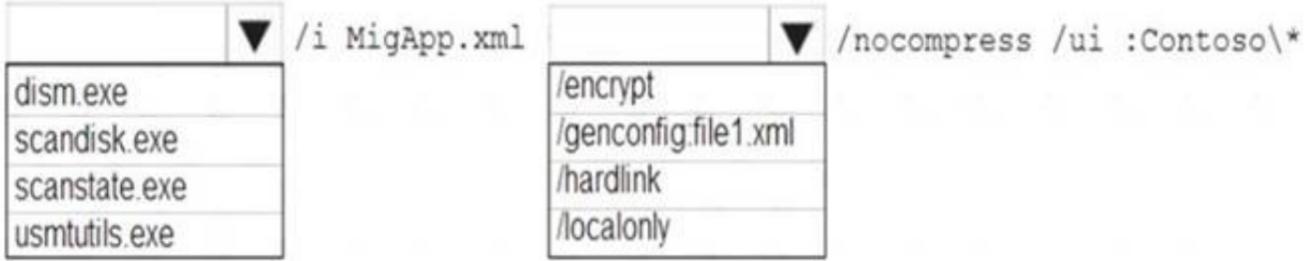

Your network contains an Active Directory domain named contoso.com. The domain contains 500 computers that run Windows 7. Some of the computers are used by multiple users.

You plan to refresh the operating system of the computers to Windows 10.

You need to retain the personalization settings to applications before you refresh the computers. The solution must minimize network bandwidth and network storage space.

Which command should you run on the computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax#how-to-use-ui-and-ue>

**NEW QUESTION 215**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure roaming user profiles. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirectation/deploy-roaming-user-profiles>

**NEW QUESTION 220**

- (Exam Topic 4)

You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant  
 Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- > Name: Policy1
- > Platform: Windows 10 and later
- > Require BitLocker: Require
- > Mark device noncompliant: 5 days after noncompliance
- > Scope (Tags): Tag1
- > Name: Policy2
- > Platform: Windows 10 and later
- > Firewall: Require
- > Mark device noncompliant: Immediately
- > Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: No.  
 Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.  
 Box 2: No  
 For the same reason as Box1.  
 Box 3: Yes  
 Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.  
 The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

**NEW QUESTION 224**

- (Exam Topic 4)  
 You have the device configuration profile shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic NOTE: Each correct selection is worth one point.

Answer Area

Users

can access any URL. cannot view the address bar in Microsoft Edge. can only access URLs that include contoso.com. can only access URLs that start with https://contoso.com/ .
--

Windows 10 devices can have

a single Microsoft Edge instance that has a single tab. a single Microsoft Edge instance that has multiple tabs. multiple Microsoft Edge instances that have multiple tabs. multiple Microsoft Edge instances that each has a single tab.
--

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: can access any URL.

Public Browsing (InPrivate): Runs a limited multi-tab version of Microsoft Edge. Users can browse publicly, or end their browsing session.

Box 2: a single Microsoft Edge instance that has multiple tabs

Single app, full-screen kiosk runs only one app on the device, such as a web browser or Store app. Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings-windows>

**NEW QUESTION 228**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 10 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro

Microsoft Defender Application Guard is installed on the computers.

Application Guard Group Policy settings are applied to the computers as shown in the following table.

Setting	State
Turn on Windows Defender Application Guard in Managed Mode	Enabled
Configure Windows Defender Application Guard clipboard settings	Enabled
Allow files to download and save to the host operating system from Windows Defender Application Guard	Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes No**

Computer1 can use Application Guard in Enterprise-managed mode.

Computer2 can copy clipboard settings from Microsoft Edge to Application Guard.

Computer3 can download files from Application Guard to the host operating system.

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Text Description automatically generated

**NEW QUESTION 229**

- (Exam Topic 4)

Your company has an internal portal that uses a URL of http://contoso.com.

The network contains computers that run Windows 10. The default browser on all the computers is Microsoft Edge.

You need to ensure that all users only use Internet Explorer to connect to the internal portal. The solution must ensure that Microsoft Edge can be used to connect

to all other websites.  
 What should you do from each computer?

- A. From Internet Explorer, configure the Compatibility View settings
- B. From the local policy, configure Enterprise Mode
- C. From Microsoft Edge, configure the Advanced Site Settings
- D. From the Settings app, configure the default web browser settings

**Answer:** B

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-edge/deploy/emie-to-improve-compatibility>

**NEW QUESTION 231**

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to configure an Intune device configuration profile to meet the following requirements:

- > Prevent Microsoft Office applications from launching child processes.
- > Block users from transferring files over FTP.

Which two settings should you configure in Endpoint protection? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

**NEW QUESTION 234**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune. You need to review the startup processes and how often each device restarts.

What should you use?

- A. Endpoint analytics
- B. Intune Data Warehouse
- C. Azure Monitor
- D. Device Management

**Answer:** B

**NEW QUESTION 239**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From the Settings app, you select Access work or school, and then you select Add or remove a provisioning package.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

**NEW QUESTION 240**

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD).

You have a Microsoft Office 365 subscription. All computers are joined to the domain and have the latest Microsoft OneDrive sync client (OneDrive.exe) installed.

On all the computers, you configure the OneDrive settings as shown in the following exhibit.

Setting	State
Allow syncing OneDrive accounts for only specific organizations	Enabled
Configure team site libraries to sync automatically	Not configured
Set the maximum percentage of upload bandwidth that OneDrive.exe uses	Not configured
Prevent users from moving their Windows known folders to OneDrive	Not configured
Block syncing OneDrive accounts for specific organizations	Not configured
Migrate Pre-existing TeamSites with OneDrive Files On-Demand	Not configured
The maximum size of a user's OneDrive for Business before they will be prompted to ch...	Not configured
Enable OneDrive Files On-Demand	Not configured
Prevent users from redirecting their Windows known folders to their PC	Disabled
Silently move Windows known folders to OneDrive	Enabled
Prompt users to move Windows known folders to OneDrive	Not configured
Prevent OneDrive from generating network traffic until the user signs in to OneDrive	Not configured
Prevent users from using the remote file fetch feature to access files on the computer	Enabled
SharePoint on-premises server URL and tenant folder name	Not configured
SharePoint prioritization setting for hybrid customers that use SharePoint Online (SPO)...	Not configured
Silently configure OneDrive using the primary Windows account	Enabled

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer Area**

[answer choice] will sync automatically by using OneDrive

▼

No folders

The Documents folder

The Favontes folder

To reduce the disk space used by a user profile, you must [answer choice].

▼

configure team site libraries to sync automatically

enable OneDrive Files On-Demand

set the maximum percentage of upload bandwidth used by OneDrive.exe

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Silently move known folders to OneDrive is enabled. Known folder include: Desktop, Documents, Pictures, Screenshots, and Camera Roll

Box 2: OneDrive Files On-Demand enables users to view, search for, and interact with files stored in OneDrive from within File Explorer without downloading them and taking up space on the local hard drive.

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders> <https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise>

**NEW QUESTION 245**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 150 Windows 10 devices. All the devices are enrolled in Microsoft Intune.

You need to use Intune to apply Windows updates to the devices. What should you do first?

- A. From the Microsoft Endpoint Manager admin center, configure scope tags.
- B. Create a device restriction policy that has telemetry set to the minimum setting of Required
- C. From the Microsoft Endpoint Manager admin center, configure a security baseline.
- D. Create a device restriction policy that has telemetry set to Security (Enterprise Only).

**Answer:** A

**NEW QUESTION 250**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 8.1.

You plan to perform an in-place upgrade of Computer1 to Windows 10 by using an answer file. You need to identify which tool to use to create the answer file. What should you identify?

- A. System Configuration (Msconfig.exe)
- B. Windows Configuration Designer
- C. Windows System Image Manager (Windows SIM)
- D. Windows Deployment Services (WDS)

**Answer: C**

**Explanation:**

Reference:

<https://thesleepyadmins.com/2019/05/31/create-windows-10-answer-file/>

**NEW QUESTION 252**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 1,000 Windows 11 devices. All the devices are enrolled in Microsoft Intune.

You plan to integrate Intune with Microsoft Defender for Endpoint.

You need to establish a service-to-service connection between Intune and Defender for Endpoint. Which settings should you configure in the Microsoft Endpoint Manager admin center?

- A. Connectors and tokens
- B. Premium add-ons
- C. Microsoft Tunnel Gateway
- D. Tenant enrollment

**Answer: A**

**Explanation:**

Microsoft Defender for Endpoint – Important Service and Endpoint Settings You Should Configure Right Now.

As a prerequisite, however, head to tenant administration > connectors and tokens > Microsoft Defender for Endpoint and confirm the connection is enabled. You previously set this up in the advanced settings of Microsoft 365 Defender.

Reference: <https://petri.com/microsoft-defender-for-endpoint-which-settings-configure-right-now/>

**NEW QUESTION 257**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1
Device2	Android	Group1
Device3	iOS	Group2

From Intune, you create and send a custom notification named Notification1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes**

**No**

User1 receives Notification1 on Device1.

User2 receives Notification1 on Device2.

User1 receives Notification1 on Device3.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

A screenshot of a computer Description automatically generated with medium confidence

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/custom-notifications>

#### NEW QUESTION 261

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From File Explorer, you go to C:\Folder1, and then you double-click the Package1.ppkg file.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

#### NEW QUESTION 264

- (Exam Topic 4)

Your company plans to deploy tablets to 50 meeting rooms.

The tablets run Windows 10 and are managed by using Microsoft Intune. The tablets have an application named App1.

You need to configure the tablets so that any user can use App1 without having to sign in. Users must be prevented from using other applications on the tablets.

Which device configuration profile type should you use?

- A. Kiosk
- B. Endpoint protection
- C. Identity protection
- D. Device restrictions

**Answer:** A

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/kiosk-single-app>

#### NEW QUESTION 269

- (Exam Topic 4)

Your company uses Microsoft Intune to manage Windows 10, Android, and iOS devices. Several users purchase new iPads and Android devices.

You need to tell the users how to enroll their device in Intune.

What should you instruct the users to use for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Android device	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text" value="https://myapps.microsoft.com"/>				
<input type="text" value="https://portal.manage.microsoft.com"/>				
<input type="checkbox"/> The Intune Company Portal app				
<input type="checkbox"/> The Settings app				
iPad	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text" value="https://myapps.microsoft.com"/>				
<input type="text" value="https://portal.manage.microsoft.com"/>				
<input type="checkbox"/> The Intune Company Portal app				
<input type="checkbox"/> The Settings app				

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

The Intune Company Portal app is used to enroll Android, iOS, macOS, and Windows devices References:

<https://docs.microsoft.com/en-us/intune-user-help/enroll-device-android-company-portal> <https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-ios>

<https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-macos-cp>

#### NEW QUESTION 274

- (Exam Topic 4)

You enable controlled folder access in audit mode for several computers that run Windows 10. You need to review the events audited by controlled folder access. Which Event Viewer log should you view?

- A. Applications and Services\Microsoft\Windows\Known Folders\Operational
- B. Applications and Services\Microsoft\Windows\Windows Defender\Operational
- C. Windows\Security

**Answer:** B

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/evaluate-controlled-folder-access?vi>

**NEW QUESTION 277**

- (Exam Topic 4)  
 You have 100 computers that run Windows 8.1.  
 You need to create a report that will assess the Windows 10 readiness of the computers. What should you use?

- A. Windows Assessment and Deployment Kit (Windows ADK)
- B. Microsoft Assessment and Planning (MAP) Toolkit
- C. Windows Deployment Services (WDS)
- D. Microsoft Desktop Optimization Pack (MDOP)

**Answer:** B

**Explanation:**

Reference:  
<https://www.techieclass.com/using-maps-azure-readiness/>

**NEW QUESTION 278**

- (Exam Topic 4)  
 You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1. You import a Windows 10 image to DS1. You have an executable installer for an application named App1. You need to ensure that App1 will be installed for all the task sequences that deploy the image. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Modify a Windows 10 operating system setting.
- Add App1 to DS1.
- Modify a selection profile.
- Identify the GUID of App1.
- Modify CustomSettings.ini.

**Answer Area**

⬅
➡

⬆
⬇

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated  
 Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using>

**NEW QUESTION 283**

- (Exam Topic 4)  
 In Microsoft Intune, you have the device compliance policies shown in the following table.

Name	Type	Encryption	Windows Defender antimalware	Mark device as not compliant	Assigned to
Policy1	Windows 8	Require	Not applicable	5 days	Group1
Policy2	Windows 10	Not configured	Require	7 days	Group2
Policy3	Windows 10	Required	Require	10 days	Group2

The Intune compliance policy settings are configured as shown in the following exhibit.

Save Discard

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as  Compliant  Not Compliant

Enhanced jailbreak detection  Enabled  Disabled

Compliance status validity period (days)  ✓

On June 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	Use BitLocker Drive Encryption (BitLocker)	Windows Defender	Member of
Device1	No	Enabled	Group1
Device2	No	Enabled	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
On June 4, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 6, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 9, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

**NEW QUESTION 284**

- (Exam Topic 4)

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline. Which tool should you use?

- A. Microsoft Defender Security Center
- B. Desktop Analytics
- C. Microsoft Defender for Endpoint Power BI app
- D. Microsoft Secure Score

Answer: D

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender/microsoft-secure-score?view=o365-worldwid>

**NEW QUESTION 289**

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system
Device1	Windows 10 Enterprise
Device2	Windows 8.1 Pro
Device3	Android 9.0.3
Device4	iOS

You plan to implement Desktop Analytics.

You need to identify which devices support the following:

- > Compatibility insights
- > App usage insights

Which devices should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Compatibility insights:

- Device1 only
- Device1 and Device2 only
- Device3 and Device4 only
- Device1, Device2, Device3, and Device4

App usage insights:

- Device1 only
- Device1 and Device2 only
- Device3 and Device4 only
- Device1, Device2, Device3, and Device4

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/compat-assessment><https://docs.microsoft.com/en-us/updates/application-insights-adds-support-for-ios-and-android-apps-improved>

**NEW QUESTION 294**

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From the Settings app on Computer1, you use the Connect to work or school account settings. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Use MDM enrollment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

References:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

**NEW QUESTION 299**

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share.

You plan to deploy Windows 10 by using the Standard Client Task Sequence template. You need to modify the task sequence to perform the following actions:

- > Format disks to support Unified Extensible Firmware Interface (UEFI).
- > Create a recovery partition.

Which phase of the task sequence should you modify?

- A. Initialization
- B. Install
- C. PostInstall
- D. Preinstall

**Answer:** D

**Explanation:**

Reference: <https://www.prajwaldesai.com/create-extra-partition-in-mdt/>

**NEW QUESTION 300**

- (Exam Topic 4)

Your network contains an Active Directory domain.

You install the Microsoft Deployment Toolkit (MDT) on a server You have a custom image of Windows 10.

You need to deploy the image to 100 devices by using MDT.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the List of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a deployment share.	
Add the Windows 10 image.	
Enable multicast.	
Create a task sequence.	
Install Windows Deployment Services (WDS).	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
Graphical user interface, text, application Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using>
