After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A third-party logistics company uses Dynamics 365 Supply Chain Management to manage its warehouses.

Customers send items to the company's warehouse for controlled storage. Once a month, customers send the company an email with an attachment containing new items entered in a standardized Excel template.

The company must be able to do the following:

- Migrate the data into Dynamics 365 Supply Chain Management
- Avoid using Dynamics 365 Supply Chain Management system forms to enter the data. You need to identify the configuration and tool to assist with entering the data into the system.

Solution: Create a record template. Enter the item information from Excel into the record templates. Create the items.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 9

SIMULATION - (Topic 6)

You are a functional consultant for Contoso Entertainment System USA (USMF).

NEW QUESTION 37

HOTSPOT - (Topic 6)

You work with a systems administrator for Dynamics 365 for Finance and Operations.

The system has been configured to prompt users for how they want to send emails based on the given scenario they are encountering. In certain situations, they will want to generate an email to forward to an account executive who doesn't have access to Dynamics 365 for Finance and Operations. Other times, the emails should be either sent as an attachment to a user email or through a generic no reply email.

You need to determine which configuration to provide to the file system administrator for the given scenario.

Which option should you use? To answer, select the appropriate options in the answer area.

NEW QUESTION 43

HOTSPOT - (Topic 6)

You are tasked with setting up Case management in the Dynamics 365 for Finance and Operations deployment for your organization. Your organization must use cases to track defect and enhancement reports for products, so that engineers can improve products over time. Only appropriate employees within the organization should have access to cases and related information.

- * Call center employees create thousands of service cases and ensure that the proper resources are allocated for each service.
- * Service department employees fix cases created by the call center and create cases for defects and enhancement suggestions when they identify them.
- * Engineers review the cases from the service department while planning and designing the next version.

You need to configure the tool to enable tracking of service cases and product defects and enhancements.

Which Case management settings should you choose for each category or categories? To answer, select the appropriate options in the answer area.

Test all components of the solution together.	<input type="text" value="End to end"/> Unit Regression Functional End to end

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Unit

Unit testing is a software development process in which the smallest testable parts of an application, called units, are individually and independently scrutinized for proper operation. This testing methodology is done during the development process by the software developers and sometimes QA staff.

Box 2: Regression

What is regression testing?

Image result for Dynamics 365 what is regression testing

Regression testing is a software testing practice that ensures an application still functions as expected after any code changes, updates, or improvements.

Regression testing is responsible for the overall stability and functionality of the existing features.

Box 3: Functional

FUNCTIONAL TESTING is a type of software testing that validates the software system against the functional requirements/specifications.

Box 4: End to End

End-to-end testing is a methodology that assesses the working order of a complex product in a start-to-finish process. End-to-end testing verifies that all components of a system are able to run and perform optimally under real-world scenarios.

You need to ensure that the default legal entity for Karl is set to FRSI. The solution must ensure that the default date, time, and number format for Karl is set to French.

To complete this task, sign in to the Dynamics 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- ? Navigate to System Administration > Users > Users.
- ? Select Karl's user account.
- ? Click User Options.
- ? Go to the Preferences tab.
- ? In the Company field, select Contoso Consulting FR (FRSI).
- ? In the Date, time and number format field, select French.
- ? Click Save to save the changes.

FILL IN THE BLANK - (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance. The company has two legal entities in two different regions requiring separate tenants. CompanyA and CompanyB are both implementing Dynamics 365 Finance as separate implementation teams in a staggered approach.

CompanyA and CompanyB want to ensure that assets are accessible across the companies and to Microsoft but will not be publicly accessible to other companies.

You need to determine how to set up and configure assets to the Lifecycle Services (LCS) Asset library.

Solution: Create a project-level asset library in LCS. Does the solution meet the goal?

A.

Answer: A

NEW QUESTION 82

You need to ensure that employees can submit and approve their own Dynamics 365 Finance workflow requests.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Add the employees to the workflow administrator security role.
- B. Add the employees to Azure Active Directory (Azure AD) as domain administrators.
- C. Add the employees as an approver to the workflow action.
- D. Create a modification in the code that allows employees to modify workflows.
- E. Clear the Disallow approval by submitter check box.

Answer: CE

You are a functional consultant who is deploying Dynamics 365 for Finance and Operations.

The implementation must:

- ? Use an iterative approach
- ? Integrate with real-world data
- ? Enforce standards and governance
- ? Implement multiple rounds of feedback

You need to deploy and validate the implementation.

Solution: Deploy the out-of-the-box solution. Enable users to customize the solution based on individual user scenarios.

Does the solution meet the goal?

NEW QUESTION 93

DRAG DROP - (Topic 6)

You are testing service updates for Dynamics 365 Finance by using the Regression suite automation tool (RSAT).

You need to select the appropriate test case type for each test requirement.

Which test case types should you use? To answer, drag the appropriate test case types to the correct test requirements. Each test case type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Test case types	Answer Area	Test case type
<input type="text" value="automated"/> <input type="text" value="chained"/> <input type="text" value="derived"/> <input type="text" value="manual"/>	<p>Test requirement</p> <p>Use a single task recording to complete multiple tests by using different parameter values.</p> <p>Use a value captured in one test as a variable in a second test.</p>	<input type="text"/> <input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: derived
 Derived test case
 RSAT lets you use the same task recording with multiple test cases, enabling a task to run with different data configurations.

Box 2: chained
 Saved variables and chaining of test cases
 One of the key features of RSAT is the chaining of test cases, that is, the ability of a test to pass variables to other tests

A third-party logistics company uses Dynamics 365 Supply Chain Management to manage its warehouses.

Customers send items to the company's warehouse for controlled storage. Once a month, customers send the company an email with an attachment containing new items entered in a standardized Excel template.

The company must be able to do the following:

- Migrate the data into Dynamics 365 Supply Chain Management.
- Avoid using Dynamics 365 Supply Chain Management system forms to enter the data.

You need to identify the configuration and tool to assist with entering the data into the system.

Solution: Create an Excel template with an OData entity. Enter the new items into the Excel template and publish the changes to Dynamics 365 Supply Chain Management.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 133

HOTSPOT - (Topic 5)

You need to meet the project manager's requirements for testing. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement

Configuration

Document step

Add developer placeholder
RSAT optional settings
Preferred value instruction
User-supplied value label

Required control

RSAT configurations
Azure DevOps settings
Task recorder edit step
Hide this step

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Add developer placeholder.

Note: The user creating the test script must document the step in the test script that the specific validation script must be run for the developers.

Add developer placeholder lets the user add a placeholder step to the list of recorded steps. This placeholder step doesn't appear when the task guide is viewed, and it isn't run

during maintenance of a recording. It's used only by the Regression suite automation tool (RSAT) or the X++ code generator that enables an X++ test to be created from a task recording. When the code generator creates an X++ test, it automatically adds a method stub to the generated code. The developer can then add X++ code into this method stub. The automated code will call the validation when the generated test is run at the point in the recording where this placeholder was added.

Note: The project manager is concerned that a critical field must have validation scripts run against it during automated testing. The developers will be required to write the custom validation script. The user creating the test script must document the step in the test script that the specific validation script must be run for the developers.

Box 2: Task Recorder Edit Step

Note: The developers will be required to write the custom validation script.

Enriching steps in a recording

There are various options for enriching a step in a recording. For example, you can adjust the text that is associated with a step and add information about a specific step. This section describes the step enrichment capabilities that are available. To access these options, click the Edit step button on a specific step of a recording.

NEW QUESTION 183

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Finance and Operations security administrator.

When testing security setups, users report that certain roles are gaining access to sensitive information via a form in the system.

You must investigate which user roles have what visibility and access level to system objects, and then send a report to the implementation team to address security compliance concerns.

You need to report the information from the system. Solution: Generate the Security role access report. Does the solution meet the goal?

- A. Yes
- B. No

NEW QUESTION 184

- (Topic 6)

Dynamics 365 Finance is implemented at your company.

Users in the accounts payable roles and inventory management roles can edit the general ledger details for all departments. These roles must not be able to change the inventory on hand or be able to pay a parts supplier. The users have physical access to warehouses.

You attempt to remove the users from the roles and see that the users are then added back to the roles.

Users must not be able to be added to both roles. Users in a single role must be able to perform their duties.

You need to ensure that users are assigned to the proper roles.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Remove the privileges from the roles.
- B. Include the users in automatic assignment.
- C. Set up segregation of duties for the users.
- D. Remove segregation of duties for the users.
- E. Exclude the users from automatic assignment.

Answer: BC

Explanation:

B: To use anything other than common capabilities in finance and operations apps, users must be assigned to security roles. You can assign users to roles automatically, based on rules and business data, exclude users from automatic role assignment, or add users to roles manually.

C: You can set up rules to separate tasks that must be performed by different users. This concept is named segregation of duties.

NEW QUESTION 199

- (Topic 6)

A company uses Dynamics 365 Finance. The company uses a number sequence named GenJml_01 for general journal vouchers. The number sequence is configured as follows:

Configuration option	Value
Format	GNJL####
Smallest number allocation	1
Largest number allocation	9999
Next number allocation	10000
Allow user changes to a lower number	No
Allow user changes to a higher number	No

A user receives the following error message when creating a new general journal: Number sequence GenJrn_01 has been exceeded.

You need to update the configuration of the number sequence to resolve the error.

Which two actions should you perform? Each correct answer presents pan of the solution.

NOTE: Each correct selection it worth one point.

- A. Update Allow user changes to a higher number to Yes.
- B. Update the number format to GNJL#####.
- C. Update the Next number allocation to 1.
- D. Update the Largest number allocation to 99999.
- E. Update the Smallest number allocation to 1000.

Answer: BD

Explanation:

When the number sequence in Dynamics AX has reached the highest number, an error message will occur, "number sequence has been exceeded." This can occur with any process done in Dynamics AX that uses a number sequence. The example below occurred when a sales order was trying to be confirmed. Due to the number sequence reaching the highest number, the system will not allow the sales order conformation to be completed.

To fix the issue, you will first need to look up the number sequence that will need to be changed.

- * 1. Go to Accounts receivables> Accounts Receivables Parameters
- * 2. Look for Conformation
- * 3. Right-click view details on number sequence code (Sales_31)
- * 4. Click edit
- * 5. Add another # in an alphanumeric segment that will extend the value field
- * 6. Add another 9 in the largest field
- * 7. Click edit again to save

NEW QUESTION 293

DRAG DROP - (Topic 6)

A company uses Dynamics 365 Supply Management. You must implement a guided process to manage actions that be performed when a customer reports a delivery that includes missing items. You need to configure case management. Where should you complete each configuration? To answer, drag the appropriate locations to the correct requirement. Each location may be used once, more than once, or into at all. You may need to drag the split bar between panes scroll to view content.
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Case Process

You should set up processes that employees must follow for the cases that are opened in your organization. Processes help guarantee consistency for the people who are involved in cases, and also help employees resolve cases faster and more efficiently. You can set up a process for each case category that cases are assigned to. Although planning a separate process for each case type takes time, case resolution will go much more smoothly if the processes are planned out.

Box 2: Case category security Case category security by role

Only appropriate employees in an organization should have access to cases and related information. To control which employees have access to view, create, and update different types of cases, you can assign security roles to case category types. You must determine which security roles should have access to the various case category types.

Box 3: Case workflow

You can setup cases in a deeper way by using workflows in Organization administration.
