

Exam Questions MD-101

Managing Modern Desktops (beta)

<https://www.2passeasy.com/dumps/MD-101/>

NEW QUESTION 1

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.

How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours

If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:

Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 2

- (Exam Topic 4)

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- B. Create a provisioning package (.ppkg) file and email the file to the user
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 3

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics. You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: B

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 4

- (Exam Topic 4)

You use the Antimalware Assessment solution in Microsoft Azure Log Analytics. From the Protection Status dashboard, you discover the computers shown in the following table.

Name	Issue
Computer1	No real time protection
Computer2	Not reporting

You verify that both computers are connected to the network and running. What is a possible cause of the issue on each computer? To answer, drag the appropriate causes to the correct computers. Each cause may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Possible Causes

The Microsoft Monitoring Agent is uninstalled.

The Microsoft Windows Malicious Software Removal Tool is installed.

Windows Defender Application Guard is misconfigured.

Windows Defender is disabled.

Answer Area

Computer1:

Possible Cause

Computer2:

Possible Cause

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/ga-ie/azure/security-center/security-center-install-endpoint-protection>

NEW QUESTION 5

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)
Microsoft Endpoint Configuration Manager
Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)
Microsoft Endpoint Configuration Manager
Microsoft Intune

Manage the traffic by using:

Delivery Optimization
BranchCache
Peer cache

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 6

- (Exam Topic 4)

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains Windows 10 devices that are managed by using Microsoft Endpoint Configuration Manager.

You plan to deploy Microsoft 365 Apps for enterprise to the devices by using Configuration Manager. You create a Configuration.xml file as shown in the following exhibit.

```
<Configuration ID="67e*0d4f-814a-4466-9e3c-1388d66a527c">
  <Add OfficeClientEdition="64" Channel="Current" OfficeMgmtCOM="TRUE">>
    <Product ID="0365ProPlusRetail">
      <Language ID="MatchOS" />
      <ExcludeApp ID="Access" />
      <ExcludeApp ID="Groove" />
      <ExcludeApp ID="Lync" />
      <ExcludeApp ID="Publisher" />
    </Product>
  </Add>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
  <Property Name="SCLCacheOverride" Value="0" />
  <Property Name="AUTOACTIVATE" Value="0" />
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="DeviceBasedLicensing" Value="1" />
  <RemoveMSI />
  <AppSettings>
    <Setup Name="Company" Value="Contoso.com" />
  </AppSettings>
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="\\Server1\Office" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Microsoft 365 Apps for enterprise will be installed from [answer choice]	<div>▼</div> <div> \\Server1\Office a Configuration Manager distribution point the Office 365 Content Delivery Network (CDN) </div>
New Microsoft Office feature updates will be available to devices [answer choice]	<div>▼</div> <div> twice a year in January and July once a month, on the second Tuesday of the month as soon as the update is ready, but on no set schedule </div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/office-deployment-tool-configuration-options> <https://docs.microsoft.com/en-us/deployoffice/overview-update-channels#semi-annual-enterprise-channel-overv>

NEW QUESTION 7

- (Exam Topic 4)

Your company has computers that run Windows 8.1, Windows 10, or macOS. The company uses Microsoft Intune to manage the computers.

You need to create an Intune profile to configure Windows Hello for Business on the computers that support it.

Which platform type and profile type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Platform type:	<div>✕</div> <div> macOS Windows 10 and later Windows 8.1 and later </div>
Profile type:	<div>✕</div> <div> Device restrictions Device restrictions (Windows 10 Team) Endpoint protection </div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-configure>

NEW QUESTION 8

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All users have computers that run Windows 10. The computers are joined to Azure AD and managed by using Microsoft Intune.

You need to ensure that you can centrally monitor the computers by using Windows Analytics. What should you create in Intune?

- A. a device configuration profile
B. a conditional access policy
C. a device compliance policy
D. an update policy

Answer: A

Explanation:

References:

<https://www.sccconfigmgr.com/2019/03/27/windows-analytics-onboarding-with-intune/>

NEW QUESTION 9

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10
- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.

Which devices will apply Policy1?

- A. Device1, Device2, Device4, and Device5
- B. Device1, Device4, and Device5 only
- C. Device4 and Device5 only
- D. Device1, Device3, Device4 and Device5

Answer: A

Explanation:

Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.

Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

NEW QUESTION 10

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

Existing on-premises computers are managed by using Microsoft System Center Configuration Manager (Current Branch). You configure contoso.com for co-management.

You deploy 100 new devices that run Windows 10. The devices are joined to Azure AD and enrolled in Microsoft Intune.

You need to ensure that the devices are co-managed. What should you create in Intune first?

- A. a conditional access policy
- B. a device compliance policy
- C. an app for the Configuration Manager client
- D. a device configuration profile
- E. an app configuration policy

Answer: C

Explanation:

For new internet-based devices, you need to create an app in Intune. Deploy this app to Windows 10 devices that aren't already Configuration Manager clients.

This scenario is when you have new Windows 10 devices that join Azure AD and automatically enroll to Intune. You install the Configuration Manager client to reach a co-management state.

References:

<https://docs.microsoft.com/en-us/configmgr/comanage/how-to-prepare-win10>

NEW QUESTION 10

- (Exam Topic 4)

You have the x64 devices shown in the following table.

Name	Operating system	Installed apps
Computer1	64-bit version of Windows 8.1 Pro	Microsoft Office 2013
Computer2	32-bit version of Windows 8.1 Enterprise	None

You have the Windows 10 Enterprise images shown in the following table.

Name	Platform	Description
Image1	x64	Custom Windows 10 Enterprise image that has Microsoft Office 2019 installed
Image2	x64	Default Windows 10 Enterprise image created by Microsoft
Image3	x86	Custom Windows 10 Enterprise image that has Microsoft Office 2019 installed
Image4	x86	Default Windows 10 Enterprise image created by Microsoft

You need to identify which images can be used to perform an in-place upgrade of Computer1 and Computer2. Which images should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Computer1:

Image1 only
Image2 only
Image1 and Image2 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4

Computer2:

Image3 only
Image4 only
Image3 and Image4 only
Image2, Image3, and Image4 only
Image1, Image2, Image3, and Image4

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Image1 and Image2 only

Computer1 is a x64 system so Image1 and Image2 are fine.

Note: x86 refers to a 32-bit CPU and operating system while x64 refers to a 64-bit CPU and operating system. Box 2: Image3 and Image4 only

There is no upgrade path from 32 bit versions of Windows to Windows 8 64 bit.

Reference:

<https://answers.microsoft.com/en-us/windows/forum/all/switch-from-x86-to-x64/a69b5aae-9d20-414b-86b8-004>

NEW QUESTION 12

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Group
Device1	Windows 10	Group1, Group2
Device2	Android	Group2
Device3	iOS	Group2, Group3

You create device configuration profiles in Intune as shown in the following table.

Name	Platform	Minimum password length
Profile1	Windows 10 and later	4
Profile2	Android	5
Profile3	iOS	6
Profile4	Android	7
Profile5	iOS	8

You assign the device configuration profiles to groups as shown in the following table.

Group	Profile
Group1	Profile3
Group2	Profile1, Profile2, Profile4
Group3	Profile3, Profile5

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes

No

Device1 must have a minimum password length of seven characters. ☐

☐

Device2 must have a minimum password length of seven characters. ☐

☐

Device3 must have a minimum password length of six characters. ☐

☐

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

If a compliance policy evaluates against the same setting in another compliance policy, then the most restrictive compliance policy setting applies.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 15

- (Exam Topic 4)

You have 100 computers that run Windows 8.1.

You need to identify which computers can be upgraded to Windows 10. What should you use?

- A. Microsoft Deployment Toolkit (MDT)
- B. Update Compliance Azure
- C. Windows Assessment Toolkit
- D. Microsoft Assessment and Planning (MAP) Toolkit.

Answer: D

Explanation:

Reference:

<https://www.techielass.com/using-maps-azure-readiness/>

NEW QUESTION 18

- (Exam Topic 4)

Your company implements Microsoft Azure Active Directory (Azure AD), Microsoft 365, Microsoft Intune, and Azure Information Protection.

The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. a supervision policy from the Security & Compliance admin center
- C. an app protection policy from the Intune admin center
- D. a device configuration profile from the Intune admin center

Answer: C

Explanation:

References:

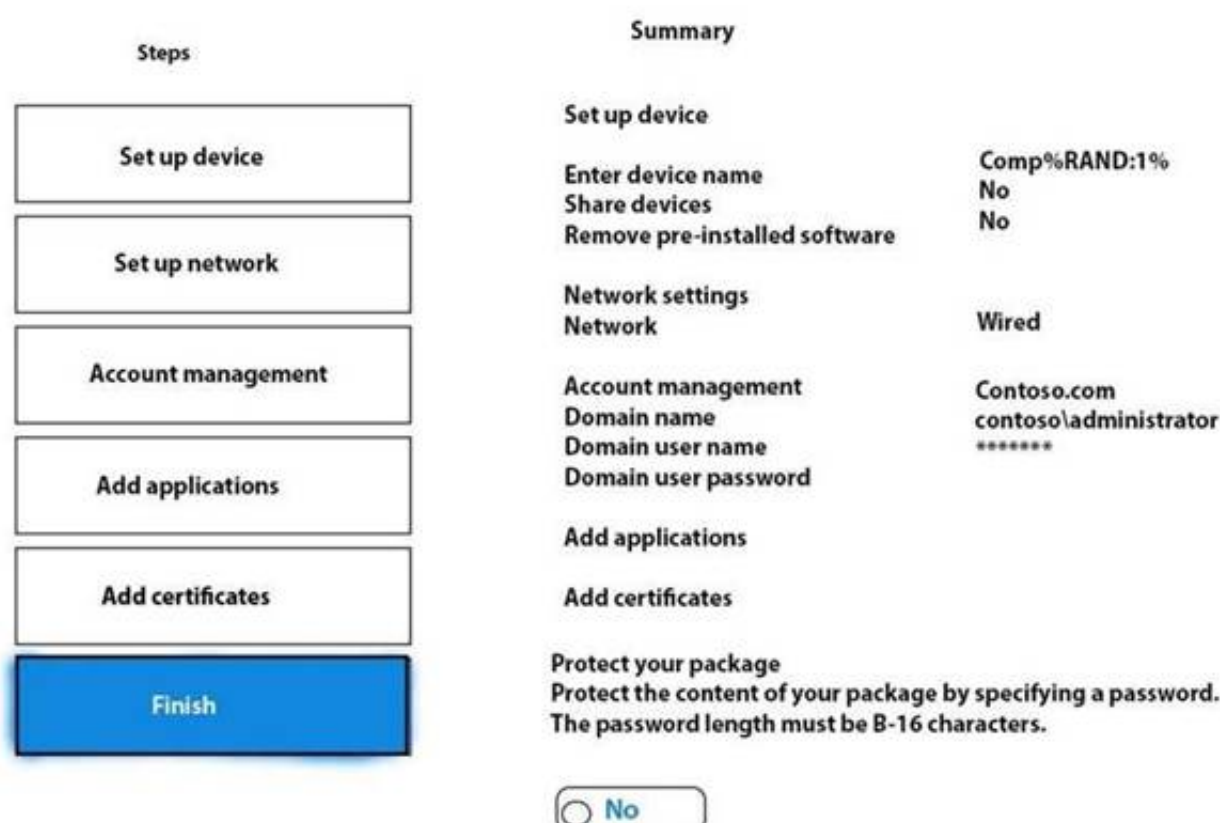

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

NEW QUESTION 20

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com.

You create a provisioning package named Package1 as shown in the following exhibit.

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 23

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1. Solution: From the Settings app, you use the Recovery options. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

https://answers.microsoft.com/en-us/windows/forum/windows_10-windows_install/how-to-recover-restore-your

NEW QUESTION 24

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from Microsoft 365 Device Management? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 security baseline
- E. a Windows 10 update ring

Answer: BE

NEW QUESTION 26

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On Server1:

Import the Deployment Image Servicing and Management (DISM) PowerShell module.
Import the WindowsAutopilotIntune Windows PowerShell module.
Install the Windows Assessment and Deployment Kit (Windows ADK).
Install the Windows Deployment Services server role.

Add to the MDT deployment share:

Windows 10 image and package only
Windows 10 image and task sequence only
Windows 10 image only
Windows 10 image, task sequence, and package

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:

Open an elevated Windows PowerShell prompt and enter the following command: Install-WindowsFeature -Name WDS -IncludeManagementTools WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All

Box 2: Windows 10 image and task sequence only Create the reference image task sequence

In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 31

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). You create an Azure Log Analytics workspace and deploy the Device Health solution. You need to enroll the computers in Windows Analytics. Which Group Policy setting should you configure?

- A. Specify intranet Microsoft update service location
- B. Allow Telemetry
- C. Configure the Commercial ID
- D. Connected User Experiences and Telemetry

Answer: C

Explanation:

Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-get-started>

NEW QUESTION 35

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Platform	(Azure Active Directory) Azure AD join type	Managed by using Microsoft Intune
Device1	Windows 10	Joined	Yes
Device2	Android	Registered	Yes
Device3	iOS	None	Yes
Device4	Windows 10	None	No
Device5	iPadOS	Registered	No

You need to assign app protection settings to the devices.

What is the minimum number of app protection policies required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies>

NEW QUESTION 37

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com that syncs to Azure Active Directory (Azure AD). Azure AD contains the users shown in the following table.

Name	Source	Member of
User1	Azure AD	Group1
User2	Windows Active Directory	Group2

You assign Windows 10 Enterprise E5 licenses to Group1 and User2. You add computers to the network as shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10 Pro	Azure AD
Computer2	Windows 10 Pro	Active Directory
Computer3	Windows 8.1	Active Directory

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 signs in to Computer1, Computer1 will be upgraded to Windows 10 Enterprise E5 automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer2, Computer2 will be upgraded to Windows 10 Enterprise E5 automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer3, Computer3 will be upgraded to Windows 10 Enterprise E5 automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 39

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the Internet by using Microsoft Edge. You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft\Windows > DeviceGuard > Operational
 B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations> User Mode
 C. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
 D. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-smartscreen/microsoft-defender-smartscreen-overview#viewing-windows-event-logs-for-microsoft-defender-smartscreen>

NEW QUESTION 41

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Inline. You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune. Solution: From Computer1, you sign in to <https://portal.manage.microsoft.com> and use the Devices tab. Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Use MDM enrolment.
 MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.
 Reference:
<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 42

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
 B. Device2 only
 C. Device1 and Device2 only
 D. Device1 only
 E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business

Windows 8.1 and later Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 47

- (Exam Topic 4)

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain. You create a workspace in Microsoft Azure Log Analytics.

You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Azure service to provision:

<input type="checkbox"/>	An Azure Storage account
<input type="checkbox"/>	Azure Cosmos DB
<input type="checkbox"/>	Azure SQL Database
<input type="checkbox"/>	Log Analytics

Action to perform on the computers:

<input type="checkbox"/>	Create a collector initiated subscription
<input type="checkbox"/>	Install the Microsoft Monitoring Agent
<input type="checkbox"/>	Enroll in Microsoft Intune
<input type="checkbox"/>	Register to Azure Active Directory (Azure AD)

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/agent-windows>

NEW QUESTION 52

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-deployment-scenarios-and-tools>

NEW QUESTION 56

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You plan to enable Enterprise State Roaming.

Which three types of data will sync across devices? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. desktop theme settings

B. internet passwords

C. Microsoft Edge Chromium settings

D. Microsoft Teams settings

E. mouse settings

Answer: ABC

NEW QUESTION 57

- (Exam Topic 4)

Your company has a Microsoft 365 tenant.

Users sign in to Windows 10 devices by using their Microsoft 365 account.

On a computer, you open Sync your settings as shown in the exhibit. (Click the Exhibit tab.)

- A. Enable User Experience Virtualization (UE-V).
- B. Enable Windows Mobility Center.
- C. Disable Windows Hello for Business.
- D. Enable Enterprise State Roaming.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-enable>

NEW QUESTION 60

- (Exam Topic 4)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

Answer: D

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- Sign in to the Microsoft Endpoint Manager admin center.
- Select Reports > Intune Data warehouse > Data warehouse.
- Retrieve the custom feed URL from the reporting blade, for example:
- Open Power BI Desktop.
- Choose File > Get Data. Select OData feed.
- Choose Basic.
- Type or paste the OData URL into the URL box.
- Select OK.
- If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
- Select Organizational account.
- Type your username and password.
- Select Sign In.
- Select Connect.
- Select Load.

Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 61

- (Exam Topic 4)

You have a Microsoft Office 365 E1 subscription. You plan to create Conditional Access policies.

You need to ensure that users have the required licenses. The solution must minimize costs. Which type of license should you assign to each user?

- A. Microsoft Intune
- B. Azure Active Directory Premium Plan 1
- C. Office 365 E3
- D. Windows 365 Business

Answer: C

NEW QUESTION 64

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You need to create a Conditional Access policy to ensure that when a user accesses the Microsoft 365 portal, the user will be prompted to sign in again after seven days.

What should you configure to specify the sign-in frequency?

- A. Session access controls
- B. an assignment that uses the Cloud apps or actions settings
- C. Grant access controls
- D. an assignment condition

Answer: A

Explanation:

Conditional Access: Session

Within a Conditional Access policy, an administrator can make use of session controls to enable limited experiences within specific cloud applications.

Sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource. Administrators can select a period of time (hours or days) or choose to require reauthentication every time.

Sign-in frequency setting works with apps that have implemented OAUTH2 or OIDC protocols according to the standards. Most Microsoft native apps for Windows, Mac, and Mobile including the following web applications follow the setting.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-session>

NEW QUESTION 66

- (Exam Topic 4)

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Role
User1	Global admin
User2	Application admin
User3	None
User4	None

You provision the private store in Microsoft Store for Business and assign Microsoft Store for Business roles to the users as shown in the following table.

Name	Role
User2	Admin
User3	Purchaser
User4	Basic Purchaser

You configure the following Shopping behavior settings for the Microsoft Store for Business:

- > Allow users to shop: Yes
- > Make everyone a Basic Purchaser: Off
- > Allow app requests: On
- > Shop offline apps: Off

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can assign the Microsoft Store for Business Admin role to User4.	<input type="radio"/>	<input type="radio"/>
When User4 requests an app from the Microsoft Store for Business, User2 will be notified.	<input type="radio"/>	<input type="radio"/>
User3 can assign apps from the Microsoft Store for Business to User2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business> <https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business>

NEW QUESTION 68

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 25 Apple iPads.

You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method. What should you do first?

- A. Upload a file that has the device identifiers for each iPad.
- B. Modify the enrollment restrictions.
- C. Configure an Apple MDM push certificate.

D. Add your user account as a device enrollment manager (DEM).

Answer: C

Explanation:

An Apple MDM Push certificate is required for Intune to manage iOS/iPadOS and macOS devices. After you add the certificate to Intune, your users can enroll their devices.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/apple-mdm-push-certificate-get>

NEW QUESTION 70

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system	Domain member
Device1	Windows 8.1 Enterprise	Yes
Device2	Windows 10 Pro	No
Device3	Windows 10 Enterprise	Yes
Device4	Mac OS X	No

You plan to implement Microsoft Defender for Endpoint.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint. What should you identify?

- A. Device3 only
- B. Device 1, Device2, and Device3 only
- C. Device 1, Device2, Device3, and Device4
- D. Device2 and Device3 only
- E. Device2, Device3, and Device4 only

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/mem/configmgr/protect/deploy-use/defender-advanced-threat-protection#bkmk>

NEW QUESTION 71

- (Exam Topic 4)

A company named A-Datum Corporation uses Microsoft Endpoint Configuration Manager, Microsoft Intune, and Desktop Analytics.

A-Datum purchases a company named Contoso, Ltd. Contoso has devices that run the following operating systems:

- > Windows 8.1
- > Windows 10
- > Android
- > iOS

A-Datum plans to use Desktop Analytics to monitor the Contoso devices.

You need to identify which devices can be monitored by using Desktop Analytics and how to add the devices to Desktop Analytics.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can be monitored by using Desktop Analytics:

▼

Windows 10 only

Windows 10, Android, and iOS only

Windows 8.1 and Windows 10 only

Windows 8.1, Windows 10, Android, and iOS

To add a device to Desktop Analytics, you must:

▼

Enroll the device in Microsoft Intune.

Install the Endpoint Configuration Manager agent.

Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/overview>

NEW QUESTION 72

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1. Computer1 has apps that are compatible with Windows 10. You need to perform a Windows 10 in-place upgrade on Computer1. Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:
Instead: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.
Reference: https://docs.microsoft.com/en-us/windows/deployment/windows-deployment-scenarios-and-tools

NEW QUESTION 75
- (Exam Topic 4)
You have a Microsoft 365 tenant.
You have a Windows 10 update ring named Policy1 as shown in the following exhibit.

Basics

Name	Policy1
Description	--

Update ring settings

Update settings

Servicing channel	Semi-Annual Channel
Microsoft product updates	Allow
Windows drivers	Block
Quality update deferral period (days)	0
Feature update deferral period (days)	0
Set feature update uninstall period (2–60 days)	14

A Windows 10 Feature update deployment named Policy2 is configured as shown in the following exhibit.

Deployment settings

Name	Policy2
Description	--
Feature deployment settings	
Name	Windows 10 2004

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Windows 10 edition	Policy applied
Device1	Windows 10 Enterprise, version 20H2	Policy1
Device2	Windows 10 Pro, version 2004	Policy2
Device3	Windows 10 Enterprise, version 20H2	Policy2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 will install feature updates twice a year.	<input type="radio"/>	<input type="radio"/>
Device2 will install feature update 20H2.	<input type="radio"/>	<input type="radio"/>
Device3 will be downgraded to feature update 2004.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-10-update-rings>

NEW QUESTION 76

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You implement hybrid Microsoft Azure Active Directory (Azure AD) and Microsoft Intune.

You need to automatically register all the existing computers to Azure AD and enroll the computers in Intune. The solution must minimize administrative effort.

What should you use?

- A. An Autodiscover address record.
- B. A Windows AutoPilot deployment profile.
- C. An Autodiscover service connection point (SCP).
- D. A Group Policy object (GPO).

Answer: B

Explanation:

Reference:

<https://techcommunity.microsoft.com/t5/Windows-IT-Pro-Blog/Windows-Autopilot-Hybrid-Azure-AD-join-and>

NEW QUESTION 78

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 10 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.

Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. bcdedit
- D. sysprep

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep--system-preparation-- overview>

NEW QUESTION 81

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant, a Microsoft System Center Configuration Manager (Current Branch) environment, and a Microsoft 365 subscription.

You have computers that run Windows 10 as shown in the following table.

Name	Managed by Configuration Manager	Domain membership
Computer1	Yes	Active Directory-joined
Computer2	Yes	Hybrid Azure AD-joined
Computer3	Yes	Azure AD-joined

You plan to use Microsoft 365 Device Management.

Which computers support co-management by Configuration Manager and Device Management?

- A. Computer1, Computer2, and Computer3
- B. Computer3 only
- C. Computer1 and Computer2 only
- D. Computer2 only

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comange/overview>

NEW QUESTION 84

- (Exam Topic 4)

Your company has an infrastructure that has the following:

- > A Microsoft 365 tenant
- > An Active Directory forest
- > Microsoft Store for Business
- > A Key Management Service (KMS) server
- >

A Windows Deployment Services (WDS) server
 > A Microsoft Azure Active Directory (Azure AD) Premium tenant
 The company purchases 100 new computers that run Windows 10.
 You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.
 What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Store for Business
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 89

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Random Delay. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 90

- (Exam Topic 4)

You have a shared computer that runs Windows 10. The computer is infected with a virus.

You discover that a malicious TTF font was used to compromise the computer.

You need to prevent this type of threat from affecting the computer in the future. What should you use?

- A. Windows Defender Exploit Guard
- B. Windows Defender Application Guard
- C. Windows Defender Credential Guard
- D. Windows Defender System Guard
- E. Windows Defender SmartScreen

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/windowsd>

NEW QUESTION 91

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has the devices shown in the following table.

Name	Platform	Registered in contoso.com
Device1	Windows 10	No
Device2	Android	Yes
Device3	iOS	Yes

On September 5, 2019, you create and enforce a terms of use (ToU) in contoso.com. The ToU has the following settings:

- > Name: Terms1
- > Display name: Terms name
- > Require users to expand the terms of use: Off
- > Require users to consent on every device: On
- > Expire consents: On
- > Expire starting on: October 10, 2019
- > Frequency Monthly

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 will be prompted to accept Terms1 on Device1.	<input type="radio"/>	<input type="radio"/>
User1 will be prompted to accept Terms1 on Device2.	<input type="radio"/>	<input type="radio"/>
User1 will be prompted to accept Terms1 on Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/terms-of-use#frequently-asked-questi>

NEW QUESTION 94

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview>

NEW QUESTION 96

- (Exam Topic 4)

You are licensed for Microsoft Endpoint Manager.

You use Microsoft Endpoint Configuration Manager and Microsoft Intune.

You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

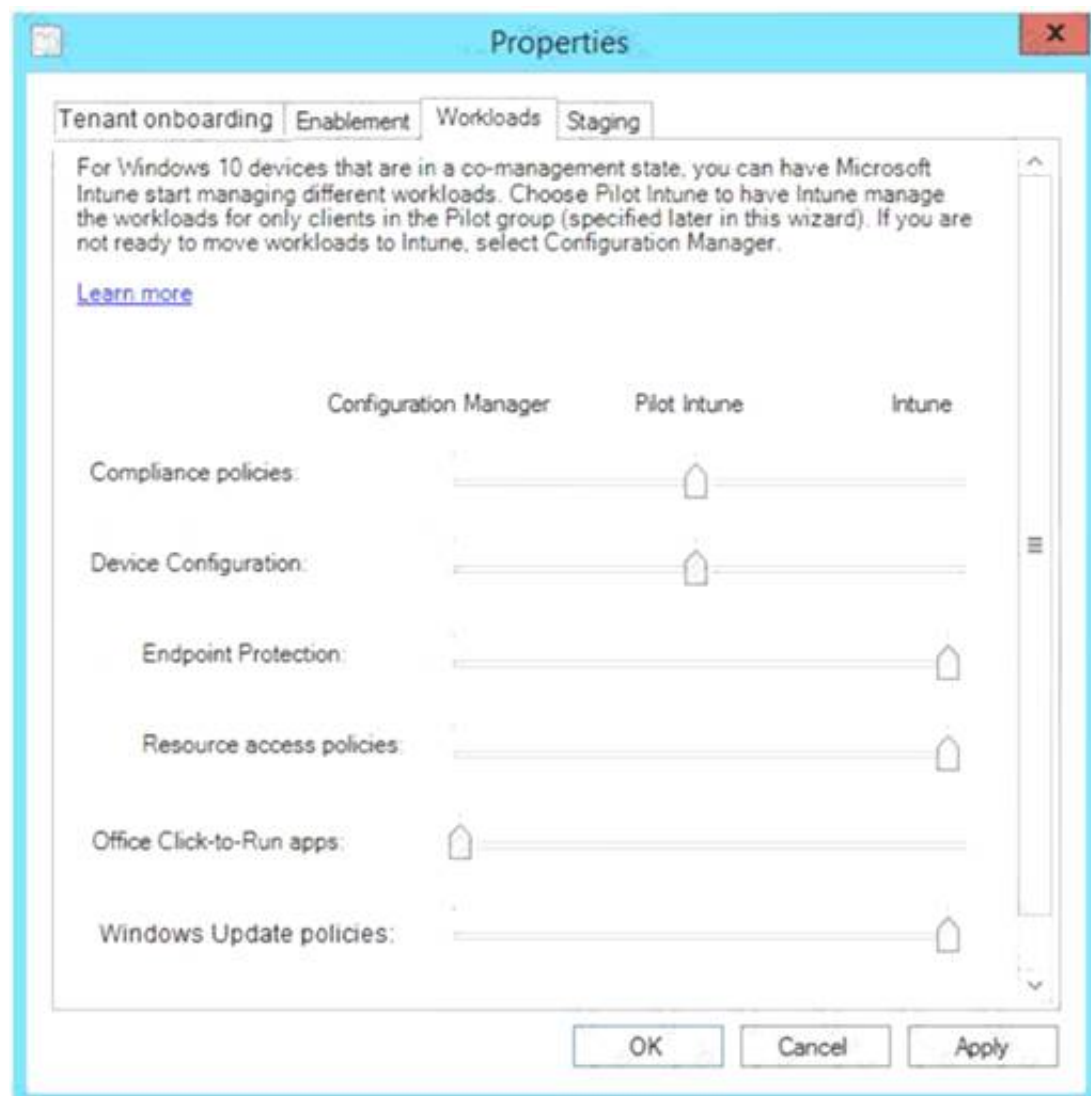

In Configuration Manager, you enable co-management and configure the following settings:

- > Automatic enrolment in Intune: Pilot
- > Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- > Compliance policies: Collection2
- > Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device1.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device2.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads

NEW QUESTION 101

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

A new user named Admin1 is responsible for deploying Windows 10 to computers and joining the computers to Microsoft Azure Active Directory (Azure AD).

Admin1 successfully joins computers to Azure AD.

Several days later, Admin1 receives the following error message: "This user is not authorized to enroll. You can try to do this again or contact your system administrator with the error code (0x801c0003)."

You need to ensure that Admin1 can join computers to Azure AD and follow the principle of least privilege.

- A. Assign the Global administrator role to Admin1.
- B. Modify the Device settings in Azure AD.
- C. Assign the Cloud device administrator role to Admin1.
- D. Modify the User settings in Azure AD.

Answer: B

Explanation:

References:

https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal

NEW QUESTION 102

- (Exam Topic 4)

You have unrooted devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- > Name: Network1
- > IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has following configurations:

- > Name: Policy1
- > Device health: Rooted devices: Block
- > Locations: Location: Network1
- > Mark device noncompliant: Immediately
- > Assigned: Group1

In Intune device compliance policy has the following configurations:

- > Mark devices with no compliance policy assigned as: Compliant
- > Enhanced jailbreak detection: Enabled
- > Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

NEW QUESTION 106

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

Delivery Optimization

Windows 10 and later

Basics **Configuration settings** Assignments

If you already configured and deployed Delivery Optimization download mode in Windows 10 update rings, before you begin, go to Software updates – Windows 10 update rings and migrate your existing settings.

NEW QUESTION 109

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure Enterprise State Roaming. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settingsrefere>

NEW QUESTION 110

- (Exam Topic 4)

You have computers that run Windows 8.1 or Windows 10. All the computers are enrolled in Microsoft Intune, Endpoint Configuration Manager, and Desktop Analytics. Co-management is enabled for your environment.

You plan to upgrade the Windows 8.1 computers to Windows 10.

You need to identify which Windows 8.1 computers do NOT have supported Windows 10 drivers.

What should you use?

- A. the General Hardware Inventory report in Configuration Manager
- B. the List of devices in a specific device category report in Configuration Manager
- C. Deployment plans in Desktop Analytics
- D. the Device compliance report in Intune

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/about-deployment-plans>

NEW QUESTION 112

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What should you configure from Microsoft 365 Device Management? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a Windows 10 security baseline
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 update ring
- E. a device restrictions device configuration profile

Answer: D

NEW QUESTION 117

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10 Pro.

The company develops a proprietary Universal Windows Platform (UWP) app named App1. App1 is signed with a certificate from a trusted certification authority (CA).

You need to sideload App1 to Computer1.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To enable sideloading:

<input type="checkbox"/> Configure the Apps & features settings in the Settings app <input type="checkbox"/> Configure the For developers settings in the Settings app <input type="checkbox"/> Run the Enable-WindowsOptionalFeature cmdlet <input type="checkbox"/> Run the Set-WindowsEdition cmdlet
--

To sideload App1:

<input type="checkbox"/> Double-click App1.appx in File Explorer <input type="checkbox"/> Use the Add a package option in the Settings app <input type="checkbox"/> Run the Install-Package cmdlet <input type="checkbox"/> Run the Add-AppxPackage cmdlet

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-enable-windows-10-sideload-apps-outside-store> <https://docs.microsoft.com/en-us/windows/application-management/sideload-apps-in-windows-10>

NEW QUESTION 119

- (Exam Topic 4)

You have a Microsoft 365 tenant and an internal certification authority (CA).

You need to use Microsoft Intune to deploy the root CA certificate to managed devices.

Which type of Intune policy and profile should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Policy type:

- App configuration policy
- App protection policy
- Compliance policy
- Configuration profile

Profile:

- Imported public key pair (PKCS) certificate
- Public key pair (PKCS) certificate
- Simple Certificate Enrollment Protocol (SCEP) certificate
- Trusted certificate

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Configuration profile Create a trusted certificate profile. Box 2: Trusted certificate

When using Intune to provision devices with certificates to access your corporate resources and network, use a trusted certificate profile to deploy the trusted root certificate to those devices. Trusted root certificates establish a trust from the device to your root or intermediate (issuing) CA from which the other certificates are issued.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-trusted-root>

NEW QUESTION 120

- (Exam Topic 4)

You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant.

You configure a Windows Autopilot deployment profile as shown in the following exhibit.

Create profile

Windows Autopilot deployment profiles

* Name

AutoPilot1 ✓

Description

Optional

By default, this profile can only be applied to Autopilot devices synced from the Autopilot service. [Learn More.](#)
 Convert all targeted devices to Autopilot.

☐ Yes ☒ No

* Deployment mode ⓘ

User-Driven

* Join to Azure AD as ⓘ

Azure AD joined

Out-of-box experience (OOBE)

Defaults configured >

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

To apply the profile to a new computer, you must first

▼

join the device to Azure AD
enroll the device in Microsoft Intune
import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

▼

joined to Azure AD only
registered in Azure AD only
joined to Active Directory only
joined to Active Directory and registered in Azure AD

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 123

- (Exam Topic 4)

Your company uses Windows Defender Advanced Threat Protection (Windows Defender ATP). Windows Defender ATP includes the machine groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Windows Defender ATP as shown in the following exhibit.

 computer1

Actions ▼

Domain: adatum.com
OS: Windows10 64-bit (Build 17134)
Machine IP addresses >

What is the effect of the Windows Defender ATP configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1 will be a member of:

▼

Group3 only
Group4 only
Grou5 only
Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

▼

Group1 only
Group2 only
Group1 and Group2 only
Group1, Group2, Group3, Group4, and Group5

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Computer1 will be a member of:

Group3 only
Group4 only
Grou5 only
Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only
Group2 only
Group1 and Group2 only
Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 128

- (Exam Topic 4)

Your company plans to deploy Windows 10 to device that will be configured for Englis use and other devices that will be configured for Korean use. You need to create a single multivariate provisioning for the planned for the planned devices. You create the provisioning package. What should do you next to add the language settings to the package?

- A. Create a file named Language.XML that contains a header for Korean.
- B. Modify the .ppkg file.
- C. Create a file named languages.xml that contains a header for English.
- D. Modify the Customizations xmlfile

Answer: D

Explanation:

Follow these steps to create a provisioning package with multivariant capabilities.

- > Build a provisioning package and configure the customizations you want to apply during certain conditions.
- > After you've configured the settings, save the project.
- > Open the project folder and copy the customizations.xml file to any local location.
- > Use an XML or text editor to open the customizations.xml file.
- > Edit the customizations.xml file to create a Targets section to describe the conditions that will handle your multivariant settings.
- > In the customizations.xml file, create a Variant section for the settings you need to customize.
- > Save the updated customizations.xml file and note the path to this updated file. You will need the path as one of the values for the next step.
- > Use the Windows Configuration Designer command-line interface to create a provisioning package using the updated customizations.xml.

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-multivariant>

NEW QUESTION 129

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1.

Solution: You restart the computer to Windows Recovery Environment (Windows RE) and use the Advanced options.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 132

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need provide a user the ability to disable Security defaults and create Conditional Access policies. The solution must use the principle of least privilege.

Which role should you assign to the user?

- A. Global Administrator
- B. Conditional Access Administrator
- C. Security Administrator
- D. Intune Administrator

Answer: B

Explanation:

To enable or disable security defaults in your directory, sign in to the Azure portal as a security administrator, Conditional Access administrator, or global administrator.

Note: Conditional Access Administrator

Users with this role have the ability to manage Azure Active Directory Conditional Access settings. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/concept-fundamentals-security-defaults>

NEW QUESTION 134

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe Package1.ppkg command.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 137

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains 500 computers that run Windows 11 and are enrolled in Microsoft Endpoint Manager. You need to manage the deployment of monthly security updates. The solution must meet the following requirements:

- Updates must be deployed to a group of test computers for quality assurance.
- Updates must be deployed automatically 15 days after the quality assurance testing. What should you create in the Microsoft Endpoint Manager admin center?

A. an update ring

B. a security baseline

C. a feature update policy

D. a device configuration profile

Answer: A

NEW QUESTION 142

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 10 Readiness scenario.

Does this meet the goal?

A. Yes

B. No

Answer: A

NEW QUESTION 145

- (Exam Topic 4)

You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.

You have a computer named Computer1 than runs Windows 10. You need to view the events collected from Computer1.

Which query should you run in Log Analytics?

A. Event| where Computer == "Computer1"

B. ETWEvent| where SourceSystem == "Computer1"

C. ETWEvent| where Computer == "Computer1"

D. Event| where SourceSystem == "Computer1"

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

NEW QUESTION 147

- (Exam Topic 4)

You upgrade three computers from Windows 8.1 to Windows 10 as shown in the following table.

Name	Days since upgrade
Computer1	18
Computer2	9
Computer3	3

The in-place upgrade settings used to perform the upgrade are shown in the following table.

Name	Setting
Computer1	Keep personal files and apps
Computer2	None
Computer3	Keep personal files and apps

After the upgrade, you perform the following actions on each computer: Add a local user account named LocalAdmin1.

_ Install Microsoft Office 2019.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can roll back Computer1 to Windows 8.1	<input type="radio"/>	<input type="radio"/>
You can roll back Computer2 to Windows 8.1	<input type="radio"/>	<input type="radio"/>
You can roll back Computer3 to Windows 8.1	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.infoworld.com/article/3033806/how-to-roll-back-your-windows-10-upgrade.html>

NEW QUESTION 150

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You are creating a Windows Autopilot deployment profile named Profile1 as shown in the following exhibit.

Create profile

Windows PC

1 Basics 2 **Out-of-box experience (OOBE)** 3 Scope tags 4 Assignments 5 Review + create

Configure the out-of-box experience for your Autopilot devices

* Deployment mode ⓘ User-Driven

* Join to Azure AD as ⓘ Azure AD joined

Microsoft Software License Terms ⓘ Show Hide

Privacy settings ⓘ Show Hide

The default value for diagnostic data collection has changed for devices running Windows 10, version 1903 and later. [Learn more](#)

Hide change account options ⓘ Show Hide

User account type ⓘ Administrator Standard

Allow White Glove OOBE ⓘ No Yes

Apply device name template ⓘ No Yes

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Users who deploy a device by using Profile1
 [answer choice].

	▼
are prevented from modifying any desktop settings	
can create additional local users on the device	
can modify the desktop settings for all device users	
can modify the desktop settings only for themselves	

Users can configure the [answer choice] during
 the deployment.

	▼
computer name	
Cortana settings	
keyboard layout	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/user-driven#:~:text=Windows%20Au> <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/white-glove>

NEW QUESTION 153

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune. You need to deploy a custom line-of-business (LOB) app to the devices by using Intune.

Which extension should you select for the app package file?

- A. .intunemac
- B. .apk
- C. .jpa
- D. .appx

Answer: C

Explanation:

iOS/iPadOS LOB apps: Select Line-of-business app as the app type, select the App package file, and then enter an iOS/iPadOS installation file with the extension .ipa.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 154

- (Exam Topic 4)

You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. Unattend.xml
- B. Unattend.bat
- C. SetupConfig.ini
- D. LiteTouch.wsf

Answer: C

Explanation:

References:

<https://www.joseespitia.com/2017/06/01/how-to-run-a-post-script-after-a-windows-10-feature-upgrade/>

NEW QUESTION 155

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to perform the following tasks for User1:

- Set the Usage location to Canada.
- Configure the Phone and Email authentication contact info for self-service password reset (SSPR). Which two settings should you configure in the Azure Active Directory admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 160

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices. You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile template should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Deploy a custom Start layout:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Rename the local Administrator account:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Device restriction

Customize Start Menu Custom & Taskbar

Here is a quick step-by-step guide to help you to deploy the prepared XML file. This Intune policy helps to customize the start menu and taskbar for Windows 10 devices.

Logon to Microsoft Endpoint Manager Portal.

Navigate to Devices -> Windows -> Configuration Profiles. Select Platform -> Windows 10 and later.

Select Profile Type -> Template.

Search with "device" and select Device Restrictions. Click on Create button.

Box 2: Identity protection

Use an Identity protection profile to manage Windows Hello for Business on groups of devices in Microsoft Intune. Windows Hello for Business is a method for signing in to Windows devices by replacing passwords, smart cards, and virtual smart cards. Intune includes built-in settings so Administrators can configure and use Windows Hello for Business.

Reference:

<https://www.anoopcnaire.com/start-menu-taskbar-custom-layout-intune-cloudpc/> <https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-configure>

NEW QUESTION 164

- (Exam Topic 4)

You have computers that run Windows 10, are joined to Azure Active Directory (Azure AD), and are enrolled in Microsoft Intune.

You have an Azure web app named App1. App1 only allows connections over HTTPS. App1 uses a certificate from an on-premises certification authority (CA).

You need to ensure that the computers can connect to App1 from Microsoft Edge.

Which type of device configuration profile should you create in Microsoft Endpoint Manager?

- A. trusted certificate
- B. Simple Certificate Enrollment Protocol (SCEP) certificate
- C. imported public key pair (PKCS) certificate
- D. public key pair (PKCS) certificate

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-scep-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-configure>

NEW QUESTION 168

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 8.1
Device2	Windows 10
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

- A. Create an Azure Active Directory group that contains all users.
- B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
- C. From the Intune portal assign the app to the Azure Active Directory group.
- D. Create an Azure Active Directory group that contains the Windows 10 devices.
- E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
- F. For your organization, make the app available in the Microsoft Store for Business.

Answer: BCD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 170

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune.

You need to implement an ADMX-backed policy. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions
- D. Device restrictions (Windows 10 Team)

Answer: B

Explanation:

Reference:

<https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-usingmicr>

NEW QUESTION 173

- (Exam Topic 4)

Your company has a main office and six branch offices. The branch offices connect to the main office by using a WAN link. All offices have a local Internet connection and a Hyper-V host cluster.

The company has a Microsoft System Center Configuration Manager deployment. The main office is the primary site. Each branch has a distribution point. All computers that run Windows 10 are managed by using both Configuration Manager and Microsoft Intune.

You plan to deploy the latest build of Microsoft Office 365 ProPlus to all the computers.

You need to minimize the amount of network traffic on the company's Internet links for the planned deployment.

What should you include in the deployment plan?

- A. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Microsoft Deployment Toolkit (MDT) deploymentshare.

- B. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.
- C. From Configuration Manager, create an application deployment. Copy the Office 365 distribution files to a Configuration Manager cloud distribution point.
- D. From Configuration Manager, create an application deployment. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/deploy-office-365-proplus-with-system-center-configurationmanager>

NEW QUESTION 174

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to use Conditional Access policies.

You need to identify which scenarios the policies will support.

Which two scenarios should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Enforce multi-factor authentication (MFA) when users access a Microsoft Office 365 service.
- B. Force users to renew an expired SSL certificate.
- C. Force users to update Windows Defender definition files before they sign in to Microsoft Office 365.
- D. Block users from using legacy authentication when signing in to Microsoft Exchange Online.
- E. Force users to install the latest Windows and Microsoft Office updates before they sign in to Office 365.

Answer: AD

Explanation:

A: Conditional Access allows administrators to control what Office 365 apps users can gain access to based on if they pass/fail certain conditions. These conditions are enforced by building a policy (or multiple policies) to control how users access your Office 365 resources.

Cloud Apps- What apps do you want to control? Conditional Access does not need to apply to all of Office 365, you can be more granular and just control access to specific apps – E.g. Exchange Online.

Access can be allowed to Office 365 with the following conditions:

* Require multi-factor authentication – User is allowed in but will need to complete additional security to log in.

* Etc.

D: The easiest way to block legacy authentication across your entire organization is by configuring a Conditional Access policy that applies specifically to legacy authentication clients and blocks access.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/block-legacy-authentication><https://do>

NEW QUESTION 176

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 10 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 10 in-place upgrade on several computers that run Windows 8.1. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 179

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the named locations shown in the following table.

Name	Location type	Configuration
Location1	IP ranges	40.77.182.32/27
Location2	Countries (IP)	Canada
Location3	IP ranges	2a01:111::/32
Location4	Countries (IP)	Australia Include unknown countries/regions
Location5	Countries (GPS)	United States

You need to create a Conditional Access policy that will have a condition to include only trusted locations. Which two named locations can be marked as trusted? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Location1
- B. Location2
- C. Location3
- D. Location4
- E. Location5

Answer: AC

Explanation:

Location 1 and Location 3, both the ones I had as well as they include the IP Ranges Subnet as Trusted locations

NEW QUESTION 183

- (Exam Topic 4)

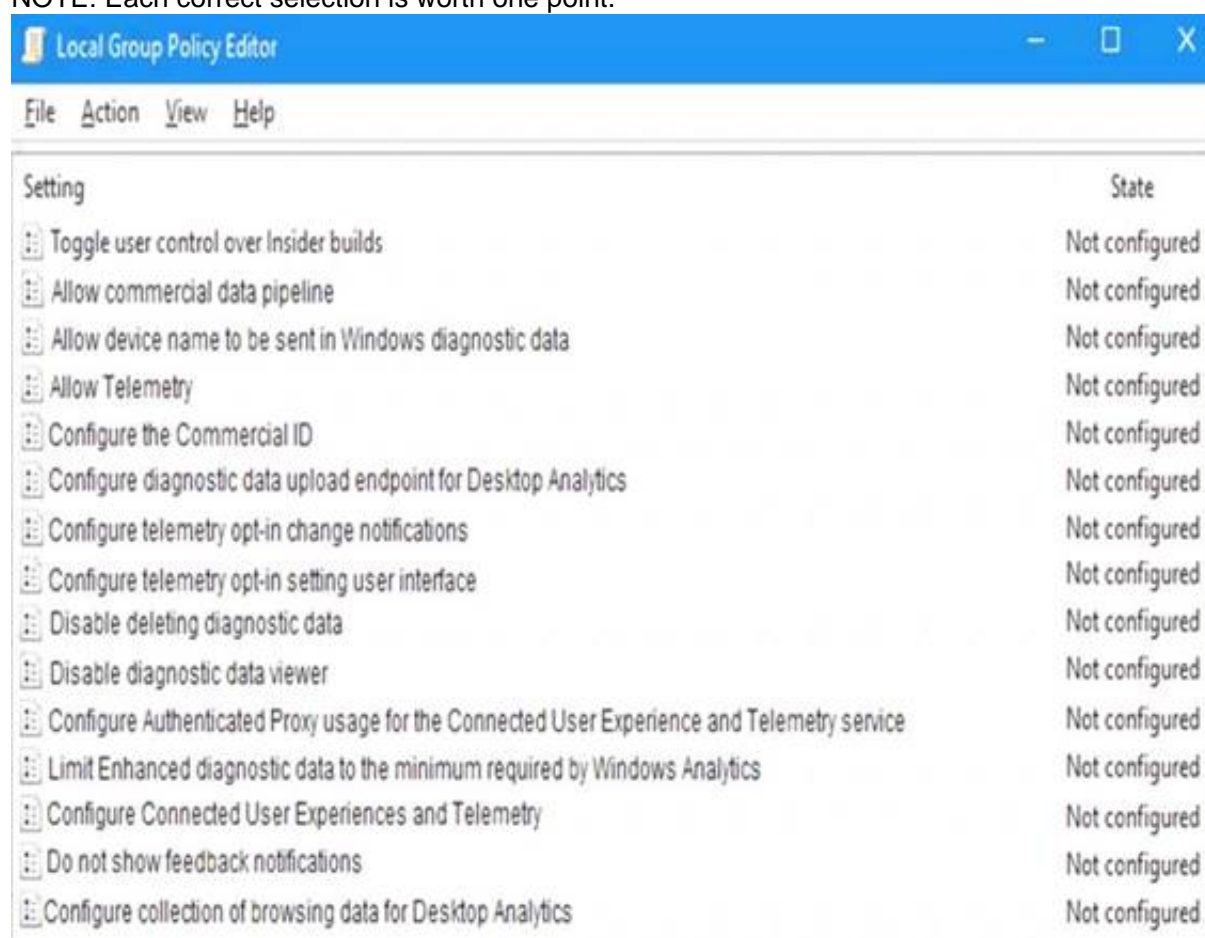

Your company has computers that run Windows 10. The employees at the company use the computers. You plan to monitor the computers by using the Update Compliance solution.

You create the required resources in Azure.

You need to configure the computers to send enhanced Update Compliance data.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-configuration-manual>

NEW QUESTION 187

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- Compliance policy trends
- Trends in device and user enrolment
- App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data source:	<div><div></div><div>Audit logs in Azure Active Directory (Azure AD)</div><div>Audit logs in Microsoft Intune</div><div>Azure Synapse Analytics</div><div>The Microsoft Intune Data Warehouse</div></div>
Data visualization tool:	<div><div></div><div>Azure Data Studio</div><div>Microsoft Power BI</div><div>The Azure portal</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/developer/reports-nav-create-intune-reports> <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 190

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You start Computer1 from the Windows 10 installation media and use the Install option. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 193

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to ensure that users can only enroll devices that meet the following requirements:

- Android devices that support the use of work profiles.
- iOS devices that run iOS 11.0 or later.

Which two restrictions should you modify? To answer, select the restrictions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Home > Devices > Enroll devices > All Users >

Edit restriction

Device type restriction

1 Platform settings 2 Review + save

Specify the platform configuration restrictions that must be met for a device to enroll. Use compliance policies to restrict devices after enrollment. Define versions as major.minor.build. Version restrictions only apply to devices enrolled with the Company Portal. Intune classifies devices as personally-owned by default. Additional action is required to classify devices as corporate-owned. [Learn more.](#)

Type	Platform	versions	Personally owned	Device manufacturer
Android Enterprise (work profile)	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
Android device administrator	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
iOS/iPadOS	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported
macOS	<input type="button" value="Allow"/> <input checked="" type="button" value="Block"/>	Restriction not supported	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported
Windows (MDM) ⓘ	<input type="button" value="Allow"/> <input checked="" type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported

Review + save

Cancel

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Android device administrator, Platform: Block Restrict devices running on the following platforms: Android device administrator
Android Enterprise work profile iOS/iPadOS
macOS Windows

Note: If you allow both Android platforms for the same group, devices that support work profile will enroll with a work profile. Devices that don't support it will enroll on the Android device administrator platform. Neither work profile nor device administrator enrollment will work until you complete all prerequisites for Android enrollment.

Box 2: iOS/PadOS, Allow min/max Range: Min

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 194

- (Exam Topic 4)

Your company has computers that run Windows 10. The company uses Microsoft Intune to manage the computers.

You have an app protection policy for Microsoft Edge. You assign the policy to a group. On a computer named Computer1, you open Microsoft Edge.

You need to verify whether Microsoft Edge on Computer1 is protected by the app protection policy. Which column should you add in Task Manager?

- A. Operating system context
- B. UAC virtualization
- C. Enterprise Context
- D. Data Execution Prevention

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/wip> <https://www.itpromentor.com/win10-mam-wip/>

NEW QUESTION 196

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant. All users in the company are licensed for Microsoft Intune.

You need to ensure that the users enroll their iOS device in Intune. What should you configure first?

- A. A Device Enrollment Program (DEP) token.
- B. An Intune device configuration profile.
- C. A Device enrollment manager (DEM) account.
- D. An Apple MDM Push certificate.

Answer: D

Explanation:

Reference:

https://www.manageengine.com/mobile-device-management/help/enrollment/mdm_creating_apns_certificate.ht

Prerequisites for iOS enrollment Before you can enable iOS devices, complete the following steps: Make sure your device is eligible for Apple device enrollment. Set up Intune - These steps set up your Intune infrastructure. In particular, device enrollment requires that you set your MDM authority. Get an Apple MDM Push certificate - Apple requires a certificate to enable management of iOS and macOS devices.

<https://docs.microsoft.com/en-gb/intune/enrollment/apple-mdm-push-certificate-get>

NEW QUESTION 197

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

Answer: D

Explanation:

Device experience

Use these settings to configure a kiosk-style experience on your dedicated devices, or to customize the home screen experiences on your fully managed devices. You can configure devices to run one app, or run many apps. When a device is set with kiosk mode, only the apps you add are available.

Device experience, Enrollment profile type: Select an enrollment profile type to start configuring Microsoft Launcher or the Microsoft Managed Home Screen on your devices. Your options:

* Dedicated device, Kiosk mode, Single App

* etc.

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work>

NEW QUESTION 202

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- > Creates a VPN connection to the corporate network
- > Installs a Microsoft Store app named App1
- > Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Removed
<input type="checkbox"/> Retained and the passphrase will be retained
<input type="checkbox"/> Retained but the passphrase will be reset

App1 will be:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Reinstalled at sign-in
<input type="checkbox"/> Removed
<input type="checkbox"/> Retained

The VPN connection will be:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Removed
<input type="checkbox"/> Retained and the credentials will be cached
<input type="checkbox"/> Retained but the credentials will be reset

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 206

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. All users use Roaming User Profiles.

You have a user named Public1 that is used to sign-in to a public computer.

You need to prevent changes to the user settings of Public1 from being saved to the user profile. What should you do?

- A. Rename the Roaming User Profile folder to Public1.man
- B. Rename Ntuser.dat to Ntuser.v6
- C. Rename Ntuser.dat to Ntuser.man
- D. Rename the Roaming User Profile folder to Public1.v1

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/answers/questions/168551/set-roaming-profile-download-from-server-to-pc> but <https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

NEW QUESTION 210

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: From Windows on the Devices blade of the Microsoft Endpoint Manager admin center, you create a filter and export the results as a CSV file.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 214

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1.

You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Windows Server Update Services (VVSUS)
- B. Multipath I/O (MPIO)
- C. Windows Deployment Services (WDS)
- D. Multipoint Connector

Answer: C

NEW QUESTION 219

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,200 computers that run Windows 8.1.

You deploy an Upgrade Readiness solution in Microsoft Azure and configure the computers to report to Upgrade Readiness.

From Upgrade Readiness, you open a table view of the applications.

You need to filter the view to show only applications that can run successfully on Windows 10.

How should you configure the filter in Upgrade Readiness? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Filter column:

	▼
Issue	
UpgradeAssessment	
UpgradeDecison	

Filter value:

	▼
No known issues	
Ready to upgrade	
Supported version available	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-resolve-issues>

NEW QUESTION 221

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to prevent users and apps from accessing dangerous websites. What should you configure?

- A. Microsoft Defender Application Control
- B. Microsoft Defender Exploit Guard
- C. Microsoft Defender Application Guard
- D. Microsoft Defender Firewall

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/enable-network-protection?view=o365-worldwide>

NEW QUESTION 223

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant. All corporate devices are enrolled in Microsoft Intune.

You have a web-based application named App1 that uses Azure AD to authenticate.

You need to prompt all users of App1 to agree to the protection of corporate data when they access App1 from both corporate and non-corporate devices.

What should you configure?

- A. Notifications in Device compliance
- B. Terms and Conditions in Device enrollment
- C. Terms of use in Conditional access
- D. an Endpoint protection profile in Device configuration

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/terms-of-use>

NEW QUESTION 224

- (Exam Topic 4)

You have a Microsoft 365 tenant

You have devices enrolled in Microsoft Intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Endpoint Manager admin center, review the Setting compliance report.
- B. From the Microsoft Endpoint Manager admin center, review the Noncompliant devices reporter.
- C. From the Microsoft Endpoint Manager admin center, review Device compliance report.
- D. From the Azure Active Directory admin center, review the Conditional Access Insights and Reporting workbook.

Answer: B

Explanation:

The Noncompliant devices report provides data typically used by Helpdesk or admin roles to identify problems and help remediate issues. The data found in this report is timely, calls out unexpected behavior, and is meant to be actionable.

Note: Compliance reports help you understand when devices fail to meet your compliance configurations and can help you identify compliance-related issues in your organization.

Open the compliance dashboard

Open the Intune Device compliance dashboard:

- Sign in to the Microsoft Endpoint Manager admin center.
- Select Devices > Overview > Compliance status tab.

When the dashboard opens, you get an overview with all the compliance reports. In these reports, you can see and check for:

Overall device compliance Per-policy device compliance Per-setting device compliance Threat agent status

Device protection status View compliance reports

In addition to using the charts on Compliance status, you can go to Reports > Device compliance.

- Sign in to the Microsoft Endpoint Manager admin center.
- Select Devices > Monitor, and then from below Compliance select the report you want to view. Some of the available compliance reports include:

Device compliance Noncompliant devices

Devices without compliance policy Setting compliance

Policy compliance Noncompliant policies (preview)

Windows health attestation report Threat agent status

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-monitor>

NEW QUESTION 229

- (Exam Topic 4)

You have the 64-bit computers shown in the following table.

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32-bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10.
 Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

- A. Computer2 and Computer4 only
- B. Computer4 only
- C. Computer3 and Computer4 only
- D. Computer1, Computer2, Computer3 and Computer4
- E. Computer2, Computer3, and Computer4 only

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

NEW QUESTION 232

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: You install the Company Portal app on Computer1 and use the Devices tab from the app. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Use MDM enrollment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 237

- (Exam Topic 4)

You have 25 computers that run Windows 8.1 Pro.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to upgrade the computers to Windows 10 Enterprise by using an in-place upgrade. The solution must minimize administrative effort.

What should you use?

- A. Microsoft Endpoint Configuration Manager and a custom image of Windows 10 Enterprise
- B. Subscription Activation
- C. Microsoft Deployment Toolkit (MDT) and a default image of Windows 10 Enterprise
- D. Windows Autopilot

Answer: B

NEW QUESTION 241

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment ToolKit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package

D. Windows AutoPilot

Answer: C

Explanation:

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

NEW QUESTION 245

- (Exam Topic 4)

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager. You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device profile type:

- Administrative Templates
- Device restrictions
- Endpoint protection
- PKCS certificate

Setting:

- Apps from store only
- Developer unlock
- Enable Dynamic Virtualization
- Trusted app installation

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

NEW QUESTION 250

- (Exam Topic 4)

You have a hybrid deployment of Azure Active Directory (Azure AD) that contains 50 Windows 10 devices.

All the devices are enrolled in Microsoft Endpoint Manager.

You discover that Group Policy settings override the settings configured in Microsoft Endpoint Manager policies.

You need to ensure that the settings configured in Microsoft Endpoint Manager override the Group Policy settings.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create an Administrative Templates device profile
- B. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy
- C. From the Microsoft Endpoint Manager admin center, create a custom device profile
- D. From Group Policy Management Editor, configure the User Configuration settings in the Default DomainPolicy

Answer: C

Explanation:

Reference:

<https://uem4all.com/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-wins/>

NEW QUESTION 252

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains the users shown in the following table.

Name	Role
User1	None
User2	Global administrator
User3	Cloud device administrator
User4	Intune administrator

You configure the following device settings for the tenant:

- Users may join devices to Azure AD: User1

> Additional local administrators on Azure AD joined devices: None

You install Windows 10 on a computer named Computer1.

You need to identify which users can join Computer1 to adatum.com, and which users will be added to the Administrators group after joining adatum.com.

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can join Computer1 to adatum.com:

Users who will be added to the Administrators group after joining adatum.com:

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

https://docs.microsoft.com/en-us/azure/active-directory/devices/assign-local-admin

NEW QUESTION 253

- (Exam Topic 4)

You use Microsoft Intune to manage Windows updates.

You have computers that run Windows 10. The computers are in a workgroup and are enrolled in Intune. The computers are configured as shown in the following table.

Name	Tag	Member of
Computer1	None	Group1
Computer2	Tag2	Group2
Computer3	Tag3	Group3

On each computer, the Select when Quality Updates are received Group Policy setting is configured as shown in the following table.

Name	State	Configuration
Computer1	Not configured	Not applicable
Computer2	Enabled	Deferral period of 5 days
Computer3	Disabled	Not applicable

You have Windows 10 update rings in Intune as shown in the following table.

Name	Quality update deferral period (days)	Scope (Tags)	Assignment
Ring1	2	Tag1	Group1
Ring2	7	Tag2	Group2
Ring3	14	Tag2	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 258

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You need to download a report that lists all the devices that are NOT enrolled in Microsoft Intune and are assigned an app protection policy.

What should you select in the Microsoft Endpoint Manager admin center?

- A. App
- B. and then Monitor
- C. Devices, and then Monitor
- D. Reports, and the Device compliance

Answer: A

Explanation:

App report: You can search by platform and app, and then this report will provide two different app protection statuses that you can select before generating the report. The statuses can be Protected or Unprotected.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies-monitor>

NEW QUESTION 262

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains devices enrolled in Microsoft Intune. You need to create Endpoint security policies to enforce the following requirements:

- > Computers that run macOS must have FileVault enabled.
- > Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.
- > Computers that run Windows 10 must have Microsoft Defender Application Control enabled.

Which Endpoint security feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
Account protection	Computers that run macOS must have FileVault enabled: <input type="text"/>
Attack surface reduction (ASR)	Computers that run Windows 10 must have Microsoft Defender Application Control enabled: <input type="text"/>
Disk encryption	Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled: <input type="text"/>
Endpoint detection and response (EDR)	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Disk encryption

Computers that run macOS must have FileVault enabled.

Intune supports macOS FileVault disk encryption. FileVault is a whole-disk encryption program that is included with macOS. You can use Intune to configure FileVault on devices that run macOS 10.13 or later.

Box 2: Attack surface reduction (ASR)

Computers that run Windows 10 must have Microsoft Defender Application Control enabled. Attack surface reduction profiles include:

* Application control - Application control settings can help mitigate security threats by restricting the applications that users can run and the code that runs in the System Core (kernel). Manage settings that can block unsigned scripts and MSIs, and restrict Windows PowerShell to run in Constrained Language Mode.

Note: Attack surface reduction rules target certain software behaviors, such as: Launching executable files and scripts that attempt to download or run files

Running obfuscated or otherwise suspicious scripts

Performing behaviors that apps don't usually initiate during normal day-to-day work

Box 3: Account protection
Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.

The account protection policy is focused on settings for Windows Hello and Credential Guard, which is part of Windows identity and access management.
Note: Microsoft Defender Credential Guard protects against credential theft attacks. It isolates secrets so that only privileged system software can access them.
Reference: <https://learn.microsoft.com/en-us/mem/intune/protect/encrypt-devices-filevault> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-account-protection-policy> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-asr-policy>

NEW QUESTION 264

- (Exam Topic 4)

Your on-premises network contains an Active Directory domain named contoso.com. You perform the following actions:

- Purchase a new Microsoft 365 subscription.
- Create a new user named User1.
- Assign User1 the Security Administrator role.

You need to ensure that User1 can enable Conditional Access policies. What should User1 do first?

- A. Register for Azure Multi-Factor Authentication (MFA).
- B. Request the Conditional Access Administrator role.
- C. Disable Security defaults.
- D. Implement Azure AD Connect.

Answer: C

Explanation:

Microsoft provides security defaults that ensure a basic level of security enabled in tenants that don't have Azure AD Premium. With Conditional Access, you can create policies that provide the same protection as security defaults, but with granularity. Conditional Access and security defaults aren't meant to be combined as creating Conditional Access policies will prevent you from enabling security defaults.

Incorrect: Not B:

Not required. Global administrator, security administrator, or Conditional Access administrator is enough. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/plan-conditional-access>

NEW QUESTION 266

- (Exam Topic 4)

You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.

Device 1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. an MDM Security Baseline profile
- C. a device compliance policy
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

Reference:

<https://uem4all.com/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-wins/>

NEW QUESTION 269

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1. Solution: You configure an applicability rule for Profile1. You assign Profile1 to Group1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 271

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You plan to implement Windows Defender Exploit Guard.

You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

▼

Security & Compliance in Microsoft 365
Windows Configuration Designer
Windows Defender Security Center

Distribution method:

▼

An Azure policy
A Group Policy object (GPO)
An Intune device compliance policy

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

NEW QUESTION 272

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Windows Update settings, you enable Configure Automatic Updates, select 3 – Auto download and notify for Install, and then enter a time.

Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 276

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 8.1 and the users shown in the following table.

Name	Domain group membership	Local group membership
User1	Domain Users, Domain Admins	Administrators
User2	Domain Users, Remote Management Users	Users
User3	Domain Users	Administrators
User4	Domain Users	Remote Management Users

You plan to use the Microsoft Assessment and Planning (MAP) Toolkit to collect inventory data. The MAP Toolkit has the following configurations:

- Inventory scenario: Windows computers
- Discovery method: Use Active Directory Domain Services (AD DS)

You need to identify which user to use for the MAP Toolkit inventory discovery. The solution must use principle of least privilege.

What should you identify?

- A. User3
B. User1
C. User4
D. User2

Answer: A

Explanation:

Reference:

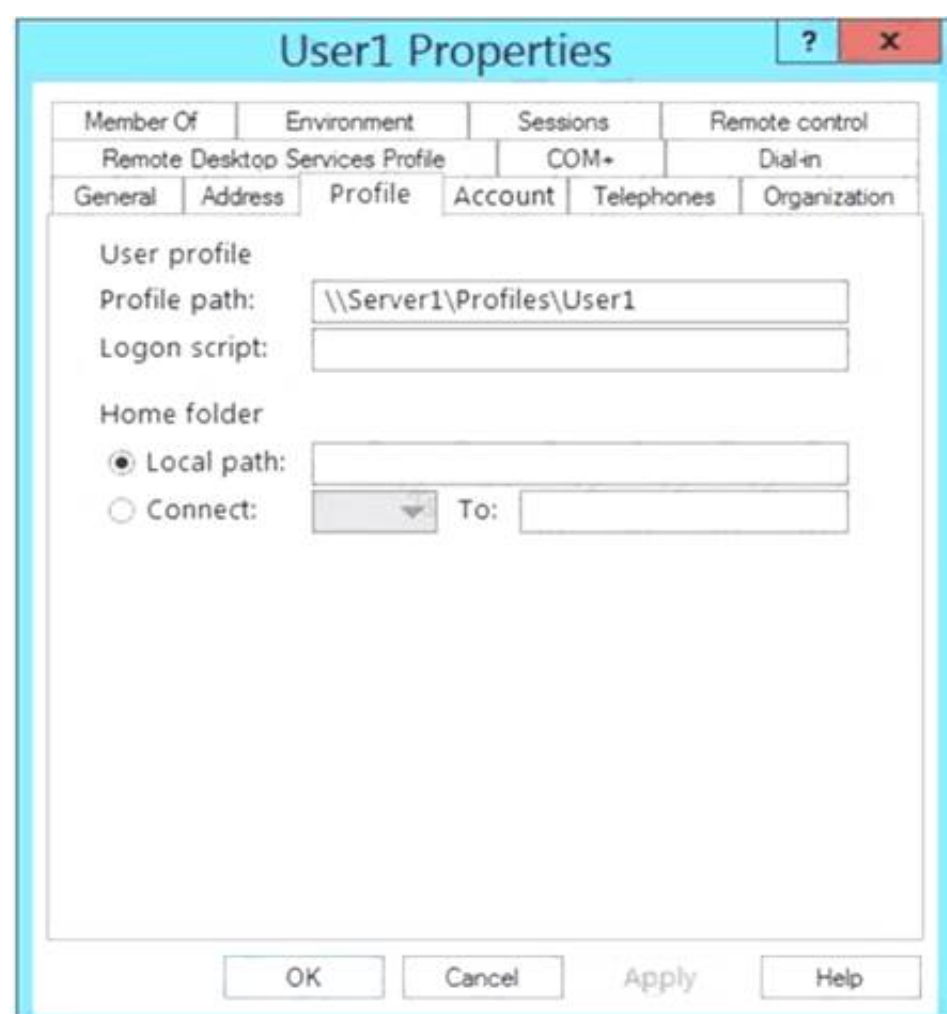

<https://social.technet.microsoft.com/wiki/contents/articles/17808.map-toolkit-choose-a-discovery-method.aspx>

NEW QUESTION 278

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

A mandatory user profile is a roaming user profile that has been pre-configured by an administrator to specify settings for users. Settings commonly defined in a mandatory profile include (but are not limited to): icons that appear on the desktop, desktop backgrounds, user preferences in Control Panel, printer selections, and more. Configuration changes made during a user's session that are normally saved to a roaming user profile are not saved when a mandatory user profile is assigned.

The .man extension causes the user profile to be a read-only profile. Reference:

<https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

NEW QUESTION 281

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system	Azure AD status	Mobile device management (MDM)
Device1	Windows 8.1	Registered	None
Device2	Windows 10	Joined	None
Device3	Windows 10	Joined	Microsoft Intune

Contoso.com contains the Azure Active Directory groups shown in the following table.

Name	Members
Group1	Group2, Device1, Device3
Group2	Device2

You add a Windows Autopilot deployment profile. The profile is configured as shown in the following exhibit.

Create profile ...

Windows PC

- ✓ Basics
- ✓ Out-of-box experience (OOBE)
- ✓ Assignments
- 1 Review + create**

Summary

Basics

Name	Profile1
Description	--
Convert all targeted devices to Autopilot	Yes
Device type	Windows PC

Out-of-box experience (OOBE)

Deployment mode	Self-Deploying (preview)
Join to Azure AD as	Azure AD joined
Skip AD connectivity check (preview)	No
Language (Region)	Operating system default
Automatically configure keyboard	Yes
Microsoft Software License Terms	Hide
Privacy settings	Hide
Hide change account options	Hide
User account type	Standard
Allow White Glove OOBE	No
Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	--

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Device1 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device2 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device3 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No
Device1 has no Mobile device Management (MDM) configured.
Note: Device1 is running Windows 8.1, and is registered, but not joined. Device1 is in Group1.
Profile1 is assigned to Group1. Box 2: No
Device2 has no Mobile device Management (MDM) configured. Note: Device2 is running Windows 10, and is joined.
Device2 is in Group2. Group2 is in Group1.
Profile1 is assigned to Group1. Box 3: Yes
Device3 has Mobile device Management (MDM) configured. Device3 is running Windows 10, and is joined
Device1 is in Group1.
Profile1 is assigned to Group1.
Mobile device management (MDM) enrollment: Once your Windows 10 device joins Azure AD, Autopilot ensures your device is automatically enrolled with MDMs such as Microsoft Intune. This program can automatically push configurations, policies and settings to the device, and install Office 365 and other business apps without you having to get IT admins to manually sort the device. Intune can also apply the latest updates from Windows Update for Business.
Reference: https://xo.xello.com.au/blog/windows-autopilot

NEW QUESTION 282

- (Exam Topic 4)
Your company has a Microsoft Azure Active Directory (Azure AD) tenant.
The company uses Microsoft Intune to manage iOS, Android, and Windows 10 devices.
The company plans to purchase 1,000 iOS devices. Each device will be assigned to a specific user.
You need to ensure that the new iOS devices are enrolled automatically in Intune when the assigned user signs in for the first time.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Create a device compliance policy.		
Add a Device Enrollment Program (DEP) token.		
Assign an enrollment profile.		
Create a device enrollment manager (DEM) account.		
Create a Windows AutoPilot self-deploying deployment profile.		
Create an Apple enrollment profile.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 286

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows Update for Business.
The research department has several computers that have specialized hardware and software installed.
You need to prevent the video drivers from being updated automatically by using Windows Update. Solution: From the Settings app, you clear the Give me updates for other Microsoft products when I update Windows check box.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 288

- (Exam Topic 4)
You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?
 NOTE: Each correct selection is worth one point.

Standard Client Task Sequence:

<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>

Standard Client Upgrade Task Sequence:

<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Image1, Image2, Image3, Image4, and Image5. All images.

Standard Client Task Sequence

Standard Client task sequence. The most frequently used task sequence. Used for creating reference images and for deploying clients in production.

Box 2: Image1, Image2, Image3, and Image4 only. Exclude image5 with applications.

Standard Client Upgrade Task Sequence

Standard Client Upgrade task sequence. A simple task sequence template used to perform an in-place upgrade from Windows 7, Windows 8, or Windows 8.1 directly to Windows 10, automatically preserving existing data, settings, applications, and drivers.

NEW QUESTION 290

- (Exam Topic 4)

You have 10 computers that run Windows 7 and have the following configurations:

- > A single MBR disk
- > A disabled TPM chip
- > Disabled hardware virtualization
- > UEFI firmware running in BIOS mode
- > Enabled Data Execution Prevention (DEP) You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Convert the MBR disk to a GPT disk
- B. Enable the TPM chip.
- C. Disable DEP
- D. Enable hardware virtualization
- E. Convert the firmware from BIOS to UEFI.

Answer: AE
