

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

<https://www.2passeasy.com/dumps/PL-200/>

NEW QUESTION 1

- (Exam Topic 1)

You need to add controls to the check-in solution for the health and wellness questions. Which form control should you use?

- A. Drop down
- B. Check box
- C. Text input

Answer: A

NEW QUESTION 2

- (Exam Topic 1)

You need to create the FAQ solution content What should you do first?

- A. AI Builder
- B. Suggest topics
- C. Automate
- D. Trigger phrases

Answer: B

Explanation:

You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.

- > Import Suggested Topics from FAQ webpage.
- > Add a topic.
- > Enable the topics Reference:

<https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx>

NEW QUESTION 3

- (Exam Topic 2)

You need to address the executive's concerns regarding unnecessary data access.

Which security changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

▼

Assign records to the user doing the verification and change table security to basic.

Assign records to a service account and share the record with the team member doing the verification.

Assign records to a service account and add the team member doing the verification by using an access team.

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

▼

Assign records to the QV team when the service request is completed.

Assign records to a service account when the service request is completed.

Assign records to the team member doing the verification when the service request is completed.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.

When to use access teams

- * The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.
- * The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.
- * A unique set of users requires access to a single record without having an ownership of the record. Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

- When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Reference:

<https://docs.microsoft.com/en-us/power-apps/developer/data-platform/use-access-teams-owner-teams-collaborat>

NEW QUESTION 4

- (Exam Topic 2)

You create a desktop flow to interact with a certification authority's website. You need to get data in and out of the desktop flow.

How should you set up the input and output parameters? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Parameter direction | Configuration |
|---------------------|--|
| Inbound | <div><div></div><div>Copy and paste qualification data into the desktop flow.</div><div>Run a cloud flow from the Dataverse qualification record to send data to the desktop flow.</div><div>Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.</div></div> |
| Outbound | <div><div></div><div>Copy and paste the verification data into the qualification record.</div><div>Send data from the desktop flow to a cloud flow to update the qualification record.</div><div>Connect by using the Dataverse connector from the desktop flow and the qualification record</div></div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data. All information sent by clients for services is stored in Microsoft Dataverse with a model-driven app as the interface.

Qualification verification

The qualification table contains details about an individual school degree, professional qualifications, and other qualifications that must be verified.

A service request can have one or more Qualification records associated with it.

Record status is pending verification until the initial team member finishes, at which point the member changes the status to Complete.

When all qualification records related to a service request are verified either by manual or automated processes, the results are made available to ADatum Corporation's client.

In the rare event that results are questioned, a new service request is created and verified independently of the previous work that took place.

Box 2: Send data from the desktop flow to a cloud flow to update the qualification record. To complete a service request, users perform the following actions:

Send a templated email by using Microsoft Outlook to the client after all qualifications for a service request are checked.

Change the service request status to Completed. Currently, service requests do not indicate when all Qualification records are addressed.

NEW QUESTION 5

- (Exam Topic 2)

You need to capture the Date Completed value from the website using a desktop flow. Which method should you use?

- A. Use optical character recognition (OCR) on the screen to locate and extract the value.
- B. Display an input dialog and prompt the user to enter the value.
- C. Extract the value from the window the browser is using.
- D. Retrieve the value from the HTML element in the webpage.

Answer: C

Explanation:

Record the name of the QV team member who performed the work and the date completed.

NEW QUESTION 6

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator.

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. Microsoft Excel template
- B. Entities component of a solution
- C. Microsoft Virtual Studio
- D. Templates area

Answer: B

Explanation:

Entity: Refers to a table in Dataverse. Table and entity are often used interchangeably for data access. Edit public views through tables

➤ Expand Data, select Tables, select the table you want, and then select the Views area.

➤ On the toolbar, select Add view. Add view to table

➤ On the Create a view dialog, enter a name and, optionally, a description, and then select Create. Reference:

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION 7

- (Exam Topic 3)
You are modifying a model-driven app. You set up a customer table in Microsoft Power Platform to retrieve user data. You set up a form with the following columns for users to enter their data. The form includes the following columns:

| Column | Data type |
|--------------------------|------------------------|
| Country/region | Choices (multi-select) |
| Passport ownership | Choice (yes /no) |
| Passport expiration date | Text |

The form must do the following:

- The Country/region column must automatically populate with US when English is chosen as a language. If the user selects Other for this column, the column must remain blank so that user can enter a value.
- The Passport expiration date column must appear only if the user selects Yes in the Passport ownership column.

You need to configure the app with the least amount of effort.
What should you configure? To answer, drag the appropriate solution component to the correct requirements. Each solution component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution components

Power Automate flow

Business rule

Business process flow

Formula

Answer Area

Requirement

Country/region
Passport expiration date column appears

Solution component

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface Description automatically generated with low confidence

NEW QUESTION 8

- (Exam Topic 3)
A company collaborates by using Microsoft Teams.
You must create a Power Apps app directly from within a Teams channel. The app will be used by members of the channel to manage sales orders.
You need to create the app by using Dataverse for Teams. How should you create the app?

- A. Create a canvas app by using a Power Apps personal app in Teams.
- B. Create a canvas app by using the App Studio app.
- C. Use the Power Apps web designer.
- D. Create a model-driven app by using the App Studio app

Answer: B

Explanation:
You can create, edit, and delete canvas apps in Teams.
Note: With Power Apps Studio embedded in the Power Apps app in Teams and the new built-in data platform providing an easy-to-use, editable data table, you can quickly build apps based on custom data tables that are Teams-specific and scenario-specific.
Reference: <https://docs.microsoft.com/en-us/power-apps/teams/create-first-app> <https://docs.microsoft.com/en-us/power-apps/teams/create-apps-overview>

NEW QUESTION 9

- (Exam Topic 3)
A company is building a Power Virtual Agents chatbot.
Users in the accounting department require access to collaborate with the building of the bot. Users in the sales department require access to only chat with the bot.
You need to configure the bot.
Which sharing options should you use? To answer, drag the appropriate sharing options to the correct requirements. Each sharing option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Sharing options

Users

Active Directory security groups

Everyone in the organization

Answer Area

Requirement

Users in the accounting department
Users in the sales department

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Sharing options | Answer Area | Requirement | Sharing option |
|----------------------------------|-------------|------------------------------------|----------------------------------|
| Users | | Users in the accounting department | Active Directory security groups |
| Active Directory security groups | | Users in the sales department | Users |
| Everyone in the organization | | | |

NEW QUESTION 10

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Relevance Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Relevance Search brings the following benefits:

- > Finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."
- > Includes the ability to search documents found in Notes and Attachments on Emails and Appointments Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 10

- (Exam Topic 3)

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- It must be in the local language.
- Only fulltime employees may access the chatbot. You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

| Requirement | Configuration |
|---------------------------|--|
| Chatbot in local language | <div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div> |
| Employee access | <div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Requirement | Configuration |
|---------------------------|--|
| Chatbot in local language | <div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div> |
| Employee access | <div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div> |

NEW QUESTION 11

- (Exam Topic 3)

You need to build a Power BI dashboard for sales managers to track opportunities.

When a new sale closes that is greater than \$1 million, a notification must pop up and an email must be sent to the leadership team.

You need to ensure the email is sent without editing the Microsoft Dataverse.

Which two elements should you configure? Each correct answer is part of the solution. NOTE: Each correct selection is worth one point.

- A. alerts in Power BI
- B. a calculated column in the Dataverse
- C. a custom connector
- D. a paginated report to save to Microsoft OneDrive
- E. a Power Automate flow

Answer: AE

Explanation:

In order to build a Power BI dashboard for sales managers to track opportunities and send notifications and emails when a new sale closes that is greater than \$1 million, you should configure:

* A. alerts in Power BI: You can set up alerts in Power BI that will trigger when a specific condition is met. For example, you can set an alert to trigger when the value of a specific field in the "Opportunities" table exceeds \$1 million.

* E. a Power Automate flow: To send an email to the leadership team when an alert is triggered, you can create a Power Automate flow that is triggered by the Power BI alert. The flow can then use the "Send an email" action to send an email to the leadership team with the necessary information about the sale that exceeded \$1 million.

References:

- > <https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-alerts>
- > <https://docs.microsoft.com/en-us/power-platform/admin/alerts-overview>

NEW QUESTION 13

- (Exam Topic 3)

You attempt to deactivate several currencies in a Microsoft Dataverse environment. You are not able to deactivate one of the currencies.

You need to determine why you cannot deactivate the currency. What is the reason?

- A. You are not the currency record owner.
- B. The currency is used by an active business process.
- C. The currency is the base currency.
- D. The currency is used by another record.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/org-service/web-service-error-codes> <https://docs.microsoft.com/en-us/power-platform/admin/manage-transactions-with-multiple-currencies>

NEW QUESTION 14

- (Exam Topic 3)

You are customizing a model-driven app for a company. You create a Theme template to ensure the company logo and colors are properly used within these apps.

The theme must meet the following requirements:

- > Updated to add the logo
- > Downloaded by the makers to create the app

You need to configure the assets. To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations

- Edit the theme in System settings and upload a jpg file.
- Replace an existing UI item's hexadecimal number.
- Upload the theme elements as new web resources.
- Use the component library.

Answer Area

Requirement

- Update logo.
- Change model-driven app colors.

Configuration

| |
|--|
| |
| |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Upload the theme elements as new web resources.

Each type of icon is stored as a web resource. Create a web resource first and then set the icons to use them. Alternatively, you can add the icon by creating a new web resource when you define the table properties.

Box 2: Replace an existing UI item's hexadecimal number. Copy and alter the existing theme

The easiest and quickest way to create a new theme is to clone and alter an existing theme. Then save, preview, and publish it.

- > Sign in to Power Apps, select Settings icon (upper right), and then select Advanced settings.
- > Select Customizations, and then select Themes.
- > Under All themes, select the theme you want to clone, such as the CRM Default Theme. Select Clone on the command bar.
- > Replace an existing UI item's hexadecimal number, such as the Title Text Color, with the hexadecimal value that represents the color you want.

For example, the CRM Default Theme was cloned and changed using mostly varying shades of green color. The following screenshots show the new colors for

navigation and highlighting. A custom logo was also added that will appear in the upper left corner of an app.

NEW QUESTION 15

- (Exam Topic 3)

You create a model-driven app for an automobile parts help desk.

A help desk agent uses a form to gather information about customers' automobiles in two custom tables. The names of the tables are Client and Automobile, The form must prepopulate the following information about the customer from the client table:

- First name
- Last name

The agent must be able to type the following information about the automobile:

- Automobile make
- Automobile model

You need to implement the form.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

NEW QUESTION 20

- (Exam Topic 3)

You manage the Dynamics 365 Customer Service environment for an organization. Microsoft SharePoint will not be deployed in the environment for a year.

You need to integrate Microsoft Office 365 solutions with the Dynamics 365 instance to help the sales team with internal collaboration efforts.

Which three solutions can you currently implement? Each correct answer presents part of the solution. NOTE:

Each correct selection is worth one point.

NOTE: Each correct selection is worth one point.

- A. Microsoft OneDrive for Business
- B. Microsoft Yammer
- C. Microsoft OneNote
- D. Microsoft Skype for Business
- E. Microsoft Exchange Online

Answer: BDE

Explanation:

References:

<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/admin/add-office-365-online-services>

NEW QUESTION 22

- (Exam Topic 3)

You are designing the organization structure for a company that has 5,000 users.

You need to configure security roles for the company while minimizing administrative effort. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Action

Apply a security role to everyone in a business unit.

Assign the security role to the default business unit team.
 Assign the security role individually to each user in the business unit.
 Create a new team, add the business unit users, and then assign the security role to the team.

Ensure an individual can see records in their current business unit and a child business unit.

Grant the user a security role from the child business unit.
 Grant the user the Parent: Child Business Units security permission.
 Grant the user a security role from the root business unit.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Create a new team, and the business unit users, and the assign the security role to the team. Change the business unit for a team Important

By changing the business unit for a team, you can remove all security role assignments for the team. At least one security role must be assigned to the team in the new business unit.

> Select an environment and go to Settings > Users + permissions > Teams.

> Select the checkbox for a team name.

> Screenshot selecting a team.

> On the menu bar, select Change Business Unit.

> In the Change Business Unit dialog box, select a business unit. Enable Move records to new business unit to move to a new business unit. Select OK.

Box 2: Grant the user a security role from the child business unit.

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/create-edit-business-units> <https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

NEW QUESTION 25

- (Exam Topic 3)

A company is planning to create a Power Virtual Agents bot. The bot has the following requirements:

- The bot must provide address information for the company.
- The bot must be available from Microsoft Teams and from the internet website of the company. You need to configure the bot. Which component should you use?

- A. Skill
- B. Composer
- C. Template
- D. Channel

Answer: D

Explanation:

To make the bot available from Microsoft Teams and from the company's internet website, you need to configure the channels for the bot. Power Virtual Agents uses channels to connect the bot to different communication platforms such as Microsoft Teams, Skype, Facebook, and more. By configuring the appropriate channels for the bot, you can make it available on those platforms and allow users to interact with the bot from those locations.

You can configure channels by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Channels" tab, where you can add the channels which you want the bot to be available on.

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/channels-overview>

NEW QUESTION 30

- (Exam Topic 3)

A company plans to create two Microsoft Power Platform applications.

One of the applications requires a custom control layout without using code. The other application will be used primarily by external users. You need to create the applications.

Which application types should you use? To answer, drag the appropriate application types to the correct requirements. Each application type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Application types | Requirement | Application type |
|--------------------|--------------------------------------|------------------|
| Canvas app | Custom control layout without coding | |
| Model-driven app | Used by external users | |
| Power Pages portal | | |
| Power BI | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Application types | Requirement | Application type |
|--------------------|--------------------------------------|------------------|
| Canvas app | Custom control layout without coding | Canvas app |
| Model-driven app | Used by external users | Model-driven app |
| Power Pages portal | | |
| Power BI | | |

NEW QUESTION 31

- (Exam Topic 3)

A company uses Power Apps with Microsoft Dataverse.

The company enables auditing on the Dataverse database. The company tenant reaches the maximum storage capacity. You need to delete some auditing data.

Which three deletion options should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. by table
- B. by record
- C. between two specified dates
- D. by column
- E. older than a specified date

Answer: ACE

Explanation:

* A. Deleting by table allows you to select specific tables in the Dataverse database for which you want to delete the auditing data. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the table for which you want to delete the auditing data. You can then select the specific auditing data you want to delete and click the "Delete" button. This is useful if you want to only delete auditing data for specific tables and not for the entire database.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

* C. Deleting between two specified dates allows you to select a range of dates within which the auditing data will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Between two dates" option. Then you can specify the start and end date for which you want to delete the auditing data. This is useful if you want to delete auditing data for a specific time period and not for the entire database. Reference: <https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

* E. Deleting older than a specified date allows you to select a specific date, and any data older than that date will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Older than a specified date" option. Then you can specify the date for which you want to delete the auditing data. This is useful if you want to delete auditing data that is older than a certain date and not for the entire database. Reference: <https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

It's always good to have a backup of Data before deletion and also check the retention period of the data you want to delete.

NEW QUESTION 32

- (Exam Topic 3)

A company uses Microsoft Teams. You plan to create a Power Apps app for Microsoft Teams. You need to determine the environment that will be used by the app. Which environment will the app use?

- A. An existing Dataverse environment that you select.
- B. An existing Dataverse for Teams environment that you select.
- C. A Dataverse environment that is automatically created for the team.
- D. A Dataverse for Teams environment that is automatically created for the team.

Answer: D

Explanation:

The Dataverse for Teams environment is automatically created for the selected team when you create an app or bot in Microsoft Teams for the first time or install a Power Apps app from the app catalog for the first time. The Dataverse for Teams environment is used to store, manage, and share team-specific data, apps, and flows. Each team can have one environment, and all data, apps, bots, and flows created with the Power Apps app inside a team are available from that team's Dataverse for Teams database.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/about-teams-environment>

NEW QUESTION 33

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history. Solution: Change Elisabeth's username in the user record for the app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 36

- (Exam Topic 3)

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design. You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable the lock orientation setting.
- B. Configure the height and width properties by using a formula.
- C. Disable the Scale to fit setting.
- D. Configure the height and width properties by using drag handles.

Answer: BC

Explanation:

To create a canvas app that uses a responsive design in Power Apps, you should perform the following actions:

* B. Configure the height and width properties by using a formula: By using a formula to set the height and width properties, you can ensure that the app will respond to changes in screen size and orientation. For example, you can use the Width() and Height() functions to set the width and height properties based on the size of the screen.

* C. Disable the Scale to fit setting: The Scale to fit setting, when enabled, makes the app's content fit on the screen by scaling it down. To create a responsive app, this setting must be disabled.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/responsive-design> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-width>

NEW QUESTION 40

- (Exam Topic 3)
You create a Power Apps app.
The app must be able to display a list of records that are sorted by category. The app must also expand or hide the list by subtopics.
You need to configure the app. Which tool should you use?

- A. card
- B. expression
- C. Power BI dashboard
- D. gallery

Answer: D

Explanation:
A gallery control in Power Apps allows you to display a list of records, and can be configured to sort the records by a specific field, such as category. Additionally, the gallery control has built-in functionality for expanding or hiding a list of subtopics. This can be done by adding a toggle control within the gallery template to show or hide the subtopics based on user interaction. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-gallery>

NEW QUESTION 41

- (Exam Topic 3)
You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app.
You need to ensure that sales team members can access the app. Where should you configure app permissions?

- A. Security Roles
- B. Manage Roles
- C. Dynamics administration center
- D. Dynamics 365 home

Answer: B

Explanation:
References:
<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-r> Manage access to apps by using security roles.
You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.
* 1. Go to Settings > My Apps.
* 2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
* 3. Enter the following in the Manage Roles dialog box:
a) App URL Suffix
b) Roles
c) Select Save.
* 4. Refresh the My Apps page.
* 5. Go to the Apps Being Edited view, and publish the app again. Reference:
<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/manage-access-app>

NEW QUESTION 46

- (Exam Topic 3)
You plan to add a Power Apps app to Microsoft Teams.
A Microsoft Dataverse for Teams environment has not been provisioned. You need to create a Dataverse for Teams environment.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Create a new environment in the Microsoft Power Platform Admin Center.
- B. Create a new app in Teams.
- C. Create an app permission policy in the Teams admin center.
- D. Install an existing app in Teams.

Answer: BD

NEW QUESTION 51

- (Exam Topic 3)
A company uses a Microsoft Power Platform environment
The company plans to implement a Power Apps app. The application must meet the following requirements:
• Audit all user activity and only retain the audit logs for one year.
• Annually remove products that were created over a year ago. You need to configure the automated processes.
What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

| Configurations | Answer Area | Requirement | Configuration |
|----------------------|-------------|---------------------|---------------|
| Table auditing | | Audit log retention | |
| Bulk deletion job | | Product removal | |
| Environment auditing | | | |
| Filtered view | | | |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 54

- (Exam Topic 3)

You need to create a Power Automate desktop flow.

What are two possible ways to create the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Record mouse and keyboard events.
- B. Configure a pre-built template.
- C. Use pre-built actions.
- D. Create models by using Microsoft Visio.

Answer: AC

Explanation:

C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.

A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and keyboard events.

Reference:

<https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-flow> <https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-web>

NEW QUESTION 55

- (Exam Topic 3)

You plan on implementing complex business logic in Microsoft Dataverse tables by using Power Automate flows.

You realize that the functionality required to implement the business logic is not available in a Power Automate flow.

The new business logic must work in multiple Dataverse tables. In addition, the operation must return a value after it finishes and must be able to run from an existing Dataverse action.

You need to recommend the method to implement the missing logic. What should you recommend?

- A. Scheduled workflow
- B. Bound action
- C. Custom API
- D. Unbound action

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/power-automate/dataverse/bound-unbound> <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/custom-api>

NEW QUESTION 60

- (Exam Topic 3)

You create a Power Virtual Agents chatbot to reduce the number of incoming support calls that require a live person.

The chatbot does not direct users to the correct information. You determine that this is because the chatbot is not able to identify which product a user is referring to in a conversation.

You need to present a list of products so that users can select the correct product. What should you create?

- A. Table
- B. Variable
- C. Slot filling
- D. Entity

Answer: C

Explanation:

Slot filling is a natural language understanding concept that means saving an extracted entity to an object. However, in Power Virtual Agents, slot filling means placing the extracted entity value into a variable.

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 64

- (Exam Topic 3)

A company uses Power Apps.

You create a custom table and configure a child table relationship with the contact table. You need to configure the cascading rules for each action.

Which behavior should you use? To answer, drag the appropriate behaviors to the correct actions. Each behavior may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Behaviors

Restrict

Cascade All

Cascade None

Answer Area

Action

Custom table record is deleted.

Custom table record is shared.

Behavior

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Behaviors

Restrict

Cascade All

Cascade None

Answer Area

Action

Custom table record is deleted.

Custom table record is shared.

Behavior

Restrict

Cascade All

NEW QUESTION 69

- (Exam Topic 3)

You are using the Data import wizard to import records into the account table from a CSV file. The CSV-to-table mapping is as following:

- Name column represents the account and maps to the Account column.
- TIE Parent Name column represents the holding company of the account with subsidiaries underneath Records that are imported into the table are only related to other records in the file.

You need to configure the import to create the relationship between records. What should you do?

- A. Map Parent Name in the CSV file to the Parent Account colum
- B. Select Account as lookup criteria
- C. Lookup the record IDs Of the records in the ParentAccount colum
- D. Add the record IDs new column in the fil
- E. Map the new column to the ParentAccount column.
- F. Map Parent Name in the file to the Parent Account colum
- G. Select Parent Account as lookup criteria
- H. Create an alternate key the account table by using the Account Name colum
- I. DO not map parent Name in file.

Answer: C

Explanation:

Add a new column for the self-referential mapping.

Reference: <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/import-data>

NEW QUESTION 73

- (Exam Topic 3)

You have a classic workflow. The workflow updates a custom column on a record when an account record is created. The workflow must update the custom column based on the following conditions:

- Update the custom column value using the Account Number.
- If the Account Number column is blank, update the custom column value using the Ticker Symbol.
- If the Ticker Symbol column is blank, update the custom column value to N/A

You need to configure the custom column value by using the update record step. What should you do?

- A. Add the two columns with the default value by using the Forms Assistant.
- B. Add an expression that evaluates the two column values and uses the first populated value or else the default value.
- C. Add check conditions to determine if the two columns contain data.
- D. Add a formula that evaluates the two column values and uses the first populated value or else the default value

Answer: A

NEW QUESTION 78

- (Exam Topic 3)

A company creates a Power Automate cloud flow for a Power Apps app.

The cloud flow must send a daily email that contains a list of year-to-date (YTD) totals. You need to configure the flow.

Which feature should you use?

- A. Parallel branch
- B. Loop
- C. Condition
- D. Wait

Answer: B

Explanation:

In order to send a daily email that contains a list of year-to-date (YTD) totals, you would need to use a loop in the Power Automate cloud flow. A loop allows you to repeat a specific set of actions until a certain condition is met. In this case, the loop would be used to iterate through the data for each day, accumulating the totals for the year-to-date (YTD) and then sending the email at the end of the loop with the accumulated totals.

Here are some references from Microsoft that may be helpful in understanding how to use loops in Power Automate:

- > Microsoft docs: Loops in Power Automate
- > Microsoft docs: Repeating a flow with a loop
- > Microsoft docs: Using the do-until loop in Power Automate

NEW QUESTION 81

- (Exam Topic 3)

You need to create a system chart for the Account entity.

The chart must display a count of accounts grouped by owner and then display the accounts by Address 1: State/Province for each owner. You begin to configure chart options as shown in the image below.

How should you complete the configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point. The chart must display a count of accounts grouped by owner, and then display the accounts by Address 1 to State/Province for each owner.

| Component | Selection |
|--|---|
| Legend Entries (Series): Select Field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |
| Legend Entries (Series): Aggregate | <div>▼</div> <div>Avg</div> <div>Count:All</div> <div>Sum</div> |
| Horizontal (Category) Axis Labels: Select Fields | |
| First grouping field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |
| Second grouping field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

| Component | Selection |
|--|---|
| Legend Entries (Series): Select Field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |
| Legend Entries (Series): Aggregate | <div>▼</div> <div>Avg</div> <div>Count:All</div> <div>Sum</div> |
| Horizontal (Category) Axis Labels: Select Fields | |
| First grouping field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |
| Second grouping field | <div>▼</div> <div>Account</div> <div>Address 1: State/Province</div> <div>Owner</div> |

NEW QUESTION 86

- (Exam Topic 3)

You need to recommend a role for users to perform several required tasks. The solution must use the principle of least privilege.

Which roles should you recommend? To answer, drag the appropriate roles to the correct functions. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Roles | Answer Area | |
|------------------------------------|----------------------------------|------|
| | Function | Role |
| Office 365 global administrator | Create new users. | Role |
| Office 365 service administrator | | Role |
| Dynamics 365 service administrator | Assign roles to users. | Role |
| Dynamics 365 system administrator | Perform backups for an instance. | Role |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Office 365 Global Administrator

You may think that the Dynamics 365 system administrator would have power to do all the actions needed to manage Dynamics 365, but this is not the case. What's different in Microsoft cloud deployments is that licenses and user accounts are managed in Office 365 by an Office 365 Global Administrator. This role is analogous to a network administrator for an on premises deployment. The Global Administrator is the only role to create new user accounts and assign subscription licenses for Dynamics 365 (and other Office 365 apps such as Skype, Power BI and SharePoint).

Box 2: Dynamics 365 system administrator

The Dynamics 365 system administrator may assign roles and permissions to the Dynamics 365 user within an instance of Dynamics 365. The Dynamics 365 system administrator also controls all the settings in Dynamics 365.

Box 3: Dynamics 365 admin

The Dynamics 365 admin can perform backups and restores. Reference:

https://docs.microsoft.com/en-us/power-platform/admin/use-service-admin-role-manage-tenant

https://community.dynamics.com/crm/b/govandthecity/posts/understanding-dynamics-365-and-office-365-admi

NEW QUESTION 91

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result, these questions will not appear in the review screen.

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Dataverse Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 95

- (Exam Topic 3)

A company creates a canvas app.

The company plans to make the app available in Microsoft Teams. Only employees will be allowed to use the app.

You need to add the app to Teams.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Sign into the Maker portal for Microsoft Power Platform.

Add the app to Teams.

Select the required Power Apps app.

Upload the Power Apps app to the Teams channel Files tab.

Sign in to the Microsoft Power Platform Admin Center.

Select and download the Power Apps app.

Share the app to the Teams channel email address.

NEW QUESTION 99

- (Exam Topic 3)

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields. You need to create forms for each of the following case types:

| Case type | Requirement |
|-------------|---|
| Case type A | A new case form that includes a timeline |
| Case type B | A new case form that includes a business process flow |
| Case type C | A new case form that can display case data on an interactive dashboard |
| Case type D | A new mobile-friendly case form that requires minimal fields for record creation |
| Case type E | A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case |

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

https://docs.microsoft.com/en-us/power-platform/admin/control-user-access

NEW QUESTION 108

- (Exam Topic 3)

You are a Dynamics 365 administrator for a veterinarian clinic.

On the client appointment form, there is a dropdown field for clients to select their type of pet If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.

You need to create a dynamically visible field. What should you configure?

- A. filed visibility on the form
- B. business process flow
- C. workflow
- D. business rule

Answer: D

Explanation:

<https://www.sherweb.com/blog/dynamics-365/configuring-business-rules-within-microsoft-dynamics-365-crm/>

NEW QUESTION 113

- (Exam Topic 3)

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots. Where should you store the model data?

- A. Global variables
- B. Custom entities
- C. Topics
- D. Multiple choice options

Answer: A

NEW QUESTION 115

- (Exam Topic 3)

You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports. You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Share the Power BI report to all users.
- B. Add the Power BI report to the Site Map dashboards.
- C. Create a PCF file.
- D. Use the native reports in model-driven apps.
- E. Add the Power BI report to a dashboard in the model-driven app.

Answer: BE

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/add-powerbi-visual>

NEW QUESTION 118

- (Exam Topic 3)

You create a Power Automate flow as part of a managed solution. The flow alerts users when files are uploaded to a SharePoint location.

Files are uploaded to SharePoint at a much higher rate than expected. Users report that they receive too many notifications about uploaded files.

You need to stop the flow and correct the issue.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement | Action |
|--|---|
| Disable the flow in the managed solution | <div>▼</div> <div>Disable the flow from the Power Automate portal</div> <div>Disable the flow from the Azure portal</div> <div>Disable the flow from the Power Automate solution</div> |
| Verify changes to the flow | <div>▼</div> <div>Run the Flow checker and then turn on the updated flow</div> <div>Use the Test feature on the updated flow and then turn on the flow</div> <div>Turn on the flow and then use the Test feature for the updated flow</div> <div>Run the Flow checker and then use the Test feature on the updated flow</div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 122

- (Exam Topic 3)

A company plans to implement AI Builder to add intelligence to several business processes. Each business process uses different sources and produces different outputs.

You need to determine which AI Builder model types to use.

Which model types should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

| Recognition requirement | Model type |
|---|---|
| Identify a person's age in a paragraph when written using the pattern twenty years old . | <div>▼</div> <div>Entity extraction</div> <div>Text recognition</div> <div>Key phrase</div> |
| Identify items and prices from an invoice. | <div>▼</div> <div>Form processing</div> <div>Text recognition</div> <div>Object detection</div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview> <https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview>

NEW QUESTION 127

- (Exam Topic 3)

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new JavaScript web resource by using the code from the third-party librar
- B. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- C. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.
- D. Add the code from the third-party JavaScript library to MyBusinessLogi
- E. Add MyBusinessLogic to the solution.
- F. Add only the third-party JavaScript web resource to the solution.

Answer: AC

Explanation:

Web resources in model-driven apps.

Web resources are virtual files that are stored in the Microsoft Dataverse database and that you can retrieve by using a unique URL address.

Capabilities of web resources.

Web resources represent files that can be used to extend the Dataverse web application such as html files, JavaScript, and CSS, and several image formats.

Reference: <https://docs.microsoft.com/en-us/power-apps/developer/model-driven-apps/web-resources>

NEW QUESTION 132

- (Exam Topic 3)

A company has marketing teams for different regions.

A user creates and publishes a chatbot within Microsoft Teams for their specific marketing team. The base metrics retrieved by the chatbot are relevant to all marketing teams.

The other marketing teams request access to the chatbot. You need to publish the chatbot to the entire company. What should you do?

- A. Configure the chatbot to be used with the Teams channel.
- B. Submit the chatbot for admin approval.
- C. Copy the published chatbot link and email it to the other teams
- D. Invite the other teams to the team that has the chatbot.
- E. Export the chatbot and import it into a corporate environment.

Answer: B

Explanation:

Show to teammates and shared users

You can share your bot by adding it to the Microsoft Teams app store, Built for your org > Built by your colleagues section. Only your teammates and shared users will find the bot there.

Important

Only teammates or shared users can find and install the bot in the Microsoft Teams app store Built by your colleague section. The bot will not show for everyone in

the organization even if it is configured to allow everyone to use the bot. To show the bot to the organization, submit the bot for admin's approval to show in Microsoft Teams app store Built by your org section.
Reference:
<https://docs.microsoft.com/en-us/power-virtual-agents/teams/publication-add-bot-to-microsoft-teams-teams>

NEW QUESTION 137

- (Exam Topic 3)
You manage the Dynamics 365 environment for a company.
You need to ensure that there are no leads for a customer before you create a new opportunity for the customer.
How can you use duplicate detection rules to achieve this goal? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

| Duplicate detection rule criteria | Value |
|-----------------------------------|---|
| Base record type | <div>Lead</div> <div>Account</div> <div>Opportunity</div> |
| Base record field | <div>Topic</div> <div>Account</div> <div>Originating Lead</div> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Duplicate detection rule criteria | Value |
|-----------------------------------|---|
| Base record type | <div>Lead</div> <div>Account</div> <div>Opportunity</div> |
| Base record field | <div>Topic</div> <div>Account</div> <div>Originating Lead</div> |
