

# Exam Questions MD-100

Windows 10

<https://www.2passeasy.com/dumps/MD-100/>

### NEW QUESTION 1

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to configure User Account Control (UAC) to meet the following requirements:

- Ensure that the local Administrator account is always be prompted to approve elevation of privilege.
- Enforce public key infrastructure (PKI) signature checks for any interactive apps that request elevation of privilege.

Which two policy settings should you modify? To answer, select the settings in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Policy	Security Setting
User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
User Account Control: Run all administrators in Admin Approval Mode	Enabled
User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
User Account Control: Only elevate executables that are signed and validated	Disabled
User Account Control: Detect application installations and prompt for elevation	Enabled
User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-W
User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

Policy	Security Setting
User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
User Account Control: Run all administrators in Admin Approval Mode	Enabled
User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
User Account Control: Only elevate executables that are signed and validated	Disabled
User Account Control: Detect application installations and prompt for elevation	Enabled
User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-W
User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

### NEW QUESTION 2

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from Audit Policy in the

local Group Policy, you configure Audit object access.

Does this meet the goal?

- A. Yes  
 B. No

Answer: A

Explanation:

References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

### NEW QUESTION 3

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure

the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit privilege use. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Files and folders are objects and are audited through object access, not through privilege use. Reference: [https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 4**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

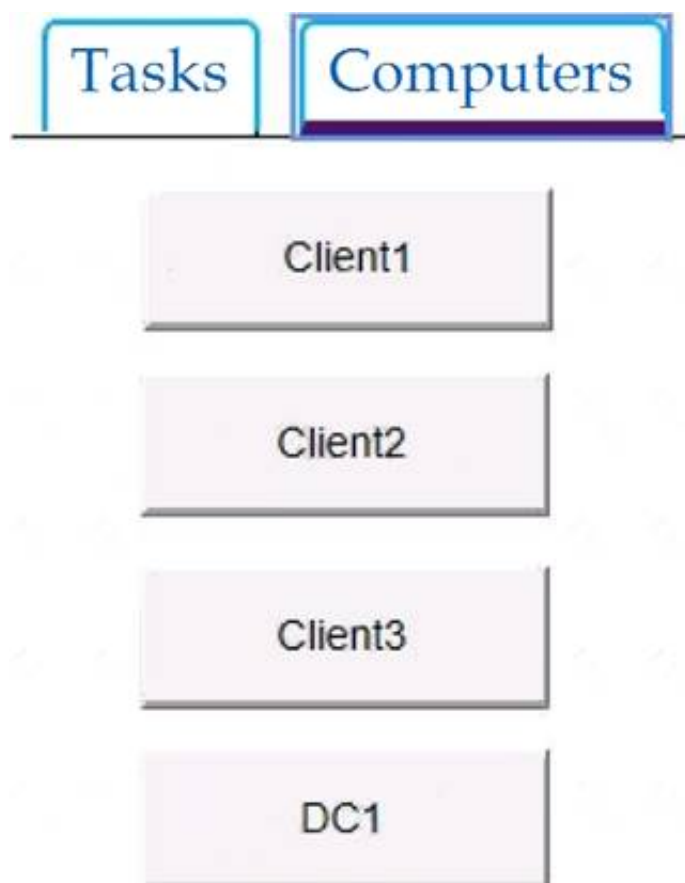

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

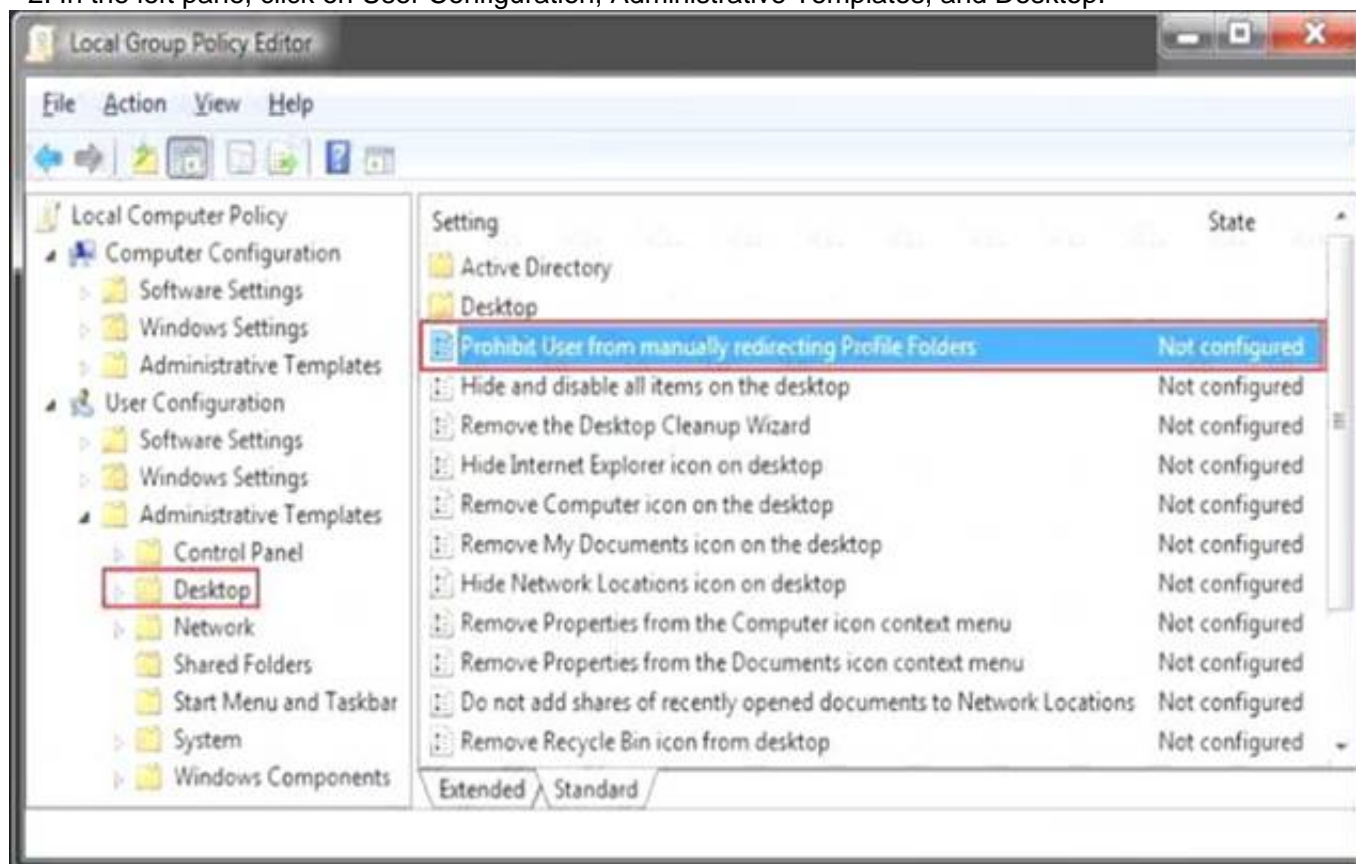

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

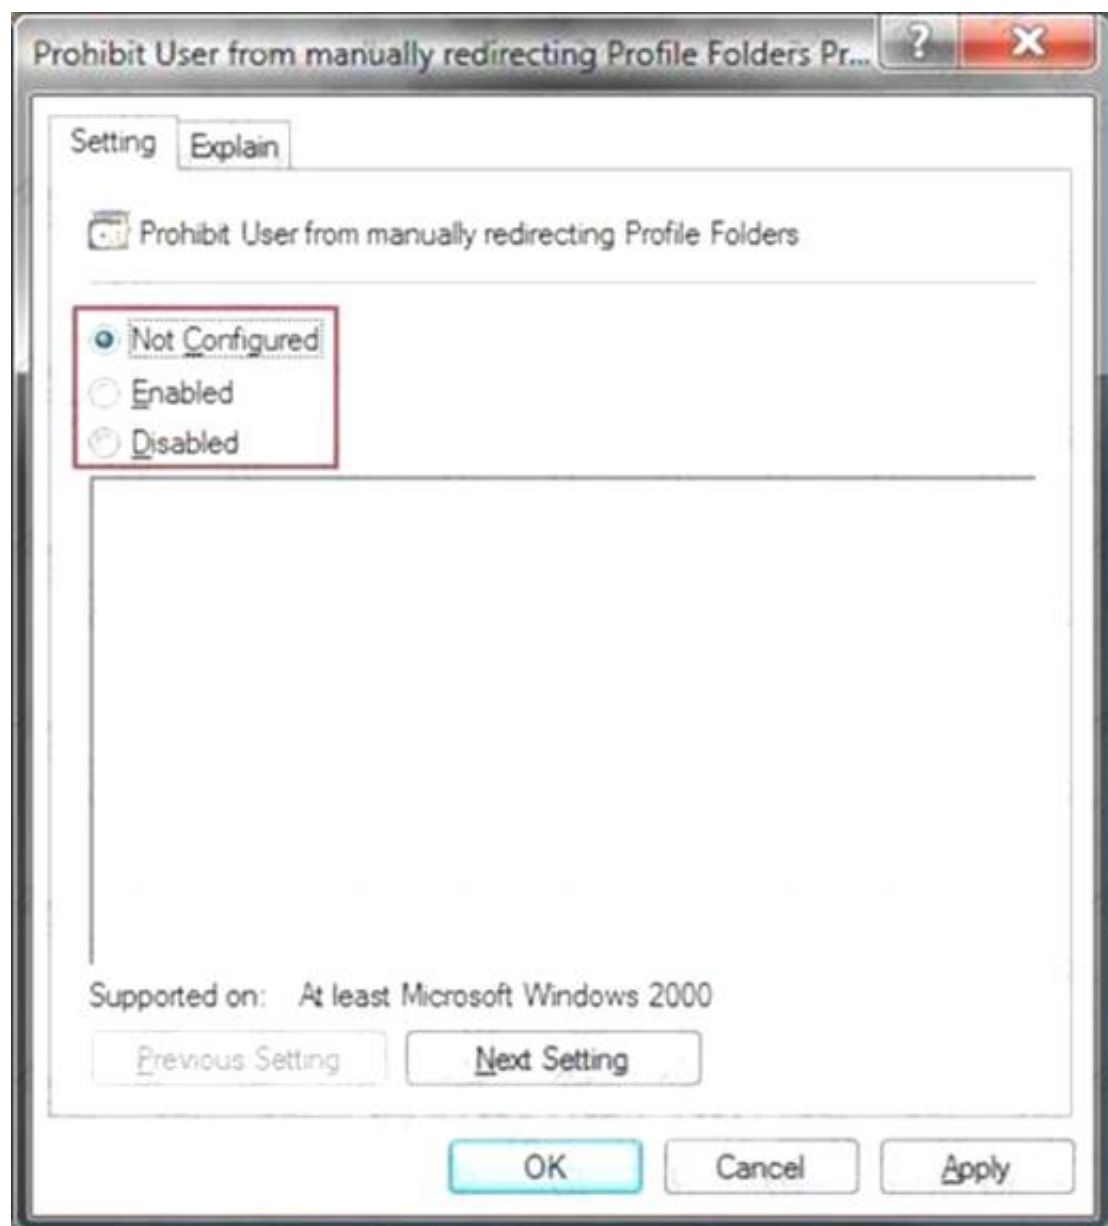

**Answer:** A

**Explanation:**

- \* 1. Open the Administrator Group Local Group Policy Editor.
- \* 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- \* 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- \* 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

\* 5. Close the Local Group Policy Editor window. References:  
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

#### NEW QUESTION 5

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers. You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

**Answer:** AE

#### Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

#### NEW QUESTION 6

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAC) package.

**Answer:** B

#### Explanation:

References:

<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

#### NEW QUESTION 7

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely

create and modify shares on the computers. The solution must use the principle of least privilege.  
 To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

**Answer:** C

#### NEW QUESTION 8

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1. What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the dislcparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the booccfg /debug command.

**Answer:** A

#### Explanation:

Reference:

<https://neosmart.net/wiki/bootmgr-is-missing/>

#### NEW QUESTION 9

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the wusa.exe command and specify the /uninstall parameter.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

#### NEW QUESTION 10

- (Exam Topic 4)

You have 20 computers that run Windows 11.

You need to enable Windows Sandbox on the computers.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Add-AppxPackage
Add-WindowsCapability
Add-WindowsPackage
Enable-WindowsOptionalFeature

-FeatureName

"Containers-DisposableClientVM"
"HostGuardian"
"HypervisorPlatform"
"VirtualMachinePlatform"

-All -Online

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Enable-WindowsOptionalFeature

To Enable Windows 10 Sandbox with PowerShell,

\* 1. Open PowerShell as Administrator.

\* 2. Type or copy-paste the following command:

Enable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -All -Online

\* 3. When prompted to restart the computer, type Y, and press Enter.

- \* 4. The change can be undone with the following command:  
 \* 5. Disable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -Online Box 2: "Containers-DisposableClientVM"  
<https://learn.microsoft.com/en-us/windows/security/threat-protection/windows-sandbox/windows-sandbox-over>

#### NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

- A. Yes  
 B. No

**Answer: B**

#### NEW QUESTION 12

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

▼

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

Users who can move File1.txt to D:\Folder3:

▼

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

- A. Mastered  
 B. Not Mastered

**Answer: A**

#### Explanation:

References:

<https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files>

#### NEW QUESTION 16

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Description	Located in
OU1	Organizational unit (OU)	Contoso.com
OU2	Organizational unit (OU)	Contoso.com
User1	User account	OU1
Computer1	Computer that runs Windows 11	OU2

BitLocker Drive Encryption (BitLocker) recovery passwords are stored in Active Directory. User1 enables the following on Computer 1:

- BitLocker on drive C
- BitLocker on a removable drive named E

Which object stores the BitLocker recovery passwords for each drive? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Active Directory Object

Computer1

OU1

OU2

TPM devices

User1

Answer Area

Drive C:

NEW QUESTION 18

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

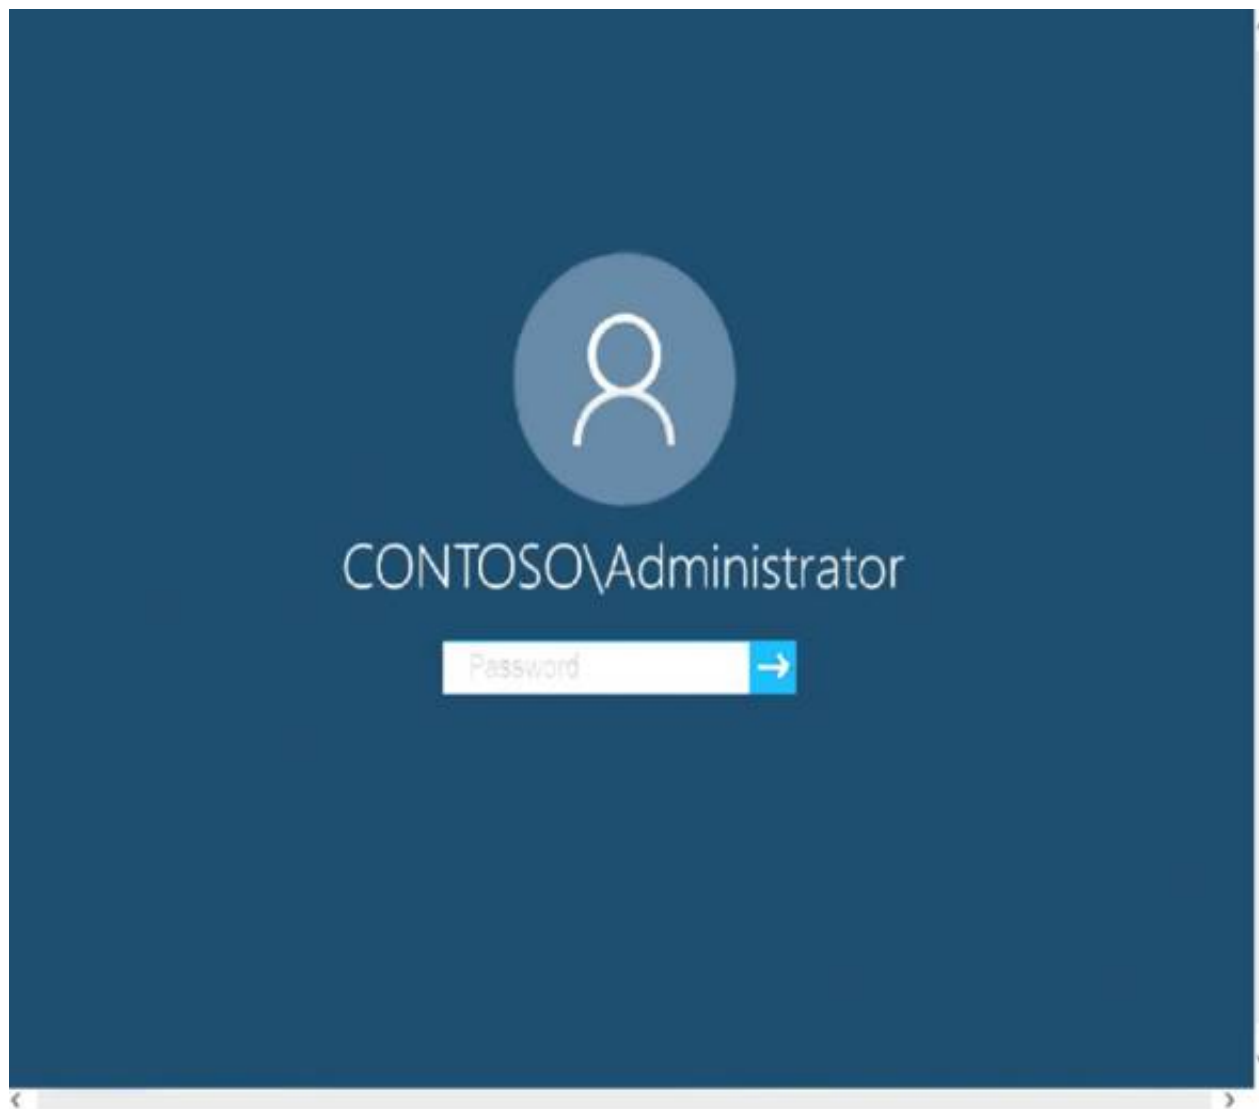

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

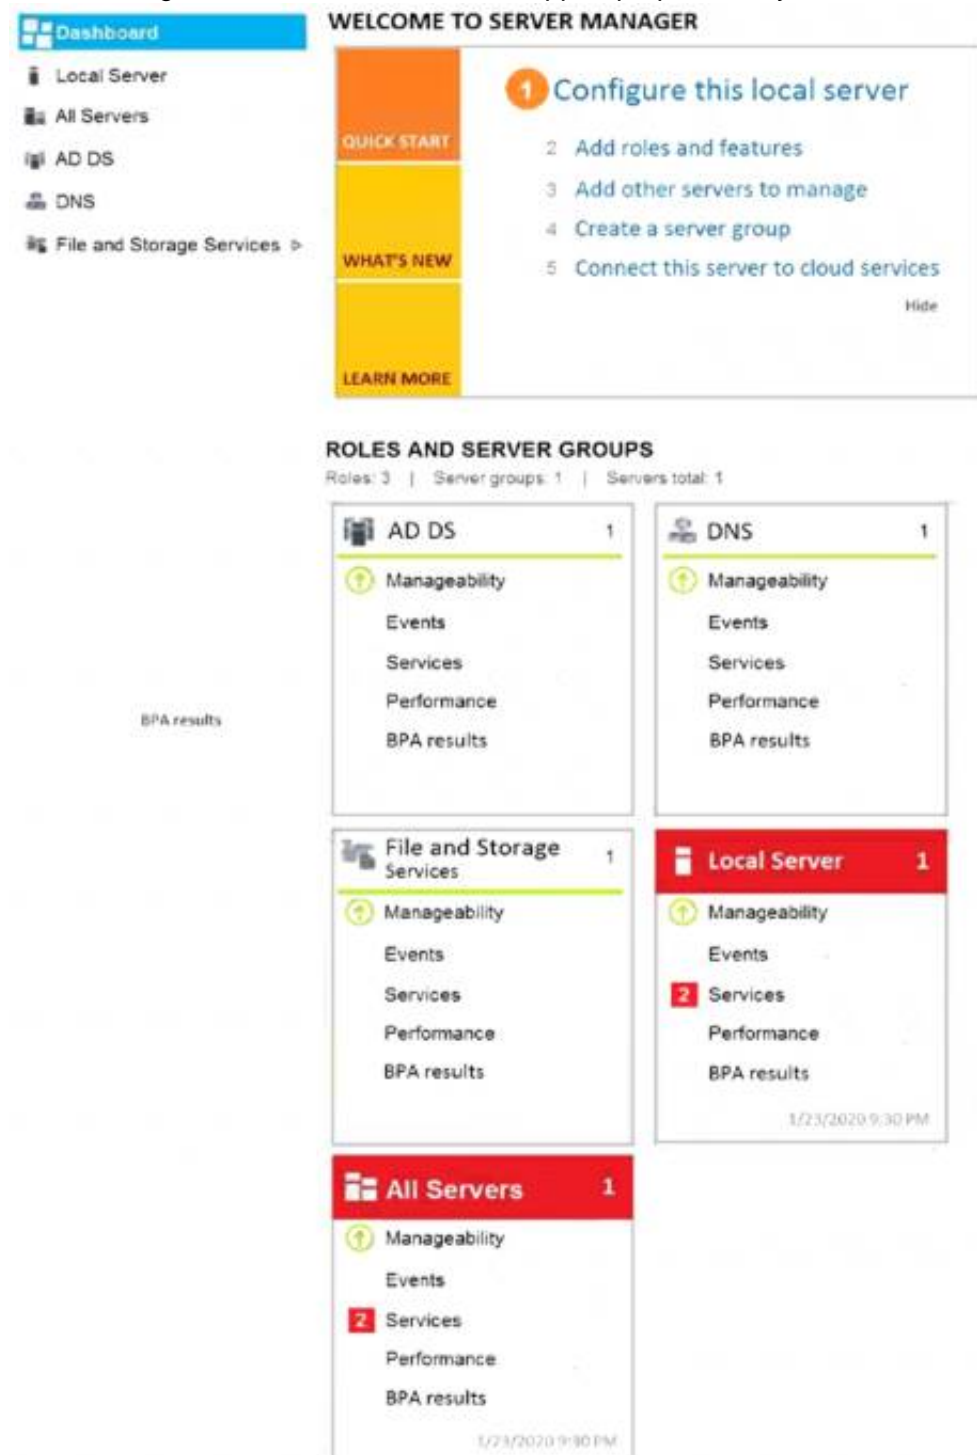

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

## Tasks Computers

You need to prevent user names and passwords from being filled in on forms automatically when a user browses to websites from Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

- > Open the Local Group Policy Editor.
- > In the left pane of Local Group Policy Editor, navigate to Computer Configuration\Administrative Templates\Windows Components\Microsoft Edge
- > In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the Configure Autofill policy to edit it.
- > Select Disabled, click/tap on OK.
- > In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the
- > Configure Password Manager policy to edit it.
- > Select Disabled, click/tap on OK.
- > You can now close the Local Group Policy Editor.

Reference:

<https://docs.microsoft.com/en-us/microsoft-edge/deploy/available-policies> <https://www.tenforums.com/tutorials/115069-enable-disable-autofill-microsoft-edge-windows-10-a.html>

### NEW QUESTION 22

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.

The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.

You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- > Administrators
- > Device Owners
- > Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>
User2 can join a maximum of 10 computers to the domain.	<input type="radio"/>	<input type="radio"/>
User3 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right.

User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

**NEW QUESTION 27**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

**NEW QUESTION 29**

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

- Contains only one 200-GB NTFS volume named C:\
- Contains 50 GB of unallocated disk space
- Is the member of a workgroup
- Has TPM enabled

What should you do first?

- A. Create a VHD.
- B. Disable TPM.
- C. Create an additional volume.
- D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

**Answer:** C

**Explanation:**

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req>

**NEW QUESTION 33**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- Log users that access C:\Folder1.
- Log users that modify and delete files in C:\Folder1. Which two actions should you perform?

- A. From the properties of C:\Folder1, configure the Auditing settings.
- B. From the properties of C:\Folder1, select the Encryption contents to secure data option.
- C. From the Audit Policy in the local Group Policy, configure Audit directory service access.
- D. From the Audit Policy in the local Group Policy, you configure Audit object access.
- E. From the Audit Policy in the local Group Policy, you configure Audit system events.

**Answer:** AD

**Explanation:**

Files and folders are objects and are audited through object access. Reference:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 35**

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computers you allow incoming ICMPv6 traffic in Windows Defender Firewall. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 40**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm

quickconfig command.  
 Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

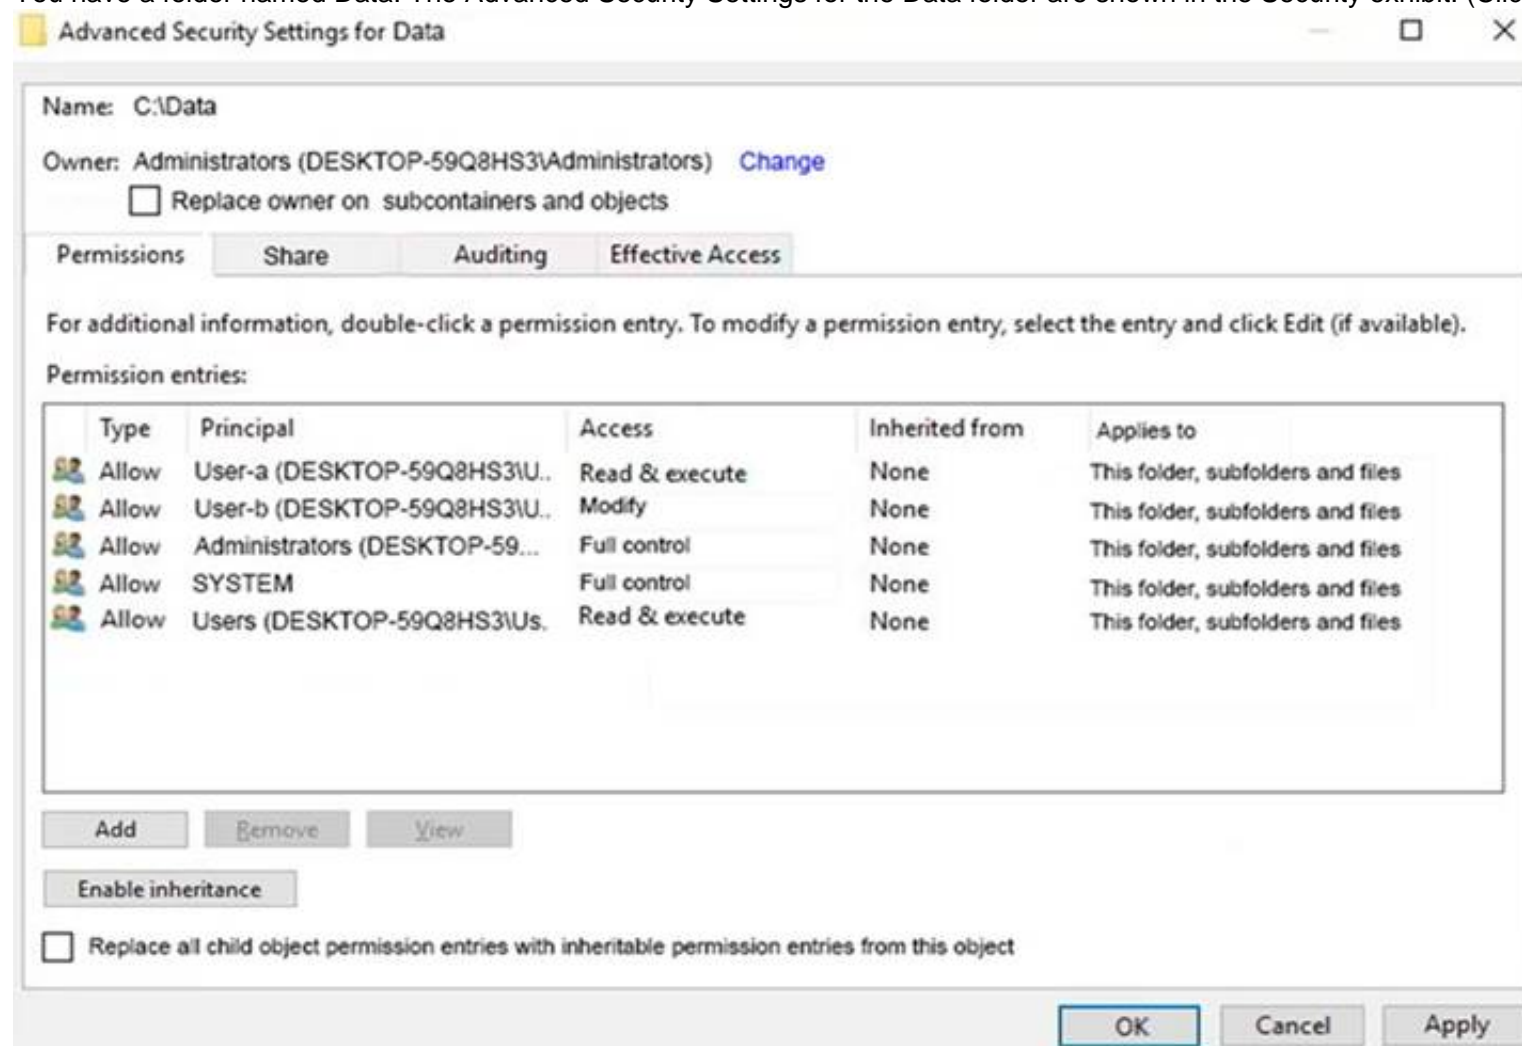

**NEW QUESTION 45**

- (Exam Topic 4)

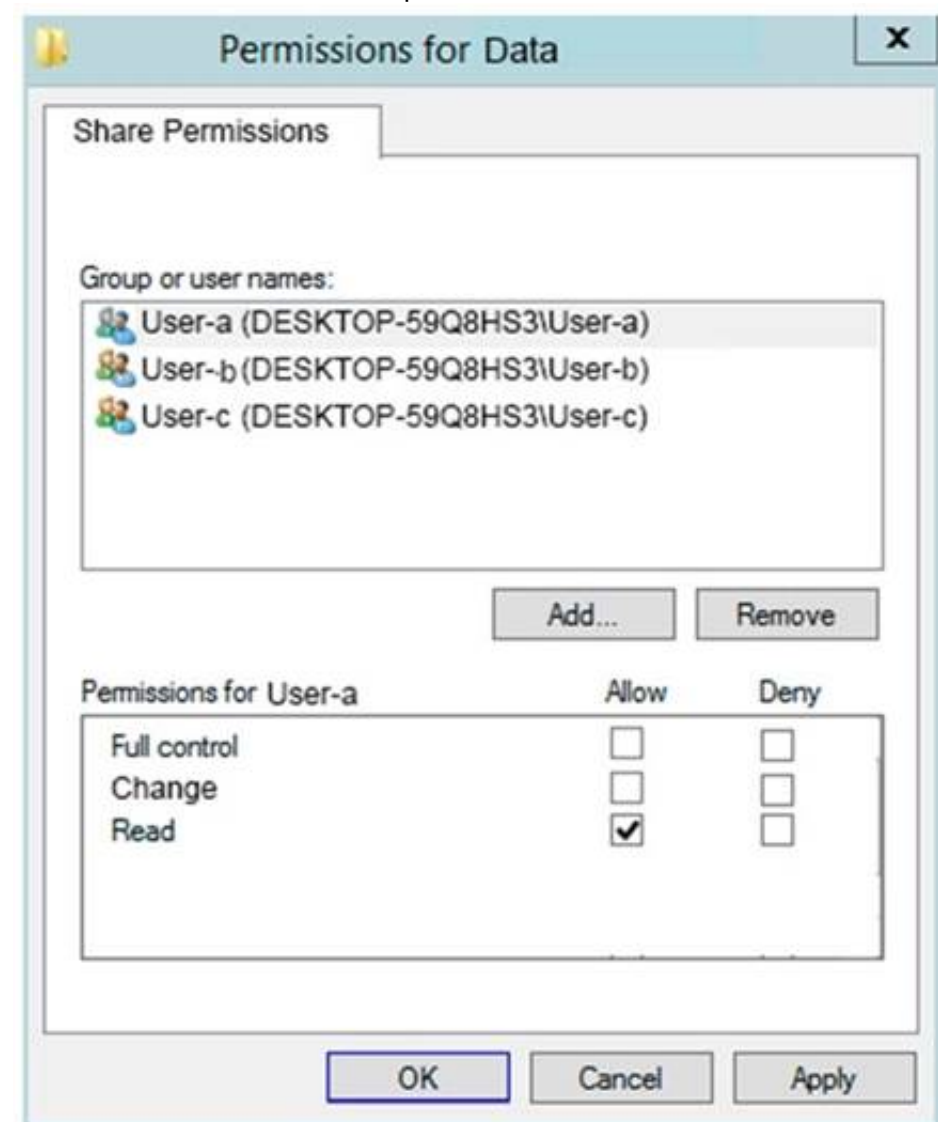

You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.

You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.

You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab.)

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

Permissions for Data

Share Permissions

Group or user names:

User-a (DESKTOP-59Q8HS3\User-a)  
User-b (DESKTOP-59Q8HS3\User-b)  
User-c (DESKTOP-59Q8HS3\User-c)

Add...Remove

Permissions for User-a

	Allow	Deny
Full control	<input type="checkbox"/>	<input type="checkbox"/>
Change	<input type="checkbox"/>	<input type="checkbox"/>
Read	<input checked="" type="checkbox"/>	<input type="checkbox"/>

OKCancelApply

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

Permissions for Data

Share Permissions

Group or user names:

User-a (DESKTOP-59Q8HS3\User-a)  
User-b (DESKTOP-59Q8HS3\User-b)  
User-c (DESKTOP-59Q8HS3\User-c)

Add...Remove

Permissions for User-a

	Allow	Deny
Full control	<input type="checkbox"/>	<input type="checkbox"/>
Change	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Read	<input checked="" type="checkbox"/>	<input type="checkbox"/>

OKCancelApply

For each of the following statements, select Yes if the statements is true. Otherwise, select No.  
NOTE: Reach correct selection is worth one point.

Statements	Yes	No
User-a can modify files in the Data share.	<input type="radio"/>	<input type="radio"/>
User-b can delete files in the Data share.	<input type="radio"/>	<input type="radio"/>
User-c can read files in the Data share.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

No No Yes

#### NEW QUESTION 46

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You need to ensure that you can use the ping command to validate network connectivity to Computer 1. How should you configure Windows Defender Firewall on Computer1?

- A. Enable the Core Networking - Teredo (UDP-In) inbound rule.
- B. Create a new connection security rule.
- C. Enable the File and Printer Sharing (Echo Request - ICMPv4-In) inbound rule.
- D. Add a new port rule to allow ports 80 and 443.

**Answer:** C

#### NEW QUESTION 48

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.

New-LocalUser –Name User1 –NoPassword Add-LocalGroupMember User –Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser? view=powershell-5.1>

#### NEW QUESTION 52

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

#### NEW QUESTION 56

- (Exam Topic 3)

Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1: 

Computer2 only

Computer3 only

Computer2 and Computer3

No Windows 10 computers

Computer2: 

Computer1 only

Computer3 only

Computer1 and Computer3

No Windows 10 computers

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Graphical user interface, text, application, chat or text message Description automatically generated  
Box 1: Computer3 only.  
Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.  
The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.  
The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.  
Box 2: No Windows 10 computers.  
The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

**NEW QUESTION 57**  
- (Exam Topic 3)  
You implement the planned changes for Computer1.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
A screenshot of a computer Description automatically generated with low confidence  
Box 1: Yes  
User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No  
The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.  
Box 3: No  
The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

**NEW QUESTION 58**  
- (Exam Topic 2)  
You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.

D. Turn on Bluetooth.

**Answer:** D

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

## NEW QUESTION 62

- (Exam Topic 2)

You need to meet the technical requirements for the HR department users.

Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

## NEW QUESTION 64

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

A. Windows Server Update (WSUS)

B. the Update Management solution in Azure Automation

C. the Update Compliance solution in Azure Log Analytics

D. the Azure Security Center

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

## NEW QUESTION 69

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

▼
Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

▼
CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

#### NEW QUESTION 72

- (Exam Topic 1)

You need to recommend a solution to configure the employee VPN connections. What should you include in the recommendation?

- A. Remote Access Management Console
- B. Group Policy Management Console (GPMC)
- C. Connection Manager Administration Kit (CMAK)
- D. Microsoft Intune

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-access/vpn/always-on-vpn/deploy/vpn-deploy>

#### NEW QUESTION 74

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

**Answer:** A

**Explanation:**

References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

#### NEW QUESTION 78

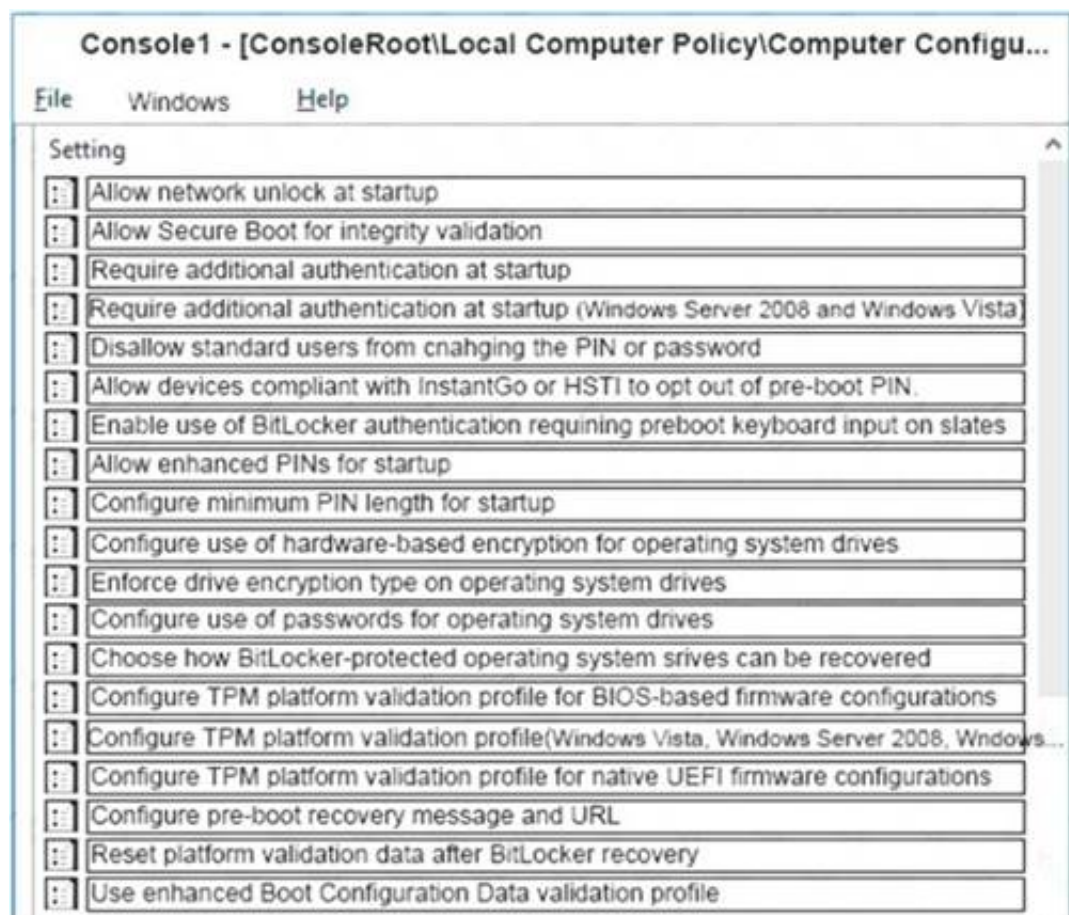

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using Bitlocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

**NEW QUESTION 79**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro for Workstation

On which computers can you perform an in-place upgrade to Windows 10 Enterprise?

- A. Computer3 only
- B. Computer2 and Computer3 only
- C. Computer2 only
- D. Computer2
- E. Computer2, and Computer3

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths> <https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-edition-upgrades>

**NEW QUESTION 81**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers. The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

**NEW QUESTION 84**

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

**NEW QUESTION 88**

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### NEW QUESTION 92

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### NEW QUESTION 97

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. \Windows.\BT\Sources\Panther\
- B. \Windows\Logs
- C. \Windows\Temp
- D. \Windows.\BT\Inf

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

#### NEW QUESTION 100

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.

How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

6 months

12 months

18 months

30 months

Computer2:

6 months

12 months

18 months

30 months

Computer3:

6 months

12 months

18 months

30 months

- A. Mastered
- B. Not Mastered

**Answer:** A

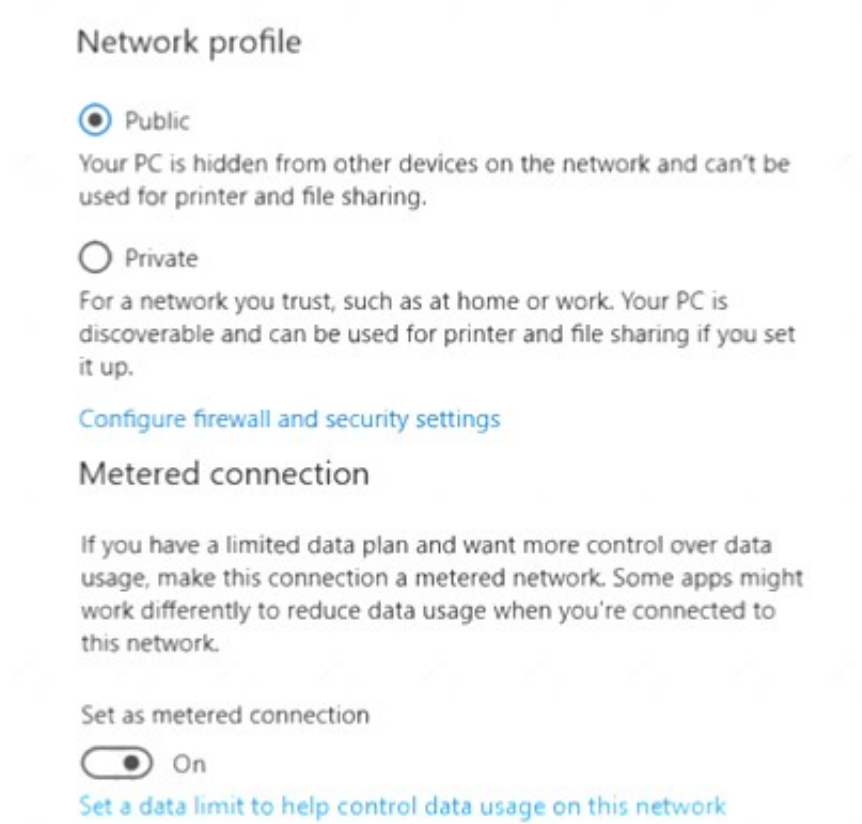

#### Explanation:

Table Description automatically generated with medium confidence  
Reference:  
https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools

NEW QUESTION 103

- (Exam Topic 4)  
You have a computer that runs Windows 10.  
From the Settings app, you view the connection properties shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

NEW QUESTION 107

- (Exam Topic 4)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User1 is a standard user. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 108**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

**Answer:** B

**Explanation:**

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

**NEW QUESTION 110**

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with new computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.

A user named Mia Hamm has an Active Directory user account named MHamm and a computer named Computer1. Mia Hamm reports that Computer1 is not activated.

You need to ensure that Mia Hamm can activate Computer1. What should you do?

- A. Assign a Windows 10 Enterprise license to MHamm, and then activate Computer1.
- B. From the Microsoft Deployment Toolkit (MDT), redeploy Computer1.
- C. From System Properties on Computer1, enter a Volume License Key, and then activate Computer1.
- D. Instruct Mia Hamm to perform a local AutoPilot Reset on Computer1, and then activate Computer1.

**Answer:** C

**NEW QUESTION 112**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

**Answer:** D

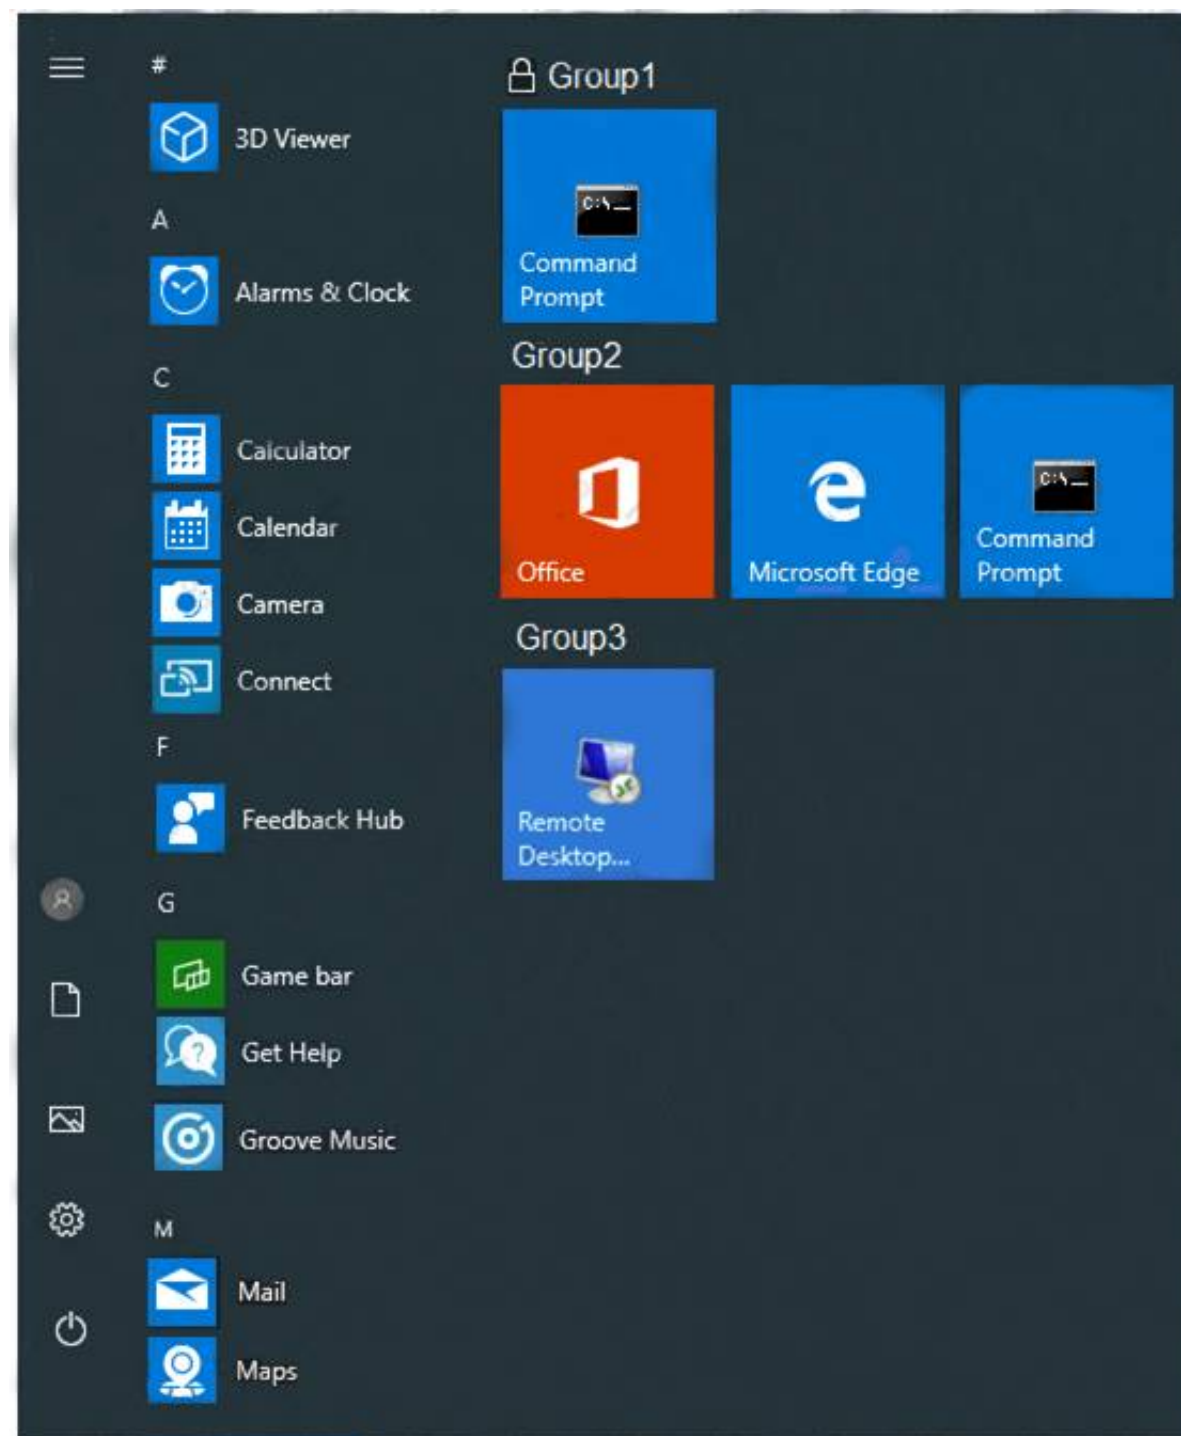

**Explanation:**

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

**NEW QUESTION 113**

- (Exam Topic 4)

You customize the Start menu on a computer that runs Windows 10 as shown in the following exhibit.

You need to add Remote Desktop Connection to Group1 and remove Group3 from the Start menu.  
 Which two actions should you perform from the Start menu customizations? Each correct answer presents part of the solution.  
 NOTE: Each correct selection is worth one point.

- A. Unlock Group1
- B. Remove Command Prompt from Group1.
- C. Delete Group3.
- D. Add Remote Desktop Connection to Group1.
- E. Rename Group3 as Group1.

**Answer:** AD

#### NEW QUESTION 118

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

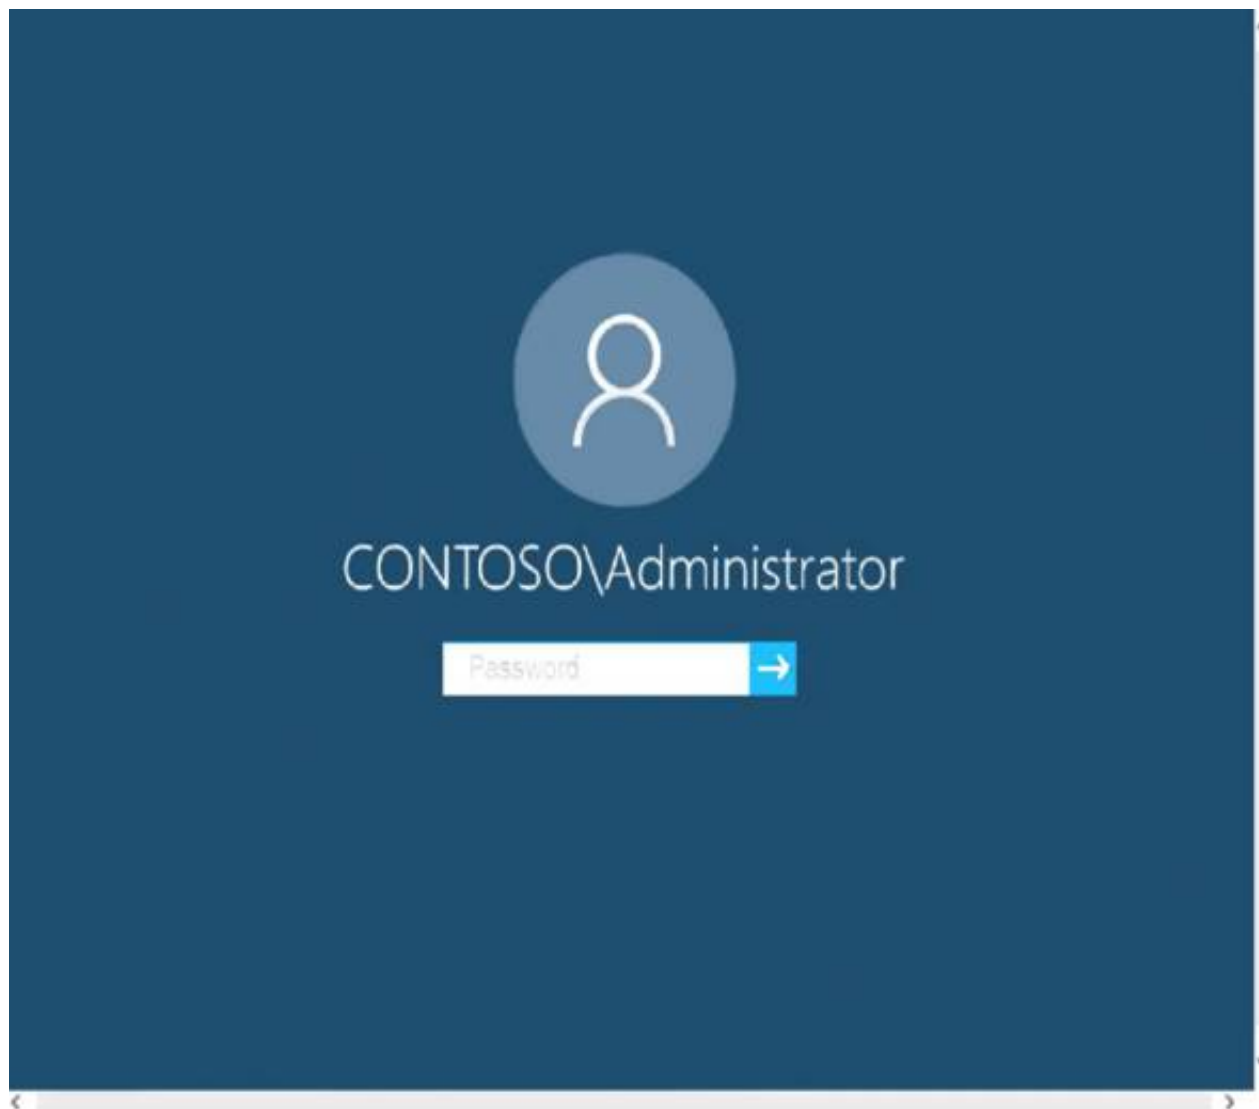

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

## Tasks Computers

A web service installed on Client1 is used for testing.

You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

To create an inbound port rule

- In the navigation pane, click Inbound Rules.
- Click Action, and then click New rule.
- On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- On the Program page, click All programs, and then click Next.
- On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- On the Action page, select Allow the connection, and then click Next.
- On the Profile page, select the network location types to which this rule applies, and then click Next.
- On the Name page, type a name and description for your rule, and then click Finish.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>

[https://en.wikipedia.org/wiki/List\\_of\\_TCP\\_and\\_UDP\\_port\\_numbers](https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers)

### NEW QUESTION 120

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

### Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

#### NEW QUESTION 123

- (Exam Topic 4)

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab.

What are three possible ways to achieve the goal? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. Enable File History and include Folder1 in the Documents library.
- B. Enable File History and add Folder1 to File History.
- C. Select Folder is ready for archiving from the properties of Folder1.
- D. Select Allow files in this folder to have contents indexed in addition to file properties from the properties of Folder1.
- E. Set up Backup and Restore (Windows 7) and include Folder1 in the backup.

**Answer:** ABE

#### NEW QUESTION 127

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0.

You configure the proxy settings on Computer1 as shown in the following exhibit.

### Manual proxy setup

Use a proxy server for Ethernet or Wi-Fi connections. These settings don't apply to VPN connections.

Use a proxy server

☒ On

Address

Port

Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.

☒ Don't use the proxy server for local (intranet) addresses

Save

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Connection attempts to

www.contoso.com will [answer choice].

bypass the proxy only when using Microsoft Edge  
 use the proxy only when using Microsoft Edge  
 bypass the proxy for all applications  
 use the proxy for all applications

If Computer1 attempts to connect to

[answer choice] from Microsoft Edge, the proxy will be bypassed.

https://10.10.0.100  
 https://store.microsoft.com  
 ftp://192.168.1.10

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 130**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- Provide a user named Jon Ross with the ability to modify the permissions of C:\Folder1.
- Ensure that the principle of least privilege is maintained.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- In Windows Explorer, right-click the C:\Folder1 folder, and then click Properties.
- Click on the Security tab, and then click Edit.
- In the Permissions dialog box, add Jon Ross.
- Specify the Allow Modify permissions for the Jon Ross.
- Click OK twice to close the Security dialog box.
- Click OK twice to close the Properties dialog box.

**Tasks** **Computers**

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

On Client1, log in as administrator. Open command prompt and type:  
 gpreport /h CONTOSO\User1\C:\Folder1\Report.html

**NEW QUESTION 136**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.  
 All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.  
 You add a folder named C:\Documents\Templates to each computer.  
 \_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.  
 \_ Only the members of Group1 must be allowed to edit the files in the Templates folder.  
 How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Inheritance:

Permissions for domain users:

Permissions for Group1:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance:

Permissions for domain users:

Permissions for Group1:

#### NEW QUESTION 137

- (Exam Topic 4)

You have a computer that runs Windows 10. You view the domain services status as shown in the following exhibit.

```

-----
| Device State |
-----

AzureAdJoined : YES

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

Microsoft Edge is configured by using:

- a Group Policy object (GPO)
- Microsoft Intune
- the Internet Explorer Administration Kit (IEAK)

The computer is:

- enrolled in Microsoft Intune
- managed by using Microsoft System Center Configuration Manager
- joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.  
 The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:  
<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>  
<https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04>

NEW QUESTION 139

- (Exam Topic 4)  
 Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit.  
 (Click the Exhibit tab.)

Name: C:\Folder1\File1.txt  
 Owner: administrator (ADATUM\administrator) [Change](#)

Permissions | Share | Auditing | Effective Access

For additional information, double-click a permission entry. To modify a permission entry, select the entry and click Edit (if available).

Permission entries:

Type	Principal	Access	Condition
Allow	Domain Admins (...)	Full control	
Allow	Group1 (ADATUM\...)	Read	Member of each ((Group1 (ADATUM\Group1), Group3 (ADATUM\Group3)))
Allow	Group2 (ADATUM\...)	Full control	Not member of any ((Group3 (ADATUM\Group3)))
Allow	Group3 (ADATUM\...)	Read	Not member of any ((Group1 (ADATUM\Group1), Group2 (ADATUM\Group2)))

Buttons: Add, Remove, View, Enable inheritance, OK, Cancel, Apply

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No  
 User1 only has Read access to the file.  
 Box 2: Yes  
 User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.  
 Box 3: No  
 User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

NEW QUESTION 144

- (Exam Topic 4)  
 You have computers that run Windows 10 and are configured as shown in the following table.

Name	TPM	BitLocker Drive Encryption enabled on drive C	BitLocker Drive Encryption enabled on drive D
Computer1	No	Yes	Yes
Computer2	Yes	No	Yes
Computer3	Yes	Yes	No

You have a removable USB drive named USBDrive1 that is encrypted by using BitLocker to Go. You plan to use USBDrive1 on Computer1, Computer2, and Computer3.  
 You need to identify on which computers you can enable automatic unlocking of BitLocker on USBDrive1. Which computers should you identify?

- A. Computer2 and Computer3 only

- B. Computer3 only
- C. Computer1 and Computer3 only
- D. Computer1, Computer2, and Computer3

**Answer: C**

**Explanation:**

The BitLocker key is stored in the registry when you enable auto-unlock but only if the operating system drive is encrypted with BitLocker. A TPM is not required.

**NEW QUESTION 146**

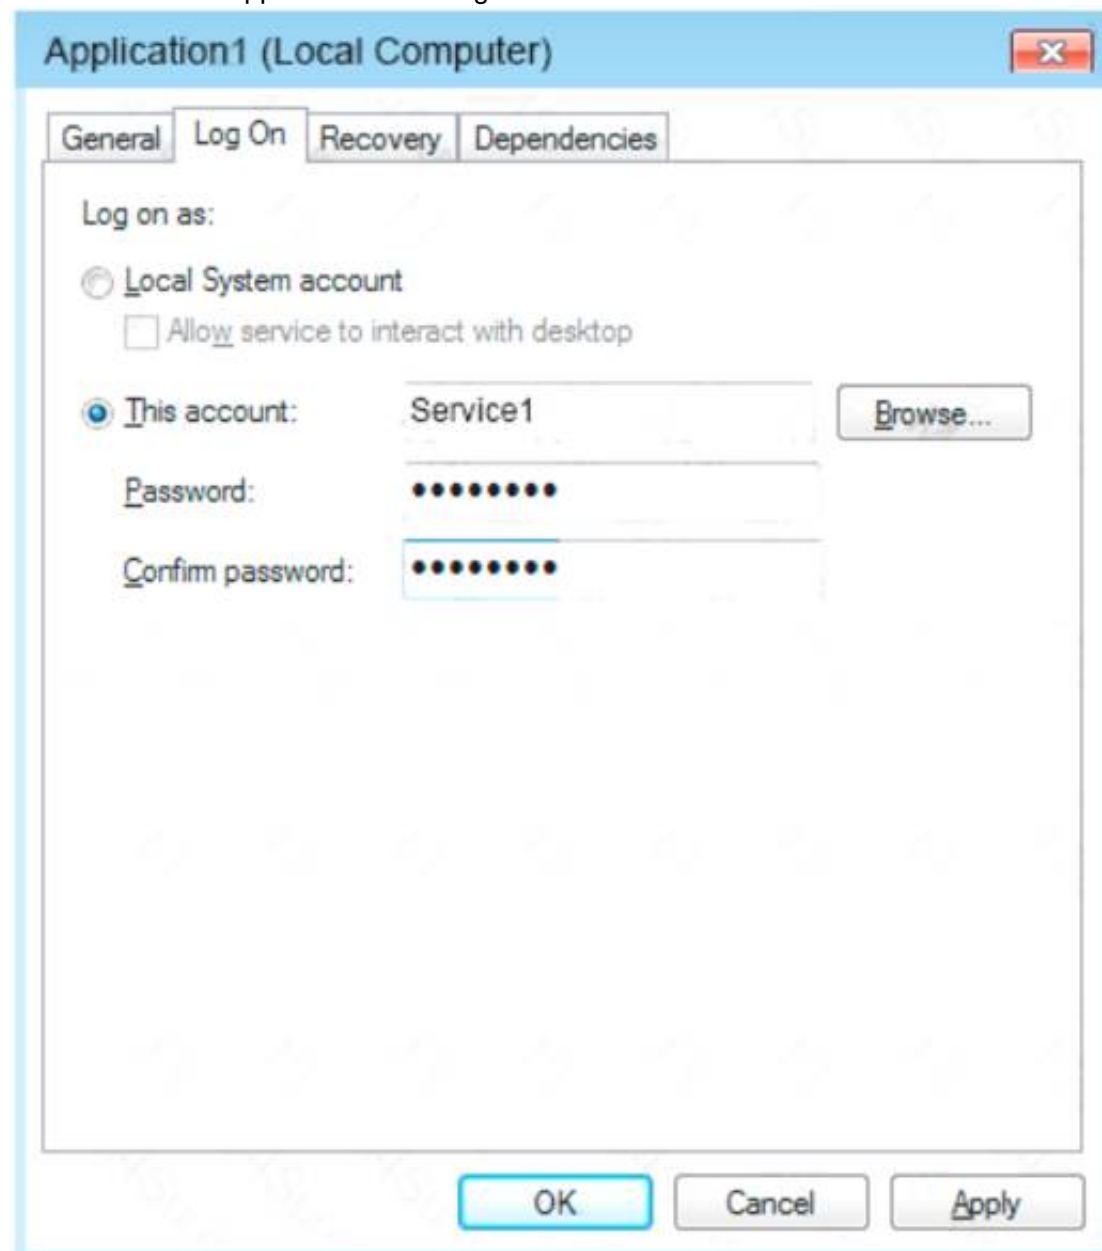

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

**NEW QUESTION 151**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

## Tasks Computers

You need to ensure that the File History of Contoso\Administrator on Client1 is backed up automatically to \\DC1\Backups.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

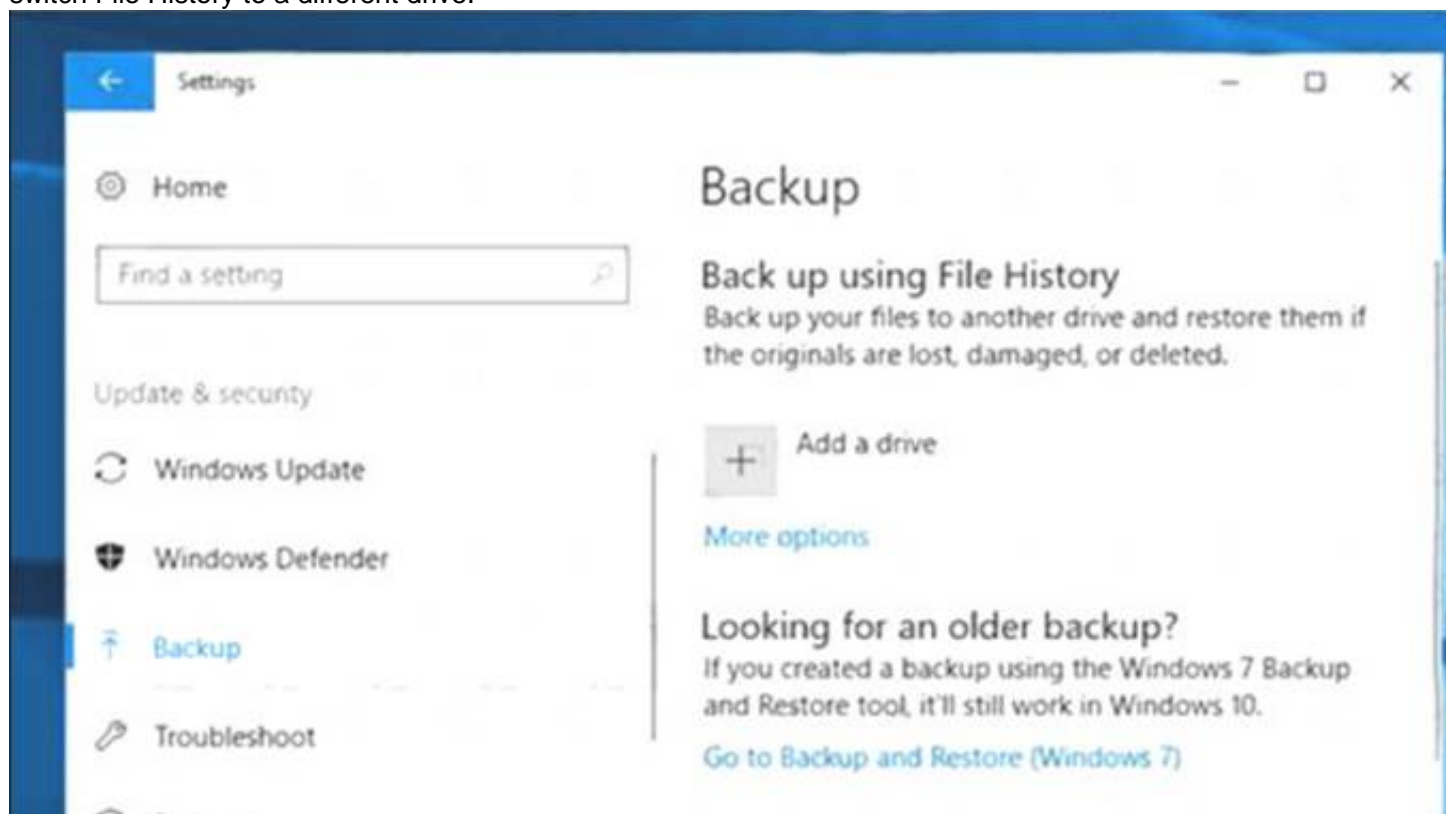

How to set up and enable File History

\* 1. On Client1, go to Start > Settings > Update & Security.

\* 2. Select Backup and click "Add a drive."

\* 3. Select the drive or network location (\\DC1\Backups) you want to use for File History's backups.

Now click "More options." Here you can start a backup, change when your files are backed up, select how long to keep backed up files, add or exclude a folder, or switch File History to a different drive.

Click the "Back up now" button to start your first File History backup. Reference:

<https://lifehacker.com/how-to-back-up-your-computer-automatically-with-windows-1762867473>

### NEW QUESTION 152

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Contoso\Event Log Readers
User2	Contoso\Administrators

The relevant group membership on Computer1 is shown in the following table.

Group	Members
Event Log Readers	Contoso\User1
Device Owners	Contoso\User1

The relevant group membership on Computed is shown in the following table.

Group	Members
Event Log Readers	None
Device Owners	Contoso\User2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
From Computer1, User1 can use Event Viewer to view events from the System log of Computer2.	<input type="radio"/>	<input type="radio"/>
From Computer1, User2 can use Event Viewer to view events from the Security log of Computer2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User1 can use Event Viewer to view events from the Setup log of Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
From Computer1, User1 can use Event Viewer to view events from the System log of Computer2.	<input checked="" type="radio"/>	<input type="radio"/>
From Computer1, User2 can use Event Viewer to view events from the Security log of Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
From Computer2, User1 can use Event Viewer to view events from the Setup log of Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 153

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Commands	Answer Area
dism.exe	Prepare a WinPE working directory: Command
copype.cmd	Mount and unmount a WinPE image: Command
mount.exe	Add scripting support to a WinPE image: Command
diskpart.exe	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Copype.cmd Dism.exe Mount.exe

NEW QUESTION 154

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.

You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.

What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

**Answer: D**

#### NEW QUESTION 156

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

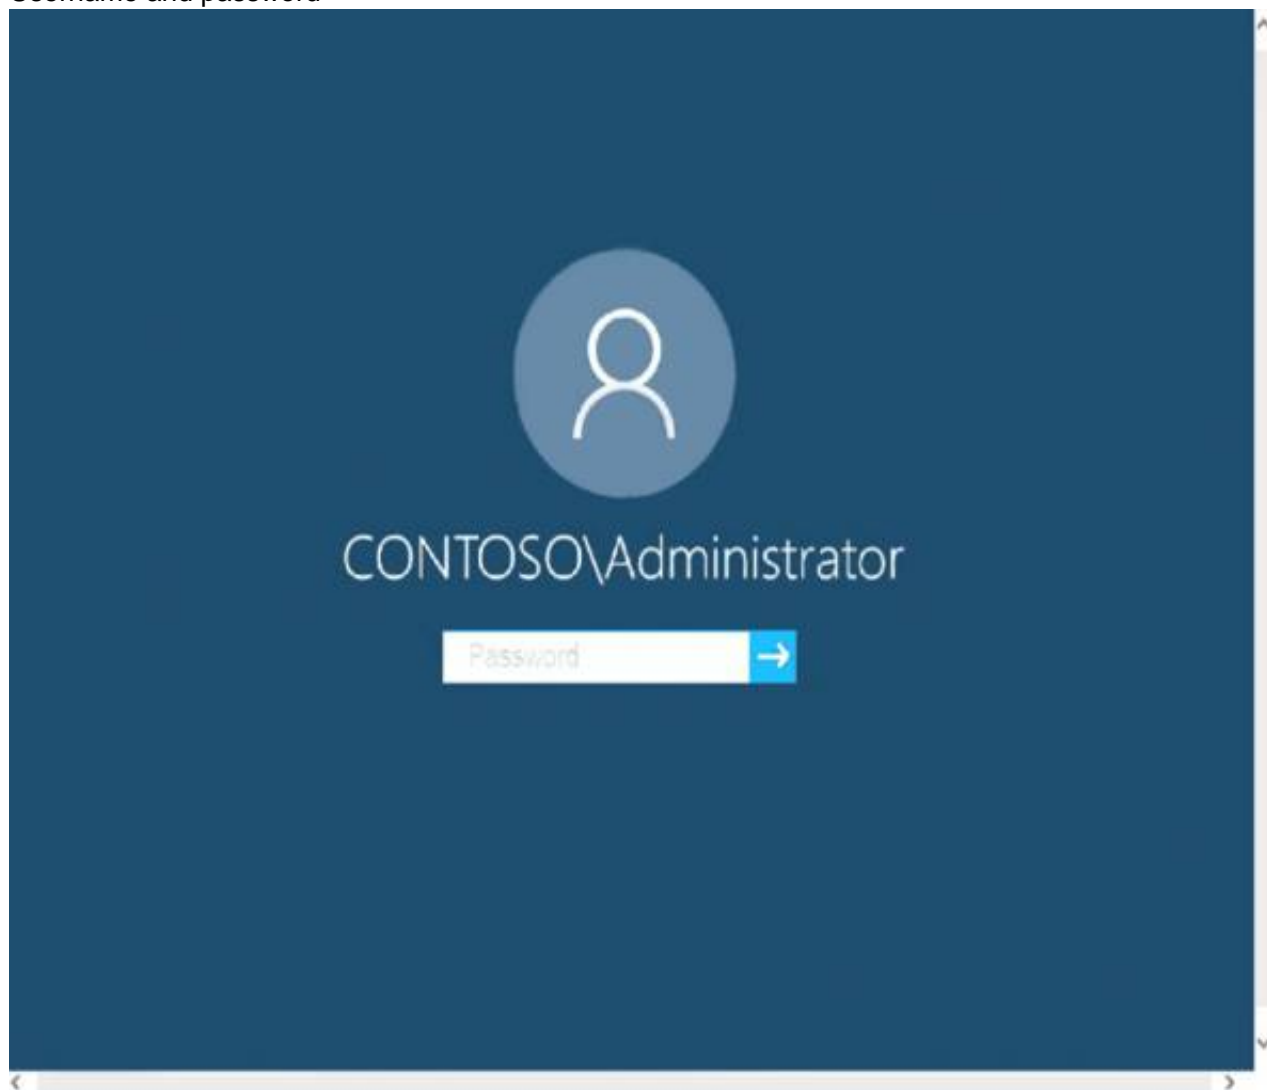

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

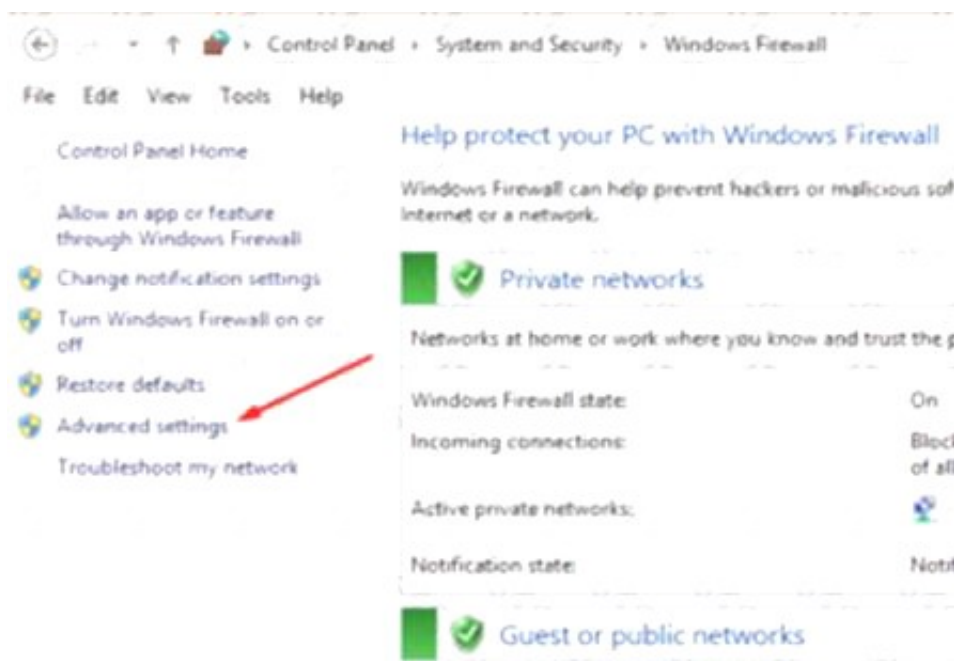

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3. You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- \* 1. Go to Control Panel -> System and Security -> Windows Firewall.
- \* 2. Click on the Advanced settings link in the left-hand side.

\* 3. Enable COM+ Network Access (DCOM-In).

\* 4. Enable all the rules in the Remote Event Log Management group.

<https://www.zubairalexander.com/blog/unable-to-access-event-viewer-on-a-remote-computer/>

## NEW QUESTION 161

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From a command prompt, you run `netsh wlan delete profile name="Wireless1"`. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Reference:

<https://lifehacker.com/remove-wi-fi-profiles-from-windows-8-1-from-the-command-1449954864>

## NEW QUESTION 166

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. The computers are in a workgroup.

You perform the following configurations on Computer1:

- Create a user named User1.
- Add User1 to the Remote Desktop Users group. You perform the following configurations on Computer2:
- Create a user named User1 and specify the same user password as the one set on Computer1.
- Create a share named Share2 and grant User1 Full control access to Share2.
- Enable Remote Desktop.

What are the effects of the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If User1 attempts to access Share2 from Computer1, the user will:

☐

☐ Access Share2 without a prompt
 ☐ Be prompted for credentials
 ☐ Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

☐

☐ Sign in to Remote Desktop without a prompt
 ☐ Be prompted for credentials and be able to sign in as User1.
 ☐ Be prompted for credentials and be prevented from signing in as User1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If User1 attempts to access Share2 from Computer1, the user will:

Access Share2 without a prompt

Be prompted for credentials

Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

Sign in to Remote Desktop without a prompt

Be prompted for credentials and be able to sign in as User1.

Be prompted for credentials and be prevented from signing in as User1.

NEW QUESTION 171

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains the folders shown in the following table.

Name	File system	BitLocker Drive Encryption (BitLocker)
C:\Folder1	NTFS	Disabled
D:\Folder2	NTFS	Enabled
E:\Folder3	FAT32	Disabled

You include Folder1, Folder2, and Folder3 in the Documents library.  
You configure File History to run every 15 minutes, and then turn on File History.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Folder1 is protected by File History.	<input type="radio"/>	<input type="radio"/>
Folder2 is protected by File History.	<input type="radio"/>	<input type="radio"/>
Folder3 is protected by File History.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Folder1 is protected by File History.	<input checked="" type="radio"/>	<input type="radio"/>
Folder2 is protected by File History.	<input checked="" type="radio"/>	<input type="radio"/>
Folder3 is protected by File History.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 173

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer1 has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.

Which two users can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

**Answer:** DE

#### NEW QUESTION 178

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

▼

Windows Server Update Services (WSUS)

Microsoft System Center Configuration Manager

Windows Update for Business

Manage the configuration by using:

▼

A Group Policy object (GPO)

Microsoft System Center Configuration Manager

Microsoft Intune

Manage the traffic by using:

▼

Delivery Optimization

BranchCache

Peer cache

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

#### NEW QUESTION 183

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer. Use User3's credentials instead. References:  
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 187**

- (Exam Topic 4)

A user has a computer that runs Windows 10. The user has access to the following storage locations:

- > A USB flash drive
- > Microsoft OneDrive
- > OneDrive for Business
- > A drive mapped to network share
- > A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

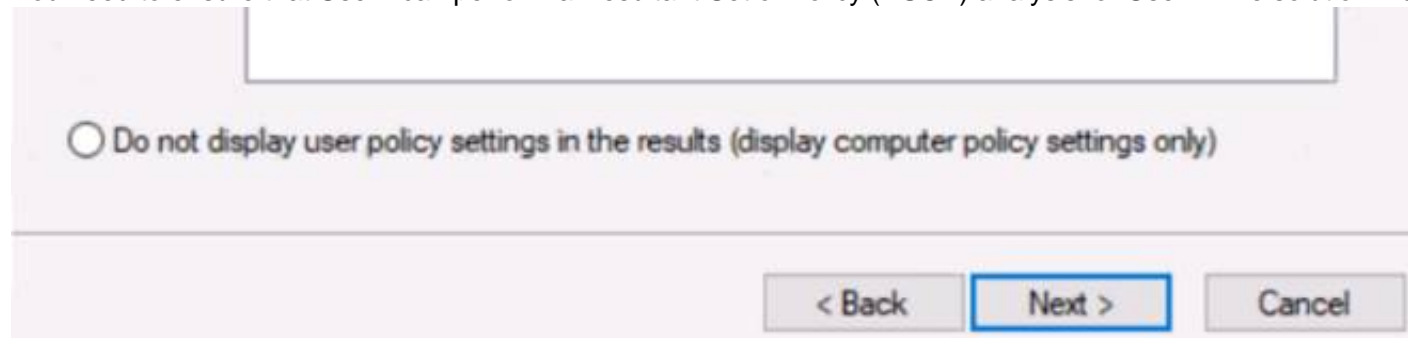

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive
- E. the drive mapped to a network share

**Answer: CE**

**NEW QUESTION 191**

- (Exam Topic 4)

You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

The screenshot shows a checkbox labeled "Do not display user policy settings in the results (display computer policy settings only)". The checkbox is currently unchecked. Below the checkbox are three buttons: "< Back", "Next >" (which is highlighted with a blue border), and "Cancel".

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

**Answer: D**

**NEW QUESTION 193**

- (Exam Topic 4)

You have four computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of
Computer1	Workgroup named WG1
Computer2	Workgroup named WG1
Computer3	Workgroup named WG2
Computer4	Active Directory domain named contoso.com

On Computer1, you create a user named User1. In the domain, you create a user named User2. You create the groups shown in the following table.

Name	Created on/in
Group3	Computer3
Group4	Computer4
Group5	Contoso.com

You need to identify to which computers User1 can sign in, and to which groups you can add User2. What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1 can sign in to:

Computer1 only
Computer1 and Computer2 only
Computer1, Computer2, and Computer3 only
Computer1, Computer2, and Computer4 only
Computer1, Computer2, Computer3, and Computer4

You can add User2 to:

Group5 only
Group4 and Group5 only
Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Computer 1 only.

User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1. Box 2: Group5 only.

User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.

**NEW QUESTION 197**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

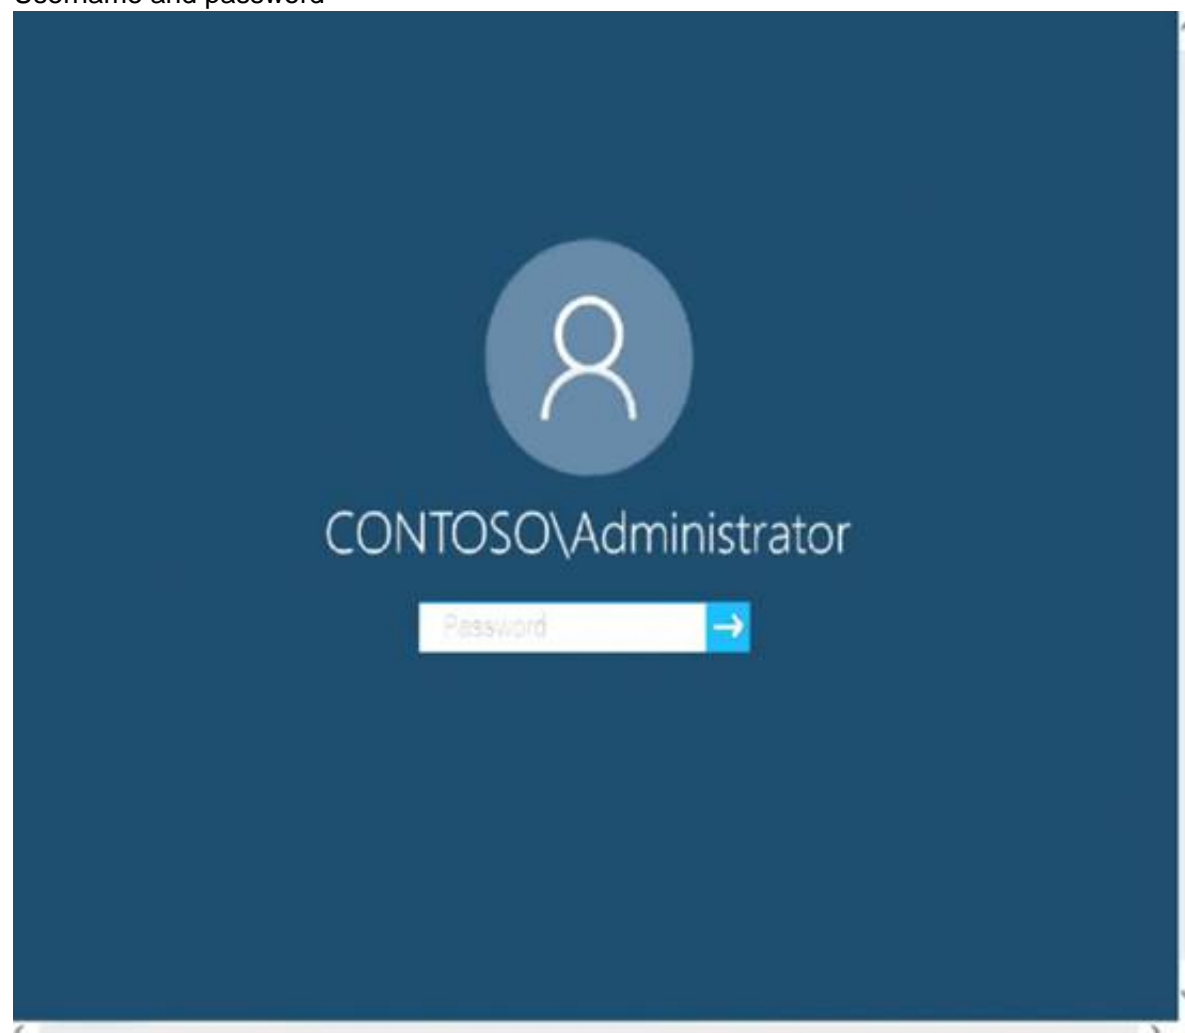

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:  
 Lab Instance: 10921597

You need to ensure that a local user named User1 can establish a Remote Desktop connection to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Add User to Remote Desktop Users Group via Settings App

- > Open the Settings app on Client2 and go to System -> Remote Desktop. Click on the Select users that can remotely access this PC link on the right side.
- > When the Remote Desktop Users dialog opens, click on Add.
- > Click on Advanced.
- > Click on Find Now and then select any user account you want to add to the "Remote Desktop Users" group, and click OK.
- > Click OK and you're done.

Reference:

<https://www.top-password.com/blog/add-user-to-remote-desktop-users-group-in-windows-10/>

**NEW QUESTION 201**

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Name	Type	Member of
User1	User	Group1
User2	User	Group2
Group1	Global group	None
Group2	Domain local group	None
Computer1	Computer	Group1
Computer2	Computer	Group1

Computer1 contains the shared folders shown in the following table.

Name	NTFS permission	Share permission	Folder enumeration mode
Share1	Group1: Write	Group1: Full control	Access-based
Share2\$	Group2: Full control	Group2: Read	Unrestricted

The computers have the network configurations shown in the following table.

Name	Network Discovery	Windows Defender Firewall
Computer1	On	Incoming connections: Block all connections to apps that are not on the list of allowed apps
Computer2	Off	Incoming connections: Block all connections to apps that are not on the list of allowed apps

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Share1 is listed if User1 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share1 is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share2\$ is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible.

Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

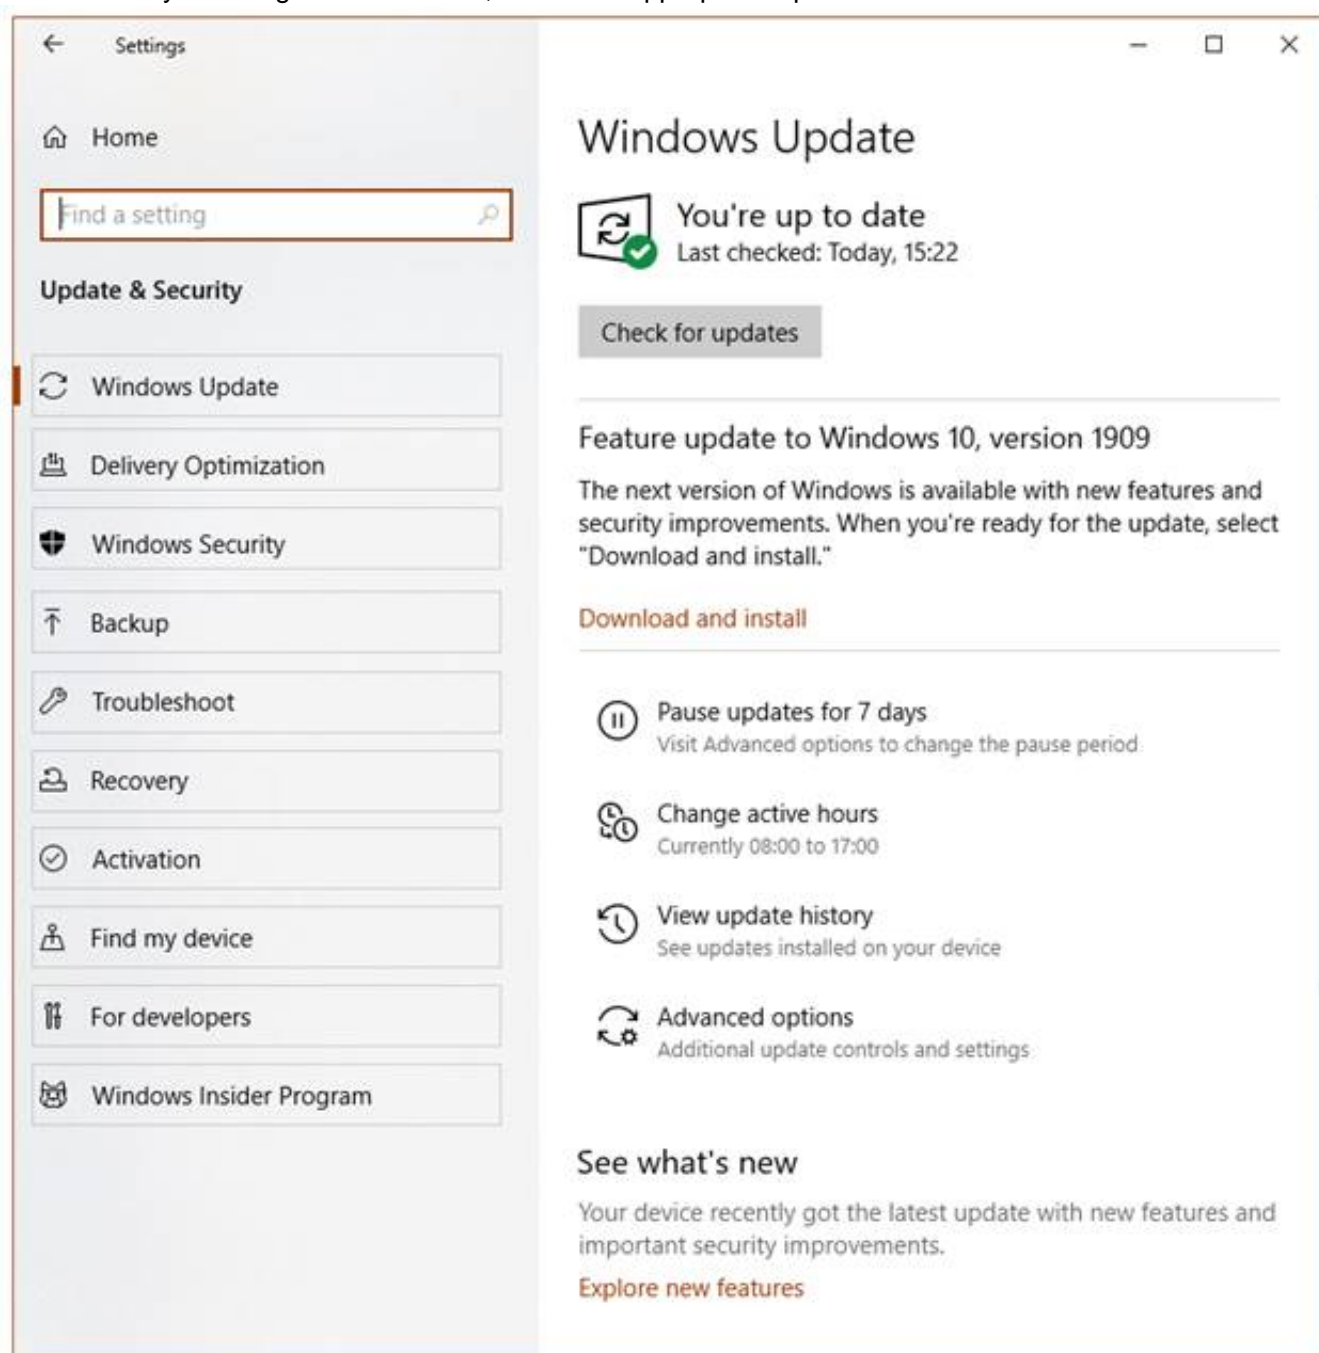

**NEW QUESTION 206**

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

#### NEW QUESTION 208

- (Exam Topic 4)

You have Windows 10 devices that use custom device drivers.

You need to test new builds of Windows before the builds are made available to the general public. The solution must ensure that the builds are installed as soon as possible.

Which Windows readiness level should you configure?

- A. Preview Build - Slow
- B. Semi-Annual Channel
- C. Release Preview
- D. Preview Build - Fast

**Answer:** D

#### NEW QUESTION 213

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has an application named App1. You need to use Performance Monitor to collect data about the processor utilization of App1. Which performance object should you monitor?

- A. Process
- B. Processor Performance
- C. Processor Information
- D. Processor

**Answer:** A

#### Explanation:

References:

[https://www.cse.wustl.edu/~jain/cse567-06/ftp/os\\_monitors/index.html](https://www.cse.wustl.edu/~jain/cse567-06/ftp/os_monitors/index.html)

#### NEW QUESTION 218

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set the network connections as metered connections.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

#### NEW QUESTION 221

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From PowerShell
- B. run the Gec-GPO cmdlet.
- C. From PowerShell
- D. run the Gec-GPOReport cmdlet.
- E. From Microsoft Edge, open edge://policy.
- F. From the Start menu, select Group Policy Object Editor

**Answer:** C

#### Explanation:

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.

To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.

#### NEW QUESTION 226

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
- B. From the Settings app, modify the Background settings.

- C. From the local Group Policy Editor
- D. modify the Desktop settings.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

**Answer:** B

#### NEW QUESTION 228

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user.

The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

## Activation

### Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

### Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run slmgr /ltc.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run slmgr /ato.

**Answer:** A

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

#### NEW QUESTION 233

- (Exam Topic 4)

You have a computer that runs Windows 10. You use the computer to test new Windows features. You need to configure the computer to receive preview builds of Windows 10 as soon as possible. What should you configure from Update & Security in the Settings app?

- A. Windows Insider Program
- B. Windows Update
- C. Delivery Optimization
- D. For developer

**Answer:** A

#### Explanation:

Reference:

<https://insider.windows.com/en-us/getting-started/>

#### NEW QUESTION 235

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.  
Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.  
Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

**NEW QUESTION 237**

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.
- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

**Answer: B**

**Explanation:**

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

**NEW QUESTION 241**

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts.

Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

**Answer: D**

**Explanation:**

References:

<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

**NEW QUESTION 245**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Use Microsoft Deployment Toolkit (MDT) instead.

**NEW QUESTION 248**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover a known compatibility issue between a feature update and a device driver on the computers. You need to test the installation of the feature update on a test computer.

Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Automatic Updates detection frequency

- B. Disable safeguards for Feature Updates
- C. Select the target Feature Update version
- D. Reschedule Automatic Updates scheduled installations

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/safeguard-opt-out>

#### NEW QUESTION 251

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Computer1 initiates communication to Computer2, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>
Computer2 can establish communications to Computer3.	<input type="radio"/>	<input type="radio"/>
If Computer3 initiates communication to Computer1, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications.

Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

#### NEW QUESTION 256

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You restart Computer1 by using Advanced startup and select Boot log.

In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

**Answer:** B

**Explanation:**

Reference:

<https://winaero.com/enable-boot-log-windows-10/>

#### NEW QUESTION 260

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History.

Does this meet the goal?

A. Yes

B. No

**Answer: A**

**Explanation:**

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

**NEW QUESTION 261**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You set up Backup and Restore (Windows 7) and include Folder1 in the backup. Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

**NEW QUESTION 264**

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.

B. Enable the Windows Firewall: Allow inbound remote administration exception setting.

C. Enable the Allow remote server management through WinRM setting.

D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.

E. Enable the Allow Remote Shell access setting.

F. Set the Startup Type of the Remote Registry service to Automatic.

**Answer: ABC**

**Explanation:**

References:

<https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P>

**NEW QUESTION 266**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the properties of the Wi-Fi adapter, you disable Link-Layer Topology Discovery Responder. Does this meet the goal?

A. Yes

B. No

**Answer: B**

**NEW QUESTION 267**

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

A. slmgr /upk

B. Sec-RDLicenseConfiguration -Force

C. Sec-MsolLicense -AddLicense  
D. slmgr /ato

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

#### NEW QUESTION 272

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has Windows Assessment and Deployment Kit (Windows ADK) installed.

Computer1 has the drives shown in the following table.

Letter	Description
C	Operating system
D	Data drive
E	DVD drive that contains the Windows 10 installation files

You need to create Windows 10 unattended answer file. What should you do first?

- A. From File Explorer, copy Install.wim from drive E to drive D.
- B. From Windows System Image Manager, select Select Windows Image, and then select Install.wim from drive E.
- C. From Windows System Image Manager, select Select Windows Image, and then select Boot.wim from drive E.
- D. From File Explorer, copy Boot.wim from drive E to drive D.

**Answer:** A

**Explanation:**

References:

<https://www.windowscentral.com/how-create-unattended-media-do-automated-installation-windows-10>

#### NEW QUESTION 274

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From PowerShell, you run `$env:Path += ";d:\scripts"`. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

[https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about\\_environment\\_varia](https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about_environment_varia)

#### NEW QUESTION 275

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account.

User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials.

Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>
