You create a user-owned custom entity by using Common Data Service.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.

Box 2: Yes

By combining conditions and actions, you can do any of the following with business rules:

- Set field values Clear field values
- Set field requirement levels Show or hide fields
- Enable or disable fields
- Validate data and show error messages
- Create business recommendations based on business intelligence.

NEW QUESTION 2

HOTSPOT - (Topic 1)

You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365. For each of the following statements, select Yes if the statement is true.

Otherwise, select

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Flow

Microsoft Flow, now called Power Automate, is cloud-based software that allows employees to create and automate workflows and tasks across multiple applications and services without help from developers.

Box 2: Power Apps

PowerApps is a suite of apps, services, connectors and data platform that provides a rapid application development environment to build custom apps for your business needs.

Box 3: Power BI

Power BI is a business analytics solution that lets you visualize your data and share insights across your organization, or embed them in your app or website. Connect to hundreds of data sources and bring your data to life with live dashboards and reports.

NEW QUESTION 10

- (Topic 2)

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker. What should you recommend?

- A. Create a custom connector.

- B. Ask the outside source to send you the data once a week.
- C. Use Microsoft Flow to connect to the database.
- D. Open a ticket with Microsoft and request a new connector.
- E. Use Microsoft Azure Service Bus.

Answer: A

Explanation:

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.

Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

NEW QUESTION 17

- (Topic 3)

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.

You need to share the Power BI dashboard with coworkers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Publish the dashboard as an app to your coworkers.
- C. Export the data into Common Data Service for others to manipulate in Power BI.
- D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment. Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive. Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 39

DRAG DROP - (Topic 3)

A company plans to create an information portal that managers can use to view critical information about their teams. You need to recommend the type of Power BI components that the company should use. What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE. Each correct selection is worth one point.

Component types	Requirement	Component type
Dashboard	Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Component type
Report	Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Component type
	Display Sales charts that can be filtered by region.	Component type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Report

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

NEW QUESTION 67

- (Topic 5)

Users within a company use Flow for personal productivity.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Export
- B. Rename
- C. Save As
- D. Share

Answer: AC

Explanation:

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

Here's how:

NEW QUESTION 70

HOTSPOT - (Topic 5)

A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts.

The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Create an approval workflow.	<ul style="list-style-type: none"> Dynamics 365 Workflow Notifications Microsoft Outlook Integration AI Builder Microsoft Flow
Connect to report data.	<ul style="list-style-type: none"> Common Data Service and Power BI Third-party from AppSource Custom Code flat file integration Dynamics 365 Field Service

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dynamics 365 Workflow notifications

You can configure the system to send email messages to users when workflow-related events occur.

Note:

? Go to Navigation pane > Modules > System administration > Users > Users.

? In the list, find and select the desired record.

? On the Action pane, click User options.

? Click the Workflow tab. Make sure that the Notifications section is expanded. In the Notifications section, you can specify how you want the user to be notified about workflow-related events.

Box 2: Dynamics 365 Field Service

Supply Chain Management enables synchronization of business processes between Dynamics 365 Supply Chain Management and Dynamics 365 Field Service. The integration scenarios are configured by using extensible Data integrator templates and Common Data Service to enable the synchronization of business processes. Standard templates can be used to create custom integration projects, where additional standard and custom fields and entities can be mapped to adjust the integration and meet specific business needs.

NEW QUESTION 75

DRAG DROP - (Topic 5)

You plan to use Microsoft Flow to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Flow components to use for the solution.

To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page. Enter the resulting posts into the product database. Combine author and link fields into a single field. Run flow every hour.	Component
expression		Component
service		Component
trigger		Component
flow type		Component

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Trigger

A trigger is something that triggers or starts the workflow. It could be a new file uploaded to a document library, a new item created in the list or an email sent to your Inbox –

something that will start (kick-off the workflow).

There are two types of triggers:

? Automatic trigger is pre-programmed into the workflow based on a certain rule (i.e. new document or item created, email sent, etc.)

? Manual Trigger is a trigger initiated by a user. Unlike with automatic trigger above, the workflow will only start when initiated manually by the end user (for example, from the Document Library for a selected file). Manual trigger is only supported for certain types of workflows (i.e. Get feedback from your manager for the selected file)

Box 2: action

An action is something that occurs as a result of the workflow.

Box 3: expression

Sometimes users just need to do basic operations like getting the current time, adding numbers together, or replacing a part of a string of text. That's possible inline in any flow action. Microsoft Flow leverages the same Workflow Definition Language used by Azure Logic apps. For new users who are unfamiliar with the expression language, there is an inline help experience that shows how to use each expression as they build out their flow.

Box 4: flow type

There are four different Flow types that you can choose from when starting out. You can create a scheduled flow, automated flow, instant flow, or a business process flow.

NEW QUESTION 79

HOTSPOT - (Topic 5)

A company plans to create a workflow that periodically runs a Dynamics 365 action based on data in third-party cloud-based solutions.

NEW QUESTION 88

- (Topic 5)

A company uses Dynamics 365 Supply Chain Management.

When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.

You need to implement the functionality to create Outlook tasks.

Which two features should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. Power Apps
- C. Business Events
- D. Microsoft Flow
- E. Common Data Service

Answer: C

Explanation:

Business events in Microsoft Power Automate

Business events can be consumed in Microsoft Power Automate via the application connector. The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.

You are a sales manager for a large retail organization.

You are creating a Power Apps app that will display customer product purchase information from your old point-of-sale (POS) system and need to link those sales to the customer accounts and product sales in Dynamics 365 Commerce.

You need to use the appropriate component. What should you use?

- A. business process flow
- B. business rule
- C. Microsoft Dataverse
- D. entity metadata

Answer: C

NEW QUESTION 119

HOTSPOT - (Topic 7)

You are authoring a Power Virtual Agents bot for a company that sells flowers and shrubs.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can use the prebuilt Postal Code entity to recommend plants that will work within a customer's growing zone.	<input type="radio"/>	<input type="radio"/>
You can create a custom entity to offer color and plant choices for landscaping options that can be made available for customer orders.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

Chatbots built with Power Virtual Agents will understand and display content that's locally relevant to the user. Localized handling and formatting are based on the user's browser locale setting, and include the following elements within a chat conversation:

- ? Date and time
- ? Numbers
- ? ZIP or postal code
- ? Currency
- ? Speed

Box 2: Yes Custom entities:

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

For instance, let's say you want to build a bot for an outdoor store. In this case, you'll need to teach the bot to acknowledge the "outdoor gears product" category in a dialog.

NEW QUESTION 121

- (Topic 7)

A company uses a custom-built system to record financial data that runs on a manager's machine.

The system does not have an API. New customer details must be manually entered into the system by the manager from a central spreadsheet. The user interface of the system contains the complex business logic that is needed for the manual customer data entry process.

You need to ensure that new customer details can be entered into the system automatically by using Power Automate.

Which type of flow should you create?

- A. business process
- B. desktop
- C. automated cloud
- D. instant cloud

Answer: B

NEW QUESTION 124

DRAG DROP - (Topic 7)

A company creates a new instance of Microsoft Dataverse to store customer information.

You are developing reports for a company.

You must create visualizations that include the following data:

- ? Invoices due from a third-party enterprise resource planning (ERP) system
- ? Number of calls made to the client from Microsoft Dataverse
- ? Microsoft Excel file data

The reports must be displayed in a single page. You need to create the visualizations.

What should you use?

- A. deployment pipelines
- B. tables
- C. columns
- D. dashboards

Answer: D

NEW QUESTION 133

- (Topic 7)

A company is using Power Virtual Agents with Dynamics 365 Customer Service. You create a new topic. The topic performs as expected during testing.

Customers report that the new topic is not visible in the frequently asked questions section of the company's website.

You need to ensure customers can see the new topic. What should you do?

- A. Analyze the chatbot
- B. Paste the link to the website
- C. Publish the topic.

NEW QUESTION 134

DRAG DROP - (Topic 7)

A company is implementing Power BI to track sales.

Each of the company's regions has specific quarterly and yearly sales goals. You need to build a Power BI dashboard for various reporting requirements.

Which chart types should you use? To answer, drag the appropriate chart types to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Donut	Show the quarterly sales total to date in relation to the sales goal.	<input type="text"/>
KPIs	View the sales trend by month of the sales year to date for all regions.	<input type="text"/>
Line chart	View the year-to-date sales as a percentage by region.	<input type="text"/>
Matrix		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: KPIs

A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Box 2: Line chart

Line charts emphasize the overall shape of an entire series of values, usually over time.

Box 3: Donut

Doughnut charts are similar to pie charts. They show the relationship of parts to a whole. The only difference is that the center is blank and allows space for a label or icon.
