

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

<https://www.2passeasy.com/dumps/PL-200/>

NEW QUESTION 1

- (Exam Topic 1)

A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.

You need to determine how to design the chat solution to answer those questions. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
Identify and reference the company event a guest mentions.	<div>▼</div> <div> Load the response into a variable Use smart matching to load an entity into a topic Load the extracted topic into a variable </div>
Identify attributes for snow conditions.	<div>▼</div> <div> Create a custom entity Create a new topic Create a new variable Create an escalation </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface Description automatically generated

Box 1: Load the extracted topic into a variable

Power Virtual Agents uses entities to understand and identify a specific type of information from a user's responses. When saving the identified information to a variable, a variable type will be associated with it. The variable type is analogous with the entity.

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

A topic has trigger phrases – these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue – and conversation nodes – these are what you use to define how a bot should respond and what it should do.

Box 2: Create a custom entity

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 2

- (Exam Topic 1)

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	<div>▼</div> <div> Auto-populate the invitation code field on the sign-in screen from the email link. Embed the invitation code in the email link URL. Send the customer their username and temporary password in the email link. </div>
Validate the user's email.	<div>▼</div> <div> Two-factor authentication Azure Active Directory authentication Social provider sign-in Invitation code sign-up </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Solution
Implement the invitation code redemption process.	<div> <div>Auto-populate the invitation code field on the sign-in screen from the email link.</div> <div>Embed the invitation code in the email link URL.</div> <div>Send the customer their username and temporary password in the email link.</div> </div>
Validate the user's email.	<div> <div>Two-factor authentication</div> <div>Azure Active Directory authentication</div> <div>Social provider sign-in</div> <div>Invitation code sign-up</div> </div>

NEW QUESTION 3

- (Exam Topic 1)

You need to create the FAQ solution content What should you do first?

- A. AI Builder
- B. Suggest topics
- C. Automate
- D. Trigger phrases

Answer: B

Explanation:

You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.

- > Import Suggested Topics from FAQ webpage.
- > Add a topic.
- > Enable the topics Reference:

<https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx>

NEW QUESTION 4

- (Exam Topic 1)

You need to embed the check-in solution into the communication solution. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

What must you use to embed the check-in solution?

Visual Studio

Power Apps Web Studio

AI Builder

Common Data Service

Where must the check-in solution be available within the communication solution?

chat section of the solution

Microsoft 365 Apps selection grid

in an embedded webpage

in a tab

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, Word Description automatically generated

Box 1: Power Apps Web Studio

Scenario: The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.

PowerApps Studio is a browser application used to edit your apps. PowerApps Studio includes a

drag-and-drop canvas in the center of the screen and a screen or object list pane on the left. Properties, Rules, and Advanced Properties for selected screens or controls are displayed in the right pane.

Box 2: in a tab

You can customize the Teams experience by adding Power Apps canvas apps to your channels in Teams using the PowerApps tab.

NEW QUESTION 5

- (Exam Topic 1)

You need to embed the business card solution in the check-in app. What you use?

- A. control
- B. Button control
- C. Custom component
- D. AI Builder component

Answer: D

NEW QUESTION 6

- (Exam Topic 2)

You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Trigger settings

	▼
Set Table name to Qualification and Column filter to statecode.	
Set Table name to Qualification and Column filter to statuscode.	
Set Table name to Service Requests and Column filter to statuscode.	

Logic to complete service requests

	▼
Complete if current record is in Complete status.	
Complete if current record is in Pending Verification status.	
Loop through related qualification records and complete if all are in Complete status.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Set Table table to Qualification and Column filter to statuscode.

Box 2: Loop through related qualification records and complete if all are in Complete status. The new process for completing a service request must automate the following:

Set the Service Request record status to Complete when work on all Qualification records is finished.

Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

NEW QUESTION 7

- (Exam Topic 2)

You need to address the executive's concerns regarding unnecessary data access.

Which security changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

	▼
Assign records to the user doing the verification and change table security to basic.	
Assign records to a service account and share the record with the team member doing the verification.	
Assign records to a service account and add the team member doing the verification by using an access team.	

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

	▼
Assign records to the QV team when the service request is completed.	
Assign records to a service account when the service request is completed.	
Assign records to the team member doing the verification when the service request is completed.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.

When to use access teams

* The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.

* The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.

* A unique set of users requires access to a single record without having an ownership of the record. Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

• When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Reference:

<https://docs.microsoft.com/en-us/power-apps/developer/data-platform/use-access-teams-owner-teams-collaborat>

NEW QUESTION 8

- (Exam Topic 3)

You are a Dynamics 365 administrator for a veterinarian clinic.

On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.

You need to create a dynamically visible field. What should you configure?

- A. field visibility on the form
- B. business process flow
- C. workflow
- D. business rule

Answer: D

Explanation:

References:

<https://www.sherweb.com/blog/dynamics-365/configuring-business-rules-within-microsoft-dynamics-365-crm/>

NEW QUESTION 9

- (Exam Topic 3)

You are designing a desktop user interface (UI) flow. The UI flow automates legacy software.

You need to prepare data for transfer to a Microsoft SharePoint list.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select information to pass to the SharePoint list.	
Copy and paste the text in the output definition window.	
On the Outputs menu of the UI flow, choose Select text on screen .	⬅️ ⬆️
Enter a name and description for the output.	➡️ ⬇️
Start recording the UI flow.	
Stop the recording and save the flow.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/inputs-outputs-desktop#use-outputs-to-extract-inform>

NEW QUESTION 10

- (Exam Topic 3)

A company uses Power Apps with Microsoft Dataverse.

The company enables auditing on the Dataverse database. The company tenant reaches the maximum storage capacity.

You need to delete some auditing data.

Which three deletion options should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. by table
- B. by record
- C. between two specified dates
- D. by column
- E. older than a specified date

Answer: BCE

NEW QUESTION 10

- (Exam Topic 3)

You create a Power Virtual Agents chatbot to reduce the number of incoming support calls that require a live person.

The chatbot does not direct users to the correct information. You determine that this is because the chatbot is not able to identify which product a user is referring to in a conversation.

You need to present a list of products so that users can select the correct product. What should you create?

- A. Table
- B. Variable
- C. Slot filling
- D. Entity

Answer: C

Explanation:

Slot filling is a natural language understanding concept that means saving an extracted entity to an object. However, in Power Virtual Agents, slot filling means placing the extracted entity value into a variable.

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 13

- (Exam Topic 3)

You create and publish a Power BI report that contains an embedded canvas app. The report will be used by multiple people.

The canvas app has an issue that must be corrected. You update the canvas app.

You need to ensure that the updated canvas app is available in the published Power BI report. What should you do?

- A. Publish the Power BI report from Power BI Desktop.
- B. Manually refresh the data source on the published Power BI report.
- C. Publish the Power BI report from Power BI Desktop and reshare to any users.
- D. Publish the canvas app.

Answer: B

Explanation:

➤ If you change the data fields associated with the visual, you must edit the app from within the Power BI service by selecting the ellipsis (...) and then selecting Edit. Otherwise, the changes won't be propagated to Power Apps, and the app will behave in unexpected ways.

➤ The Power Apps visual can't trigger a refresh of Power BI reports and Power BI data sources from within Power BI Desktop. If you write back data from the app to the same data source as the report, your changes won't be reflected immediately in Power BI Desktop. Changes are reflected on the next scheduled refresh.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual#limitations-of-the-po>

NEW QUESTION 16

- (Exam Topic 3)

You ate a Dynamics 365 help desk administrator

You need to create a dashboard that displays information on help desk cases that ate handled each week. Which dashboard components should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Component type

Add a tag chart by using opened cases.

System chart
Personal chart
Area chart

Add a stacked column chart shared with your team.

System chart
Personal chart
Area chart

Add a Microsoft Power BI visualization.

System chart
Personal chart
Area chart

Add a chart from a view that a user creates.

System chart
Personal chart
Area chart

Add a doughnut chart that shows cases by owner.

System chart
Personal chart
Area chart

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

System Personal Personal
Personal System
<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/basics/add-edit-power-bi-visualizations-da>

NEW QUESTION 21

- (Exam Topic 3)
You create a new solution for a business process.
The business process includes uploading specific file types to a web service.
You need to ensure that the business process works the same way anywhere the solution is deployed. Which option should you use? To answer, drag the appropriate options to the correct configurations. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Options

Connection reference

Environment variable

Solution system settings

Answer Area

Configuration

Blocked file types

URL to a web service

Option

Option

Option

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Solution system settings
For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.
Box 2: Environment variable
When should Environment variables be used? Some examples include:
When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.
If you're building a solution where your customer is required to provide an input value. Application setup pages.
Incorrect:
A connection reference is a solution component that contains information about a connector. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/advanced-navigation> <https://powerapps.microsoft.com/en-us/blog/environment-variables-available-in-preview/>

NEW QUESTION 24

- (Exam Topic 3)
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable Outlook integration
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead enable server-based SharePoint integration. Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/set-up-dynamics-365-online-to-use-sharepoint-online>

NEW QUESTION 25

- (Exam Topic 3)
You are configuring Microsoft Dataverse security. You plan to assign users to teams. Record ownership and permissions will differ based on business requirements.
You need to determine which team types meet the requirements.

Which team type should you use? To answer, drag the appropriate team types to the correct requirements. Each team type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Team types		Requirement	Team Type
Access team		Ability to own records in Dataverse	
Azure Active Directory group team		Provides permissions without a security role assigned	
Microsoft Teams team			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Teams team

Dataverse supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the table is created and can't be changed. For security purposes, records that are organization owned, the only access level choices is either the user can do the operation or can't. For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

Box 2: Access team

An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams in which they are members. The records are shared with an access team and the team is granted access rights on the records, such as Read, Write or Append.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/use-access-teams-owner-teams-collaborate>

NEW QUESTION 27

- (Exam Topic 3)

You create a report by using Power BI Desktop and a Power BI dataset that is connected to Azure SQL Database.

Multiple groups of employees will use the report.

You need to ensure that each group of employees can see only data that pertains to their group. What should you do?

- A. Create and assign file security profiles.
- B. Create and assign Common Data Service security roles.
- C. Create and assign roles by using row-level security.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION 32

- (Exam Topic 3)

You are creating a business process flow for a Power Apps app. The business process flow must meet the following requirements:

- Must be available offline.
- Send an email to the team when a record is created. You need to set up business process flow.

What should you do? To answer, select the appropriate options in the answer area. Each correct selection is worth one point

Requirement	Configuration
Make it available offline.	<input type="checkbox"/> Ensure that the business process flow is referencing one table. <input type="checkbox"/> Ensure that the business process flow is referencing two tables. <input type="checkbox"/> Ensure that the business process flow is referencing one table per stage.
Send an email to the team.	<input type="checkbox"/> Create a step. <input type="checkbox"/> Create a stage. <input type="checkbox"/> Create a required column.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 36

- (Exam Topic 3)

You have a canvas app.

The canvas app must store data in a variable that is available only to the current screen. You need to create the variable.

Which two functions should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Navigate
- B. UpdateContext
- C. Set
- D. Collect
- E. SaveData

Answer: AB

NEW QUESTION 37

- (Exam Topic 3)

A veterinary office plans to use Microsoft Power Platform to streamline customer experiences. The customer creates a canvas apps to manage appointments.

On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, a text field must appear so that staff members can add details about the pet.

You need to create a dynamically visible field. What should you configure?

- A. business rule
- B. business process flow
- C. workflow

Answer: A

NEW QUESTION 41

- (Exam Topic 3)

You create a Power Virtual Agents bot.

You observe that the bot is not able to recognize input from some users. You need to configure the bot response for unrecognized input from users.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Transfer to an agent.
- B. Use a fallback topic.
- C. Display a system-defined error message.
- D. Connect to a different channel.

Answer: BC

NEW QUESTION 42

- (Exam Topic 3)

A company uses a model-driven app for customer support. The company has the following requirements for the app:

- Send an email in real-time to customers when they enter their email address.
- Send an email to customers at the same time every day for cases that are open for more than 24 hours. The solution should require the least amount of customization.

Components

Power Apps component framework (PCF) control

Classic workflow

Power Automate flow

JavaScript

Answer Area

Requirement

Send email to customer when email address entered.

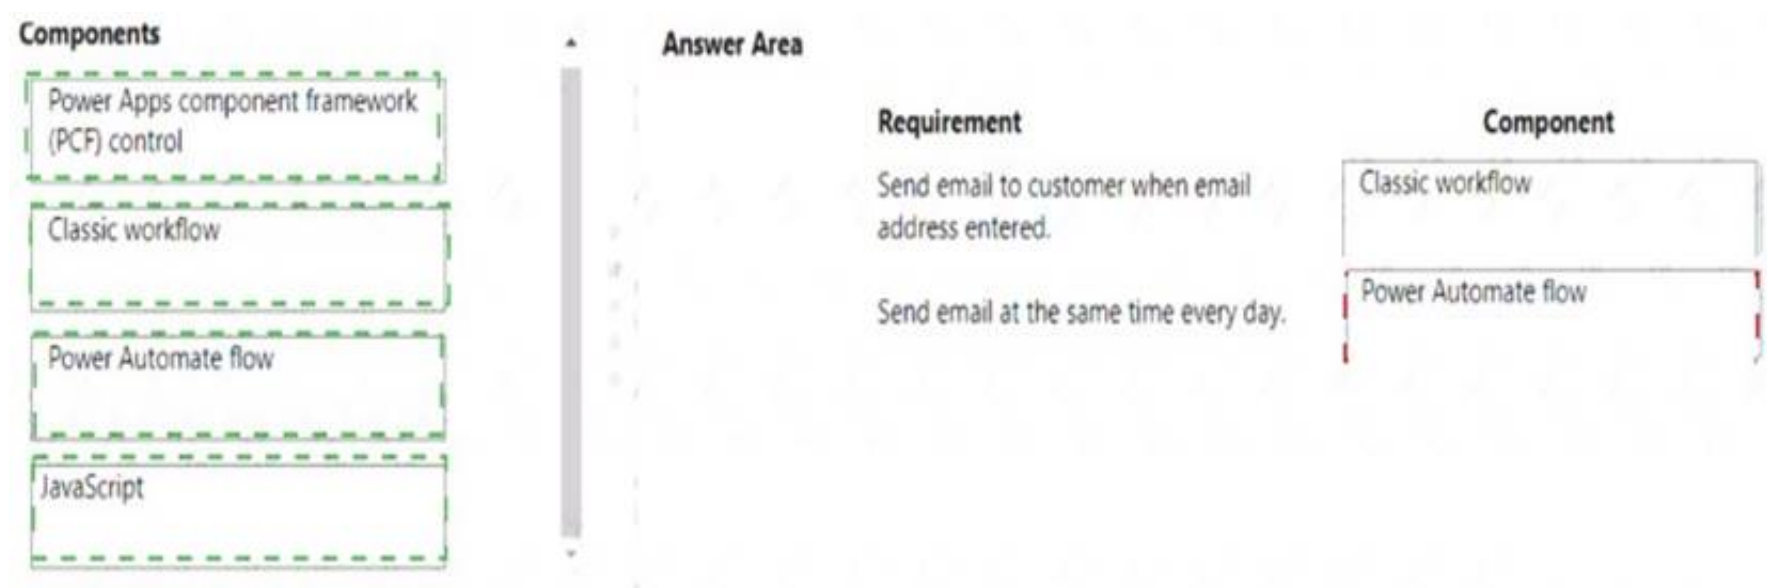

Send email at the same time every day.

Component

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 43

- (Exam Topic 3)

You are a Dynamics Sales administrator for a car dealership. The dealership uses only out-of-the-box functionality. When a new car is sold, the salesperson uses a Word template to generate a letter from the quote to thank the customer. You need to determine if you can revise the template. Which Word template change can you make?

- A. Add the Discount field conditionally.
- B. Format the table to have alternating color rows.
- C. Format the Created On field to a long date format.
- D. Add the address of the customer.D18912E1457D5D1DDCBD40AB3BF70D5D

Answer: D

NEW QUESTION 45

- (Exam Topic 3)

You create workflows to automate business processes. You need to create a workflow that automatically sends emails based on a mail merge template. The workflow must contain the following configurations:

- > Run immediately.
- > Validate when a condition is met.
- > Perform an action when a condition is met.

To answer, select the appropriate configuration in the answer area.
NOTE: Each correct selection is worth one point.

Workflow Requirement	Configuration Option
Run immediately.	<div><div></div><div>Approve the workflow.</div><div>Configure the workflow to run now.</div><div>Configure child workflow to run now.</div></div>
Validate when a condition is met.	<div><div></div><div>Publish workflow.</div><div>Subject contains data.</div><div>Trigger when a Power Automate button is pressed.</div></div>
Perform an action when a condition is met.	<div><div></div><div>Send an email.</div><div>View chart.</div><div>Update a security role.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 47

- (Exam Topic 3)

A company plans to implement chatbots by using Power Virtual Agents. The company has the following requirements for the bots:

- Users in the accounting department must be able to create a bot for frequently asked questions.
- The support desk users must be able to use the bot.

The users must not be able to change environment parameters in the Microsoft Power Platform environment.
You need to configure the permissions for the bots.
Which actions should you implement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement

Users can create a bot.

Action

Assign users the Maker permissions.

Assign users to a security role.

Share the bot with a security group.

Assign users the Maker permissions.

Assign users the System Administrator role.

Requirement

Support desk users can use the bot.

Action

Share the bot with a security group.

Assign users to a security role.

Share the bot with a security group.

Assign users the Maker permissions.

Assign users the System Administrator role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement

Users can create a bot.

Action

Assign users the Maker permissions.

Assign users to a security role.

Share the bot with a security group.

Assign users the Maker permissions.

Assign users the System Administrator role.

Requirement

Support desk users can use the bot.

Action

Share the bot with a security group.

Assign users to a security role.

Share the bot with a security group.

Assign users the Maker permissions.

Assign users the System Administrator role.

NEW QUESTION 52

- (Exam Topic 3)
You are a Dynamics 365 Customer Service administrator.
Users report that the main form does not display data from other entities or allow them to edit data from other entities.
You need to embed information from other entities in the form and allow users to edit the data. Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement

Edit data

Action

Add a mobile form

Add a quick create form

Add a sub-grid

Add a virtual entity

Requirement

View data

Action

Add a reference panel

Add a quick view

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated
Box 1: Add a quick create form
With quick create forms, your app can have a streamlined data entry experience with full support for logic defined by form scripts and business rules.

Box 2: Add a quick view

A quick view form can be added to another form as a quick view control. It provides a template to view information about a related entity record within a form for another entity record. This means your app users do not need to navigate to a different record to see the information needed to do their work.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-quick-create-forms> <https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/create-edit-quick-v>

NEW QUESTION 53

- (Exam Topic 3)

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots. Where should you store the model data?

- A. Global variables
- B. Custom entities
- C. Topics
- D. Multiple choice options

Answer: A

NEW QUESTION 54

- (Exam Topic 3)

A company uses a canvas app to manage production resources in a specific region. Employees must be at company locations to use the app.

Due to a sudden requirement for employees to work remotely, employees no longer commute to a specific location to conduct their work and cannot access the canvas app.

You must reconfigure the app to ensure that employees only access the app from a limited number of locations.

You need to restrict access to the app.

Which components should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Component

Ensure that employees can only access the app from a specific region

	▼
Canvas app settings	
Power Platform admin center	
Azure Active Directory	
Office 365 admin center	

Specify the locations where a user can access the app

	▼
Security role	
Conditional Access policy	
Local Security policy	
Compliance policy	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/restrict-access-online-trusted-ip-rules>

NEW QUESTION 56

- (Exam Topic 3)

You create a canvas app for a sales team. The app has an embedded Power BI tile that shows year-to-date sales. Sales users do not have access to the data source that the tile uses.

Sales team users must be able to see data in the Power BI tile. You must minimize the level of permissions that you grant and minimize administrative overhead.

You need to share another Power BI component to make the data visible. What should you share?

- A. The Power BI dataset the tile uses as a data source.
- B. The Power BI workspace that includes the tile.
- C. The Power BI dashboard that includes the tile.

Answer: C

Explanation:

Once shared, the PowerApps app will be accessible by all users who have permissions to access the app. However, in order to make the Power BI content visible to those users, the dashboard where the tile comes from needs to be shared with the user on Power BI. This ensures that Power BI sharing permissions are respected when Power BI content is accessed in an app.

Reference:

<https://powerapps.microsoft.com/en-us/blog/power-bi-tile-in-powerapps/>

NEW QUESTION 58

- (Exam Topic 3)

You create functionality for a company. The functionality includes a Microsoft Dataverse table with a form for data entry. The functionality will be distributed to other lines of business in the company, each with its own Dataverse environment. New forms must not be created in order for updates to the functionality to work correctly. You need to package the new functionality for distribution. What should you do?

- A. Use a patch solution and disable the ability to create new forms for the table.
- B. Use a managed solution and include only the needed form.
- C. Use an unmanaged solution and include only the needed form.
- D. Use a managed solution and disable the ability to create new forms for the table.

Answer: B

Explanation:

Managed solutions are used to deploy to any environment that isn't a development environment for that solution. This includes test, UAT, SIT, and production environments. Managed solutions can be serviced independently from other managed solutions in an environment. As an ALM best practice, managed solutions should be generated by exporting an unmanaged solution as managed and considered a build artifact. Additionally: You can't edit components directly within a managed solution. Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm>

NEW QUESTION 59

- (Exam Topic 3)

You are creating a Power Virtual Agents chatbot that uses multiple topics. Each user interaction can reference more than one topic. You need to be able to capture a value in an initial topic and use it in subsequent topics. Which type of variable should you create?

- A. Bot
- B. Topic
- C. Context

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION 64

- (Exam Topic 3)

A company has a canvas app that includes the following screens: Screen1 and Screen2. The OnVisible property for Screen1 contains the following expression. Set(AgeGroups, ["1-25", "26-54", "55+"]) For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input type="radio"/>
You can use the Update function to change values in AgeGroups.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input checked="" type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input checked="" type="radio"/>
You can use the Update function to change values in AgeGroups.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 69

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app. You need to ensure that sales team members can access the app. Where should you configure app permissions?

- A. Security Roles
- B. Manage Roles
- C. Dynamics administration center
- D. Dynamics 365 home

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-r> Manage access to apps by using security roles. You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.
* 1. Go to Settings > My Apps.
* 2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
* 3. Enter the following in the Manage Roles dialog box:
a) App URL Suffix
b) Roles
c) Select Save.
* 4. Refresh the My Apps page.
* 5. Go to the Apps Being Edited view, and publish the app again. Reference:
<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/manage-access-app>

NEW QUESTION 71

- (Exam Topic 3)
You implement an editable grid for the Account entity.
The business team provides the following list of features that they would like you to implement:

- > Group by or sort columns in the current view.
- > Configure a business rule to show an error message.
- > Edit values in calculated fields.
- > Edit the Address composite field.
- > Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	<div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div>Yes</div><div>No</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	<div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div>Yes</div><div>No</div></div>

NEW QUESTION 72

- (Exam Topic 3)

A company creates a Microsoft Power Apps app through the Power Apps designer portal for use in Microsoft Teams. This app needs to be promoted to the user acceptance testing environment. You need to complete the Microsoft recommended actions before you export the solution. Which two actions should you complete? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Write validation tests.
- B. Set the Optimized embedding appearance field to true.
- C. Publish all changes.
- D. Run the solution checker.
- E. Clone a solution.

Answer: DE

Explanation:

The Power Apps solution checker performs a rich static analysis check on your solutions against a set of best practice rules to quickly identify problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.

The solution checker analyzes these solution components: Common Data Service plug-ins
Common Data Service custom workflow activities
Common Data Service web resources (HTML and JavaScript) Common Data Service configurations, such as SDK message steps
Reference: <https://www.eimagine.com/ui/>

NEW QUESTION 74

- (Exam Topic 3)

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete. The changes must meet the following requirements:

- Must be clearly identified so that they are not confused with system components and components from other solutions.
- Must not affect any existing components in the test environment. You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a new unmanaged solution and select the correct publisher.

Create a new publisher.

Select a managed solution and add the correct publisher.

Add the table with all components to the solution.

Choose an existing publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Answer area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Create a new publisher Solution publisher
Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.
Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution
Unmanaged solutions are used in development environments while you make changes to your application. Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be

considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table top the solution and add the new column. Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.

Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm> <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/use-powerapps-checker>

NEW QUESTION 75

- (Exam Topic 3)

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design. You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable the lock orientation setting.
- B. Configure the height and width properties by using a formula.
- C. Disable the Scale to fit setting.
- D. Configure the height and width properties by using drag handles.

Answer: BC

NEW QUESTION 77

- (Exam Topic 3)

The sales manager receives a list of leads from a partner company monthly. The field names that are provided do not match the fields in Dynamics 365. A data map does not exist.

You need to import the leads without changing the data from the partner company. What should you do?

- A. Create a data map in Data Management.
- B. Add a template for Import Data.
- C. Use Import Field Translations.
- D. Create a data map on the first import by using the Import Data wizard.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/basics/import-accounts-leads>

NEW QUESTION 81

- (Exam Topic 3)

You are embedding a Power Apps visual in a Power BI dashboard. External customers must authenticate to have access to the dashboard. You need to configure the solution.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the Power BI service to authenticate users.
- B. Use a table in the Power BI dashboard.
- C. Publish to Power BI Report Server.
- D. Set the Power BI service to allow anonymous access.
- E. Share the Power Apps visual components with external users.

Answer: AE

Explanation:

Power BI uses Azure Active Directory (AAD) to authenticate users who sign in to the Power BI service, and in turn, uses the Power BI login credentials whenever a user attempts to access resources that require authentication. Users sign in to the Power BI service using the email address used to establish their Power BI account; Power BI uses that login email as the effective username, which is passed to resources whenever a user attempts to connect to data. The effective username is then mapped to a User Principal Name (UPN) and resolved to the associated Windows domain account, against which authentication is applied.

Reference: <https://docs.microsoft.com/en-us/power-bi/enterprise/service-admin-power-bi-security>

NEW QUESTION 84

- (Exam Topic 3)

A company creates a Power Automate cloud flow for a Power Apps app.

The cloud flow must send a daily email that contains a list of year-to-date (YTD) totals. You need to configure the flow.

Which feature should you use?

- A. Parallel branch
- B. Loop
- C. Condition
- D. Wait

Answer: C

NEW QUESTION 88

- (Exam Topic 3)

A company creates a Microsoft Teams app that stores data in two tables in a Microsoft Dataverse for Teams environment.

Users require access to the app and the app data. You need to configure access.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Access	Action
Access to the data	Share the data and assign permissions. Assign a permission set for each table in the app. Create a security role and assign permissions by table. Share the data and assign permissions.
Access to the app	Publish the app to a Teams channel. Share with a security group. Share with users. Publish the app to a Teams channel.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Access	Action
Access to the data	Share the data and assign permissions. Assign a permission set for each table in the app. Create a security role and assign permissions by table. Share the data and assign permissions.
Access to the app	Publish the app to a Teams channel. Share with a security group. Share with users. Publish the app to a Teams channel.

NEW QUESTION 91

- (Exam Topic 3)
You plan to create a dataflow to import data into Microsoft Dataverse by using Power Query. The dataflow has the following requirements:

- A table of aggregated data must be created in dataflow storage.
- A unique identifier must be created for the table. You need to configure the dataflow.

Which solutions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Table of aggregated data	Merge query Fact table Merge query Linked entity Computed entity
Unique identifier	Key column Key column Pivot column Alternate key

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Requirement	Solution
Table of aggregated data	Merge query Fact table Merge query Linked entity Computed entity
Unique identifier	Key column Key column Pivot column Alternate key

NEW QUESTION 96

- (Exam Topic 3)
A user needs to create a Power Apps portal app. The user is getting a permission denied error when creating the portal app. You need to configure permissions to create the portal app. Which three permissions should you configure? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. In the Power Platform admin center, ensure that the user account has read-write access.

- B. In Azure Active Directory, assign the Contributor role to the application at the subscription scope.
- C. In Azure Active Directory, ensure that the user has permission to register an app.
- D. In the Power Platform admin center, change the portal app owner to the user.
- E. In the Power Platform admin center, ensure that the user has the System administrator security role.

Answer: ACE

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-common-problems> <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-portal>
<https://docs.microsoft.com/en-us/azure/active-directory/develop/howto-create-service-principal-portal#required>

NEW QUESTION 100

- (Exam Topic 3)

You add a business process flow to the Account table. The flow has three stages. You need to ensure that a workflow can run when a user completes the final stage. Which option should you use?

- A. Start when: Record status changes
- B. Available to run: Run this workflow in the background
- C. Available to run: As an on-demand process
- D. Available to run: As a child process

Answer: C

Explanation:

You can trigger on-demand workflows from inside a business process flow. For example, you can add an on-demand workflow to a business process flow so that an activity, such as a task or email, is created whenever a stage is completed.

Note: A workflow becomes activated based on where you drop the workflow onto the business process flow designer.

On-demand stage processes. When the workflow is dropped onto a business process flow stage, the workflow is triggered on entry or exit of the stage.

Reference:

<https://docs.microsoft.com/en-us/power-automate/bpf-add-on-demand-workflow>

NEW QUESTION 102

- (Exam Topic 3)

You use Power BI Desktop to configure Power BI reports and dashboards.

You need to create a canvas app that displays account information and include the app in a Power BI report. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. Publish the report to the Power BI service.
- B. Connect to Common Data Service from Power BI Desktop.
- C. Connect Common Data Service from Power BI Desktop
- D. Selected required fields from the Accounts table.
- E. From the Power Apps Insert menu, add a Power BI
- F. From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data.

Answer: CDE

NEW QUESTION 107

- (Exam Topic 3)

The business team provides the following list of features that they would like you to implement:

- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.
- Edit the Address composite field.
- Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Group by or sort columns in the current view.	<div>Yes</div> <div>No</div>
Configure a business rule to show an error meessage.	<div>Yes</div> <div>No</div>
Edit values in calculated fields	<div>Yes</div> <div>No</div>
Edit the Address composite field.	<div>Yes</div> <div>No</div>
use the editable grid on mobile phones.	<div>Yes</div> <div>No</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group by or sort columns in the current view.

Configure a business rule to show an error meessage.

Edit values in calculated fields

Edit the Address composite field.

use the editable grid on mobile phones.

NEW QUESTION 112

- (Exam Topic 3)

You are customizing a model-driven app for a company. You create a Theme template to ensure the company logo and colors are properly used within these apps.

The theme must meet the following requirements:

- > Updated to add the logo
- > Downloaded by the makers to create the app

You need to configure the assets. To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations

Edit the theme in System settings and upload a jpg file.

Replace an existing UI item's hexadecimal number.

Upload the theme elements as new web resources.

Use the component library.

Answer Area

Requirement

Update logo.

Change model-driven app colors.

Configuration

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Upload the theme elements as new web resources.

Each type of icon is stored as a web resource. Create a web resource first and then set the icons to use them. Alternatively, you can add the icon by creating a new web resource when you define the table properties.

Box 2: Replace an existing UI item's hexadecimal number. Copy and alter the existing theme

The easiest and quickest way to create a new theme is to clone and alter an existing theme. Then save, preview, and publish it.

- > Sign in to Power Apps, select Settings icon (upper right), and then select Advanced settings.
- > Select Customizations, and then select Themes.
- > Under All themes, select the theme you want to clone, such as the CRM Default Theme. Select Clone on the command bar.
- > Replace an existing UI item's hexadecimal number, such as the Title Text Color, with the hexadecimal value that represents the color you want.

For example, the CRM Default Theme was cloned and changed using mostly varying shades of green color. The following screenshots show the new colors for navigation and highlighting. A custom logo was also added that will appear in the upper left corner of an app.

NEW QUESTION 115

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history. Solution: Change Elisabeth's username in the user record for the app. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 117

- (Exam Topic 3)

You are a Dynamics 365 Customer Service developer. A salesperson creates a chart.

You need to ensure that the chart is available to all users on the team.

Which actions should the salesperson perform? To answer, drag the appropriate actions to the correct users. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

Share the chart with the team.

Assign the chart to each person on the team.

Export the user chart to Microsoft Power BI. Import it as a Power BI visualization.

Export the user chart for import as a user chart.

Export the user chart for import as a system chart.

Answer Area

Action

1

Export the user chart for import as a user chart.

2

Share the chart with the team.

NEW QUESTION 121

- (Exam Topic 3)
You are designing an app for a bank.
You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types

Answer Area

1 : N

N : N

N : 1

Requirement

Relationship type

The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.

Loan applicants can apply for one type of loan per application. Applicants can have more than one application.

Loans must be applied for for a single property.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated
Box 1: N:1
You add a lookup column with a many-to-one relationship.
Box 2: N:N
Box 3: N:1
Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-entity-lookup>

NEW QUESTION 122

- (Exam Topic 3)
You have a business process flow.
You need to update the business process flow while minimizing administrative and maintenance efforts. What should you implement? To answer, drag the appropriate features to the correct requirements. Each

feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION 125

- (Exam Topic 3)

You are developing a canvas app.
You need to apply business rules to the app without writing code.
Which three actions can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Validate data and show error messages.B Enable or disable fields.
- B. Set field requirement levels.
- C. Set field values.
- D. Show or hide fields

Answer: ACD

Explanation:

The following actions are not available on Canvas apps:

- Show or hide columns
- Enable or disable columns
- Create business recommendations based on business intelligence Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

NEW QUESTION 130

- (Exam Topic 3)

You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports. You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Share the Power BI report to all users.
- B. Add the Power BI report to the Site Map dashboards.
- C. Create a PCF file.
- D. Use the native reports in model-driven apps.
- E. Add the Power BI report to a dashboard in the model-driven app.

Answer: BE

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/add-powerbi-visual>

NEW QUESTION 131

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Use multiple choice for Identify in the question and create options that represent of the age groups. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 132

- (Exam Topic 3)

You must create a new entity to support a new feature for an app. Entity data will be transactional and will be associated with business units.

You need to configure entity ownership. Which entity ownership type should you use?

- A. user or team owned
- B. organization-owned
- C. none
- D. business-owned

Answer: A

NEW QUESTION 136

- (Exam Topic 3)

A company has locations in the United States, Brazil, India. and Japan. The company conducts financial transactions in all of these regions.

Financial transactions in Brazil are going to stop, but the office will remain open.

Users must longer be able to create records associated with the Brazilian currency. Historical records must remain intact

You need to configure Microsoft Dataverse to meet the requirement What should you do?

- A. Rename the Brazilian currency.
- B. Delete the Brazilian currency record.
- C. Disable the Brazilian language pack
- D. Deactivate the Brazilian currency record.

Answer: D

Explanation:

You can't delete currencies that are in use by other records; you can only deactivate them. Deactivating currency records doesn't remove the currency information stored in existing records, such as opportunities or orders. However, you won't be able to select the deactivated currency for new transactions.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/manage-transactions-with-multiple-currencies>

NEW QUESTION 141

- (Exam Topic 3)

You are designing a Power Virtual Agents chatbot.

The chatbot must be able to maintain customer information if the conversation topic changes during a dialog. You need to configure variables to store customer name and email address.

Which type of variable should you create?

- A. session
- B. topic
- C. bot
- D. slot

Answer: C

Explanation:

By default, a variable's value can only be used in the topic where this variable gets created. However, you might want the bot to use the same value across topics. This means the bot can remember the necessary context when a conversation spans multiple topics. In some systems, these types of variables are known as global variables. In Power Virtual Agents, these variables are called bot variables, because they apply across the entire bot.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION 145

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Categorized Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 150

- (Exam Topic 3)

A company plans to implement AI Builder to add intelligence to several business processes. Each business process uses different sources and produces different outputs.

You need to determine which AI Builder model types to use.

Which model types should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Recognition requirement

Model type

Identify a person's age in a paragraph when written using the pattern **twenty years old**.

▼

Entity extraction
Text recognition
Key phrase

Identify items and prices from an invoice.

▼

Form processing
Text recognition
Object detection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview> <https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview>

NEW QUESTION 152

- (Exam Topic 3)

You attempt to deactivate several currencies in a Microsoft Dataverse environment. You are not able to deactivate one of the currencies.

You need to determine why you cannot deactivate the currency.

What is the reason?

- A. You are not the currency record owner.
- B. The currency is used by an active business process.
- C. The currency is the base currency.
- D. The currency is used by another record.

Answer: C

Explanation:

NEW QUESTION 157

- (Exam Topic 3)

You are designing a Power Virtual Agents chatbot.

You observe that the environment you plan to use does not appear as an option in the Power Virtual Agents user interface.

You need to ensure that you can create the chatbot in the environment that you want to use.

What should you do?

- A. Create an environment in a supported region.
- B. Convert the environment to a sandbox environment.
- C. Change the region for the environment.

Answer: A

Explanation:

The environment doesn't show up in the drop-down menu of Power Virtual Agents

Your environment might not show up in the drop-down menu due to one of the following:

The environment doesn't have a database created. To resolve this issue, go to admin.powerplatform.com to create a database in your environment.

The environment is created in an unsupported region.

NEW QUESTION 164

- (Exam Topic 3)

A company uses a model-driven app. The app uses a workflow to send email. Emails are sent to new customers that enter an email address for the first time in the app.

Customers report that they do not receive an email after entering an email address. You need to troubleshoot the issue.

In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows the 'Actions' pane on the left with four actions: 'Edit the workflow', 'Review the tab with the process sessions', 'Clear the option to delete the workflow retention jobs', and 'Run the workflow'. To the right is the 'Answer area' with a numbered list (1, 2, 3, 4) and a 'Move' button. The actions are being moved to the answer area in the following order: 1. 'Run the workflow', 2. 'Clear the option to delete the workflow retention jobs', 3. 'Review the tab with the process sessions', and 4. 'Edit the workflow'.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Answer area

1

Edit the workflow.

2

Review the tab with the process sessions.

3

Clear the option to delete the workflow retention jobs.

4

Run the workflow.

NEW QUESTION 166

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable OneDrive for Business.

Does this meet the goal?

- A. Yes
- B. No

Answer: B
