

Microsoft

Exam Questions MD-100

Windows 10

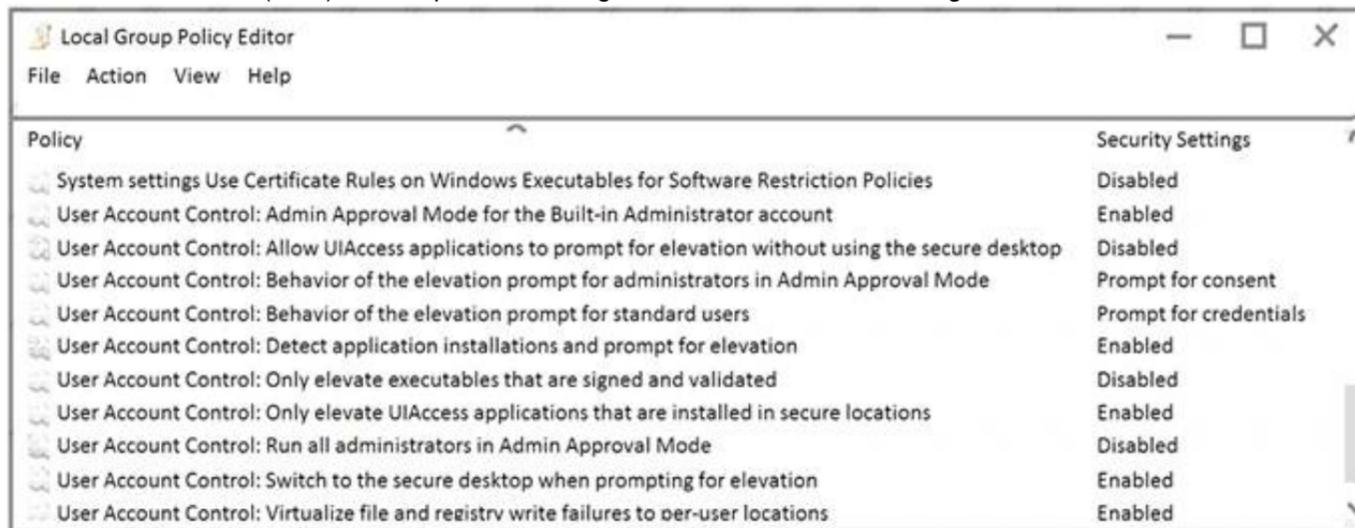

NEW QUESTION 1

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default). When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

NEW QUESTION 2

- (Exam Topic 4)

You are planning a recovery strategy for computers that run Windows 10.

You need to create recovery procedures to roll back feature updates and quality updates.

What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

- Recovery from the Settings app
- Windows Update from the Settings app
- Programs and Features from the Control Panel
- Troubleshoot from the Settings app

To roll back quality updates:

- Recovery from the Settings app
- Windows Update from the Settings app
- Programs and Features from the Control Panel
- Troubleshoot from the Settings app

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.thewindowsclub.com/rollback-uninstall-windows-10-creators-update> <https://www.dummies.com/computers/pcs/undo-windows-update/>

NEW QUESTION 3

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 4

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

▼ /Image:

- Add-WindowsCapability
- Add-WindowsFeature
- Dism.exe
- Setup.exe

▼

- "C:\Mount"
- "C:\Mount\Windows"
- "C:\Windows"
- "D:\Folder1\Image1.wim"

▼ /Add-Package /PackagePath: "E:\x64\lanqpacks\Microsoft-Windows-Client-Language-Pack_x64_fr-fr.cab"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 5

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share. What should you do?

- A. From File Explorer, use Network File and Folder Sharing
- B. Assign the Read permission to Group2.
- C. From File Explorer, use Advanced Sharing
- D. Assign the Read share permission to Group2.
- E. From Control Panel, use Advanced sharing setting
- F. Configure file and printer sharing for the network profile of the domain.
- G. At a command prompt, run the net share Share=C:\Folder1 /grant:adatum\group2, read command.

Answer: D

Explanation:

Reference:

<https://techgenix.com/net-share-command-30/>

NEW QUESTION 6

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to create a Start menu layout file. The solution must meet the following requirements:

- > Contain an app group named Contoso Apps that has several pinned items. Contoso Apps must be locked from user modification.
- > Ensure that users can customize other parts of the Start screen.
- > Minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Actions

- Deploy the start layout.
- Modify the StartLayoutCollection XML element.
- Modify the DefaultLayoutOverride XML element.
- Export the start layout to a file.
- On a reference computer, customize the Start menu.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. On a reference computer, customize the Start menu
- * 2. Export the start layout to a file
- * 3. Modify the DefaultLayoutOverride XML element
- * 4. Deploy the start layout

References:
<https://docs.microsoft.com/en-us/windows/configuration/customize-and-export-start-layout>

NEW QUESTION 7

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 8

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you enable the Remote Event Log Management inbound rule from Windows

Defender Firewall.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

NEW QUESTION 9

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to modify the Security Settings of Computer1 to meet the following requirements:

- > A local group named Branch_Admins must be able to view and clear the Security log.
- > Local users must be prompted to change their password three days before the password expires.

Which two nodes of the Local Group Policy Editor should you access to configure the settings? To answer, select the appropriate nodes in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated
 User Rights Assignment > Manage auditing and security log.
 Security Options > Interactive Logon: Prompt user to change password before expiration: 3 days.

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit privilege use.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Files and folders are objects and are audited through object access, not through privilege use. Reference:
https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.

You turn on System Protection and create a restore point named Point1. You perform the following changes:

➤ Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop. Run a configuration script that adds the following four registry keys:

- Key1 to HKEY_CURRENT_USER
- Key2 to HKEY_CLASSES_ROOT
- Key3 to HKEY_LOCAL_MACHINE\SYSTEM
- Key4 to HKEY_CURRENT_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Removed files:

File2.dll only

File2.dll and File3.sys only

File2.dll, File3.sys, and File4.exe

File1.txt, File2.dll, File3.sys, and File4.exe

Removed keys:

Key1 only

Key1 and Key2 only

Key2, Key3, and Key4 only

Key1, Key2, Key3, and Key4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.maketecheasier.com/what-system-restore-can-and-cannot-do-to-your-windows-system/> <https://superuser.com/questions/343112/what-does-windows-system-restore-exactly-back-up-and-restore>

NEW QUESTION 12

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

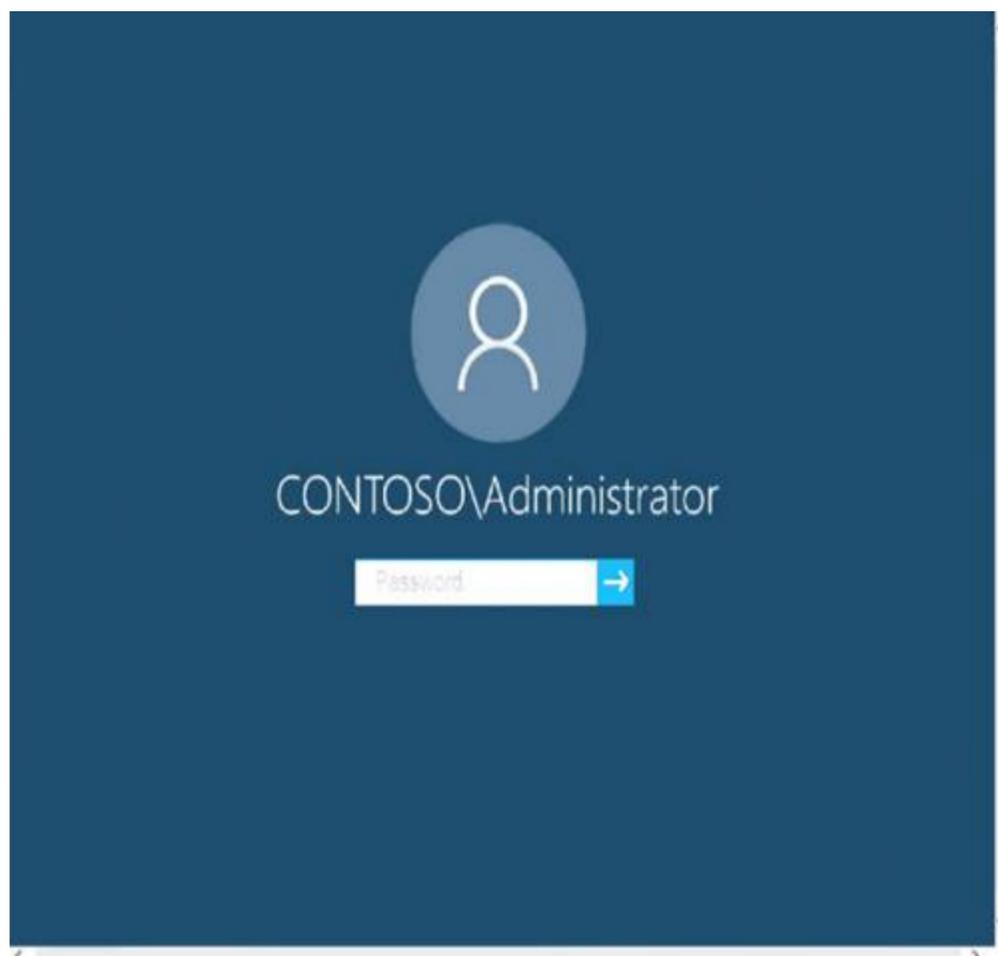

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

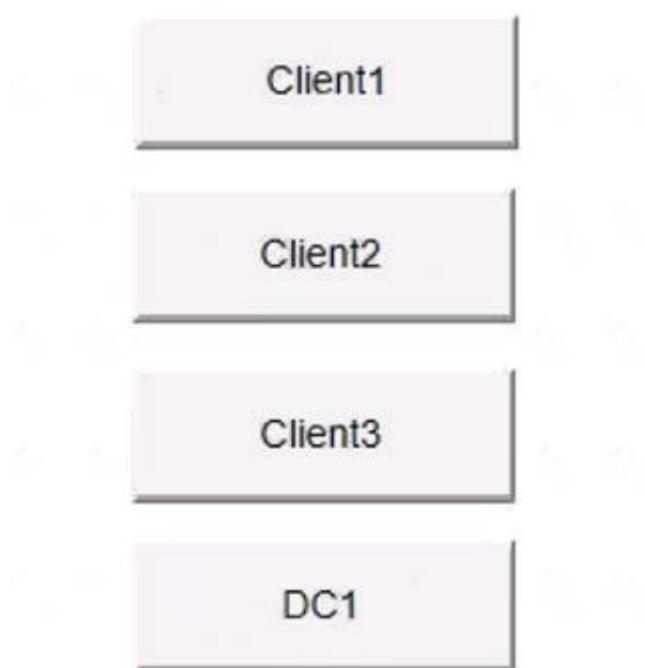

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

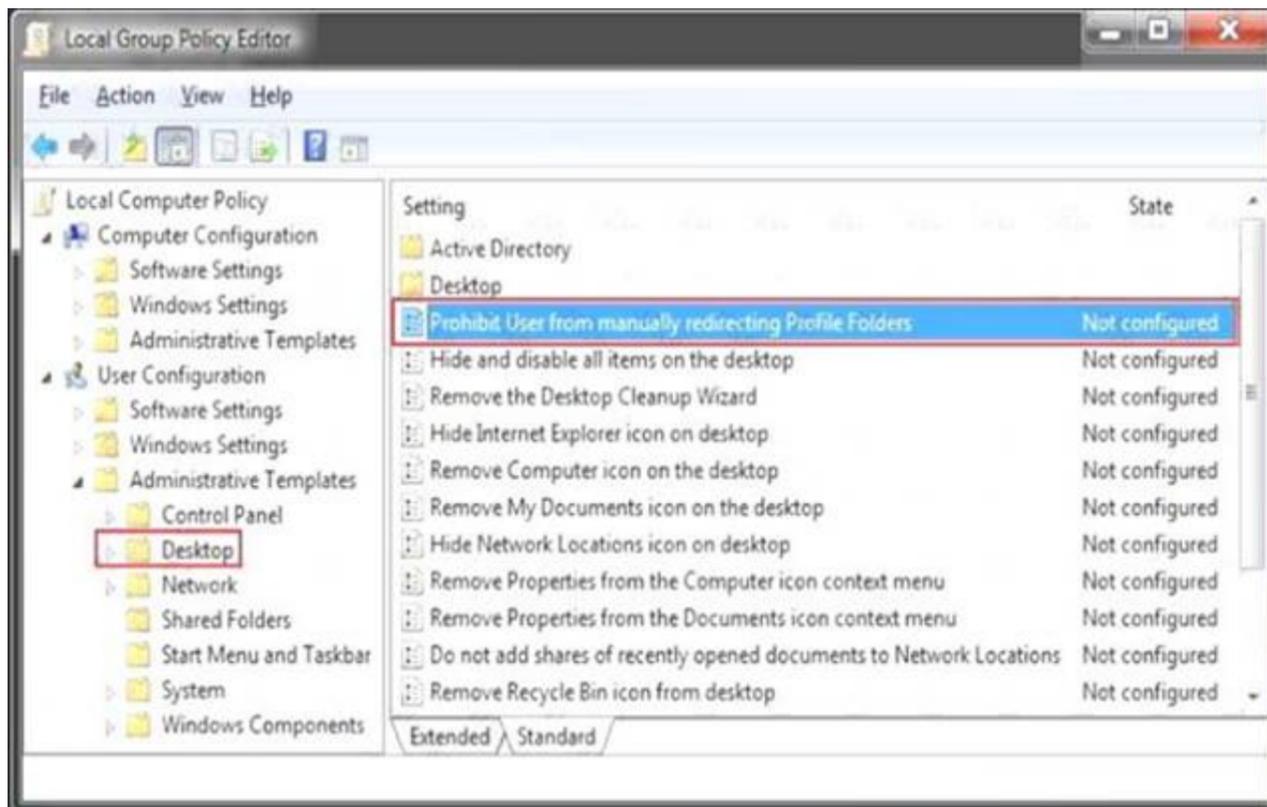

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

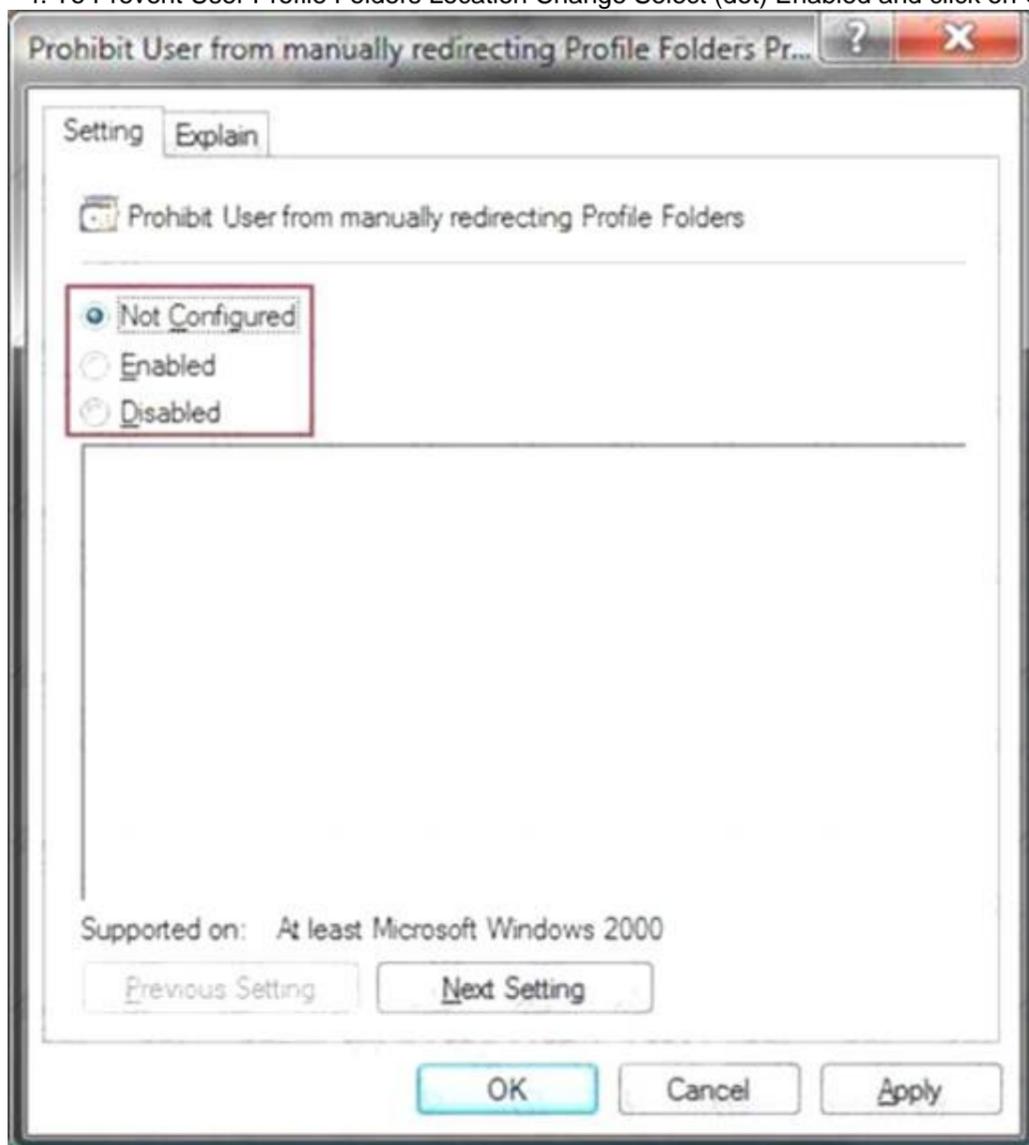

Answer: A

Explanation:

- * 1. Open the Administrator Group Local Group Policy Editor.
- * 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- * 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- * 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

- * 5. Close the Local Group Policy Editor window. References:
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

NEW QUESTION 14

- (Exam Topic 4)

You deploy Windows 10 to a new computer named Computer1. You sign in to Computer1 and create a user named User1.

You create a file named LayoutModification.xml in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder. LayoutModification.xml contains the following markup.

```
<?xml version= "1.0" encoding= "utf-8"?>
<LayoutModificationTemplate
  xmlns= "http://schemas.microsoft.com/Start/2014/LayoutModification"
  xmlns:defaultlayout= "http://schemas.microsoft.com/Start/2014/FullDefaultLayout"
  xmlns:start= "http://schemas.microsoft.com/Start/2014/StartLayout"
  xmlns:taskbar= "http://schemas.microsoft.com/Start/2014/TaskbarLayout"
  Version= "1">
  <CustomTaskbarLayoutCollection>
    <defaultLayout:TaskbarLayout>
      <taskbar:TaskbarPinList>
        <taskbar:DesktopApp DesktopApplicationLinkPath= "%ALLUSERSPROFILE%\Microsoft\Windows
\Start Menu\Programs\Accessories\Paint.lnk" />
      </taskbar: TaskbarPinList>
    </defaultLayout:TaskbarLayout>
  </CustomTaskbarLayoutCollection>
</LayoutModificationTemplate>
```

What is the effect of the configuration? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

When you sign in to Computer1, the taskbar will contain:

▼
Default apps only
Default apps and Microsoft Paint
Microsoft Paint only

When User1 signs in to Computer1, the taskbar will contain:

▼
Default apps only
Default apps and Microsoft Paint
Microsoft Paint only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/configuration/configure-windows-10-taskbar>

NEW QUESTION 17

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10. You need to configure the computers to send the error events in the System log to a computer named Computer1 that runs Windows 10. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Computer1:

<input type="checkbox"/>	Create a source-initiated subscription.
<input type="checkbox"/>	Create a collector-initiated subscription.
<input type="checkbox"/>	Create a custom view in Event Viewer.
<input type="checkbox"/>	Configure Event Forwarding by using a Group Policy Object (GPO).

100 Windows 10 computers:

<input type="checkbox"/>	Create a source-initiated subscription.
<input type="checkbox"/>	Create a collector-initiated subscription.
<input type="checkbox"/>	Create a custom view in Event Viewer.
<input type="checkbox"/>	Configure Event Forwarding by using a Group Policy Object (GPO).

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. Source:
<https://learn.microsoft.com/en-us/windows/win32/wec/creating-a-source-initiated-subscription>

NEW QUESTION 18

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:

References:
<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

NEW QUESTION 19

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege. To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

Answer: C

NEW QUESTION 23

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 26

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1. What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the disclparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the booccfg /debug command.

Answer: A

Explanation:

Reference:

<https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 29

- (Exam Topic 4)

You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager. You need to create an answer file. What should you do first?

- A. Open the Install.wim file from the Windows 10 installation media.
- B. Open the Boot.wim file from the Windows 10 installation media.
- C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
- D. Install the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 34

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are joined to an Azure AD tenant and enrolled in Microsoft Intune. The computers are in remote locations and connected to public networks.

You need to recommend a solution for help desk administrators that meets the following requirements:

- > Connect remotely to a user's computer to perform troubleshooting.
- > Connect to a user's computer without disrupting the desktop of the computer.
- > Remotely view services, performance counters, registry settings, and event logs. Which tool should you include in the recommendation?

- A. Quick Assist
- B. Intune
- C. Remote Assistance
- D. Windows Admin Center

Answer: C

NEW QUESTION 38

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 41

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 46

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators.

What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as User1 and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

Answer: B

Explanation:

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

NEW QUESTION 50

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. All users have been issued with laptop computers as well as desktop computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.

A user named Mia Hamm informs you that she must perform a BitLocker recovery on her laptop but she does not have her BitLocker recovery key.

You need to ensure that Mia Hamm can perform a BitLocker recovery on her laptop. What should you do?

- A. Instruct Mia Hamm to log on to her desktop computer and run the repair-bde.exe command.
- B. Instruct Mia Hamm to use the BitLocker Recovery Password Viewer to view the computer object of the laptop.
- C. Instruct Mia Hamm to log on to her desktop computer and go to <https://account.activedirectory.windowsazure.com> and view the user account profile.
- D. Instruct Mia Hamm to run the Enable-BitLocker cmdlet on her laptop.

Answer: C

Explanation:

The BitLocker recovery key is stored in Azure Active Directory. Reference:
<https://cedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

NEW QUESTION 55

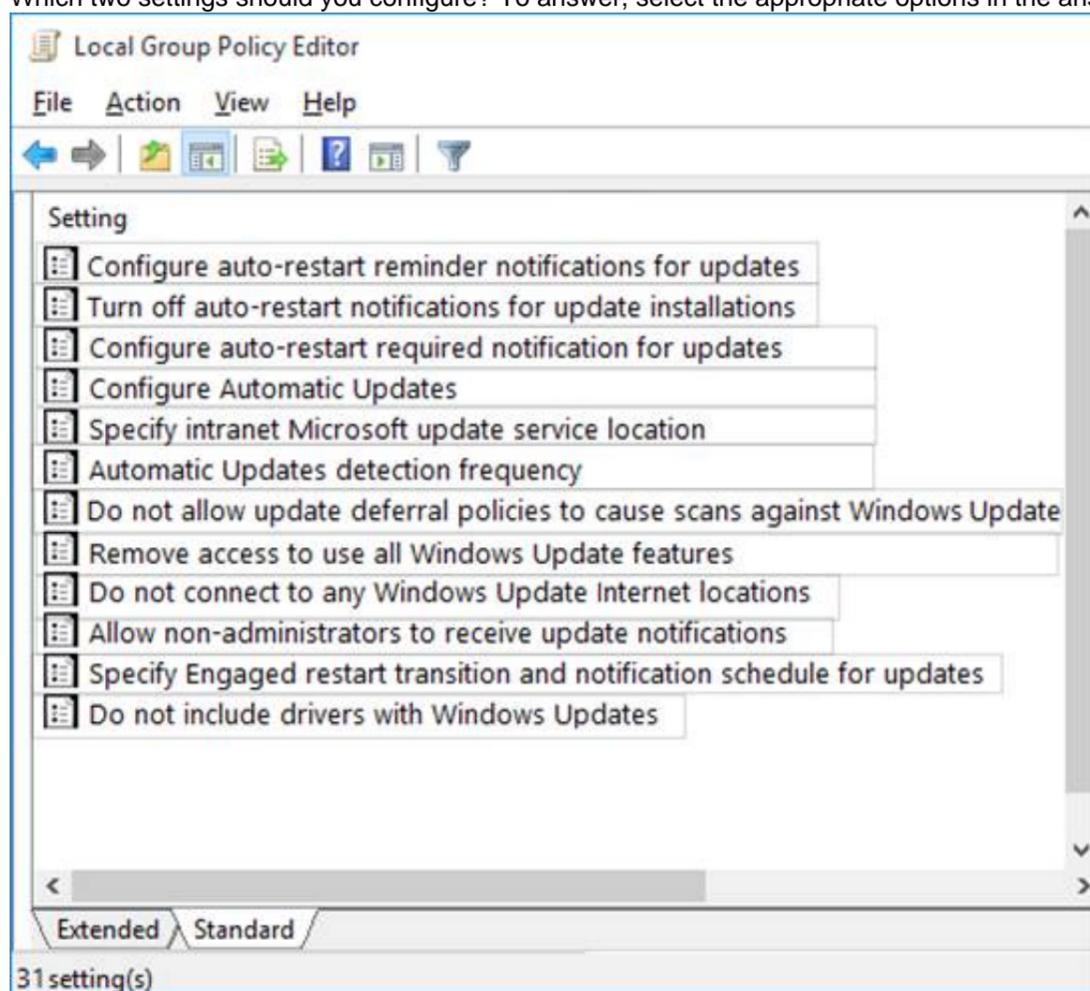

- (Exam Topic 4)

You have 10 computers that run Windows 10.

You have a Windows Server Update Services (WSUS) server.

You need to configure the computers to install updates from WSUS.

Which two settings should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wsus#configure-automatic>

NEW QUESTION 60

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

NEW QUESTION 62

- (Exam Topic 4)

Your network contains the segments shown in the following table.

Name	Domain controller connectivity	Internet connectivity
Segment1	Yes	Yes
Segment2	No	Yes

You have computers that run Windows 10 and are configured as shown in the following table.

Name	Shared folder	Share permission	Active Directory joined	Connected to
Computer1	Share1	Everyone: Full control	Yes	Segment1
Computer2	Share2	Everyone: Full control	Yes	Segment2
Computer3	Share3	Everyone: Full control	No	Segment1

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

Computer	Domain	Private	Public
Computer1	Allowed	Not allowed	Not allowed
Computer2	Allowed	Allowed	Not allowed
Computer3	<i>Not applicable</i>	Allowed	Allowed

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share3 from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share3 from Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 64

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device. You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Catalog file:

Deployment Image Servicing and Management (DISM)
Windows Configuration Designer
Windows Deployment Services (WDS)
Windows System Image Manager (Windows SIM)

Answer file:

Deployment Image Servicing and Management (DISM)
Windows Configuration Designer
Windows Deployment Services (WDS)
Windows System Image Manager (Windows SIM)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 67

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes **No**

User1 can read and write all files in FolderC.

Yes No

User2 can delete all files in FolderB.

Yes No

User3 can delete all files in FolderC.

Yes No

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 71

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to identify the following information:

- The name, username, and SID of the computer
- The user groups to which your user account belongs Which command should you run?

- A. whoami
- B. query
- C. msinfo32
- D. userinit

Answer: A

NEW QUESTION 75

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 78

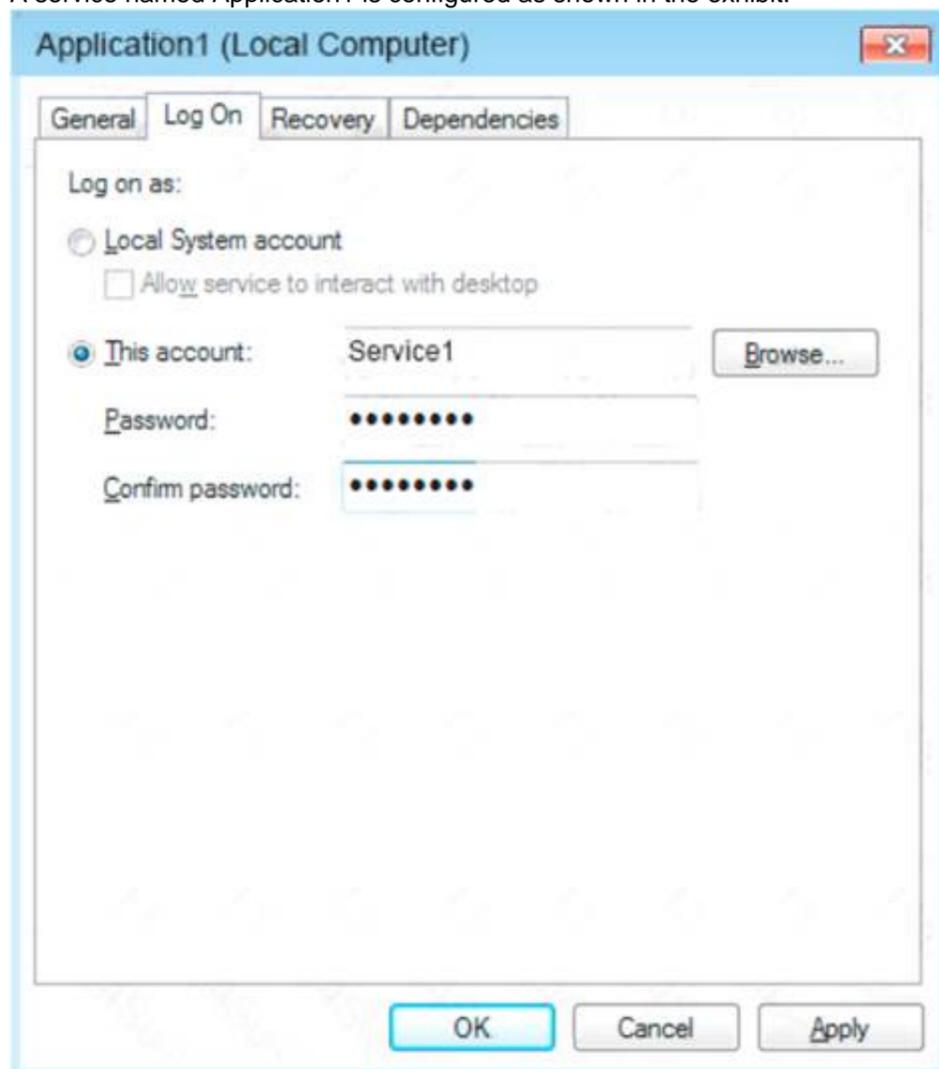

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

NEW QUESTION 82

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computers you allow incoming ICMPv6 traffic in Windows Defender Firewall. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 85

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. the sc command
- B. Task Manager
- C. Services
- D. the sfc command

Answer: A

NEW QUESTION 89

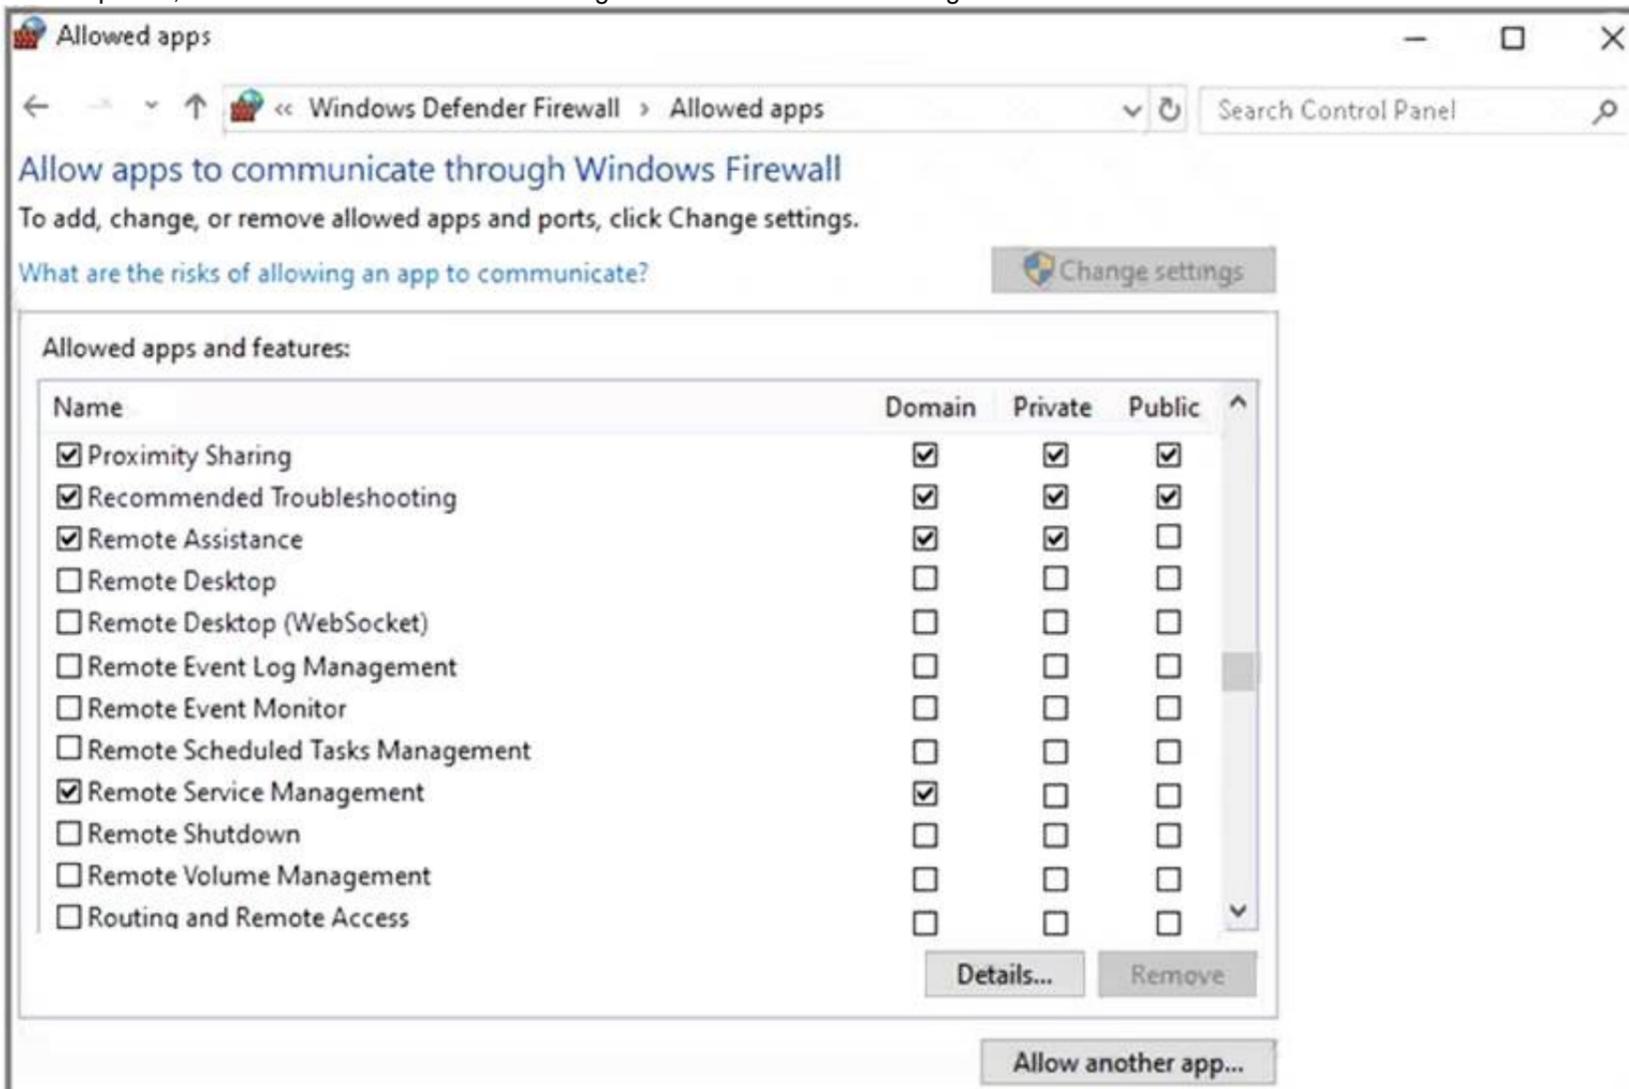

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.

On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

Status	Name	DisplayName
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Because the firewall is blocking Remote Volume Management.

Box 2: No

Because the Remote Registry Service is stopped.

Box 3: No

Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

NEW QUESTION 92

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them.

You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

- A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box
- C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

Answer: C

Explanation:

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip).

We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 95

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool:

- Connection Manager Administration Kit (CMAK)
- Local Group Policy Editor Microsoft Deployment
- Microsoft Deployment Toolkit (MDT)
- Windows Autopilot
- Windows Configuration Designer

File type:

- ADMX
- CAB
- PPKG
- WIM
- XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 99

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. HKEY_CURRENT_USER
- B. HKEY_LOCAL_MACHINE
- C. HKEY_USERS
- D. HKEY_CLASSES_ROOT
- E. HKEY_CURRENT_CONFIG

Answer: BC

NEW QUESTION 102

- (Exam Topic 4)

You have a computer that runs Windows 8.1. You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

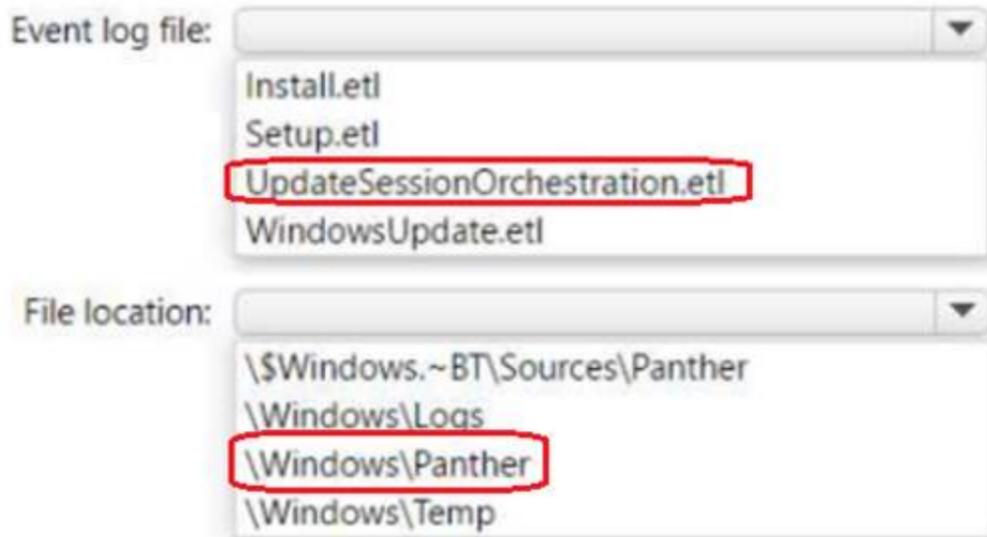

File location:

- \\\$Windows.~BT\Sources\Panther
- \\Windows\Logs
- \\Windows\Panther
- \\Windows\Temp

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 106

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.
 New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser?view=powershell-5.1>

NEW QUESTION 111

- (Exam Topic 4)

You have several computers that run Windows 10.

All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.

You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Copy ADMX and ADML files to C:\Users\Public\Desktop\
- B. From Backup in the Settings app, add a drive
- C. Configure the Silently move Windows known folders to OneDrive settings
- D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions
- E. Configure the Save documents to OneDrive by default setting

Answer: CD

Explanation:

References:

<https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise> <https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard>

NEW QUESTION 114

- (Exam Topic 3)

Which users can sign in to Computer2 by using Remote Desktop?

- A. Admin1 only
- B. User 1 only
- C. Admin1 and User2 only
- D. Admin1, User1, User2, and User3
- E. User2 only

Answer: C

Explanation:

Reference:

<https://4sysops.com/archives/user-rights-assignment-in-windows-server-2016/>

NEW QUESTION 118

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.

- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vm>s

NEW QUESTION 122

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 125

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 and Admin1 only
- D. User31, User 32, User33, and Admin1
- E. User31, User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 127

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 132

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Add the help desk users to:

<input type="checkbox"/>	The local Administrators group on the Windows 10 computers
<input type="checkbox"/>	The Domain Computrers group in the domain group
<input type="checkbox"/>	The Event Log Readers group in the domain group
<input type="checkbox"/>	The local Event Log Readers group on the Windows 10 computers
<input type="checkbox"/>	The Group Policy Creators Owners group in the domain group
<input type="checkbox"/>	The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

<input type="checkbox"/>	Get-GPOReport
<input type="checkbox"/>	GPRresult
<input type="checkbox"/>	GPOUpdate
<input type="checkbox"/>	Group Policy Object Editor

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 136

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation:

References:
<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

NEW QUESTION 138

- (Exam Topic 1)

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

NEW QUESTION 140

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 142

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:

Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform:

Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

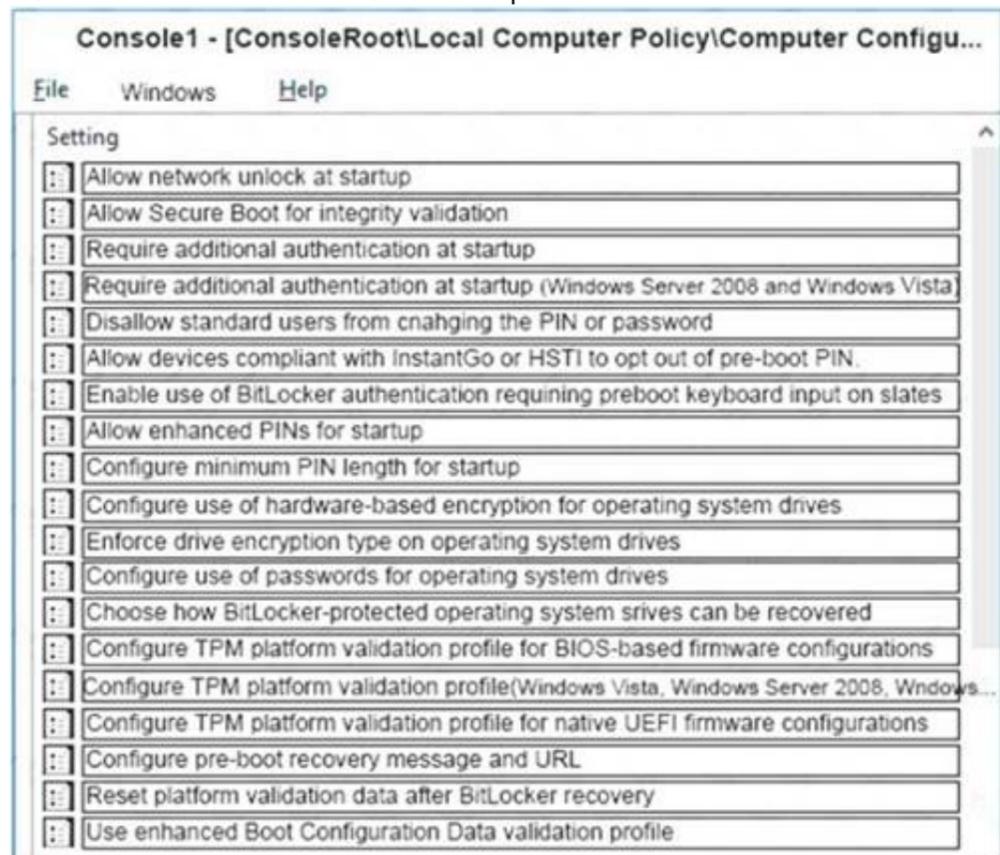

Reference:

<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 143

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.
 You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.
 Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 147

- (Exam Topic 4)

You are a network administrator at your company.
 The company uses an application that checks for network connectivity to a server by sending a ping request to the IPv6 address of the server replies, the application loads.
 A user cannot open the application.
 You manually send the ping request from the computer of the user and the server does not reply. You send the ping request from your computer and the server replies.
 You need to ensure that the ping request works from the user's computer. Which Windows Defender firewall rule is a possible cause of the issue?

- A. File and Printer Sharing (NB-Datagram-In)
- B. File and Printer Sharing (Echo request ICMPv6-Out)
- C. File and Printer Sharing (NB-Datagram-Out)
- D. File and Printer Sharing (Echo Request ICMPv6-In)

Answer: B

NEW QUESTION 150

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.
 The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

NEW QUESTION 152

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
- Unused Microsoft OneDrive content
- Non-critical files for Microsoft Defender Antivirus The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all. You may need to drag the split bar between panes or scroll to view content.

Tools	File types
<div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Cleanup recommendations</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Disk Cleanup</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Disk Management</div> <div style="border: 1px solid gray; padding: 2px;">Storage Sense</div>	<div style="margin-bottom: 20px;">Unused apps: <div style="border: 1px solid gray; padding: 5px; display: inline-block;">Tool</div></div> <div style="margin-bottom: 20px;">Unused OneDrive content: <div style="border: 1px solid gray; padding: 5px; display: inline-block;">Tool</div></div> <div>Non-critical files for Microsoft Defender Antivirus: <div style="border: 1px solid gray; padding: 5px; display: inline-block;">Tool</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tools	File types
Cleanup recommendations	Unused apps: Disk Cleanup
Disk Cleanup	Unused OneDrive content: Disk Management
Disk Management	Non-critical files for Microsoft Defender Antivirus: Cleanup recommendations
Storage Sense	

NEW QUESTION 155

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 158

- (Exam Topic 4)

You have a computer that runs Windows 10.

The computer fails to start, and you receive the following error message: "BOOTMGR image is corrupt. The system cannot boot".

You need to repair the system partition.

Which command should you run from Windows Recovery Environment (WinRE)?

- A. fdisk.exe
- B. chkdsk.exe
- C. diskpart.exe
- D. bcdboot.exe

Answer: C

Explanation:

DiskPart, which has replaced fdisk, is a command-line utility that provides the ability to manage disks, partitions or volumes in your computer running all versions of operating system since Windows 2000.

References:

<https://www.diskpart.com/windows-10/diskpart-windows-10-1203.html>

NEW QUESTION 163

- (Exam Topic 4)

You have a public computer named Computer1 that runs Windows 10/ Computer1 contains a folder named Folder1.

You need to provide a user named User1 with the ability to modify the permissions of Folder1. The solution must use the principle of least privilege.

Which NTFS permission should you assign to User1?

- A. Full control
- B. Modify
- C. Write
- D. Read & execute

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc73288>

<http://www.mdmarra.com/2013/11/full-control-v-modify-why-you-should-be.html>

NEW QUESTION 166

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

Answer: C

Explanation:

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.

Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

NEW QUESTION 168

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence. Does the meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 171

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the necsh int ip resec command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NecworkController cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 175

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with computers that run Windows 8.1.

A user named Mia Hamm has a computer named Computer1. You upgrade Computer1 to Windows 10 by performing a clean installation of Windows 10 without formatting the drives.

You need to migrate the settings for Mia Hamm from Windows 8.1 to Windows 10. Which two actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Run scanstate.exe and specify the C:\Users folder
- B. Run loadstate.exe and specify the C:\Windows.old folder
- C. Run usmultils.exe and specify the C:\Users folder
- D. Run scanstate.exe and specify the C:\Windows.old folder
- E. Run loadstate.exe and specify the C:\Users folder
- F. Run usmultils.exe and specify the C:\Windows.old folder

Answer: DE

Explanation:

D: As we have performed a clean installation of Windows 10 without formatting the drives, User1's Windows 8.1 user profile will be located in the \Windows.old folder. Therefore, we need to run scanstate.exe on the \Windows.old folder.

E: User1's Windows 10 profile will be in the C:\Users folder so we need to run loadstate.exe to apply the changes in the C:\Users folder.

NEW QUESTION 177

- (Exam Topic 4)

You plan to install Windows 10 on a new computer by using an answer file. You need to create the answer file.

Which tool should you use to create the answer file, and which file is required by the tool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to create the answer file:

- Windows PE (WinPE)
- Windows Configuration Designer
- Microsoft Deployment Toolkit (MDT)**
- Windows System Image Manager (Windows SIM)

File required by the tool:

- Boot.wim
- Setup.exe
- Install.wim
- Autorun.inf**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 182

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

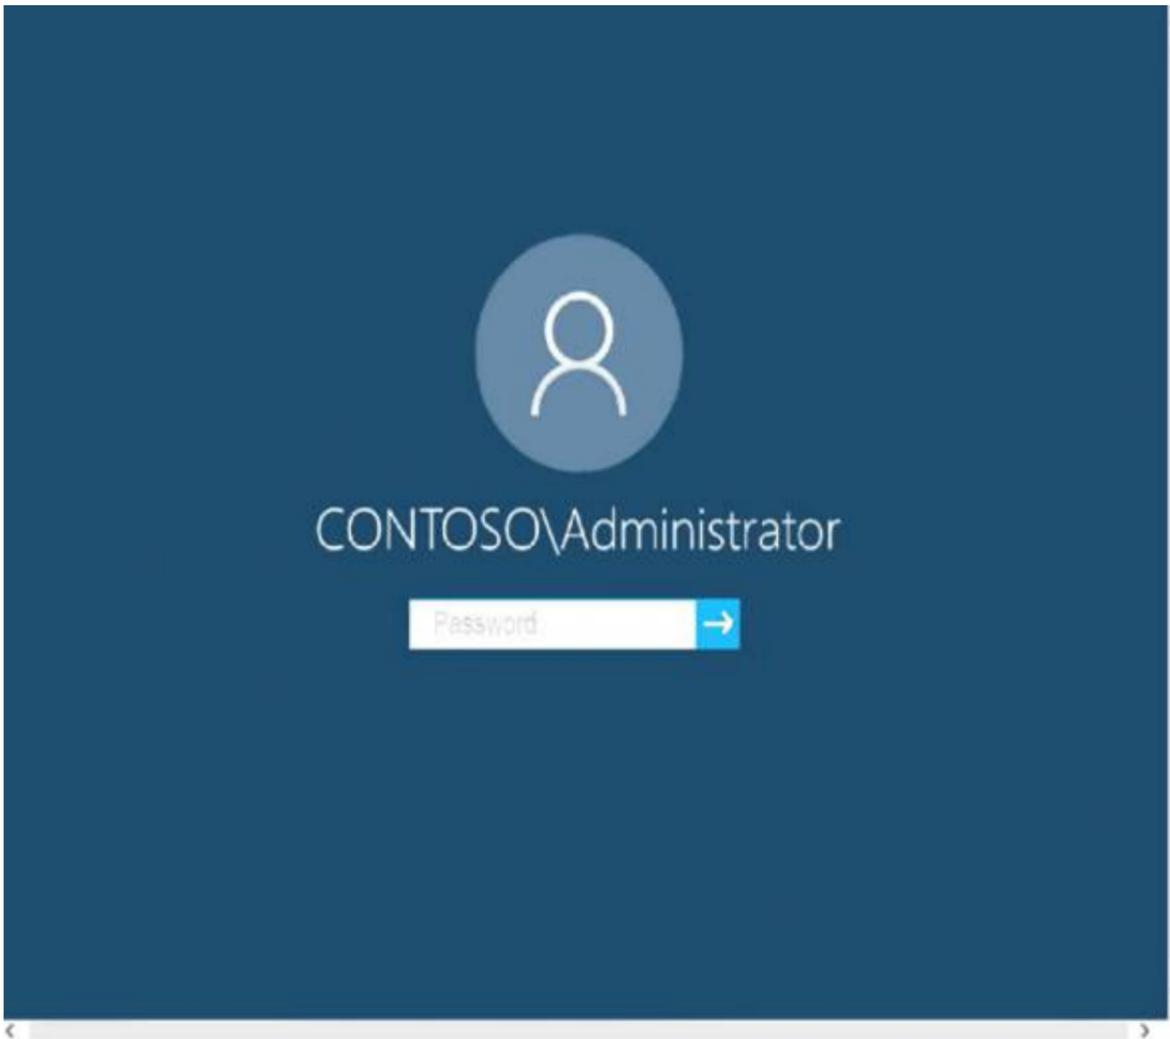

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Tasks

Computers

You need to ensure that C:\Scripts\Configure.ps1 runs every time a user sign in to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

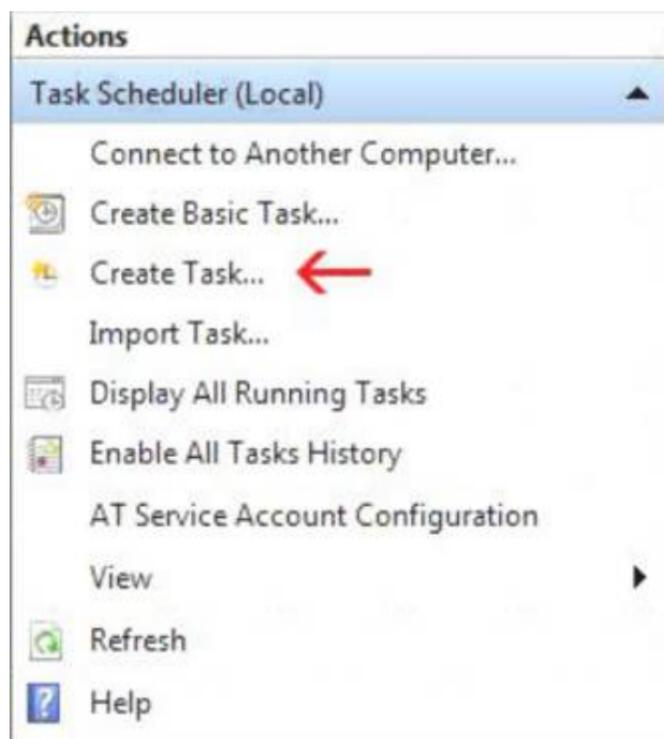

Answer: A

Explanation:

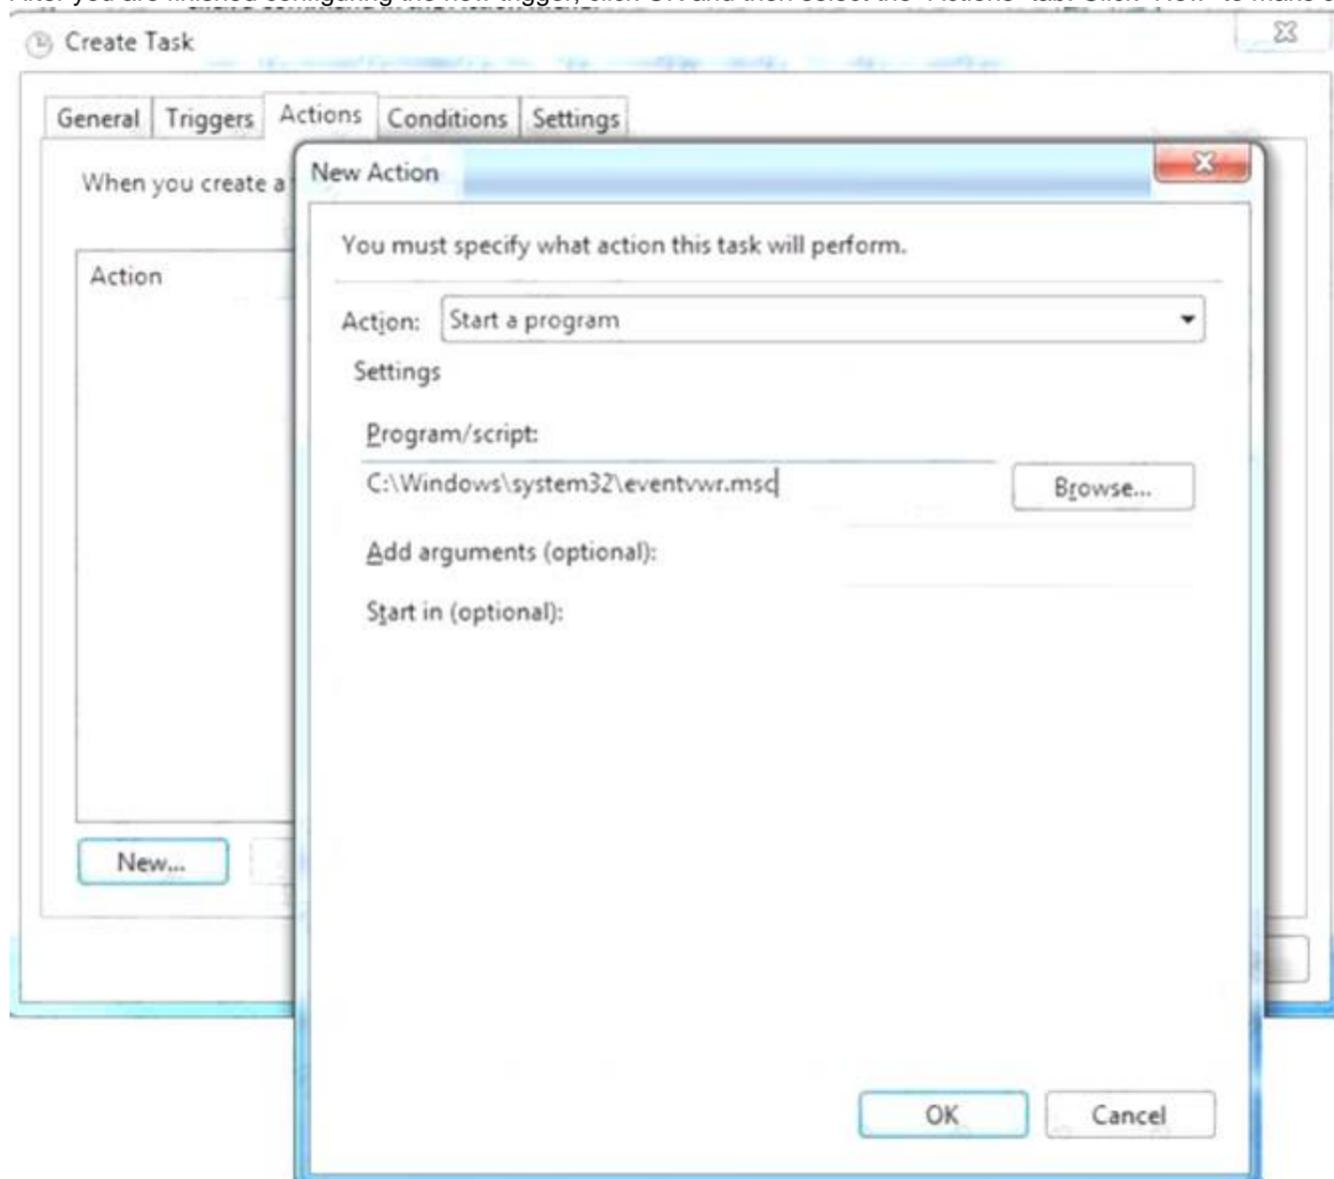

Go to the Start menu, type "Task Scheduler" and select it from the search results.

Task Scheduler can also be accessed in the Control Panel under Administrative Tools. In the right side of the Task Scheduler menu, under Actions, select "Create Task."

On the General tab, enter a name and description for the task you're creating. Check the box "Run with highest privileges."
 Once you have filled out a name and description, click the "Triggers" tab, and then click "New."
 In this menu, under "Begin the task:" select "At log on." Choose which user you would like the task to run for at log on. For our purposes, Any user.
 Configure any of the applicable advanced settings you would like.
 After you are finished configuring the new trigger, click OK and then select the "Actions" tab. Click "New" to make a new action.

Choose "Start a program" under the Action menu and then click "Browse" to point to C:\Scripts\Configure.ps1.
 Click OK to exit out of the Actions menu. The "Conditions" and "Settings" tabs can be left alone.
 Click OK on the Create Task menu, and you are finished. Reference:
<https://www.howtogeek.com/138159/how-to-enable-programs-and-custom-scripts-to-run-at-boot/>

NEW QUESTION 186

- (Exam Topic 4)

You have an app named App1 that uses an on-premises Microsoft SQL Server database named DB1. You plan to migrate DB1 to an Azure SQL managed instance.

You need to enable customer-managed Transparent Data Encryption (TDE) for the instance. The solution must maximize encryption strength. Which type of encryption algorithm and key length should you use for the TDE protector?

- A. RSA2048
- B. RSA4096
- C. RSA3072
- D. AES256

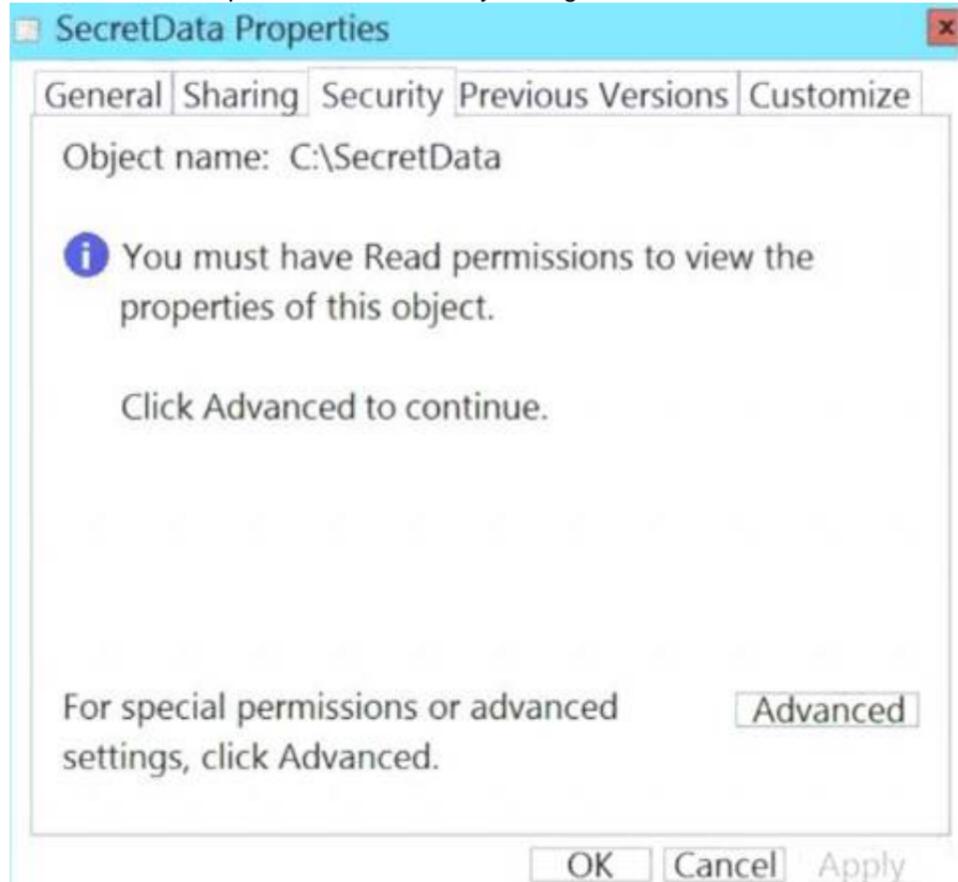

Answer: D

NEW QUESTION 191

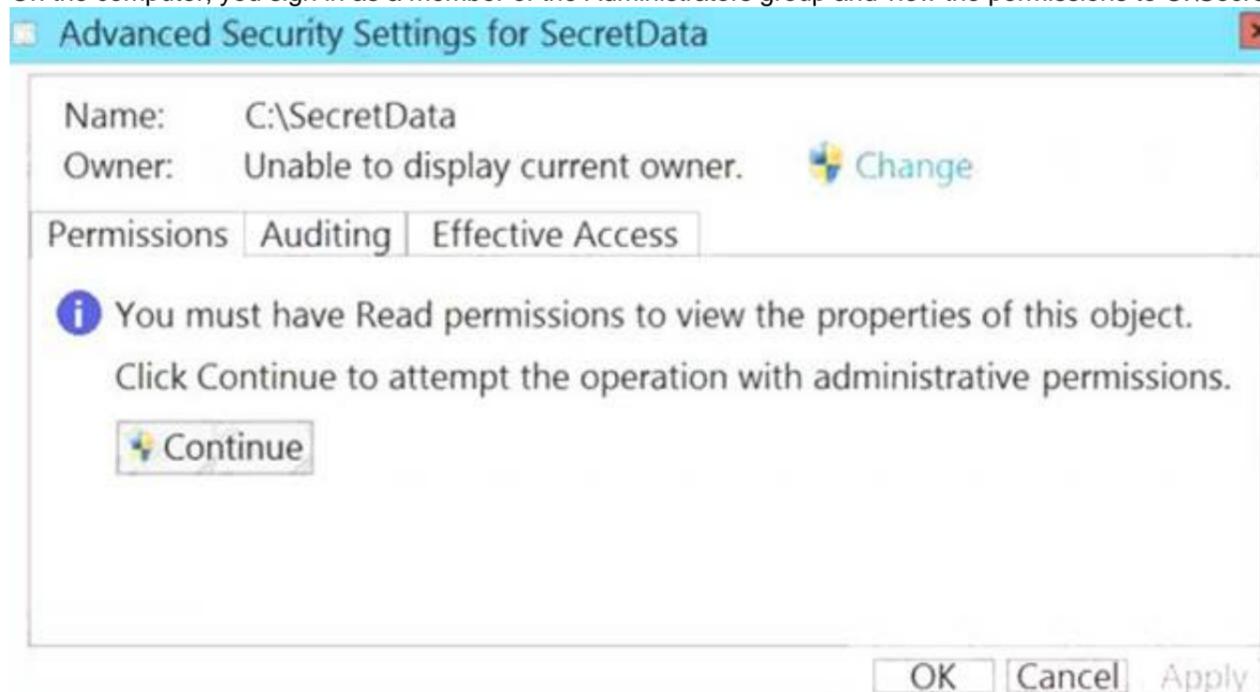

- (Exam Topic 4)

User1 is a member of the Administrators group on a computer that runs Windows 10.

When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run `cacls.exe c:\secretdata /g user1:F`.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

NEW QUESTION 193

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

Answer: D

Explanation:

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

NEW QUESTION 194

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 198

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History. You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

NEW QUESTION 199

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission. You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

Answer: D

Explanation:

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

NEW QUESTION 202

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 205

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.
 Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 207

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to configure User Account Control (UAC) to prompt administrators for their credentials. Which settings should you modify?

- A. Administrators Properties in Local Users and Groups
- B. User Account Control Settings in Control Panel
- C. Security Options in Local Group Policy Editor
- D. User Rights Assignment in Local Group Policy Editor

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 212

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0.

You configure the proxy settings on Computer1 as shown in the following exhibit.

Manual proxy setup

Use a proxy server for Ethernet or Wi-Fi connections. These settings don't apply to VPN connections.

Use a proxy server

Address

Port

Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.

Don't use the proxy server for local (intranet) addresses

Save

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Connection attempts to www.contoso.com will [answer choice].

- bypass the proxy only when using Microsoft Edge
- use the proxy only when using Microsoft Edge
- bypass the proxy for all applications
- use the proxy for all applications

If Computer1 attempts to connect to [answer choice] from Microsoft Edge, the proxy will be bypassed.

NEW QUESTION 219

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: At a command prompt, you run set.exe path=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 222

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

_ Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

NEW QUESTION 225

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to view the Windows Update diagnostic log. What should you do first?

- A. From File Explorer, go to the C:\Windows\Logs\WindowsUpdate folder and select Show hidden files, folders, and drives.
- B. From Windows Update in the Settings app
- C. configure Advanced options.
- D. From Event Viewer, modify the properties of the WindowsUpdateClient operational log.
- E. From Windows PowerShell, run the Get-WindowsUpdateLog cmdlet.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdatelog?view=windowsserv>

NEW QUESTION 226

- (Exam Topic 4)

Your company has several mobile devices that run Windows 10.
 You need configure the mobile devices to meet the following requirements:

- > Windows updates may only be download when mobile devices are connect to Wi-Fi.
- > Access to email and the Internet must be possible at all times.

What should you do?

- A. Open the Setting app and select Update & Securit
- B. Then select and configure Change active hours.
- C. Open the Setting app and select Network & Interne
- D. Then select Change connection properties, and set the Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Securit
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

Reference:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 227

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

Answer: C

Explanation:

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About

References: <https://aadguide.azurewebsites.net/aadjoin/>

NEW QUESTION 232

- (Exam Topic 4)

You are troubleshooting a Windows 10 device that fails to install updates from Windows Update. You discover that some files in the component store are corrupt. You need to resolve the issue to ensure that you can install the updates. Which command should you run?

- A. chkdsk /c c:
- B. Dism /Online /Cleanup-Image /RestoreHealth
- C. Dism /Online /Cleanup-Image /StartComponentCleanup
- D. chknfs /c c:

Answer: B

NEW QUESTION 237

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printed and Printer3 only

- C. Printed, Printer2, and Printer3 only
- D. Printed, Printer3, and Printer4 only
- E. Printed, Printer2, Printer3, and Printer4

Answer: E

NEW QUESTION 238

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Copye.cmd Dism.exe Mount.exe

NEW QUESTION 241

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Name	Servicing channel
Computer1	Semi-Annual Channel (SAC)
Computer2	Long-Term Servicing Channel (LTSC) 2016

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 244

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

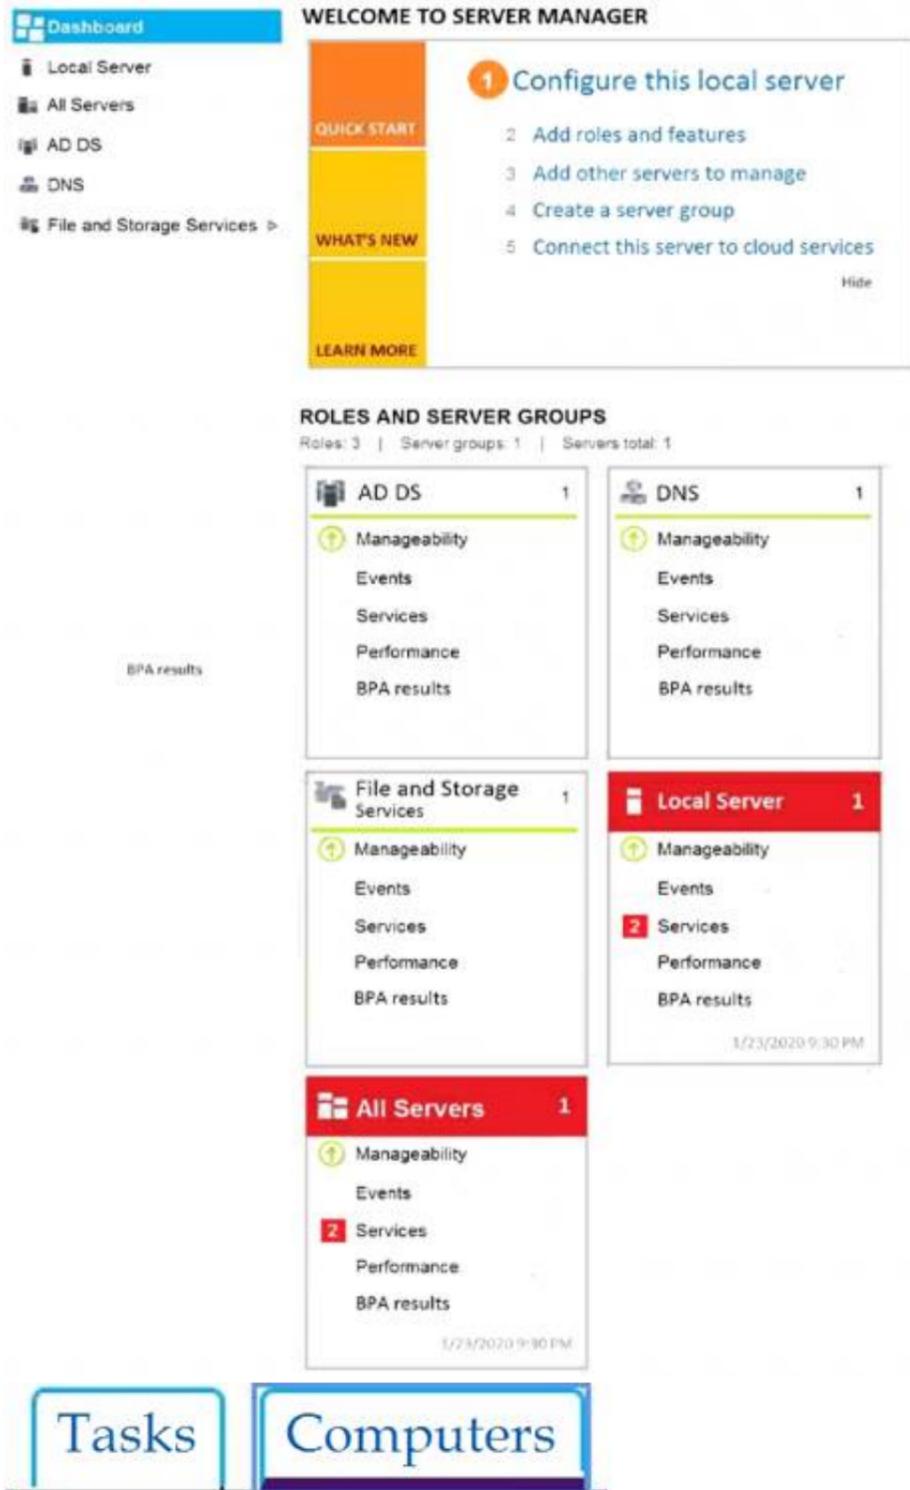

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

- > Open Server Manager.
- > From Tools menu, select Active Directory Users and Computers

- Double click at your domain on the left and then select Builtin.
- Open Remote Desktop Users on the right pane.
- At Members tab, click Add.
- Type the AD users that you want to give Remote access to the RDS Server and click OK.
- After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.

- * 1. Open Group Policy Editor. To do that:
 - * a. Simultaneously press the Windows + R keys to open run command box. 
 - * b. Type gpedit.msc and press Enter.
- * 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.
- * 3. At the right Pane: double click at Allow log on through Remote Desktop Services.
- * 4. Click Add User or Group.
- * 5. Type remote and then click Check Names.
- * 6. Select the Remote Desktop Users and click OK.
- * 7. Click OK at 'Select users, computers...' window.
- * 8. Finally click OK again and close Group Policy Editor.

NEW QUESTION 250

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From a command prompt, you run netsh wlan delete profile name="Wireless1". Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://lifelacker.com/remove-wi-fi-profiles-from-windows-8-1-from-the-command-1449954864>

NEW QUESTION 255

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```

Connection-specific DNS Suffix . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi. . . . . : Enabled
    
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 256

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

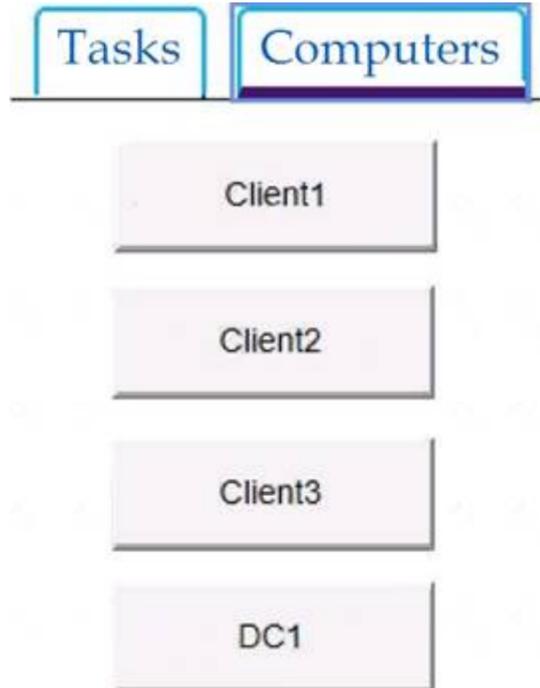

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- Private.txt will now show its file name in green color.
- Right-click Private.txt and then select Properties.
- Click Advanced on the General tab.

- Click Details on the Advanced Attributes tab to open the User Access dialog box.
- Click Add to open the Encrypting File System dialog box and then select User1.
- Click OK to add User1 to the list of users who have access to the file.
- Click OK until you've exited out of the dialog boxes. Reference:

<https://www.top-password.com/blog/password-protect-notepad-text-files-in-windows-10/> <https://sourcedaddy.com/windows-7/how-to-grant-users-access-to-an-encrypted-file.html>

NEW QUESTION 260

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VMI. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	Not applicable
Base2	VHDX	Fixed size	Not applicable
Disk1	VHD	Dynamically expanding	Not applicable
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	Not applicable
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VMI. You need to identify the following:

Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VMI is running.

What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only**
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word, website Description automatically generated

NEW QUESTION 264

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to configure the local computer policy to meet the following requirements:

- An event must be created in the Security log when changes are made to local users or groups.
- The local administrator and guest accounts must be renamed.

Which Security Settings should you modify? To answer, select the appropriate options in the answer area.

Create an event when local users or groups change:

Account Lockout Policy
 Audit Policy
 Password Policy
 Security Options
User Rights Assignment

Rename the local administrator and guest accounts:

Account Lockout Policy
 Audit Policy
 Password Policy
 Security Options
User Rights Assignment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Audit Policy Box 2: Security options

NEW QUESTION 265

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains a user named user1@contoso.com. You have a computer named Computer1 that runs Windows 10.

You join Computer1 to Azure AD. You enable Remote Desktop on Computer1.

User1@contoso.com attempts to connect to Computer1 by using Remote Desktop and receives the following error message: "The logon attempt failed."

You need to ensure that the user can connect to Computer1 by using Remote Desktop. What should you do first?

- A. In Azure AD, assign user1@contoso.com the Cloud device administrator role.
- B. From the local Group Policy, modify the Allow log on through Remote Desktop Services user right.
- C. In Azure AD, assign user1@contoso.com the Security administrator role.
- D. On Computer1, create a local user and add the new user to the Remote Desktop Users group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

NEW QUESTION 268

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the Security settings of D:\Folder1
- B. From File Explorer, add D:\Folder1 to the Documents library
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

NEW QUESTION 272

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local user account on Computer1 and instruct User2 to use the local account to connect to Share1.
 Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 274

- (Exam Topic 4)

You have a computer that runs Windows 10 Home.

You need to upgrade the computer to Windows 10 Enterprise as quickly as possible. The solution must retain the user settings.

What should you do first?

- A. Run the scansce command.
- B. Perform an in-place upgrade to Windows Pro.
- C. Install the latest feature updates.
- D. Run the sysprep command.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 277

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

<input type="checkbox"/> Windows Server Update Services (WSUS) <input type="checkbox"/> Microsoft System Center Configuration Manager <input type="checkbox"/> Windows Update for Business
--

Manage the configuration by using:

<input type="checkbox"/> A Group Policy object (GPO) <input type="checkbox"/> Microsoft System Center Configuration Manager <input type="checkbox"/> Microsoft Intune

Manage the traffic by using:

<input type="checkbox"/> Delivery Optimization <input type="checkbox"/> BranchCache <input type="checkbox"/> Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

NEW QUESTION 280

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover that when users are on their lock screen, they see a different background image every day, along with tips for using different features in Windows 10.

You need to disable the tips and the daily background image for all the Windows 10 computers. Which Group Policy settings should you modify?

- A. Turn off the Windows Welcome Experience
- B. Turn off Windows Spotlight on Settings
- C. Do not suggest third-party content in Windows spotlight
- D. Turn off all Windows spotlight features

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/configuration/windows-spotlight>

NEW QUESTION 285

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

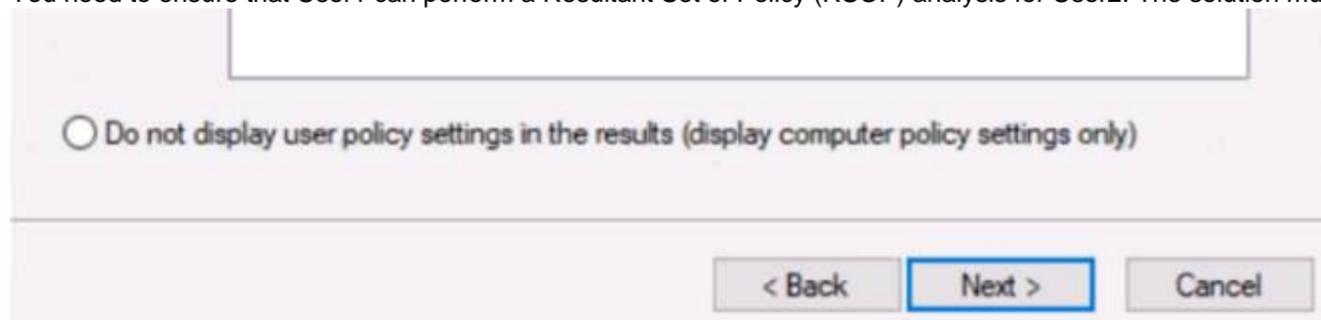

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

NEW QUESTION 290

- (Exam Topic 4)

You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

Answer: D

NEW QUESTION 293

- (Exam Topic 4)

You have four computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of
Computer1	Workgroup named WG1
Computer2	Workgroup named WG1
Computer3	Workgroup named WG2
Computer4	Active Directory domain named contoso.com

On Computer1, you create a user named User1. In the domain, you create a user named User2. You create the groups shown in the following table.

Name	Created on/in
Group3	Computer3
Group4	Computer4
Group5	Contoso.com

You need to identify to which computers User1 can sign in, and to which groups you can add User2. What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1 can sign in to:

Computer1 only
Computer1 and Computer2 only
Computer1, Computer2, and Computer3 only
Computer1, Computer2, and Computer4 only
Computer1, Computer2, Computer3, and Computer4

You can add User2 to:

Group5 only
Group4 and Group5 only
Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Computer 1 only.
 User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1. Box 2: Group5 only.
 User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.

NEW QUESTION 295

- (Exam Topic 4)

You are a network administrator at your company.
 A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.
 You start the computer in recovery mode.
 Which command should you run next? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

▼
Bootrec
Diskpart
Sfc

▼
/FixMbr
/RebuildBcd
/ScanNow
/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: https://neosmart.net/wiki/bootrec/#Bootrec_in_Windows10

NEW QUESTION 298

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type netsh wlan show profiles in the Command Prompt to manage and delete wireless network profiles.

References:

<https://kb.netgear.com/29889/How-to-delete-a-wireless-network-profile-in-Windows-10>

NEW QUESTION 302

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

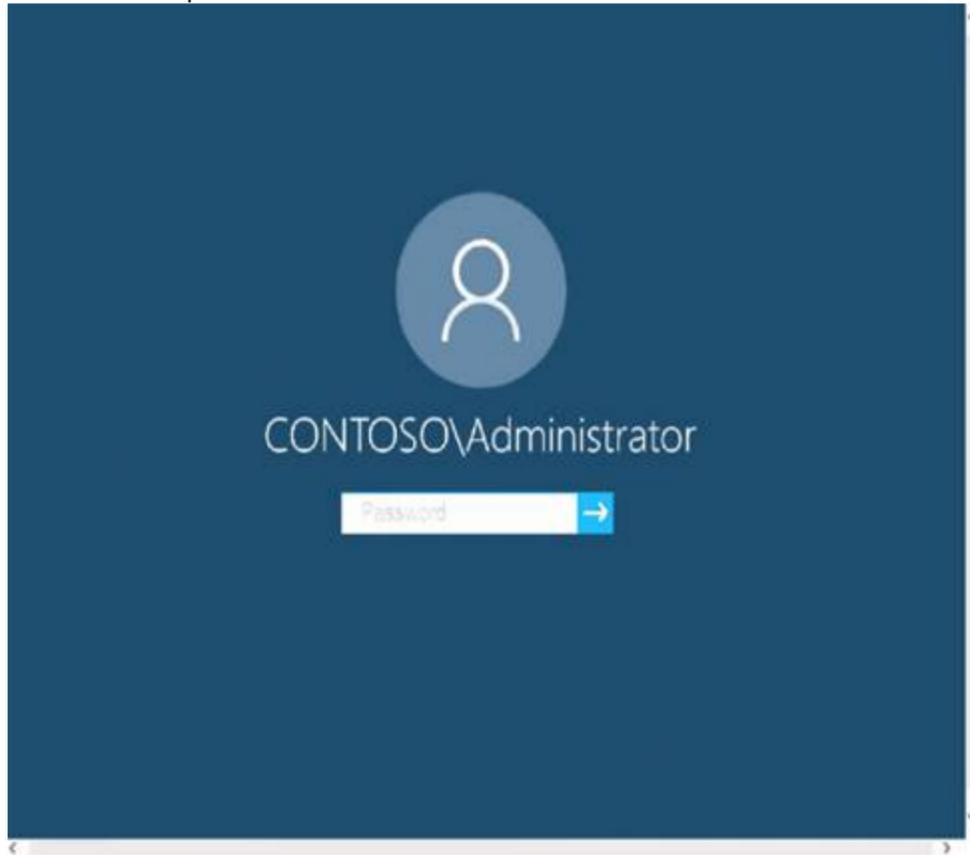

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

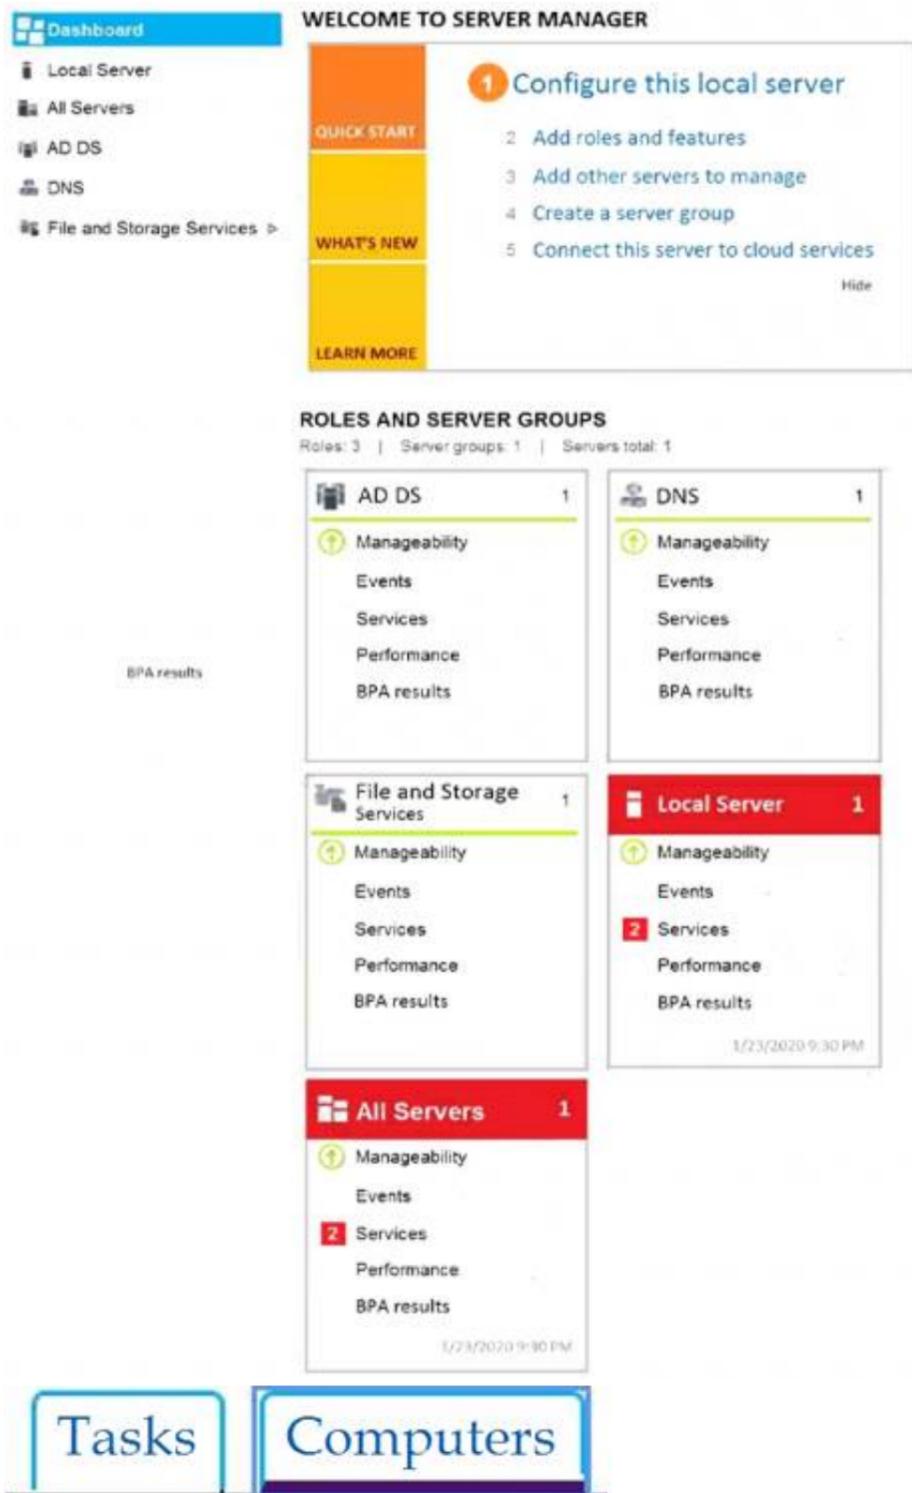

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You have already prepared Client1 for remote management.
 You need to forward all events from the Application event log on Client1 to DC1.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Configuring the event source computer

* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

* 2. Start group policy by running the following command:

```
%SYSTEMROOT%\System32\gpedit.msc
```

* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.

* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.

* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied:

```
gpupdate /force
```

Configuring the event collector computer

* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

* 2. Run the following command to configure the Event Collector service:

```
wecutil qc /q
```

* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:

```
wecutil cs configurationFile.xml
```

Reference:

<https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the>

NEW QUESTION 307

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup. You need to prevent users from using Microsoft Store apps on their computer.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From Security Settings in the local Group Policy, configure Security Options.
- B. From Administrative Templates in the local Group Policy, configure the Store settings.
- C. From Security Settings in the local Group Policy, configure Software Restriction Policies.
- D. From Security Settings in the local Group Policy, configure Application Control Policies.

Answer: BD

Explanation:

References:

<https://www.techrepublic.com/article/how-to-manage-your-organizations-microsoft-store-group-policy/>

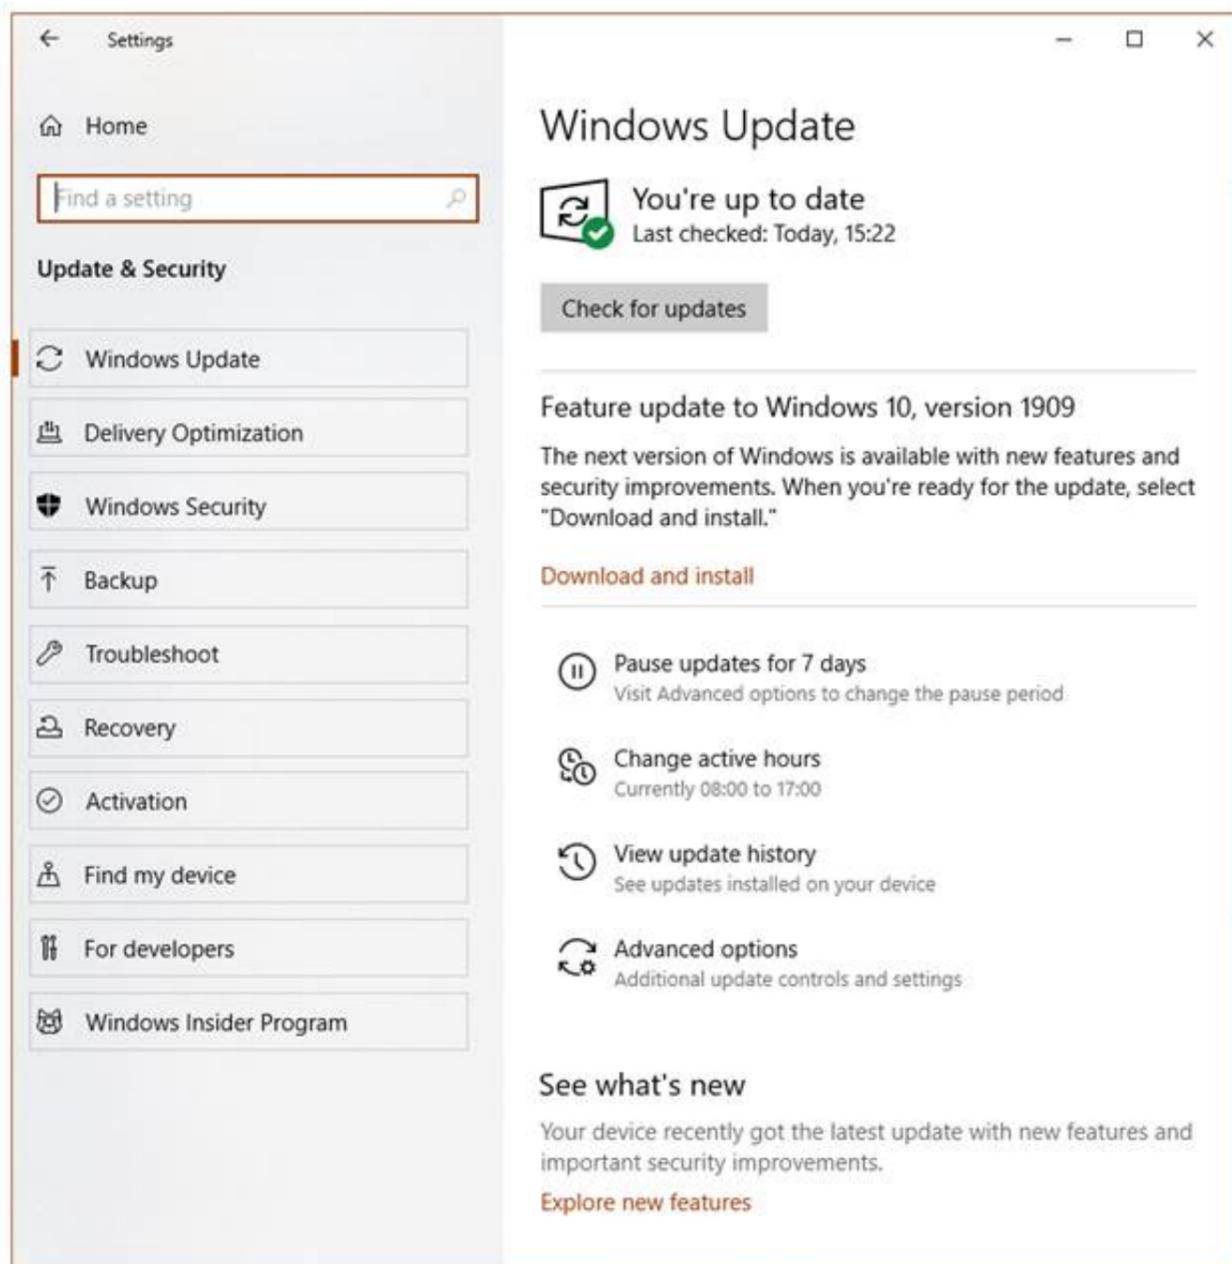

NEW QUESTION 309

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 311

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group1
User4	Users
Admin1	Administrators

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
- B. 2
- C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 313

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are in a workgroup. The computers have a low-bandwidth metered Internet connection. You need to reduce the amount of Internet bandwidth consumed to download updates. What should you configure?

- A. BranchCache in hosted mode
- B. BranchCache in distributed cache mode
- C. Delivery Optimization
- D. Background intelligent Transfer Service (BITS)

Answer: C

Explanation:

References:
<https://support.microsoft.com/en-us/help/4468254/windows-update-delivery-optimization-faq>

NEW QUESTION 314

- (Exam Topic 4)

You have a Windows 10 device named Device1.

You plan purchase a wireless display device that will stream audio and video from Device1. Which wireless feature or protocol should the display device support?

- A. Wi-Fi sense
- B. Miracast
- C. near field communications (NFC)
- D. Bluetooth

Answer: B

NEW QUESTION 315

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
- B. From the Settings app, modify the Background settings.
- C. From the local Group Policy Edito
- D. modify the Desktop settings.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

Answer: B

NEW QUESTION 317

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user.

The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

Activation

Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run slmgr /lrc.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run slmgr /ato.

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 320

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to configure a Windows Sandbox environment. The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values

- Default
- Disable
- Enable
- False
- True

Answer Area

```
<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```
<Configuration>
  <Vgpu>  </Vgpu>

```

NEW QUESTION 321

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 322

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to be able to recover the computer by using System Image Recovery. What should you use to create a system image?

- A. Windows System Image Manager (Windows SIM)
- B. Backup and Restore (Windows 7)
- C. File History
- D. System Protection

Answer: B

Explanation:

Reference:

https://answers.microsoft.com/en-us/windows/forum/windows_10/how-to-create-a-system-image-in-windows-1

NEW QUESTION 327

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts. Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

Answer: D

NEW QUESTION 332

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Use Microsoft Deployment Toolkit (MDT) instead.

NEW QUESTION 337

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 342

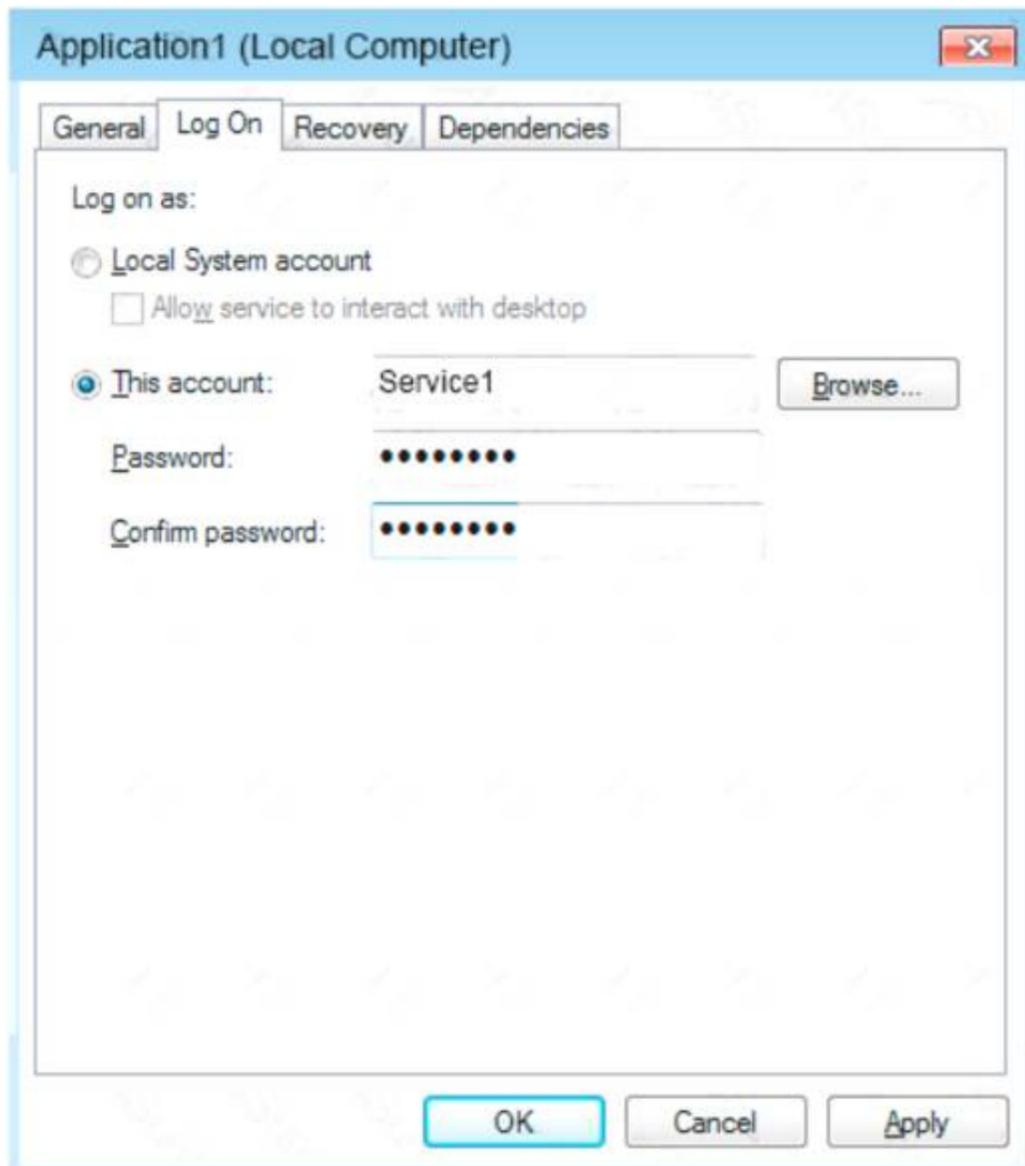

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.
 Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account.
 Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

NEW QUESTION 347

- (Exam Topic 4)

You need to configure Device1 to meet the following requirements:

- Deny User1 the right to sign in locally.
- Ensure that a logon script runs only when User2 signs in to Device1.
- Ensure that no logon scripts run when User1 or Admin1 sign in to Device1.

Which two policies should you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Local Computer\Admin1 Policy
- B. Local Computer\Administrators Policy
- C. Local Computer\Non-Administrators Policy IS
- D. Local Computer\User1 Policy
- E. Local Computer\User2 Policy
- F. Local Computer Policy

Answer: DE

NEW QUESTION 352

- (Exam Topic 4)

You plan to deploy Windows 10 to 100 secure computers.

You need to select a version of Windows 10 that meets the following requirements:

- > Uses Microsoft Edge as the default browser
- > Minimizes the attack surface on the computer
- > Supports joining Microsoft Azure Active Directory (Azure AD)
- > Only allows the installation of applications from the Microsoft Store

What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode

- B. Windows 10 Home in S mode
- C. Windows 10 Pro
- D. Windows 10 Enterprise

Answer: A

Explanation:

Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store <https://docs.microsoft.com/es-es/windows/deployment/s-mode>

NEW QUESTION 355

- (Exam Topic 4)

You have a computer that runs Windows 10. A feature update is installed automatically. You need to roll back the feature update.

Up to how many days after the feature update is installed can you roll back the installation, and what should you use to perform the roll back? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To roll back the feature update, use:

Go back to the previous version of Windows 10
Reset this PC option
Uninstall an update in Control Panel

The rollback can be performed up to:

7 days after
10 days after
35 days after

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated
