A. Mastered
B. Not Mastered

Answer: A

Explanation:
According to the Microsoft documentation1, you can use Audio conferencing policies to manage audio conferencing toll and toll-free numbers to be displayed in meeting invites created by users within your organization. You can use one of the two automatically created policies or create and assign custom policies. To create a custom audio- conferencing policy, you need to follow these steps1:
? In the left navigation of the Microsoft Teams admin center, go to Meetings > Audio
conferencing.
? Select Add.
? Enter the name and description of the policy. The name can't contain special characters or be longer than 64 characters.
? Choose whether or not to Include toll-free numbers in meetings created by users of this policy.
? Under Phone numbers included in meeting invites, select Add phone number, and then select the toll-free number that you want to appear at the top of the list of numbers on Outlook invites to Teams meetings. You can also add other phone numbers that you want to include in the meeting invites.
? Select Save.
Therefore, based on this information, the correct sequence of actions is:
? Purchase Communication Credits.

NEW QUESTION 2
- (Topic 5)
You have a Microsoft 365 E3 subscription that contains 500 users. All the users have computers that run Windows 10 and are joined to Azure AD.
Vou need to generate a report that identifies which documents the users copied from Microsoft Teams to USB devices.
What should you do first?

A. Onboard the Windows 10 computers to Endpoint data loss prevention (Endpoint DLP).
B. Assign the Microsoft 365 ES compliance add-on to each user.
C. Create a custom data loss prevention (DLP) policy.
D. Assign the Enterprise Mobility + Security ES add-on to each user.

Answer: B

Explanation:
According to the Microsoft documentation1, to generate a report that identifies which documents the users copied from Teams to USB devices, you need to use advanced hunting on Microsoft Defender ATP. Advanced hunting lets you run queries to find threat activity involving USB devices, such as mounting and unmounting of USB drives or copying of files2.
To use advanced hunting, you need to have one of the following roles:
? Security administrator
? Security reader
? Security operator
? Global administrator
The Groups Administrator role does not have access to advanced hunting or Microsoft Defender ATP.
Therefore, based on this information, the correct answer is B. Assign the Microsoft 365 E5 compliance add-on to each user. This add-on includes Microsoft Defender ATP and allows you to use advanced hunting features3. Alternatively, you can request one of the roles that have access to advanced hunting, such as Security administrator or Global administrator.
