

# Salesforce

## Exam Questions ADM-201

Administration Essentials for New Admins

#### NEW QUESTION 1

Sales reps at Northern Trail Outfitters have asked for a way to change the Probability field value of their Opportunities.

What should an administrator suggest to meet this request?

- A. Define a newStage picklist value.
- B. Create a custom field on Opportunity.
- C. Configure Forecasting support.
- D. Make the field editable on page layouts

**Answer:** D

#### Explanation:

Probability is a standard percentage field on the Opportunity object that indicates how likely an opportunity will close successfully. It is automatically calculated based on the opportunity stage unless you make it editable on page layouts. To allow sales reps to change the probability field value of their opportunities, you need to make the field editable on page layouts. References: [https://help.salesforce.com/s/articleView?id=sf.opportunity\\_fields.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.opportunity_fields.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.customize\\_layoutedit.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_layoutedit.htm&type=5)

#### NEW QUESTION 2

Cloud Kicks has a Customer success agent going on leave and needs to change ownership on multiple cases.

Which two users are able to fulfill this request? Choose 2 answers

- A. A user with Read Permission on account.
- B. A user with manager role above the agent.
- C. A user with the System Administrator profile.
- D. A user with the Manage Cases Permission

**Answer:** BC

#### Explanation:

A user with manager role above the agent can change ownership on multiple cases that are owned by the agent or by users below the agent in the role hierarchy. A user with the System Administrator profile can change ownership on any case, regardless of the owner or role hierarchy. References: [https://help.salesforce.com/s/articleView?id=sf.case\\_change\\_owner.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.case_change_owner.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.admin\\_userperms.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_userperms.htm&type=5)

#### NEW QUESTION 3

Ursa Major Solar wants its sales reps to be aware when they are speaking with high-profile customers.

Which two options should be added to the Lightning record pages to achieve this? Choose 2 answers

- A. Custom Component
- B. Highlight Panel
- C. Action and Recommendations
- D. Component Visibility Filter
- E. Rich Text Area

**Answer:** AD

#### Explanation:

Two options that should be added to Lightning record pages to make sales reps aware when they are speaking with high-profile customers are:  
? Custom Component, which can display a custom message or icon on the record page based on certain criteria such as account rating or industry. For example, an administrator can create a custom Lightning Web Component that shows a star icon on account record pages if account rating is Hot or Warm.  
? Component Visibility Filter, which can control when a component is visible on a record page based on field values of that record. For example, an administrator can add a component visibility filter to an existing component such as Path or Highlights Panel that makes it visible only if account rating is Hot or Warm. Highlight Panel, Action and Recommendations, and Rich Text Area are not options that can be used to make sales reps aware when they are speaking with high-profile customers. References: [https://developer.salesforce.com/docs/component-library/documentation/en/lwc/lwc.create\\_components](https://developer.salesforce.com/docs/component-library/documentation/en/lwc/lwc.create_components)  
[https://help.salesforce.com/s/articleView?id=sf.dynamic\\_forms\\_component\\_visibility.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.dynamic_forms_component_visibility.htm&type=5)

#### NEW QUESTION 4

New leads need be routed to the correct Sales person based on the lead address.

- A. Configure validation rule
- B. Use lead assignment rule
- C. Create a formula field
- D. Assign with an escalation rule

**Answer:** B

#### Explanation:

Lead assignment rule is a feature that can be used to route new leads to the correct sales person based on the lead address. Lead assignment rule can assign leads to users or queues based on certain criteria, such as lead source, industry, or location. Lead assignment rule can also send email notifications to the new lead owners or other recipients. References: [https://help.salesforce.com/s/articleView?id=sf.leads\\_assignment\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.leads_assignment_rules.htm&type=5)

#### NEW QUESTION 5

A user at Cloud Kicks is having issues logging in to Salesforce. The user asks the administrator to reset their password.

Which two options should the administrator consider when resetting the user's password? Choose 2 answers

- A. Resetting the password will change the user's password policy.

- B. Single sign-on users can reset their own passwords using the forgot password link.
- C. Resetting a locked-out user's password automatically unlocks the user's account.
- D. After resetting a password, the user may be required to activate their device to successfully log in to Salesforce.

**Answer:** CD

**Explanation:**

Page layout editor is a tool that allows you to customize the layout and organization of detail and edit pages for a specific object and record type combination. You can use page layout editor to make fields editable or read-only on page layouts for different profiles or record types. After resetting a password, the user may be required to activate their device by entering a verification code sent to their email address or phone number before they can log in to Salesforce. This is a security feature that helps prevent unauthorized access to Salesforce from unknown devices or browsers. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_layoutedit.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_layoutedit.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.identity\\_verification.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.identity_verification.htm&type=5)

**NEW QUESTION 6**

A team of support users at Cloud Kicks is helping inside sales reps make follow-up calls to prospects that filled out an interest form online. The team currently does not have access to the lead object. How should an administrator provide proper access?

- A. Create a new profile
- B. Configure permission sets.
- C. Assign a new role.
- D. Set Up Manual Sharing

**Answer:** B

**Explanation:**

Permission sets are a flexible way to grant additional access to users without changing their profiles. To provide access to the lead object for a team of support users, create a permission set that includes the appropriate object and field permissions for leads, and then assign it to the users. References: [https://help.salesforce.com/s/articleView?id=sf.perm\\_sets\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.perm_sets_overview.htm&type=5)

**NEW QUESTION 7**

An administrator has reviewed an upcoming critical update. How should the administrator proceed with activation of the critical update?

- A. Activate the critical update in a sandbox.
- B. Allow the critical update to auto-activate.
- C. Activate the critical update in production.
- D. Allow the critical update to auto-activate in a sandbox.

**Answer:** A

**Explanation:**

To test the impact of a critical update before it is auto-activated, you should activate it in a sandbox first. This way, you can verify that your customizations and integrations work as expected without affecting your production org. References: [https://help.salesforce.com/s/articleView?id=sf.admin\\_critical\\_updates.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_critical_updates.htm&type=5)

**NEW QUESTION 8**

At Universal Containers, there is a custom field on the Lead named Product Category. Management wants this information to be part of the Opportunity upon lead conversion. What action should the administrator take to satisfy the request?

- A. Map the lead custom field to the product's product category field.
- B. Create a workflow to update Opportunity fields based on the lead.
- C. Create a custom field on the Opportunity and map the two fields.
- D. Configure the product categories picklist field on the product.

**Answer:** C

**Explanation:**

To transfer data from a lead custom field to an opportunity field upon lead conversion, an administrator needs to create a custom field on the opportunity object that matches the data type and length of the lead custom field, and then map the two fields using the lead field mapping tool under setup. This will ensure that the value of the product category field on the lead is copied to the corresponding field on the opportunity when the lead is converted. References: [https://help.salesforce.com/s/articleView?id=sf.leads\\_customize\\_map.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.leads_customize_map.htm&type=5)

**NEW QUESTION 9**

Which two objects are customizable in the Stage Setup Flow? Choose 2 answers

- A. Leads
- B. Campaigns
- C. Opportunities
- D. Campaign Members

**Answer:** AC

**Explanation:**

The Stage Setup Flow is a tool that allows administrators to customize stages for leads and opportunities based on best practices from Salesforce experts. The Stage Setup Flow guides administrators through a series of questions about their sales process and then creates or updates stages for leads or opportunities accordingly. The Stage Setup Flow also provides tips and resources for each stage such as key fields, guidance for success, reports and dashboards,

etc.References:[https://help.salesforce.com/s/articleView?id=sf.stages\\_setup\\_flow\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.stages_setup_flow_overview.htm&type=5)

#### NEW QUESTION 10

Cloud Kicks wants to update a screen flow so that if the checkbox field High Value Customer is set to true, the first screen is skipped and the user is directed to the second screen. How should the administrator configure the decision element?

- A. Use the equals operator and  `{!$GlobalConstant.True}`  as the value.
- B. Use the equals operator and “High Value Customer” as the value.
- C. Use the contains operator and  `{!$GlobalConstant.False}`  as the value.
- D. Use the contains operator and “High Value Customer” as the value

**Answer:** A

#### Explanation:

The equals operator is an operator that compares two values and returns true if they are equal or false if they are not equal; it can be used in decision elements in flow builder to check if two values match certain criteria. The  `{!$GlobalConstant.True}`  value is a global constant value that represents true in flow builder; it can be used in decision elements in flow builder as one of the values being compared. Using equals operator and  `{!$GlobalConstant.True}`  as value can help Cloud Kicks update screen flow so that if checkbox field High Value Customer is set true first screen is skipped by using equals operator compare High Value Customer field value with  `{!$GlobalConstant.True}`  value in decision element output connector conditions; if condition is met first screen is skipped else first screen is shown. Using equals operator “High Value Customer” as value contains operator  `{!$GlobalConstant.False}`  as value contains operator “High Value Customer” as value are not valid options for updating screen flow skip first screen if checkbox field High Value Customer is set true because they either use wrong values wrong operators compare checkbox field values. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_operators.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_operators.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements\\_decision.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_decision.htm&type=5)

#### NEW QUESTION 10

An administrator at Universal Containers needs a simple way to trigger an alert to the director of sales when opportunities reach an amount of \$500,000. What should the administrator configure to meet this requirement?

- A. Set up Big Deal Alerts for the amount.
- B. Enable Opportunity Update Reminders
- C. Opportunity warning in Kanban View.
- D. Key Deals component on the homepage

**Answer:** A

#### Explanation:

Big Deal Alerts allow you to notify users when an opportunity reaches a certain amount or probability. References: [https://help.salesforce.com/s/articleView?id=sf.forecasts3\\_big\\_deal\\_alerts.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.forecasts3_big_deal_alerts.htm&type=5)

#### NEW QUESTION 11

Cloud Kicks has the organization wide defaults for Opportunity set to private. which two features should the administrator use to open up access to Opportunity records for sales users working on collaborative deals? Choose 2 answers

- A. Sharing set
- B. Role hierarchy
- C. Profiles
- D. Sharing rules

**Answer:** BD

#### Explanation:

Role hierarchy and sharing rules are two features that should be used to open up access to Opportunity records for sales users working on collaborative deals. Role hierarchy can be used to grant access to records owned by or shared with users who are below them in the hierarchy. Sharing rules can be used to extend sharing access to users in public groups, roles, or territories based on certain criteria, such as record owner or field value. References: [https://help.salesforce.com/s/articleView?id=sf.admin\\_sharing.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_sharing.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.security\\_sharing\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.security_sharing_rules.htm&type=5)

#### NEW QUESTION 12

Cloud Kicks wants to track shoe designs by products. Shoe designs should be unable to be deleted, and there can be multiple designs for one product across various stages.

Which two steps should the administrator configure to meet this requirement? Choose 2 answers

- A. Add a custom master-detail field for shoe designs on the Product object,
- B. Create a custom object for shoe designs.
- C. Use the standard object for designs.
- D. Configure a custom lookup field for shoe designs on the Product object.

**Answer:** BD

#### Explanation:

To track shoe designs by products, prevent them from being deleted, and allow multiple designs for one product across various stages, the administrator should create a custom object for shoe designs and configure a custom lookup field for shoe designs on the Product object. This will create a one-to-many relationship between products and shoe designs, and allow users to link multiple shoe designs to one product record. To prevent shoe designs from being deleted, the administrator can use validation rules or permissions. Adding a custom master-detail field for shoe designs on the Product object will create a many-to-one relationship, which is not desired. Using the standard object for designs or configuring a validation rule will not meet the requirement. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_object\\_relationships\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_object_relationships_overview.htm&type=5)

#### NEW QUESTION 15

Once an opportunity reaches the negotiation stage at cloud kicks, The Amount fields becomes required for sales users. Sales managers need to be able to move opportunities into this stage without knowing the amount.

How should the administrator require this field during the negotiation stage for sales users but allow their managers to make changes?

- A. Make the field required for all users.
- B. Create a formula field to fill in the field for managers.
- C. Assign the administrator profile to the managers.
- D. Configure a validation rule to meet the criteria.

**Answer: D**

**Explanation:**

To require the Amount field during the negotiation stage for sales users but allow their managers to make changes, the administrator should configure a validation rule

that checks if the user profile is not a salesmanager, the stage is negotiation, and the amount is blank. This will prevent sales users from saving the record without entering an amount, but allow sales managers to do so. Making the field required for all users will not meet the requirement. Creating a formula field or assigning the administrator profile to the managers will not affect field requirement. References: [https://help.salesforce.com/s/articleView?id=sf.validation\\_rules\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.validation_rules_overview.htm&type=5)

**NEW QUESTION 16**

The sales manager at Cloud Kicks wants to set up a business process where opportunity discounts over 30% need to be approved by the VP of sales. Any discounts above 10% need to be approved by the user's manager. The administrator has been tasked with creating an approval process. Which are two considerations the administrator needs to review before setting up this approval process?

Choose 2 answers

- A. Create a custom Discount field on the opportunity to capture the discount amount
- B. Populate the Manager standard field on the sales users' User Detail page.
- C. Configure two separate approval processes.
- D. Allow the submitter choose the approver manually.

**Answer: AC**

**Explanation:**

Discount is not a standard field on the Opportunity object, so you need to create a custom field to capture the discount amount or percentage for each opportunity. To set up an approval process where opportunity discounts over 30% need to be approved by the VP of sales, and any discounts above 10% need to be approved by the user's manager, you need to configure two separate approval processes with different entry criteria based on the discount field value and different approvers based on their roles. References: [https://help.salesforce.com/s/articleView?id=sf.approvals\\_getting\\_started.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.approvals_getting_started.htm&type=5)

**NEW QUESTION 17**

The VP of sales at Dreamhouse Realty has requested a dashboard to visualize enterprise sales across the different teams. The key piece of data is the total of all sales for the year and the progress to the enterprise sales goal.

What dashboard component will effectively show this number and the proximity to the total goal as a single value?

- A. Table
- B. Stacked Bar
- C. Donut
- D. Gauge

**Answer: D**

**Explanation:**

A gauge component shows a single value along with its percentage of a total value within predefined ranges using colors (red-yellow-green). It is useful for showing key performance indicators (KPIs) such as total sales amount and progress towards sales goal. References: [https://help.salesforce.com/s/articleView?id=sf.dashboards\\_gauge\\_component\\_type.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.dashboards_gauge_component_type.htm&type=5)

**NEW QUESTION 21**

An administrator at Ursa Major Solar needs to send information to an external accounting system

What workflow action should the administrator use to accomplish this?

- A. Assign Task
- B. Outbound Message
- C. Create Record
- D. Custom Notification

**Answer: B**

**Explanation:**

Outbound message allows you to send information to an external system as part of a workflow rule or approval process. You can use outbound message to specify which fields to send and which endpoint URL to send them to.

References: [https://help.salesforce.com/s/articleView?id=sf.workflow\\_om\\_considerations.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.workflow_om_considerations.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.workflow\\_om\\_define.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.workflow_om_define.htm&type=5)

**NEW QUESTION 26**

The administrator at Universal Containers has a screen flow that helps users create new leads.

When lead source is "Search Engine", the administrator needs to require the user to choose a specific

a search engine from a picklist. If lead source is not "Search Engine", this picklist should be hidden. How should the administrator complete this requirement?

- A. Assign a decision element to direct the user to a second screen to hold specific search engine only when a lead source is "Search Engine".
- B. Use an assignment element, one for when lead source is "Search Engine" and one for everything else.
- C. Create a picklist for specific search engine, and set conditional visibility so that it is only shown when lead source is "Search Engine".
- D. Configure a picklist for specific search engine, and use a validation rule to conditionally show only when lead source is "Search Engine"

**Answer: C**

**Explanation:**

To require users to choose a specific search engine from a picklist when lead source is "Search Engine", and hide it otherwise, the administrator should create a picklist for specific search engine on the same screen as lead source, and set conditional visibility so that it is only shown when lead source is "Search Engine". This will make sure that users see only relevant fields based on their input. A decision element will create an extra screen that may disrupt user experience. An assignment element will not affect field visibility. A validation rule will not hide fields but only show errors when values are invalid. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements\\_screen\\_components\\_picklist.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_screen_components_picklist.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements\\_screen\\_components\\_conditional\\_visibility.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_screen_components_conditional_visibility.htm&type=5)

**NEW QUESTION 30**

Northern Trail Outfitters wants emails received from customers to generate cases automatically. How should the administrator ensure that the emails are sent to the correct queue?

- A. Utilize a flow to identify the correct queue and assign the case.
- B. Use a custom email services to set the owner of the case upon creation.
- C. Create an Escalation Rules to send cases to the correct queue.
- D. Configure Email-to-Case so emails are delivered to the correct queue

**Answer: D**

**Explanation:**

Email-to-Case allows administrators to set up routing addresses that automatically create cases from incoming emails and assign them to queues based on predefined criteria. This way, emails from customers can generate cases automatically and be sent to the correct queue. A flow is a tool for building automated processes, but it is not designed for email routing. A custom email service is a way to process inbound emails using Apex code, but it requires coding skills and is more complex than Email-to-Case. An escalation rule is a way to escalate cases based on certain conditions, but it does not create cases from emails or assign them to queues. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_email2case.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_email2case.htm&type=5)

**NEW QUESTION 33**

Universal Containers has enabled Data Protection and Privacy for its org. Which page layouts will have the Individual field available for tracking data privacy information?

- A. Case and Opportunity
- B. Account and User
- C. Contact, Lead, and Person Account
- D. Individual, User, and Account

**Answer: C**

**Explanation:**

Contact, lead, and person account are three objects that will have the individual field available for tracking data privacy information when data protection and privacy is enabled for an org. The individual object is an object that stores data privacy preferences and requests for customers who are subject to privacy regulations such as GDPR; it can be linked to contact, lead, or person account records using the individual field. Case and opportunity, account and user, or individual, user, and account are not combinations of objects that will have the individual field available for tracking data privacy information; they either do not store customer data or do not support individual object relationships. References: [https://help.salesforce.com/s/articleView?id=sf.individual\\_object.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.individual_object.htm&type=5)

**NEW QUESTION 37**

The administrator at Ursa Major Solar has Created a new record type for customer warranty cases which two assignments should the administrator use to display the new record type to users? Choose 2 answers

- A. Profile Assignment
- B. Role Assignment
- C. App Manager Assignment.
- D. Page layout Assignment.

**Answer: AD**

**Explanation:**

Profile assignment and page layout assignment are two assignments that should be used to display a new record type to users. Profile assignment determines which profiles can access a record type and which record type is the default for each profile. Page layout assignment determines which page layout is assigned to each record type and profile combination. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_recordtype\\_assign.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_recordtype_assign.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.customize\\_recordtype\\_pagelayoutassign.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_recordtype_pagelayoutassign.htm&type=5)

**NEW QUESTION 40**

An administrator is building a Lightning app and sees a message that a My Domain must be set up first. What should the administrator take into consideration when enabling My Domain?

- A. Single sign-on must be disabled prior to implementing MyDomain.
- B. The login for all internal and external users changes to the My Domain login

- C. A deployed My Domain is irreversible and renaming is unavailable.
- D. The URL instance for a My Domain stays the same for every release

**Answer:** B

**Explanation:**

My Domain is a feature that allows administrators to create a custom domain name for their Salesforce org that replaces their instance URL (such as na35.salesforce.com). My Domain provides benefits such as improved security; enhanced branding; faster navigation; access to Lightning components; etc. However, one of the considerations when enabling My Domain is that it changes how users log in to Salesforce - instead of using their instance URL login (such as login.salesforce.com), they have to use their My Domain login (such as mydomain.my.salesforce.com). This applies to all internal and external users who access Salesforce via web browser or mobile app.  
References:[https://help.salesforce.com/s/articleView?id=sf.domain\\_name\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.domain_name_overview.htm&type=5)

**NEW QUESTION 45**

The administrator has been asked to automate a simple field update on the account. When a support agent changes the status of the account to 'Audited', they would like the system to automatically update the Audited date field on the account with today's date.  
Which tool should the administrator use to complete this automation?

- A. Approval process
- B. Formula Field
- C. Flow Builder
- D. Validation Rule

**Answer:** B

**Explanation:**

A formula field is a type of field that calculates a value based on an expression or formula that references other fields or constants. For example, a formula field can display today's date by using the TODAY() function. In this case, the administrator can create a formula field on the account object that updates the audited date field with today's date when the status of the account is changed to 'Audited'.  
References:[https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_formulas.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_formulas.htm&type=5)

**NEW QUESTION 47**

The Call center manager in Ursa Major Solar wants to provide agents with a case dashboard that can be drilled down by case origin, status and owner.  
What should an Administrator add to the dashboard to fulfil the request?

- A. Dashboard Filter
- B. Bucket column
- C. Dashboard component
- D. Combination Chart

**Answer:** A

**Explanation:**

A dashboard filter is a feature that allows users to filter dashboard components by one or more field values without changing the underlying report data. For example, a dashboard filter can allow users to view cases by origin, status, or owner. A dashboard filter consists of a filter name, one or more source fields, and one or more filter values. Users can apply one or more filters to see different views of the dashboard data.  
References:[https://help.salesforce.com/s/articleView?id=sf.dashboards\\_filters.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.dashboards_filters.htm&type=5)

**NEW QUESTION 52**

Universal container has a contact Lightning record Page with a component that shows LinkedIn data. The sales team would like to only show this component to sales users when they are on their mobile phones. Choose 2 Answers.

- A. Filter the component visibility with User > Profile > name = sales User.
- B. Filter the component visibility with Form Factor = phone
- C. Filter the component visibility with view = Mobile/Tablet.
- D. Filter the component visibility with User > Role > Name = Sales User.

**Answer:** AB

**Explanation:**

To show a component that shows LinkedIn data only to sales users when they are on their mobile phones, the administrator should filter the component visibility with two conditions:  
? User > Profile > name = sales User, which checks if the user's profile name is "sales User"  
? Form Factor = phone, which checks if the user's device is a phone  
Filtering with view or role will not achieve the desired result. References:  
[https://help.salesforce.com/s/articleView?id=sf.app\\_builder\\_page\\_visibility\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.app_builder_page_visibility_rules.htm&type=5)

**NEW QUESTION 54**

The administrator at AW Computing wants to send off client welcome tasks and a welcome email to the primary contact automatically when an Opportunity is Closed won.  
What automation tool best accomplishes this?

- A. Validation Rule
- B. Outbound Message
- C. Approval Process
- D. Process Builder

**Answer:** D

**Explanation:**

Process Builder is a tool that can be used to automate business processes by creating record-triggered flows that execute actions when certain conditions are met. In this case, Process Builder can be used to create a flow that executes when an opportunity is closed won and creates a client welcome task and a welcome email for the primary contact. References: [https://help.salesforce.com/s/articleView?id=sf.process\\_which\\_tool.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.process_which_tool.htm&type=5)

**NEW QUESTION 55**

Ursa Major Solar has a path on Case. The company wants to require its users to follow the status values as they are on the path. Agents should be prohibited from reverting the Case back to a previous status.

Which feature should an administrator use to fulfill this request?

- A. Predefined Field Values
- B. Global Value Picklists
- C. Dependent Picklists
- D. Validation Rules

**Answer:** D

**Explanation:**

To require users to follow the status values as they are on the path and prevent them from reverting back to previous status values, the administrator should use validation rules that check if the statusfield value is changed from one value to another value that is not allowed by business logic. For example, if status values are New > In Progress > Closed, then a validation rule can check if status is changed from Closed to In Progress or New, and show an error message if true. Predefined Field Values, Global Value Picklists, and Dependent Picklists are not able to enforce status progression or prevent status reversion. References: [https://help.salesforce.com/s/articleView?id=sf.validation\\_rules\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.validation_rules_overview.htm&type=5)

**NEW QUESTION 60**

The sales manager at cloud Kicks approves time off for their employees. They asked the administrator to ensure these requests are seen and responded to by a backup manager while the sales manager is out on vacation.

What should administrator use to fulfill the requirement?

- A. Delegated approver
- B. Two step Approval process
- C. Approval history related list
- D. Delegated Administrator

**Answer:** A

**Explanation:**

Delegated approver is a feature that should be used to fulfill this requirement. Delegated approver allows users to delegate their approval authority to another user for a specified period of time, such as when they are out on vacation. Users can specify which approval requests they want to delegate and who they want to delegate them to. References: [https://help.salesforce.com/s/articleView?id=sf.approvals\\_delegate.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.approvals_delegate.htm&type=5)

**NEW QUESTION 61**

Sales reps at Cloud Kicks want to be notified when they have a high likelihood of winning an opportunity over \$1,000,000.

Which feature meets this requirement?

- A. Key Deals
- B. Big Deal Alerts
- C. Activity Timeline.
- D. Performance chart.

**Answer:** B

**Explanation:**

Big Deal Alerts are notifications that are sent to users when an opportunity reaches a certain amount, probability, or stage. They can be configured by administrators to alert sales reps or managers when they have a high likelihood of winning a big deal. Key Deals are a feature of Einstein Opportunity Scoring that shows the top opportunities based on their score and stage, but they do not send notifications. Activity Timeline is a component of Lightning Experience that shows the past and upcoming activities related to a record, but it does not notify users of big deals. Performance chart is a type of report chart that shows how well users or teams are performing against their goals, but it does not alert users of big deals. References: [https://help.salesforce.com/s/articleView?id=sf.forecasts3\\_big\\_deal.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.forecasts3_big_deal.htm&type=5)

**NEW QUESTION 66**

Ursa Major Solar offers amazing experiences for all of its employees. The Employee engagement committee wants to post updates while restricting other employees from posting. What should the administrator create to meet this request?

- A. Chatter Stream.
- B. Chatter Broadcast Group
- C. Chatter Recommendations.
- D. Chatter Unlisted Group

**Answer:** B

**Explanation:**

Chatter broadcast group is a type of group that should be created to meet this request. Chatter broadcast group is a group where only group owners and managers can create posts, but anyone can comment on posts. This can be useful for sharing important updates or announcements with a large audience without

cluttering the feed with other posts. References: [https://help.salesforce.com/s/articleView?id=sf.collab\\_groups\\_create.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.collab_groups_create.htm&type=5)

#### NEW QUESTION 67

An administrator has been asked to update a flow that was created as part of a recent update. When the administrator opens the flow for editing, the Flow toolbox offers only four elements: Assignment, Decision, Get Records, and Loop. What would cause this?

- A. The flow is a screen flow.
- B. The version of the flow is inactive.
- C. The flow is a before save flow.
- D. The version of the flow is activated.

**Answer: C**

#### Explanation:

Before save flows only support four elements: Assignment, Decision, Get Records, and Loop. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements.htm&type=5)

#### NEW QUESTION 72

AW Computing (AWC) occasionally works with independent contractors, who the company stores as Contacts in Salesforce. Contractors often change agencies, and AWC wants to maintain the historical accuracy of the record. What should AWC use to track Contacts?

- A. Use a partner community to track the Contacts.
- B. Create a new Contact record for each agency.
- C. Create a Junction object to track many-to-many relationship.
- D. Enable Contacts to multiple Accounts.

**Answer: D**

#### Explanation:

Contacts to multiple accounts is a feature that allows you to associate a single contact with multiple accounts, both business and person accounts. This way, you can maintain the historical accuracy of the contact record without creating duplicate records for each account. References: [https://help.salesforce.com/s/articleView?id=sf.contacts\\_multiple\\_accounts.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.contacts_multiple_accounts.htm&type=5)

#### NEW QUESTION 75

When a Sales rep clicks a button on an opportunity, a simple discount calculator screen should be launched. Which automation tool should an administrator use to build this discount calculator screen?

- A. Flow Builder
- B. Workflow Rule
- C. Platform Event
- D. Process Builder

**Answer: A**

#### Explanation:

Flow Builder supports creating a screen that can launch a simple discount calculator when a button is clicked on an opportunity. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_builder\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_builder_overview.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.flow\\_distribute\\_button.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_distribute_button.htm&type=5)

#### NEW QUESTION 80

The administrator at Ursa Major Solar need to make sure the unassigned cases from VP customers get transferred to the appropriate service representative within 5 hours. VIP Customers have access to support 24 hours a day. How should this be configured?

- A. Assignment Rules.
- B. Business Hours.
- C. CaseQueues
- D. Escalation Rules

**Answer: D**

#### Explanation:

Escalation rules allow you to escalate cases based on certain criteria, such as time or priority. You can use escalation rules to transfer unassigned cases to the appropriate service representative within a specified time frame. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_escalation.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_escalation.htm&type=5)

#### NEW QUESTION 81

Universal Containers (UC) would like to count the number of open cases associated with each account and update the account with this value every Friday evening. UC has several hundred open cases at any given time. What should the administrator use to complete this request?

- A. Use a record trigger flow.

- B. Use a scheduled process builder.
- C. Use a Roll-Up summary.
- D. Use a scheduled flow

**Answer:** D

**Explanation:**

A scheduled flow is a type of flow that runs at scheduled times on batches of records that meet certain criteria. It can be used to count the number of open cases associated with each account and update the account with this value every Friday evening by using an assignment element to loop through the accounts and cases and assign the count value to a field on the account record. Using a record trigger flow, a scheduled process builder, or a roll-up summary field are not suitable options for this requirement because they would not run at scheduled times or on batches of records; they would run every time a record is created or updated, which may not reflect the accurate count of open cases at the end of each week. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_concepts\\_scheduled.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_concepts_scheduled.htm&type=5)

**NEW QUESTION 83**

Universal Container wants to increase the security of their org by requiring stricter user passwords. Which two of the following should an administrator configure? Choose 2 answers

- A. Password different than username
- B. Prevent common words
- C. Minimum password length.
- D. Password complexity requirement.

**Answer:** CD

**Explanation:**

Minimum password length and password complexity requirement are two settings that administrators can configure to increase the security of user passwords in Salesforce. They determine how long and how complex the passwords must be to meet the security standards. Password different than username and prevent common words are not valid settings in Salesforce, although they are good practices for creating strong passwords. References: [https://help.salesforce.com/s/articleView?id=sf.admin\\_password\\_policies.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_password_policies.htm&type=5)

**NEW QUESTION 85**

Ursa Major Solar has its business hours set from 9:00 AM to 5:00 PM for the reps that are on pacific time. The reps on Eastern Time need business hours set to start 3 hours earlier to cover for support. How should an administrator solve for this issue?

- A. Set temporary business hours for each time zone.
- B. Adjust the current business hours to accommodate the Eastern Time Zone.
- C. Create one set of business hours per timezone.
- D. Allow the reps to set business hours manually.

**Answer:** C

**Explanation:**

Business hours are used to specify the days and hours when your company's employees work. You can create multiple sets of business hours for different time zones or regions and assign them to users based on their location or function. To meet the requirement of having different business hours for reps on pacific time and eastern time, you need to create one set of business hours per time zone and assign them accordingly. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_supporthours.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_supporthours.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.customize\\_supporthours\\_assign.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_supporthours_assign.htm&type=5)

**NEW QUESTION 86**

The sales team at Ursa Major Solar has asked the administrator to automate an outbound message. What should the administrator utilize to satisfy the request?

- A. Process builder
- B. Task assignment
- C. Workflow rule
- D. Flow builder

**Answer:** C

**Explanation:**

To automate an outbound message, the administrator should use a workflow rule that defines the criteria for sending the message and the actions to perform when those criteria are met. One of the actions available for workflow rules is sending an outbound message to a designated endpoint URL with specified fields as parameters. Process builder, task assignment, and flow builder are not able to send outbound messages directly. References: [https://help.salesforce.com/s/articleView?id=sf.workflow\\_define.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.workflow_define.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.workflow\\_action\\_outboundmessaging.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.workflow_action_outboundmessaging.htm&type=5)

**NEW QUESTION 90**

Northern Trail Outfitters has requested that when the Referral Date field is updated on the custom object Referral Source, the parent object Referral also needs to be updated. Which automation solution should an administrator use to meet this request?

- A. Lightning Web Component
- B. Approval Process
- C. Workflow Field Update
- D. Process Builder

**Answer:** D

**Explanation:**

Process Builder is an automation tool that allows you to create processes that perform actions based on criteria that you specify. You can use Process Builder to update fields on related records when a record is created or updated. To meet the requirement of updating the parent object Referral when the Referral Date field is updated on the custom object Referral Source, you need to create a process that triggers when a Referral Source record is updated, checks if the Referral Date field has changed, and updates the Referral Date field on the related Referral record. References: [https://help.salesforce.com/s/articleView?id=sf.process\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.process_overview.htm&type=5)

**NEW QUESTION 95**

Sales reps at Ursa Major Solar are having difficulty managing deals. The leadership team has asked administrator to help sales reps prioritize and close more deals.  
the administrator configure to help with these issues?

- A. Einstein Activity Capture
- B. Einstein Opportunity Scoring
- C. Einstein Search Personalization Einstein Lead Scoring

**Answer: B**

**Explanation:**

To help sales reps prioritize and close more deals, the administrator should use Einstein Opportunity Scoring, which is a feature that assigns each opportunity a score from 1 to 99 based on how likely it is to be won. The score is calculated using historical data and machine learning models, and can help reps focus on the most promising opportunities and take actions to improve their chances of winning. Einstein Activity Capture, Einstein Search Personalization, and Einstein Lead Scoring are not related to opportunity management. References: [https://help.salesforce.com/s/articleView?id=sf.einstein\\_sales\\_oppty\\_scoring.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.einstein_sales_oppty_scoring.htm&type=5)

**NEW QUESTION 99**

A Sales user is trying to manage Campaign Members for an upcoming networking event. The user can view the Campaign, but add new Campaign Members or update Member statuses.  
How can an administrator troubleshoot this problem?

- A. Create a permission set to allow the user to edit Campaign Members.
- B. Provide the user access to both Leads and Contacts to edit all Members.
- C. Make sure the Marketing User Checkbox is checked on the user record page.
- D. Run a Campaign report and update any Member information via Data Loader.

**Answer: C**

**Explanation:**

To allow a user to add new Campaign Members or update Member statuses, the administrator should make sure that Marketing User Checkbox is checked on the user record page. This checkbox enables users to create, edit, and delete campaigns, configure advanced campaign setup, import leads, manage campaign members, and update campaign history via mass update. The checkbox also requires users to have Read and Edit permissions on campaigns and leads/contacts. Creating a permission set, providing access to both Leads and Contacts, or running a Campaign report will not enable users to manage Campaign Members. References: [https://help.salesforce.com/s/articleView?id=sf.campaigns\\_enable.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.campaigns_enable.htm&type=5)

**NEW QUESTION 100**

Cloud Kicks (CK) is partnering with a used shoe store and second-hand bicycle emporium. CK has an automated business process it wants to run once a week to count the number of open cases related to an account.  
How should the administrator recommend automating this business process?

- A. Create a workflow rule with an outbound message.
- B. Set up a scheduled process in Process Builder.
- C. Configure a scheduled flow in flow Builder.
- D. Use a process to update the account when it is edited

**Answer: C**

**Explanation:**

Flow Builder supports creating a scheduled flow that can run at specified intervals and perform actions on a set of records that meet certain criteria. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_builder\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_builder_overview.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.flow\\_concepts\\_scheduled\\_start.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_concepts_scheduled_start.htm&type=5)

**NEW QUESTION 102**

A sales rep has left the company and an administrator has been asked to re-assign all their accounts and opportunities to a new sales rep and keep the teams as is. Which tool should an administrator use to accomplish this?

- A. Data Loader
- B. Mass Transfer Tool
- C. Data Import Wizard
- D. DataLoader.io

**Answer: B**

**Explanation:**

The mass transfer tool allows you to transfer up to 250 records at a time from one user to another user while keeping the existing team members intact. You can access this tool from Setup by entering Mass Transfer Records in the Quick Find box. References: [https://help.salesforce.com/s/articleView?id=sf.mass\\_transfer\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.mass_transfer_overview.htm&type=5)

**NEW QUESTION 107**

An administrator created a record trigger flow to update contacts.  
How should the administrator reference the values of the active record the flow is running on?

- A. Use the {!Contact.Id} global variable.
- B. Use the {!Account.Id} record variable.
- C. Use the \$Record global variable.
- D. Use the Get Records element to find the Id.

**Answer:** C

**Explanation:**

The \$Record global variable allows you to reference the values of the active record the flow is running on.  
References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_global\\_variables.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_global_variables.htm&type=5)

**NEW QUESTION 109**

Ursa Major Solar has a path on Case. The Company wants to require its users to follow the status values as they are on the path. Agents should be prohibited from preventing the case back to a previous status.

Which Feature Should an administrator use to fulfill this request?

- A. Validation rules.
- B. Global Value Picklists
- C. Predefined field Values.
- D. Dependent Picklists.

**Answer:** A

**Explanation:**

Validation rules are a way to enforce data quality and business logic by preventing users from saving records that do not meet certain criteria. They can be used to require users to follow the status values as they are on the path and prevent them from reverting the case back to a previous status by using formulas that compare the old and new values of the status field. Global value picklists are a way to create and maintain picklist values that can be shared across multiple fields, but they do not enforce any logic or order on the values. Predefined field values are a way to set default values for fields on path settings, but they do not prevent users from changing them later. Dependent picklists are a way to filter the values of one picklist based on the value of another picklist, but they do not prevent users from going back to a previous value. References: [https://help.salesforce.com/s/articleView?id=sf.validation\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.validation_rules.htm&type=5)

**NEW QUESTION 113**

Cloud Kicks has a custom object called Shipments. The Company wants to see all the shipment items from an Account page. When an Account is deleted, the shipments should remain.  
What type of relationship should the administrator make between Shipments and Account?

- A. Shipments should have a lookup to Account.
- B. Accounts should have a lookup to Shipments.
- C. Shipments should have a master-detail to Accounts.
- D. Accounts should have a master-detail to Shipments.

**Answer:** A

**Explanation:**

A lookup relationship is a type of relationship that links two objects together, but does not affect security or deletion. It can be used to create a relationship between shipments and accounts where shipments should have a lookup to accounts; this way, shipments can show related account information on their records, but when an account is deleted, the shipments remain. Accounts should have a lookup to shipments is not a valid option because it does not match the requirement of seeing all shipment items from an account page; it would show related account information on shipment records instead. Shipments should have a master-detail to accounts or accounts should have a master-detail to shipments are not valid options either because they do not match the requirement of keeping shipments when an account is deleted; they would delete shipments along with their master account records. References: [https://help.salesforce.com/s/articleView?id=sf.relationships\\_lookup.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.relationships_lookup.htm&type=5)

**NEW QUESTION 117**

The administrator at Cloud Kicks created a new field for tracking returns on their new cloud shoe. A user has submitted case to the administrator indicating that the new field is unavailable. Which two steps should an administrator do to troubleshoot this issue?  
Choose 2 answers

- A. Ensure that the page layout for the user's profile has been updated.
- B. Run the setup audit trail for the organization.
- C. Update the organization wide default for the object.
- D. Review the field level security of the field for the user profile

**Answer:** AD

**Explanation:**

Page layout and field level security are two factors that determine whether a user can see a new field on a record. To troubleshoot this issue, the administrator should ensure that the page layout for the user's profile has been updated to include the new field and that the field level security of the field for the user profile allows read or edit access. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_layoutoverview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_layoutoverview.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.admin\\_fls.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_fls.htm&type=5)

**NEW QUESTION 121**

An administrator at Universal Containers is reviewing current security settings in the company's Salesforce org.  
What Should the administrator do to prevent unauthorized access to Salesforce?

- A. Disable TLS requirements for sessions.
- B. Enable multi factor authentication
- C. Customize organization wide default
- D. Enable caching and autocomplete on login page

**Answer: B**

**Explanation:**

Multi factor authentication (MFA) is a security feature that requires users to verify their identity using two or more factors when they log in to Salesforce. It can help prevent unauthorized access to Salesforce by adding an extra layer of protection beyond username and password. Enabling MFA can be done by administrators in the security settings or by users in their personal settings. Disabling TLS requirements for sessions, customizing organization wide defaults, or enabling caching and autocomplete on login page are not actions that would prevent unauthorized access to Salesforce; in fact, they may reduce security or have no effect on security at all. References: [https://help.salesforce.com/s/articleView?id=sf.security\\_mfa.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.security_mfa.htm&type=5)

**NEW QUESTION 123**

Northern Trail Outfitters has asked an administrator to ensure that when a contact with a title of CEO is created, the contact's account record gets updated with the CEO's name. Which feature should an administrator use to implement this request?

- A. Quick Action
- B. Workflow Rule
- C. Process Builder
- D. Validation Rule

**Answer: C**

**Explanation:**

Process Builder is a tool that can be used to implement this request. Process Builder can create record-triggered flows that execute actions when certain conditions are met. In this case, Process Builder can create a flow that executes when a contact with a title of CEO is created and updates the contact's account record with the CEO's name. References: [https://help.salesforce.com/s/articleView?id=sf.process\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.process_overview.htm&type=5)

**NEW QUESTION 125**

Cloud Kicks has created a screen flow for their sales team to use when they add new leads. The screen flow collect name, email and shoe preference. which two things should the administrator do to display the screen flow? Choose 2 answers

- A. Create a tab and add the screen flow to the page.
- B. use a flow element and add the screen flow to the record page.
- C. Add the flow in the utility bar of the console
- D. install an app from the AppExchange

**Answer: AB**

**Explanation:**

To display the screen flow, the administrator should create a tab and add the screen flow to the page. The administrator can also use a flow element and add the screen flow to the record page.

The other options are not relevant to this scenario. Adding the flow in the utility bar of the console will not display the screen flow. Installing an app from the AppExchange is not necessary to display the screen flow.

Here are the steps on how to create a tab and add the screen flow to the page:

- ? Go to Setup > Tabs.
- ? Click New.
- ? Enter a name and label for the tab.
- ? Select the Screen Flow tab type.
- ? Select the screen flow that you want to display.
- ? Click Save.

Here are the steps on how to use a flow element and add the screen flow to the record page:

- ? Go to Setup > Customize > Lightning App Builder.
- ? Select the record page that you want to add the screen flow to.
- ? Click Edit.
- ? Drag the Flow element from the Palette to the canvas.
- ? Select the screen flow that you want to display.
- ? Click Save.

**NEW QUESTION 130**

Northern Trail Outfitters wants to calculate how much revenue has been generated for each of its marketing campaigns. How should an administrator deliver this information?

- A. Design a standard Campaign report and add the value Won Opportunities in Campaign field.
- B. Perform periodic data job to update campaign records.
- C. Create a roll-up summary field on Opportunity to Campaign.
- D. Add a Total Value Field on campaign and use a workflow rule to update the value when an opportunity is won.

**Answer: C**

**Explanation:**

Roll-up summary fields allow you to calculate the sum of a field from child records related to a parent record. References: [https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_roll\\_up\\_summary\\_fields.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5)

#### NEW QUESTION 131

Cloud Kicks has asked the administrator to test a new screen flow that create contacts. What are two key components of testing the flow?  
Choose 2 answers

- A. Set Up a flow interview to test the flow.
- B. Run the flow using it to create contacts.
- C. Use Debug to test the flow in Flow Builder.
- D. Test the flow in a sandbox.

**Answer:** BC

#### Explanation:

Running the flow using it to create contacts and using debug to test the flow in Flow Builder are two key components of testing a new screen flow that creates contacts. Running the flow allows the administrator to see how the flow behaves in real time and check for any errors or unexpected results. Debugging the flow allows the administrator to simulate how the flow runs with different inputs and outputs and check for any logic or syntax errors. Setting up a flow interview or testing the flow in a sandbox are not necessary for testing a screen flow that creates contacts. References:  
[https://help.salesforce.com/s/articleView?id=sf.flow\\_test.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_test.htm&type=5)

#### NEW QUESTION 132

An administrator at Cloud Kicks is building a flow that needs to search for records that meet certain conditions and store values from those records in variable for use later in the flow. What flow element should the administrator add?

- A. Assignment
- B. Get Records
- C. Create Records
- D. Update Records

**Answer:** B

#### Explanation:

Get Records is a flow element that allows you to retrieve one or more records from an object that meet certain conditions and store them in a collection variable or a record variable for use later in the flow. You can also choose which fields from those records you want to store in variables. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements\\_data\\_getrecords.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_data_getrecords.htm&type=5)

#### NEW QUESTION 134

The marketing director at Northern Trail Outfitters has requested that the budget field is populated in order for the Lead Status field to be marked as qualified. What tool should the administrator use to fulfill this request?

- A. Lead Conversion.
- B. Require Field.
- C. Workflow Rule
- D. Validation Rule

**Answer:** D

#### Explanation:

Validation rule is a tool that can be used to enforce data quality and business logic by preventing users from saving records that do not meet certain criteria. In this case, a validation rule can be created on the Lead object to display an error message if the Lead Status field is marked as qualified and the Budget field is blank. References: [https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_validation\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_validation_rules.htm&type=5)

#### NEW QUESTION 138

An administrator at Universal Container needs an automated way to delete records based on field values.  
What automated solution should the administrator use?

- A. Workflow
- B. Process Builder
- C. Flow Builder
- D. Automation Studio

**Answer:** C

#### Explanation:

Flow Builder is a tool that can be used to create an automated way to delete records based on field values. Flow Builder can create flows that define the logic and actions for deleting records, such as finding records that match certain criteria and deleting them in bulk. Flows can be scheduled to run at regular intervals or triggered by other events or processes. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_builder.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_builder.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.flow\\_concepts\\_delete.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_concepts_delete.htm&type=5)

#### NEW QUESTION 141

An administrator at Cloud Kicks has a flow in production that is supposed to create new records. However, no new records are being created. What could the issue be?

- A. The flow is read only.
- B. The flow is inactive.
- C. The flow URL is deactivated.
- D. The flow trigger is missing.

**Answer:** B

**Explanation:**

A flow can be active or inactive depending on whether you want it to run or not. An inactive flow cannot be run by users or processes until you activate it. If a flow in production is supposed to create new records but it is not doing so, it could be because the flow is inactive and needs to be activated. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_distribute\\_activate.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_distribute_activate.htm&type=5)

**NEW QUESTION 145**

The Cloud Kicks sales manager wants to boost productivity by providing insights at the start of each day. Which three sales-specific standard Lightning components should administrator add to the homepage to meet this requirement? Choose 3 Answers.

- A. Activities
- B. Path
- C. Assistant
- D. Key Deals
- E. Performance chart.

**Answer:** ACD

**Explanation:**

To boost productivity by providing insights at the start of each day, the administrator should add three sales-specific standard Lightning components to the homepage:

- ? Activities, which shows tasks and events related to records that matter most to users
  - ? Assistant, which provides personalized suggestions and reminders for key updates and actions
  - ? Key Deals, which highlights important opportunities that need attention or are close to closing
- Path and Performance Chart are not standard Lightning components, but custom components that can be added to specific objects or pages. References: [https://help.salesforce.com/s/articleView?id=sf.home\\_components.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.home_components.htm&type=5)

**NEW QUESTION 146**

Cloud Kicks has a team of product owners that need a space to share feedback and ideas with just the product team. How should the administrator leverage Salesforce to help the team collaborate?

- A. Use Quick Actions to log communication.
- B. Configure a Chatter Public Group.
- C. Create a Chatter Private Group.
- D. Add Activity History to document tasks.

**Answer:** C

**Explanation:**

A Chatter private group is a type of Chatter group that allows members to share feedback and ideas with each other in a secure and exclusive space; only members can see and post in a private group. It can be used by Ursa Major Solar to create a space for product owners to collaborate with just the product team by creating a Chatter private group and adding product owners as members. Using quick actions to log communication, configuring a Chatter public group, or adding activity history to document tasks are not solutions for creating a space for product owners to collaborate with just the product team; they either do not provide privacy or do not support collaboration.

References: [https://help.salesforce.com/s/articleView?id=sf.collab\\_groups\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.collab_groups_overview.htm&type=5)

**NEW QUESTION 147**

The Support team at Ursa Major Solar prefers using split list views on the case homepage. Occasionally, the team views shipments from another support application. What should the administrator configure to allow the team to use the split list view?

- A. Filter by a single shipment record type in the list view.
- B. Include the Shipments tab on the app's navigation bar.
- C. Split views are only available on standard objects.
- D. Add the Manage List Views permission for support users.

**Answer:** C

**Explanation:**

Split views are a feature that allows users to view records as a split list on object home pages in Lightning Experience apps that use console navigation. Split views show records in two panes: a list view pane on the left and a record detail pane on the right. Users can switch between different list views and records without losing context or scrolling. However, split views are only available on standard objects such as accounts, contacts, leads, opportunities, cases, etc., and not on custom objects such as shipments. References: [https://help.salesforce.com/s/articleView?id=sf.lex\\_split\\_view.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.lex_split_view.htm&type=5)

**NEW QUESTION 148**

Northern Trail Outfitters wants to initiate expense reports from Salesforce to the external HR system. This process needs to be reviewed by managers and directors. Which two tools should administrator configure? Choose 2 answers

- A. Quick Action
- B. Outbound Message
- C. Approval Process
- D. Email Alert Action

**Answer:** AC

**Explanation:**

Quick actions allow you to initiate expense reports from Salesforce to an external HR system. Approval processes allow you to review the expense reports by

managers and directors.

References: [https://help.salesforce.com/s/articleView?id=sf.approvals\\_considerations.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.approvals_considerations.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.quick\\_actions\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.quick_actions_overview.htm&type=5)

#### NEW QUESTION 149

The CTO of AW Computing has defined a new policy for cases to improve customer satisfaction. All cases submitted with a Case Reason of Installation must be acknowledged immediately via email and assigned to the appropriate agents. Any cases that are still in the New status after 4 hours must be escalated to support management.

What case management tools need to be utilized for this requirement?

- A. Auto-response rules, Macros, Entitlements
- B. Auto-response rules, Queues, Macros
- C. Auto-response rules, Queues, Escalation Rules
- D. Auto-response rules, Entitlements, Escalation Rules

**Answer: B**

#### Explanation:

To advertise on TV, radio, print, and social under one banner called New Runners and aggregate total statistics for this marketing effort, an administrator should use Parent campaign field on Campaign object. This field allows creating hierarchical relationships between campaigns by specifying one campaign as parent of another campaign. Parent campaigns roll up statistics from child campaigns such as number of leads generated, amount of revenue won etc. For example, an administrator can create four child campaigns for TV, radio, print and social ads respectively and link them to one parent campaign called New Runners using Parent campaign field. Junction object, lookup relationship, and master-detail relationship are not features related to Campaign object or hierarchy. References: [https://help.salesforce.com/s/articleView?id=sf.campaigns\\_parent.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.campaigns_parent.htm&type=5)

#### NEW QUESTION 154

What should an administrator use as an identifier when importing and updating records from a separate system?

- A. Rich Text field
- B. Record ID
- C. Auto-Number field
- D. External ID

**Answer: D**

#### Explanation:

To use as an identifier when importing and updating records from a separate system, an administrator should use External ID field type on an object. External ID fields allow storing unique identifiers from external systems and using them for matching records during import or update operations. External ID fields can also be used for upsert operations that insert new records or update existing ones based on external ID values. For example, an administrator can create an External ID field on Account object that stores account numbers from an external ERP system and use it for importing or updating accounts from that system. Rich Text field, Record ID, and Auto-Number field are not suitable for using as identifiers when importing and updating records from a separate system. References: [https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_field\\_types.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_field_types.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.data\\_loader\\_upsert.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.data_loader_upsert.htm&type=5)

#### NEW QUESTION 156

DreamHouse Realty regularly processes customer requests for warranty work and would like to offer customers a self-serve option to generate cases.

Which two solutions should an administrator use to meet this request? Choose 2 answers

- A. Web-to-Case
- B. Case Escalation
- C. Case Queues
- D. Email-to-Case

**Answer: AD**

#### Explanation:

Web-to-Case and Email-to-Case are two solutions that allow customers to create cases from a web form or an email. Web-to-Case generates HTML code for a web form that you can place on your website. Email-to-Case converts incoming emails into cases.

References: [https://help.salesforce.com/s/articleView?id=sf.customizesupport\\_web\\_to\\_case.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customizesupport_web_to_case.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.customizesupport\\_email\\_to\\_case.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customizesupport_email_to_case.htm&type=5)

#### NEW QUESTION 161

Northern Trail Outfitters has a new flow that automatically sets the field values when a new account is created. That the flow is launched by a process, But the flow is not working properly.

What should administrator do to identify the problem?

- A. Use the native debug feature in the flow builder.
- B. Review debug logs with the login level.
- C. View the setup audit Trail and review for errors.
- D. Setup Email logs and review the send error log.

**Answer: A**

#### Explanation:

Native debug feature is a tool that can be used to identify the problem with the new flow. Native debug feature allows users to test a flow by running it with different input values and inspecting the output values at each element. Users can also see error messages and warnings that indicate where the flow failed or might fail. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_debug.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_debug.htm&type=5)

#### NEW QUESTION 165

An administrator supporting a global team of salesforce users has been asked to configure company settings.  
Choose 2 options

- A. Currency Locale
- B. Default Language
- C. Password Policy
- D. Login Hours

**Answer:** AB

#### Explanation:

Currency locale and default language are two of the company settings that an administrator can configure in Salesforce. Currency locale determines how currency amounts are formatted and displayed in reports and other places. Default language determines the language used for labels, buttons, tabs, and other elements in Salesforce. References: [https://help.salesforce.com/s/articleView?id=sf.admin\\_supported\\_currencies.htm&type=5https://help.salesforce.com/s/articleView?id=sf.admin\\_supported\\_languages.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_supported_currencies.htm&type=5https://help.salesforce.com/s/articleView?id=sf.admin_supported_languages.htm&type=5)

#### NEW QUESTION 166

Universal Containers has three separate lines of business. Each line has specific fields that must be displayed to users. However, the fields needed by the sales team are different than the fields needed by the service team.  
How should the administrator configure this requirement?

- A. Create two record types, each with 3 page layouts.
- B. Create one record type with six Page Layouts.
- C. Create three record types, each with 2 page layouts.
- D. Create six record types, each with 1 page layout.

**Answer:** C

#### Explanation:

A record type is a feature that allows administrators to offer different business processes, picklist values, page layouts, etc., to different users based on their profile or role. A page layout is a feature that allows administrators to control how fields, related lists, buttons, etc., are arranged on a record detail or edit page for each object. In this case, since Universal Containers has three separate lines of business with specific fields for each line; and since sales team needs different fields than service team; the administrator should create three record types for each line of business; and create two page layouts for each record type - one for sales team and one for service team. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_recordtype.htm&type=5https://help.salesforce.com/s/articleView?id=sf.customize\\_pagelayouts\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_recordtype.htm&type=5https://help.salesforce.com/s/articleView?id=sf.customize_pagelayouts_overview.htm&type=5)

#### NEW QUESTION 170

What are three Setting an administrator should configure to make it easy for approvers to respond to approval requests?  
Choose 3 Answers.

- A. Update the organizations chatter setting to allow approvals.
- B. Enable the organizations Email approval response setting.
- C. Specify initial submission actions within the approval process.
- D. Add the Items to approve component to the approvers home page.
- E. Create a flow to automatically approve all records.

**Answer:** ACD

#### Explanation:

To make it easy for approvers to respond to approval requests, the administrator should configure three settings:  
? Update the organization's chatter setting to allow approvals, which enables approvers to approve or reject requests from chatter feeds or email notifications  
? Enable the organization's Email approval response setting, which allows approvers to reply to approval request emails with keywords such as APPROVE or REJECT  
? Add the Items to approve component to the approvers home page, which shows a list of pending approval requests that can be acted upon with one click  
Specifying initial submission actions within the approval process will not affect how approvers respond to requests. Creating a flow to automatically approve all records will bypass the approval process altogether. References: [https://help.salesforce.com/s/articleView?id=sf.approvals\\_considerations.htm&type=5https://help.salesforce.com/s/articleView?id=sf.approvals\\_email.htm&type=5https://help.salesforce.com/s/articleView?id=sf.approvals\\_one\\_click.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.approvals_considerations.htm&type=5https://help.salesforce.com/s/articleView?id=sf.approvals_email.htm&type=5https://help.salesforce.com/s/articleView?id=sf.approvals_one_click.htm&type=5)

#### NEW QUESTION 172

Cloud kicks has the organization-wide sharing default set to private on the shoe object. The sales manager should be able to view a report containing shoe records for all of the sales reps on their team.  
Which 3 items should the administrator configure to provide appropriate access to the report?  
Choose 3 answers

- A. Custom report type.
- B. Folder access
- C. Report subscription
- D. Field level security

**Answer:** ABD

#### Explanation:

To provide appropriate access to a report that contains shoe records for all of the sales reps on their team, the administrator should configure three items:  
? A custom report type that includes the shoe object and its fields  
? A folder access that grants access to the sales manager and their team members to view and run reports in that folder  
? A field level security that allows the sales manager and their team members to see all the fields on the shoe object Report subscription, while useful for

scheduling and delivering reports, does not affect access to the report itself. References:  
[https://help.salesforce.com/s/articleView?id=sf.reports\\_builder\\_create\\_report\\_type.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.reports_builder_create_report_type.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.reports\\_manage\\_folders.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.reports_manage_folders.htm&type=5)  
[https://help.salesforce.com/s/articleView?id=sf.admin\\_fls.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_fls.htm&type=5)

#### NEW QUESTION 173

The administrator at AW Consulting has created a custom picklist field. Business users have requested that it be a text field. The administrator attempts to change the field type but, is unable to because it is referenced by other functionalities. Which functionality is preventing the field type from being changed?

- A. Formula fields
- B. Record types
- C. Visualforce
- D. Javascript

**Answer:** A

#### Explanation:

Formula fields are types of fields that calculate a value based on an expression or formula that references other fields or constants. Formula fields prevent administrators from changing their field type once they are created because they may be referenced by other functionalities such as reports, validation rules, workflow rules, etc., that depend on their data type and value. If a formula field is referenced by other functionalities, then changing its field type may cause errors or unexpected results. References: [https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_formulas.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_formulas.htm&type=5)

#### NEW QUESTION 178

Northern Trail Outfitters has two different sales processes: one for business opportunities with four stages and one for partner opportunities with eight stages. Both processes will vary in page layouts and picklist value options. What should an administrator configure to meet these requirements?

- A. Validation rules that ensure that users are entering accurate sales stage information.
- B. Different page layouts that control the picklist values for the opportunity types.
- C. Public groups to limit record types and sales processes for opportunities.
- D. Separate record types and Sales processes for the different types of opportunities.

**Answer:** D

#### Explanation:

Record types and sales processes allow you to have different page layouts, fields, required fields, and picklist values for different types of opportunities. References: <https://www.salesforceben.com/salesforce-record-types/> <https://trailhead.salesforce.com/content/learn/projects/create-an-opportunity-record-type-for-npsp/create-and-manage-stages-and-sales-processes>

#### NEW QUESTION 181

Sales Users at Cloud Kicks are requesting that the data in the industry field on the Account object displays on the Opportunity page layout. Which type of the field should an administrator create to accomplish this?

- A. Custom Account Field
- B. Standard Account Field.
- C. Cross Object Formula Field
- D. Master detail relationship Field

**Answer:** C

#### Explanation:

A cross object formula field is a type of formula field that references fields from related objects using relationships such as lookup or master-detail. It can be used to display data from one object on another object without creating another relationship or copying data. A cross object formula field can be created on opportunity object to display data from industry field on account object using account ID lookup relationship. A custom account field, a standard account field, or a master-detail relationship field are not types of fields that can display data from industry field on account object on opportunity page layout; they either do not exist or do not reference related objects. References: [https://help.salesforce.com/s/articleView?id=sf.cross\\_object\\_formulas.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.cross_object_formulas.htm&type=5)

#### NEW QUESTION 186

Universal Containers (UC) customers have provided feedback that their support cases are not being responded to quickly enough. UC wants to send all unassigned Cases that have been open for more than 2 hours to an urgent Case queue and alert the support manager. which feature should an administrator configure to meet this requirement?

- A. Case Scheduled Reports.
- B. Case Dashboard Refreshes.
- C. Case Escalation Rules.
- D. Case Assignment Rules.

**Answer:** C

#### Explanation:

Case escalation rules are a way to automatically escalate cases that meet certain criteria, such as being open for more than a specified time or having a certain priority. Escalation rules can assign cases to a different owner or queue and send email notifications to the support manager or other recipients. References: [https://help.salesforce.com/s/articleView?id=sf.case\\_escalation.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.case_escalation.htm&type=5)

#### NEW QUESTION 189

administrator at Northern Trail Outfitters is unable to add a new user in Salesforce. What could cause this issue?

- A. The username is already in use another organization.
- B. The username is restricted to a domain specific to my domain.
- C. The email address used for the username has a contact record.
- D. The email used for the username is not a corporate email address.

**Answer:** A

**Explanation:**

One of the possible causes for being unable to add a new user in Salesforce is that the username is already in use by another organization. Usernames must be globally unique across all Salesforce orgs, so if another user has claimed that username before, it cannot be used again. To fix this issue, choose a different username that is not taken by anyone else. The username is not restricted to a domain specific to my domain unless specified by an administrator. The email address used for the username does not have to match a contact record. The email used for the username can be any valid email address. References: [https://help.salesforce.com/s/articleView?id=sf.admin\\_usermgmt\\_add.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_usermgmt_add.htm&type=5)

**NEW QUESTION 190**

The Client services and customer support teams share the same profile but have different permission sets. The Custom Object Retention related list needs to be restricted to the client services team on the Lightning record page layout. What should the administrator use to fulfil this request?

- A. Sharing settings
- B. Page Layout Assignment
- C. Component Visibility
- D. Record Type Assignment

**Answer:** C

**Explanation:**

Component visibility allows you to restrict the visibility of a related list based on a permission set. References: [https://help.salesforce.com/s/articleView?id=sf.dynamic\\_forms\\_component\\_visibility.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.dynamic_forms_component_visibility.htm&type=5)

**NEW QUESTION 191**

Northern trail Outfitter wants to use contract hierarchy in its or to display contact association. What should the administrator take into consideration regarding the contact hierarchy?

- A. Contacts displays in the contact hierarchy are limited to record-level access by User.
- B. Contact Hierarchy is limited to only 3,000 contacts at one time.
- C. Customizing hierarchy columns changes the recently viewed Contacts list view.
- D. Sharing setting are ignored by contacts displayed in the Contact Hierarchy.

**Answer:** A

**Explanation:**

The contact hierarchy is a feature that allows users to view contacts related to an account in a hierarchical tree structure based on their role or position within the account. The contact hierarchy respects record-level access by user, meaning that users can see only those contacts that they have access to based on their profile permissions and sharing settings. The other options are incorrect because contact hierarchy is not limited to 3,000 contacts at one time (it can display up to 5,000 contacts), customizing hierarchy columns does not change the recently viewed contacts list view (it only affects how contacts are displayed in the hierarchy), and sharing settings are not ignored by contacts displayed in the contact hierarchy (they determine which contacts are visible to users). References: [https://help.salesforce.com/s/articleView?id=sf.contacts\\_hierarchy.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.contacts_hierarchy.htm&type=5)

**NEW QUESTION 192**

The standard Lead Rating field has picklist values of Hot, Warm, and Cold. A list of new leads was imported without errors even though several records had the value of Unrated in the Rating field. How were these records added without error?

- A. The Restricted picklist checkbox was unchecked.
- B. Field-level security was set to Visible for all profiles.
- C. A global picklist value set was used to populate the picklist.
- D. The Add to All Record Types checkbox was selected.

**Answer:** A

**Explanation:**

A restricted picklist is a type of picklist that enforces the integrity of the picklist values by allowing only values defined in the picklist during data entry or import operations. If the restricted picklist checkbox is checked for a picklist field, then any records with values not defined in the picklist will cause errors during import operations. However, if the restricted picklist checkbox is unchecked for a picklist field, then any records with values not defined in the picklist will be imported without errors. References: [https://help.salesforce.com/s/articleView?id=sf.picklist\\_limitations.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.picklist_limitations.htm&type=5)

**NEW QUESTION 194**

An administrator at Dreamhouse Reality needs to Create Customized pages for the Salesforce mobile app. Which two types of pages could an administrator build and customize using the Lightning App Builder? Choose 2 Answers

- A. User Page
- B. Dashboard page
- C. App page
- D. Record Page

**Answer:** AB

**Explanation:**

App page and record page are two types of pages that an administrator can build and customize using Lightning App Builder for Salesforce mobile app. App pages are pages that display information or tools that don't belong to a specific record; they can be accessed from navigation menus or tabs in Salesforce mobile app. Record pages are pages that display information or actions related to a specific record; they can be accessed by opening any record in Salesforce mobile app. User page and dashboard page are not types of pages that can be built using Lightning App Builder for Salesforce mobile app; they are types of pages that can be built using other tools such as Profile settings or Dashboard Builder. References: [https://help.salesforce.com/s/articleView?id=sf.app\\_builder\\_mobile\\_pages.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.app_builder_mobile_pages.htm&type=5)

**NEW QUESTION 196**

What are three characteristics of a master-detail relationship? Choose 3 answers

- A. The master object can be a standard or custom object.
- B. Permissions for the detail record are set independently of the master.
- C. Each object can have up to five master-detail relationships.
- D. Roll-up summaries are supported in master-detail relationships.
- E. The owner field on the detail records is the owner of the master record.

**Answer:** ABC

**Explanation:**

A master-detail relationship is a parent-child relationship in which the master object controls certain behaviors of the detail object. The master object can be a standard or custom object, but not all standard objects support being a master. Roll-up summaries are fields that calculate the sum, count, min, or max of child records. The owner field on the detail records is not available and is automatically set to the owner of the master record. References: <https://www.forcetalks.com/blog/master-detail-relationship-in-salesforce/>  
[https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_roll\\_up\\_summary\\_fields.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5)

**NEW QUESTION 200**

Northern Trail Outfitters is using one profile for all of its marketing users, providing read-only access to the Campaign object. A few marketing users now require comprehensive edit access on Campaigns.  
How should an administrator fulfill this request?

- A. Permission sets
- B. Organization-wide defaults
- C. Marketing user checkbox
- D. Field-level security

**Answer:** A

**Explanation:**

Permission sets are used to grant additional permissions and access settings to individual users without changing their profiles or requiring a new profile to be created. You can use permission sets to extend users' functional access without changing their existing profiles. To meet the request of giving comprehensive edit access on Campaigns to a few marketing users who have read-only access by default, you need to create a permission set with edit access on Campaigns and assign it to those users. References: [https://help.salesforce.com/s/articleView?id=sf.perm\\_sets\\_overview.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.perm_sets_overview.htm&type=5)

**NEW QUESTION 201**

The administrator at DreamHouse Realty added an email quick action to the Case page Layout and is unable to see the action on the case feed.  
Which feature must be enabled to ensure the quick action will be displayed as expected?

- A. Email Notifications
- B. Email-to-Case
- C. Email Alerts
- D. Email Templates

**Answer:** B

**Explanation:**

Email-to-Case allows you to create cases from incoming emails. You need to enable this feature and set up routing addresses and case creation settings. References: [https://help.salesforce.com/s/articleView?id=sf.customizesupport\\_email\\_to\\_case.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customizesupport_email_to_case.htm&type=5)

**NEW QUESTION 206**

Which two solutions could an administrator find on the AppExchange to enhance their organization?  
Choose 2 answers

- A. Communities
- B. Consultants
- C. Components
- D. Customers

**Answer:** AB

**Explanation:**

The AppExchange is an online marketplace where you can find solutions to enhance your Salesforce organization. Some of the solutions you can find on the

AppExchange are consultants and components. Consultants are certified professionals who can help you with your Salesforce projects, such as implementation, customization, integration, training, etc. Components are reusable building blocks that you can use to create apps or pages in Salesforce, such as charts, calendars, maps, buttons, etc. References: <https://appexchange.salesforce.com/consultants><https://appexchange.salesforce.com/components>

#### NEW QUESTION 211

The administrator at Cloud Kicks writes an assignment rule to send all cases created via email or the web to the Automated Cases Queue Any manually created cases should be owned by the agent creating them, however, the manually created cases now show the administrator as the owner. What will the administrator find when troubleshooting this issue?

- A. An escalation rule is changing the case owner on case creation
- B. The Assignment Rule checkbox is selected by default.
- C. Another assignment rule is giving ownership to the administrator
- D. The Owner field is missing on the webform and email template.

**Answer: B**

#### Explanation:

The Assignment Rule checkbox is a checkbox that appears on manual case creation pages when assignment rules are defined for cases. The Assignment Rule checkbox determines whether or not to apply assignment rules to manually created cases. If the Assignment Rule checkbox is selected by default, then any manually created cases will be assigned according to assignment rules instead of being owned by the agent creating them. To prevent this from happening, an administrator can either deselect the Assignment Rule checkbox when creating cases manually; or change the default setting for this checkbox under setup by selecting or deselecting Use active assignment rules by default. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_casesupport\\_assign.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_casesupport_assign.htm&type=5)

#### NEW QUESTION 213

Cloud Kicks has decided to delete a custom field. What will happen to the data in the field when it is deleted?

- A. The data in the field is stored for 20 days.
- B. The data is permanently deleted.
- C. The data associated with the field is required.
- D. The data is restorable from the recycle bin.

**Answer: A**

#### Explanation:

When you delete a custom field, the data in that field is stored for 20 days before it is permanently deleted. During this time, you can restore the field and its data from the Recycle Bin or use Data Loader to export the data. References: [https://help.salesforce.com/s/articleView?id=sf.customize\\_del\\_field.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.customize_del_field.htm&type=5)

#### NEW QUESTION 218

The Marketing team at Cloud Kicks uses campaigns to generate product interest. They want custom picklist values for the campaign member Status field for each campaign they run, currently, they ask the administrator to add or delete values, but this is very time consuming. Which two user permission should allow the Marketing team to customize the campaign member status picklist values themselves? Choose 2 answers

- A. Create and Edit for Campaign Member
- B. Marketing user feature license
- C. Customize Application permission
- D. Edit permission for campaigns

**Answer: BD**

#### Explanation:

To customize the campaign member status picklist values themselves, marketing users need two things: a marketing user feature license and edit permission for campaigns. A marketing user feature license enables users to create, edit, and delete campaigns; manage campaign members; and update campaign history via the import wizards or API. Edit permission for campaigns allows users to modify existing campaigns and their related records such as campaign members and campaign member statuses.
