

Microsoft

Exam Questions MD-102

Endpoint Administrator

About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.
- Internet traffic must be minimized.
- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)
Microsoft Endpoint Configuration Manager
Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)
Microsoft Endpoint Configuration Manager
Microsoft Intune

Manage the traffic by using:

Delivery Optimization
BranchCache
Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 2

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. On Computer1, you need to run the

Invoke-Command cmdlet to execute several PowerShell commands on Computer2. What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet.
- B. On Computer2, add Computer1 to the Remote Management Users group.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer1, run the HcK-PSSession cmdlet.

Answer: C

NEW QUESTION 3

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You need to ensure that users are not added automatically to the local Administrators group when they join their Windows 11 device to contoso.com.

What should you configure?

- A. Windows Autopilot
- B. provisioning packages for Windows
- C. Security defaults in Azure AD
- D. Device settings in Azure AD

Answer: D

Explanation:

To ensure that users are not added automatically to the local Administrators group when they join their Windows 11 device to contoso.com, you should configure the Device settings in Azure AD. The Device settings allow you to manage which users can join devices to Azure AD and whether they are added as local administrators or standard users. By default, users who join devices to Azure AD are added to the local Administrators group, but you can change this setting to None or Selected1.

The other options are not relevant for this scenario because:

- Windows Autopilot is a service that allows you to pre-configure new devices and enroll them automatically to Azure AD and Microsoft Intune. It does not control the local administrator role of the users who join the devices2.
- Provisioning packages for Windows are files that contain custom settings and policies that can be applied to Windows devices during the setup process. They do not affect the Azure AD join process or the local administrator role of the users3.
- Security defaults in Azure AD are a set of basic identity security mechanisms that are enabled by default to protect your organization from common attacks. They do not include any settings related to device management or local administrator role4.

References: Manage device identities using the Microsoft Entra admin center, Windows Autopilot, Provisioning packages for Windows 10, What are security defaults?

NEW QUESTION 4

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune.

You need to implement a Microsoft Defender for Endpoint solution that meets the following requirements:

- Enforces compliance for Defender for Endpoint by using Conditional Access
- Prevents suspicious scripts from running on devices

What should you configure? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
A device restriction policy	Enforces compliance: <input type="text"/>
A security baseline	Prevents suspicious scripts: <input type="text"/>
An attack surface reduction (ASR) rule	
An Intune connection	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enforce compliance for Defender for Endpoint by using Conditional Access, you need to configure an Intune connection in the Defender for Endpoint portal. This allows you to use Intune device compliance policies to evaluate the health and compliance status of devices that are enrolled in Defender for Endpoint. You can then use Conditional Access policies to block or allow access to cloud apps based on the device compliance status. References: <https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/conditional-access>

To prevent suspicious scripts from running on devices, you need to configure an attack surface reduction (ASR) rule in Intune. ASR rules are part of the endpoint protection settings that you can apply to devices by using device configuration profiles. You can use the ASR rule “Block Office applications from creating child processes” to prevent Office applications from launching child processes such as scripts or executables. References: <https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10#attack-surface-reduction>

NEW QUESTION 5

- (Exam Topic 4)

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

- Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create profile ...

Windows PC

✓ Basics **2 Out-of-box experience (OOBE)** 3 Assignments 4 Review + create

NEW QUESTION 6

- (Exam Topic 4)

You have an on-premises Active Directory domain that syncs to Azure AD tenant.

The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using an Group Policy Object (GPO).

You need to migrate the GPO to Intune.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Assign the policy.
Create a compliance policy.
Set a scope tag to the policy.
Import an ADMX file.
Create a configuration profile.
Configure the Administrative Templates settings.
Assign the profile.

Answer Area

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

The screenshot shows the Microsoft Intune console interface. On the left, under the 'Actions' tab, there is a list of actions: 'Assign the policy.', 'Create a compliance policy.', 'Set a scope tag to the policy.', 'Import an ADMX file.', 'Create a configuration profile.', 'Configure the Administrative Templates settings.', and 'Assign the profile.'. On the right, the 'Answer Area' shows three options: 'Create a configuration profile.', 'Configure the Administrative Templates settings.', and 'Assign the profile.'. The 'Create a configuration profile.' option is selected, indicated by a right-pointing arrow icon next to it.

NEW QUESTION 7

- (Exam Topic 4)

You have a Windows 11 capable device named Device1 that runs the 64-bit version of Windows 10 Enterprise and has Microsoft Office 2019 installed. You have the Windows 11 Enterprise images shown in the following table.

Name	Platform	Description
Image1	x64	Custom Windows 11 image that has Office 2021 installed
Image2	x64	Default Windows 11 image created by Microsoft

Which images can be used to perform an in-place upgrade of Device1?

- A. image1 only
- B. Image2only
- C. Image1 and Image2

Answer: B

NEW QUESTION 8

- (Exam Topic 4)

You have a Windows 10 device named Device! that is joined to Active Directory and enrolled in Microsoft Intune.

Device1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. a device compliance policy
- C. an MDM Security Baseline profile
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

A device configuration profile is a collection of settings that can be applied to devices enrolled in Microsoft Intune. You can use device configuration profiles to manage Windows 10 devices that are joined to Active Directory and enrolled in Intune. To ensure that the Intune settings override the Group Policy settings, you need to enable the policy CSP setting called MDMWinsOverGP in the device configuration profile. This setting will give precedence to the MDM policy over any conflicting Group Policy settings. References: [Us policy CSP settings to create custom device configuration profiles]

NEW QUESTION 9

- (Exam Topic 4)

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant by using Azure AD Connect.

You use Microsoft Intune and Configuration Manager to manage devices.

You need to recommend a deployment plan for new Windows 11 devices. The solution must meet the following requirements:

- Devices for the marketing department must be joined to the AD DS domain only. The IT department will install complex applications on the devices at build time, before giving the devices to the marketing department users.
- Devices for The sales department must be Azure AD joined. The devices will be shipped directly from the manufacturer to The homes of the sales department users.
- Administrative effort must be minimized.

Which deployment method should you recommend for each department? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Sales:
 Configuration Manager
 Windows Autopilot with automatic registration
 Windows Autopilot with manual registration
 Windows Autopilot with OEM registration

Marketing:
 Configuration Manager
 Windows Autopilot with automatic registration
 Windows Autopilot with manual registration
 Windows Autopilot with OEM registration

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Sales:
 Configuration Manager
 Windows Autopilot with automatic registration
 Windows Autopilot with manual registration
 Windows Autopilot with OEM registration

Marketing:
 Configuration Manager
 Windows Autopilot with automatic registration
 Windows Autopilot with manual registration
 Windows Autopilot with OEM registration

NEW QUESTION 10

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system	Description
Device1	32-bit version of Windows 10	Retired device
Device2	64-bit version of Windows 11	New device
Server1	Windows Server 2019	File server

You need to migrate app data from Device1 to Device2. The data must be encrypted and stored on Seryer1 during the migration.

Which command should you run on each device? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Device1:
 LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
 LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
 ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
 ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
 ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

Device2:
 LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
 LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
 ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
 ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
 ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Device1:

LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key:"mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

Device2:

LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key:"mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

NEW QUESTION 10

- (Exam Topic 4)

You have an Azure AD group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2. You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Profile1?

- A. Assignments
- B. Settings
- C. Scope (Tags)
- D. Applicability Rules

Answer: D

Explanation:

To ensure that Profile1 applies to Device1 only, you need to modify the Applicability Rules in Profile1. You can use applicability rules to filter which devices receive a profile based on criteria such as device model, manufacturer, or operating system version. You can create an applicability rule that matches Device1's properties and excludes Device2's properties. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign#applicability-rules>

NEW QUESTION 13

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 iOS devices. The devices are enrolled in Microsoft Intune as follows:

- Two hundred devices are enrolled by using the Intune Company Portal.
- Eight hundred devices are enrolled by using Apple Automated Device Enrollment (ADE).

You create an iOS/iPadOS software updates policy named Policy 1 that is configured to install iOS/iPadOS 15.5.

How many iOS devices will Policy1 update, and what should you configure to ensure that only iOS/iPadOS 15.5 is installed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Number of devices:

200
800
1000

Configure a:

Compliance policy
Conditional Access policy
Device restriction policy

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policy 1 will update 800 iOS devices that are enrolled by using Apple Automated Device Enrollment (ADE). This is because ADE devices are supervised devices that support software update policies in Intune1. Devices that are enrolled by using the Intune Company Portal are not supervised devices and do not support software update policies2.

To ensure that only iOS/iPadOS 15.5 is installed, you should configure a device restriction policy that restrict visibility of software updates. This will prevent users from manually updating the OS to a newer version than the one you specified in Policy 11. You can use the Deployment Workbench to create and assign a device restriction profile to your ADE devices3.

NEW QUESTION 17

- (Exam Topic 4)
You have a Microsoft 365 subscription. All devices run Windows 10.
You need to prevent users from enrolling the devices in the Windows Insider Program.
What two configurations should you perform from the Microsoft Intune admin center? Each correct answer is a complete solution.
NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a Windows 10 and later security baseline
- D. a custom device configuration profile
- E. a Windows 10 and later update ring

Answer: AE

NEW QUESTION 22

- (Exam Topic 4)
You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User 1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.
To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Groups

Administrators

Event Log Readers

NEW QUESTION 24

- (Exam Topic 4)
Your company uses Microsoft Defender for Endpoint Microsoft Defender for Endpoint includes the device groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Microsoft Defender for Endpoint as shown in the following exhibit.

computer1

Actions

Domain: adatum.com
OS: Windows10 64-bit (Build 17134)
Machine IP addresses

What is the effect of the Microsoft Defender for Endpoint configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of:

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Computer1 will be a member of:

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 28

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

Name	Member
Group1	Device1, Device2, Device3
Group2	Device2

You add an Autopilot deployment profile as shown in the following exhibit.

Create profile

Windows PC

☒ Basics
 ☒ Out-of-box experience (OOBE)
 ☒ Assignments
 ☒ 4 Review

Summary

Basics

Name	Profile1
Description	--
Convert all targeted devices to Autopilot	Yes
Device type	Windows PC

Out-of-box experience (OOBE)

Deployment mode	Self-Deploying (preview)
Join to Azure AD as	Azure AD joined
Skip AD connectivity check (preview)	No

Language (Region)

Operating system default	
--------------------------	--

Automatically configure keyboard	No
Microsoft Software License Terms	Hide
Privacy settings	Hide
Hide change account options	Hide
User account type	Standard

Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input checked="" type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 29

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 31

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type template should you use?

- A. Device restrictions (Windows 10 Team)
- B. Identity protection
- C. Custom
- D. Device restrictions

Answer: C

NEW QUESTION 35

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?
 NOTE: Each correct selection is worth one point.

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 39

- (Exam Topic 4)

You have a Hyper-V host. The host contains virtual machines that run Windows 10 as shown in following table.

Name	Generation	Virtual TPM	Virtual processors	Memory
VM1	1	No	4	16 GB
VM2	2	Yes	2	4 GB
VM3	2	Yes	1	8 GB

Which virtual machines can be upgraded to Windows 11?

- A. VM1 only
- B. VM2 only
- C. VM2 and VM3 only
- D. VM1, VM2, and VM3

Answer: C

Explanation:

Windows 11 has certain hardware requirements that must be met in order to upgrade from Windows 10. Some of these requirements are as follows:

- A processor with at least 1 GHz clock speed and 2 cores.
- A system firmware that supports UEFI and Secure Boot.
- A Trusted Platform Module (TPM) version 2.0 or higher.
- At least 4 GB of system memory (RAM).
- At least 64 GB of storage space.

In this scenario, the virtual machines that run Windows 10 have the following specifications:

- VM3 is a generation 2 virtual machine with a virtual TPM, 1 virtual processor, and 8 GB of memory.
- VM1 cannot be upgraded to Windows 11 because it does not have a virtual TPM and it is not a generation 2 virtual machine. Generation 1 virtual machines do not support UEFI and Secure Boot, which are required for Windows 11. VM2 and VM3 can be upgraded to Windows 11 because they have a virtual TPM and they are generation 2 virtual machines. They also meet the minimum requirements for processor speed, cores, memory, and storage space.

NEW QUESTION 44

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enroll devices in Microsoft Endpoint Manager that have the platforms and versions shown in the following table.

Platform	Version
Android	8, 9
iOS	11, 12

You need to configure device enrollment to meet the following requirements:

- Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager.
- Ensure that devices are added to Microsoft Azure Active Directory (Azure AD) groups based on a selection made by users during the enrollment.

Which device enrollment setting should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager:

▼

Android enrollment
Apple enrollment
Corporate device identifiers
Device categories
Enrollment restrictions
Windows enrollment

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

▼

Android enrollment
Apple enrollment
Corporate device identifiers
Device categories
Enrollment restrictions
Windows enrollment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set> <https://docs.microsoft.com/en-us/mem/intune/enrollment/device-group-mapping>

NEW QUESTION 45

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Add a certificate connector.
- C. Configure the Partner device management settings.
- D. Link your managed Google Play account to Intune.

Answer: D

NEW QUESTION 49

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 11 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 11 in-place upgrade on several computers that run Windows 10. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 53

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1. What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

On Server1:

Import the Deployment Image Servicing and Management (DISM) PowerShell module.
Import the WindowsAutopilotIntune Windows PowerShell module.
Install the Windows Assessment and Deployment Kit (Windows ADK).
Install the Windows Deployment Services server role.

Add to the MDT deployment share:

Windows 10 image and package only
Windows 10 image and task sequence only
Windows 10 image only
Windows 10 image, task sequence, and package

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:
 Open an elevated Windows PowerShell prompt and enter the following command: Install-WindowsFeature -Name WDS -IncludeManagementTools
 WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All
 Box 2: Windows 10 image and task sequence only Create the reference image task sequence
 In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.
 Reference:
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 54

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You have devices enrolled in intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage Appl ?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

The correct answer is B because you need to create two app configuration policies for managed devices, one for iOS/iPadOS devices and one for Android devices1. App configuration policies let you customize the settings of apps for iOS/iPadOS or Android devices1. The settings are assigned to user groups and applied when the app runs1. The app developer or supplier provides the configuration settings (keys and values) that are exposed to Intune1. You can't use a single app configuration policy for both iOS/iPadOS and Android devices because they have different configuration settings2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn
<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Add app configuration policies for managed iOS/iPadOS devices | Microsoft Learn
<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-use-ios>

NEW QUESTION 59

- (Exam Topic 3)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.
- B. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory blade in the Azure portal.
- C. Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.
- D. Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/add-profile-to-devices#manage-autopilot-deployment-profiles>

NEW QUESTION 62

- (Exam Topic 3)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory admin center.
- B. Extract the hardware ID information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.
- C. Extract the hardware ID information of each computer to an XML file and upload the file from the Devices settings in Microsoft Store for Business.
- D. Extract the serial number information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

NEW QUESTION 64

- (Exam Topic 3)

You need to meet the requirements for the MKG department users. What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business
- B. Download the APPX file for App1 from Microsoft Store for Business
- C. Add App1 to the private store
- D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business
- E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store> Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

NEW QUESTION 69

- (Exam Topic 3)

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device configuration profile

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 74

- (Exam Topic 1)

User1 and User2 plan to use Sync your settings.

On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:	<div><div>No devices</div><div>Device4 and Device5 only</div><div>Device1, Device2 and Device3 only</div><div>Device1, Device2, Device3, Device4, and Device5</div></div>
User2:	<div><div>No devices</div><div>Device4 and Device5 only</div><div>Device1, Device2 and Device3 only</div><div>Device1, Device2, Device3, Device4, and Device5</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

<https://www.jeffgilb.com/managing-local-administrators-with-azure-ad-and-intune/>

NEW QUESTION 78

- (Exam Topic 1)

You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements. To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: C

Explanation:

Reference:

<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 82

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

net accounts
net localgroup
net user

Administrators /add "

AzureAD
CONTOSO
UPN

\user1@contoso.com"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

net accounts
net localgroup
net user

Administrators /add "

AzureAD
CONTOSO
UPN

\user1@contoso.com"

NEW QUESTION 85

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and a web app named App1. App1 must only accept modern authentication requests. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
 - Users or workload identities: User1
 - Cloud apps or actions: App1
- Access controls
 - Grant: Block access

You need to block only legacy authentication requests to App1. Which condition should you add to CAPolicy1?

- A. Filter for devices
- B. Device platforms
- C. User risk
- D. Sign-in risk
- E. Client apps

Answer: E

Explanation:

you can use the client apps condition to block legacy authentication requests to App11. Legacy authentication is a term that refers to authentication protocols that do not support modern authentication features such as multi-factor authentication or conditional access2. Examples of legacy authentication protocols include Basic Authentication, Digest Authentication, NTLM, and Kerberos2. To block legacy authentication requests, you need to configure the client apps condition to include Other clients, which covers any client that uses legacy authentication protocols13. References: 1: Conditional Access: Block legacy authentication | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/block-legacy-authentication> 2: What is legacy authentication? | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/legacy-authentication> 3: Client apps condition in Azure Active Directory Conditional Access | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/client-apps-condition>

NEW QUESTION 86

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. Computer2 has Remote Desktop enabled. From Computer1, you connect to Computer2 by using Remote Desktop Connection. You need to ensure that you can access the local drives on Computer1 from within the Remote Desktop session. What should you do?

- A. From Computer 2, configure the Remote Desktop settings.
- B. From Windows Defender Firewall on Computer 1, allow Remote Desktop.
- C. From Windows Defender Firewall on Computer 2, allow File and Printer Sharing.
- D. From Computer1, configure the Remote Desktop Connection settings.

Answer: D

NEW QUESTION 90

- (Exam Topic 4)

You have a Microsoft 365 subscription. You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM). You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers. What should you do?

- A. From the Microsoft Intune admin center, create a Windows 10 device profile.
- B. From Azure AD, add an app registration.
- C. From Azure A
- D. add an enterprise application.
- E. From the Microsoft Intune admin center, add an app.

Answer: D

Explanation:

To deploy Microsoft 365 Apps for enterprise to Windows 10 devices that are enrolled in Intune, you need to add an app of type "Windows 10 app (Win32)" in the Microsoft Intune admin center and configure the app settings. You can then assign the app to groups of users or devices. References: <https://docs.microsoft.com/en-us/mem/intune/apps/apps-win32-app-management>

NEW QUESTION 93

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. Azure AD joined Windows devices enroll automatically in Intune. You have the devices shown in the following table.

Name	Operating system	Azure AD joined	Line-of-business (LOB) apps installed
Device1	64-bit version of Windows 10 Pro	Yes	No
Device2	32-bit version of Windows 10 Pro	No	Yes
Device3	64-bit version of Windows 10 Pro	No	Yes

You are preparing to upgrade the devices to Windows 11. All the devices are compatible with Windows 11. You need to evaluate Windows Autopilot and in-place upgrade as deployment methods to implement Windows 11 Pro on the devices, while retaining all user settings and applications. Which devices can be upgraded by using each method? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Windows Autopilot:

Device1 and Device3 only
None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

In-place upgrade:

Device1 and Device3 only
None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Windows Autopilot:

Device1 and Device3 only
None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

In-place upgrade:

Device1 and Device3 only
None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

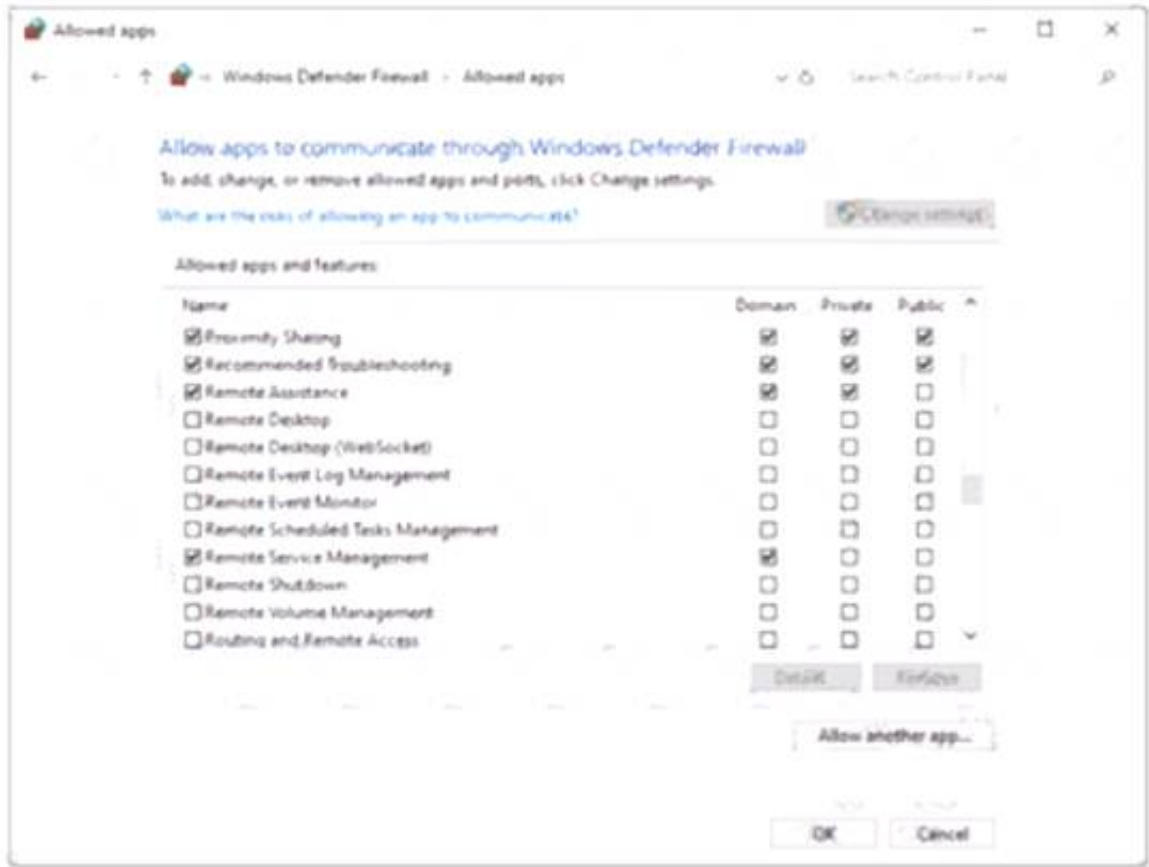

NEW QUESTION 96

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password. On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

Status	Name	DisplayName
-----	----	-----
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input checked="" type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input checked="" type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

NEW QUESTION 101

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security Administrator
Admin2@contoso.com	Cloud Device Administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 104

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune. You need to configure Delivery Optimization on the devices to meet the following requirements:

- Allow downloads from the internet and from other computers on the local network.
- Limit the percentage of used bandwidth to 50. What should you use?

- A. a configuration profile
B. a Windows Update for Business Group Policy setting
C. a Microsoft Peer-to-Peer Networking Services Group Policy setting
D. an Update ring for Windows 10 and later profile

Answer: A

Explanation:

A configuration profile is the correct answer because it allows you to configure Delivery Optimization settings for Windows devices in Intune. You can specify the download mode, bandwidth limit, caching options, and more. A configuration profile is a template that contains one or more settings that you can apply to groups of devices. References:

- Windows 10 Delivery Optimization settings for Intune - Microsoft Intune | Microsoft Learn
- Delivery Optimization settings in Microsoft Intune

NEW QUESTION 107

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics.

You need to create baseline metrics.
 What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: C

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 110

- (Exam Topic 4)

You have a Microsoft 365 tenant and an internal certification authority (CA).

You need to use Microsoft Intune to deploy the root CA certificate to managed devices.

Which type of Intune policy and profile should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy type:

- App configuration policy
- App protection policy
- Compliance policy
- Configuration profile

Profile:

- Imported public key pair (PKCS) certificate
- Public key pair (PKCS) certificate
- Simple Certificate Enrollment Protocol (SCEP) certificate
- Trusted certificate

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Configuration profile Create a trusted certificate profile. Box 2: Trusted certificate

When using Intune to provision devices with certificates to access your corporate resources and network, use a trusted certificate profile to deploy the trusted root certificate to those devices. Trusted root certificates establish a trust from the device to your root or intermediate (issuing) CA from which the other certificates are issued.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-trusted-root>

NEW QUESTION 112

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft intune as shown in the following table.

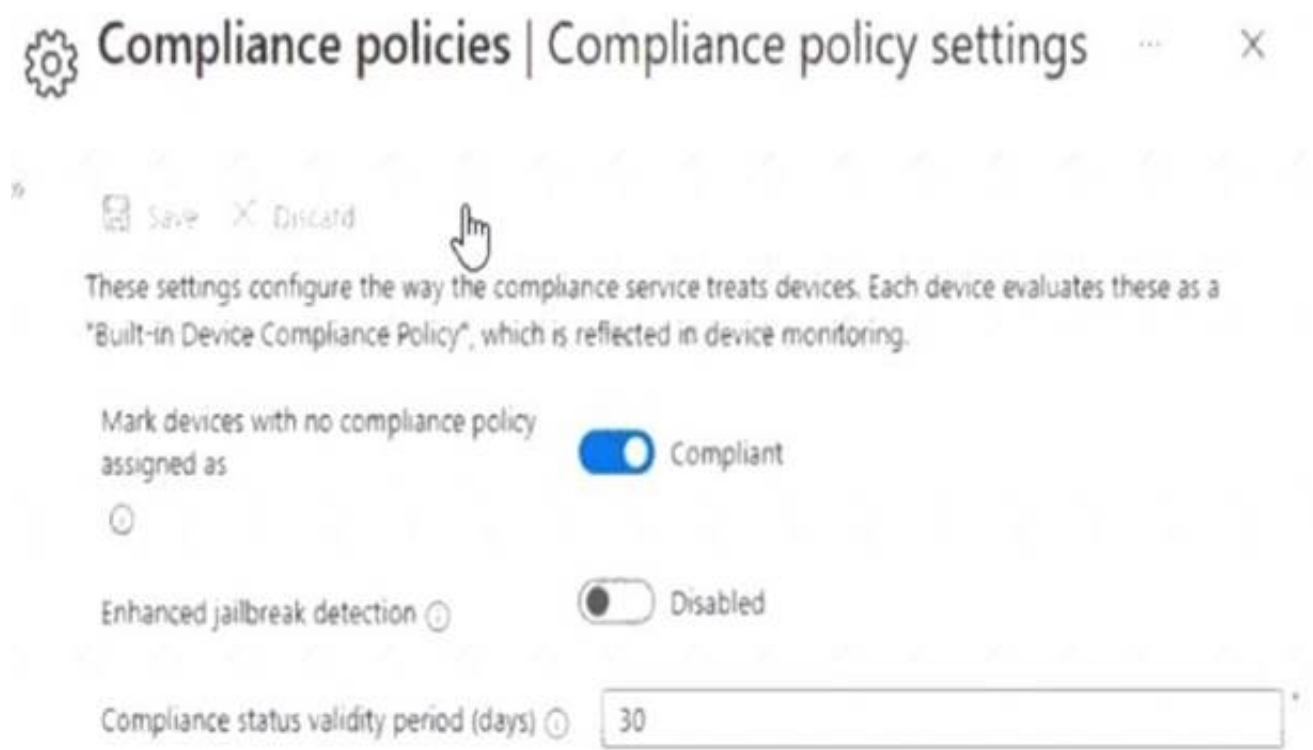

Name	Platform	Member of	Description
Device1	Windows 11	Group1	Disk encryption is not configured.
Device2	Windows 10	Group2	Disk encryption is configured.
Device3	Android	Group3	Device local storage is not encrypted.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

Name	Platform	Setting	Applied to
Compliance1	Windows 10 and later	Require encryption of data storage on device	Group2
Compliance2	Android Enterprise	Require encryption of data storage on device	Group3

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.) You create the following Conditional Access policy:

- Name: Policy1
- Assignments
 - o Users and groups: User1
 - o Cloud apps or actions: Office 365 SharePoint Online
- Access controls
 - o Grant Require device to be marked as compliant
- Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 115

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains the users shown in the following table.

Name	Member of	License
User1	Group1	None
User2	Group1	Microsoft 365 E3
User3	Group2	Microsoft 365 E5

Group2 has been assigned in the Enrollment Status Page. You have the devices shown in the following table.

Name	Operating system	Department
Device1	Windows 10 Pro	Marketing
Device2	Windows 11 Home	Research
Device3	Windows 10 Pro	Marketing

You capture and upload the hardware IDs of the devices in the marketing department. You configure Windows Autopilot. For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="radio"/>	<input type="radio"/>
User2 can complete the Autopilot process on Device1.	<input type="radio"/>	<input type="radio"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can complete the Autopilot process on Device1.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 119

- (Exam Topic 4)

You are replacing 100 company-owned Windows devices.

You need to use the Microsoft Deployment Toolkit (MDT) to securely wipe and decommission the devices. The solution must meet the following requirements:

- Back up the user state.
- Minimize administrative effort.

Which task sequence template should you use?

- A. Standard Client Task Sequence
 B. Standard Client Replace Task Sequence
 C. Litetouch OEM Task Sequence
 D. Sysprep and Capture

Answer: B

NEW QUESTION 124

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information [Edit](#)

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments [Edit](#)

Group mode	Group
<input type="radio"/> Required	
<input checked="" type="radio"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 127

- (Exam Topic 4)
You have a Microsoft 365 tenant.
You have devices enrolled in Microsoft Intune.
You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft

OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Entra admin center, review the Conditional Access Insights and Reporting workbook.
- B. From the Microsoft Intune admin center, review Device compliance report.
- C. From the Microsoft Intune admin center, review the Noncompliant devices report.
- D. From the Microsoft Intune admin center, review the Setting compliance report.

Answer: C

NEW QUESTION 128

- (Exam Topic 4)

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices. You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the Compliance policy settings
- B. the device compliance policy
- C. a network location
- D. a configuration profile

Answer: D

NEW QUESTION 133

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have a device named Device1 that is enrolled in Intune.

You need to ensure that User1 can use Remote Help from the Intune admin center for Device1. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Deploy the Remote Help app to Device1.
- B. Assign the Help Desk Operator role to User1.
- C. Assign the Intune Administrator role to User1.
- D. Assign a Microsoft 365 E5 license to User1.
- E. Rerun device onboarding on Device1.
- F. Assign the Remote Help add-on license to User1.

Answer: ABF

NEW QUESTION 134

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune. You plan to manage Windows updates by using Intune.

You create an update ring for Windows 10 and later and configure the User experience settings for the ring as shown in the following exhibit.

User experience settings

Automatic update behavior ⓘ	Auto install and restart at maintenance time ▼
Active hours start * ⓘ	8 AM ▼
Active hours end * ⓘ	5 PM ▼
Restart checks ⓘ	<input checked="" type="button" value="Allow"/> <input type="button" value="Skip"/>
Option to pause Windows updates ⓘ	<input checked="" type="button" value="Enable"/> <input type="button" value="Disable"/>
Option to check for Windows updates ⓘ	<input checked="" type="button" value="Enable"/> <input type="button" value="Disable"/>
Change notification update level ⓘ	Use the default Windows Update notifications ▼
Use deadline settings ⓘ	<input checked="" type="button" value="Allow"/> <input type="button" value="Not configured"/>
Deadline for feature updates ⓘ	5 ✓
Deadline for quality updates ⓘ	2 ✓
Grace period ⓘ	1 ✓
Auto reboot before deadline ⓘ	<input checked="" type="button" value="Yes"/> <input type="button" value="No"/>

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Automatic restarts are blocked [answer choice].

A restart will be forced on a device [answer choice] after the deadline.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:
 Answer Area

Automatic restarts are blocked [answer choice].

A restart will be forced on a device [answer choice] after the deadline.

NEW QUESTION 139

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Application admin
Admin2	Cloud application admin
Admin3	Office apps admin
Admin4	Security admin

In the Microsoft 365 Apps admin center, you create a Microsoft Office customization. Which users can download the Office customization file from the admin center?

- A. Admin1, Admin2, Admin3. and Admin4
 B. Admin1, Admin2, and Admin3 only
 C. Admin3 only
 D. Admin3 and Admin4 only
 E. Admin1 and Admin3 only

Answer: B

Explanation:

* Admin1

An application admin has full access to enterprise applications, applications registrations, and application proxy settings.

* Admin2

Mark your app as publisher verified.

In Azure AD this user must be a member of one of the following roles: Application Admin, Cloud Application Admin, or Global Admin.

* Admin3

Office Apps admin - Assign the Office Apps admin role to users who need to do the following:

- Use the Office cloud policy service to create and manage cloud-based policies for Office
- Create and manage service requests
- Manage the What's New content that users see in their Office apps
- Monitor service health Reference:

Office Apps admin - Assign the Office Apps admin role to users who need to do the following <https://docs.microsoft.com/en-us/azure/active-directory/develop/mark-app-as-publisher-verified>

NEW QUESTION 141

- (Exam Topic 4)

You have a hybrid deployment of Azure AD that contains 50 Windows 10 devices. All the devices are enrolled in Microsoft Intune.

You discover that Group Policy settings override the settings configured in Microsoft Intune policies. You need to ensure that the settings configured in Microsoft Intune override the Group Policy settings. What should you do?

- A. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy.
 B. From the Microsoft Intune admin center, create a custom device profile.

- C. From the Microsoft Intune admin center, create an Administrative Templates device profile.
D. From Group Policy Management Editor, configure the User Configuration settings in the Default Domain Policy.

Answer: C

NEW QUESTION 145

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices. You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile type template should you use for each action? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Deploy a custom Start layout:

Device restriction

Delivery optimization

Device restriction

Endpoint protection

Identity protection

Rename the local Administrator account:

Identity protection

Delivery optimization

Device restriction

Endpoint protection

Identity protection

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Deploy a custom Start layout:

Device restriction

Delivery optimization

Device restriction

Endpoint protection

Identity protection

Rename the local Administrator account:

Identity protection

Delivery optimization

Device restriction

Endpoint protection

Identity protection

NEW QUESTION 150

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system	Azure AD status	Mobile device management (MDM)
Device1	Windows 8.1	Registered	None
Device2	Windows 10	Joined	None
Device3	Windows 10	Joined	Microsoft Intune

Contoso.com contains the Azure Active Directory groups shown in the following table.

Name	Members
Group1	Group2, Device1, Device3
Group2	Device2

You add a Windows Autopilot deployment profile. The profile is configured as shown in the following exhibit.

Create profile ...

Windows PC

- ✓

Basics
- ✓

Out-of-box experience (OOBE)
- ✓

Assignments
- 1

Review + create

Summary

Basics

Name	Profile1
Description	--
Convert all targeted devices to Autopilot	Yes
Device type	Windows PC

Out-of-box experience (OOBE)

Deployment mode	Self-Deploying (preview)
Join to Azure AD as	Azure AD joined
Skip AD connectivity check (preview)	No
Language (Region)	Operating system default
Automatically configure keyboard	Yes
Microsoft Software License Terms	Hide
Privacy settings	Hide
Hide change account options	Hide
User account type	Standard
Allow White Glove OOBE	No
Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	--

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Device1 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device2 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device3 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
Device1 has no Mobile device Management (MDM) configured.
Note: Device1 is running Windows 8.1, and is registered, but not joined. Device1 is in Group1.
Profile1 is assigned to Group1. Box 2: No
Device2 has no Mobile device Management (MDM) configured. Note: Device2 is running Windows 10, and is joined.
Device2 is in Group2. Group2 is in Group1.
Profile1 is assigned to Group1. Box 3: Yes
Device3 has Mobile device Management (MDM) configured. Device3 is running Windows 10, and is joined

Device1 is in Group1.

Profile1 is assigned to Group1.

Mobile device management (MDM) enrollment: Once your Windows 10 device joins Azure AD, Autopilot ensures your device is automatically enrolled with MDMs such as Microsoft Intune. This program can automatically push configurations, policies and settings to the device, and install Office 365 and other business apps without you having to get IT admins to manually sort the device. Intune can also apply the latest updates from Windows Update for Business.

Reference: <https://xo.xello.com.au/blog/windows-autopilot>

NEW QUESTION 154

- (Exam Topic 4)

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a device configuration profile from the Microsoft Intune admin center
- B. a data loss prevention (DLP) policy from the Microsoft Purview compliance portal
- C. an insider risk management policy from the Microsoft Purview compliance portal
- D. an app protection policy from the Microsoft Intune admin center

Answer: B

NEW QUESTION 158

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1. You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Multipath I/O (MPIO)
- B. Multipoint Connector
- C. Windows Deployment Services (WDS)
- D. Windows Server Update Services (WSUS)

Answer: C

NEW QUESTION 162

- (Exam Topic 4)

You have an Azure AD tenant that contains the devices shown in the following table.

Name	Operating system	Azure AD join type
Device1	Windows 11 Pro	Joined
Device2	Windows 11 Pro	Registered
Device3	Windows 10 Pro	Joined
Device4	Windows 10 Pro	Registered

Which devices can be activated by using subscription activation?

- A. Device 1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4

Answer: C

NEW QUESTION 166

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune. You plan to use Intune to deploy an application named App1 that contains multiple installation files.

What should you do first?

- A. Prepare the contents of App1 by using the Microsoft Win32 Content Prep Tool.
- B. Create an Android application package (APK).
- C. Upload the contents of App1 to Intune.
- D. Install the Microsoft Deployment Toolkit (MDT).

Answer: A

NEW QUESTION 167

- (Exam Topic 4)

Your company has computers that run Windows 10 and are Microsoft Azure Active Directory (Azure AD)-joined.

The company purchases an Azure subscription.

You need to collect Windows events from the Windows 10 computers in Azure. The solution must enable you to create alerts based on the collected events.

What should you create in Azure and what should you configure on the computers? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Resource to create in Azure:

	▼
An Azure event hub	
An Azure Log Analytics workspace	
An Azure SQL database	
An Azure Storage account	

Configuration to perform on the computers:

	▼
Configure the Event Collector service	
Create an event subscription	
Install the Microsoft Monitoring Agent	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/log-analytics-agent>

NEW QUESTION 168

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- > Creates a VPN connection to the corporate network
- > Installs a Microsoft Store app named App1
- > Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

	☑
Removed	
Retained and the passphrase will be retained	
Retained but the passphrase will be reset	

App1 will be:

	☑
Reinstalled at sign-in	
Removed	
Retained	

The VPN connection will be:

	☑
Removed	
Retained and the credentials will be cached	
Retained but the credentials will be reset	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 172

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table. You are creating a compliance policy named Compliance1.

Which objects can you specify in Compliance1 as additional recipients of noncompliance notifications?

- A. Group3 and Group4 only
B. Group3, Group4, and Admin1 only
C. Group1, Group2, and Group3 only

- D. Group1, Group2, Group3, and Group4 only
- E. Group1, Group2, Group3, Group4, and Admin1

Answer: C

Explanation:

Reference:

<https://www.ravenswoodtechnology.com/microsoft-intune-compliance-notifications/> <https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

NEW QUESTION 177

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have devices enrolled in Microsoft Intune as shown in the following table. To which devices can you deploy apps by using Intune?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3 only
- E. Device1, Device2, Device3, and Device4

Answer: E

NEW QUESTION 178

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices. All devices are in the same time zone. You create an update rings policy and assign the policy to all Windows devices.

On the November 1, you pause the update rings policy. All devices remain online.

Without further modification to the policy, on which date will the devices next attempt to update?

- A. December 1
- B. December 6
- C. November 15
- D. November 22

Answer: C

NEW QUESTION 179

- (Exam Topic 4)

You use Windows Admin Center to remotely administer computers that run Windows 10.

When connecting to Windows Admin Center, you receive the message shown in the following exhibit.

This site is not secure

This might mean that someone's trying to fool you or steal any info you send to the server. You should close this site immediately.

 Go to your Start page

Details

Your PC doesn't trust this website's security certificate.

Error Code: DLG_FLAGS_INVALID_CA

Go on to the webpage (Not recommended)

You need to prevent the message from appearing when you connect to Windows Admin Center. To which certificate store should you import the certificate?

- A. Personal
- B. Trusted Root Certification Authorities
- C. Client Authentication Issuers

Answer: B

NEW QUESTION 184

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains computers that run Windows 11 and are enrolled in Microsoft Intune. You need to create a compliance policy that meets the following requirements:

- Requires BitLocker Drive Encryption (BitLocker) on each device
- Requires a minimum operating system version

Which setting of the compliance policy should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 188

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You add apps to Intune as shown in the following table.

Name	App type
App1	Android store app
App2	Android line-of-business app
App3	Managed Google Play app

You need to create an app configuration policy named Policy1 for the Android Enterprise platform. Which apps can you manage by using Policy1?

- A. App2 only
B. App3 only
C. App1 and App3 only
D. App2 and App3 only
E. App1, App2, and App3

Answer: D

NEW QUESTION 193

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1
Device2	Android	Group1
Device3	iOS	Group2

From Intune, you create and send a custom notification named Notification1 to Group1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements

Yes No

User1 receives Notification1 on Device1.

☐ Yes ☐ No

User2 receives Notification1 on Device2.

☐ Yes ☐ No

User1 receives Notification1 on Device3.

☐ Yes ☐ No

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 197

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 500 Android Enterprise devices. All the devices are enrolled in Microsoft Intune. You need to deliver bookmarks to the Chrome browser on the devices. What should you create?

- A. a compliance policy
- B. a configuration profile
- C. an app protection policy
- D. an app configuration policy

Answer: D

NEW QUESTION 198

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com. You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	iOS
Device4	Ubuntu Linux

Which devices can be Azure AD joined, and which devices can be registered in contoso.com? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Azure AD joined:

Registered in contoso.com:

- A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

NEW QUESTION 201

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune. You have computers that run Windows 11 as shown in the following table.

Name	Azure AD status	Intune	BitLocker Drive Encryption (BitLocker)	Firewall
Computer1	Joined	Enrolled	Disabled	Enabled
Computer2	Registered	Enrolled	Enabled	Enabled
Computer3	Registered	Not enrolled	Enabled	Disabled

You have the groups shown in the following table.

Name	Members
Group1	Computer1, Computer2
Group2	Computer3

You create and assign the compliance policies shown in the following table.

Name	Configuration	Action for noncompliance	Assignment
Policy1	Require BitLocker to be enabled on the device.	Mark device as noncompliant after 10 days.	Group1
Policy2	Require firewall to be on and monitoring.	Mark device as noncompliant immediately.	Group2

The next day, you review the compliance status of the computers.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
The compliance status of Computer1 is In grace period.	<input type="checkbox"/>	<input type="checkbox"/>
The compliance status of Computer2 is Compliant.	<input type="checkbox"/>	<input type="checkbox"/>
The compliance status of Computer3 is Not compliant.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
The compliance status of Computer1 is In grace period.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
The compliance status of Computer2 is Compliant.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
The compliance status of Computer3 is Not compliant.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

NEW QUESTION 204

- (Exam Topic 4)

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline.

Which tool should you use?

- A. Microsoft Defender for Endpoint Power 81 app
- B. Microsoft Secure Score
- C. Endpoint Analytics
- D. Microsoft 365 Defender portal

Answer: B

NEW QUESTION 209

- (Exam Topic 4)

You have 25 computers that run Windows 10 Pro.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to upgrade the computers to Windows 11 Enterprise by using an in-place upgrade. The solution must minimize administrative effort.

What should you use?

- A. Microsoft Deployment Toolkit (MDT) and a default image of Windows 11 Enterprise
- B. Microsoft Configuration Manager and a custom image of Windows 11 Enterprise
- C. Windows Autopilot
- D. Subscription Activation

Answer: C

NEW QUESTION 214

- (Exam Topic 4)

You install a feature update on a computer that runs Windows 10. How many days do you have to roll back the update?

- A. 5
- B. 10
- C. 14
- D. 30

Answer: B

NEW QUESTION 218

- (Exam Topic 4)

You have SOO Windows 10 devices enrolled in Microsoft Intune.

You plan to use Exploit protection in Microsoft Intune to enable the following system settings on the devices:

- Data Execution Prevention (DEP)
- Force randomization for images (Mandatory ASLR)

You need to configure a Windows 10 device that will be used to create a template file.

Which protection areas on the device should you configure in the Windows Security app before you create the template file? To answer, drag the appropriate protection areas to the correct settings. Each protection area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Protection areas	Answer Area
Account protection	DEP: <input type="text"/>
App & browser control	Mandatory ASLR: <input type="text"/>
Device security	
Virus & threat protection	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Exploit protection is a feature that helps protect against malware that uses exploits to infect devices and spread. Exploit protection consists of many mitigations that can be applied to either the operating system or individual apps1.

To configure a Windows 10 device that will be used to create a template file for Exploit protection, you need to configure the following protection areas on the device in the Windows Security app:

- DEP: Device security. Data Execution Prevention (DEP) is a mitigation that prevents code from running in memory regions marked as non-executable. You can enable DEP system-wide or for specific apps in the Device security section of the Windows Security app1.
- Mandatory ASLR: App & browser control. Force randomization for images (Mandatory ASLR) is a mitigation that randomizes the location of executable images in memory, making it harder for attackers to predict where to inject code. You can enable Mandatory ASLR system-wide or for specific apps in the App & browser

control section of the Windows Security app1.

NEW QUESTION 221

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Azure AD joined and are enrolled in Microsoft Intune. You plan to manage Microsoft Defender Antivirus on the computers. You need to prevent users from disabling Microsoft Defender Antivirus, What should you do?

- A. From the Microsoft Intune admin center, create a security baseline.
- B. From the Microsoft 365 Defender portal, enable tamper protection.
- C. From the Microsoft Intune admin center, create an account protection policy.
- D. From the Microsoft Intune admin center, create an endpoint detection and response (EDR) policy.

Answer: B

Explanation:

Tamper protection is a feature of Microsoft Defender Antivirus that prevents users or malicious software from disabling or modifying the antivirus settings. Tamper protection can be enabled from the Microsoft 365 Defender portal for devices that are Azure AD joined and enrolled in Microsoft Intune. This will prevent users from turning off Microsoft Defender Antivirus or changing its configuration through Windows Security, PowerShell, Registry, or Group Policy. References: [Enable tamper protection]

NEW QUESTION 224

- (Exam Topic 4)

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant. The tenant contains the users shown in the following table.

Name	Member of	On-premises sync
User1	Group1	Disabled
User2	Group2	Enabled

You assign Windows 10/11 Enterprise E5 licenses to Gtoup1 and Uset2. You deploy the devices shown in the following table.

Name	Operating system	Joined to
Device1	Windows 11 Pro	Azure AD
Device2	Windows 11 Pro	AD DS
Device3	Windows 10 Pro	Azure AD

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 227

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1. User! is assigned a Windows 10/11 Enterprise E3 license. You use Microsoft Intune Suite to manage devices. User1 activates the following devices:

- Device1: Windows 11 Enterprise
 - Device2: Windows 10 Enterprise
 - Device3: Windows 11 Enterprise
- How many more devices can User1 activate?

- A. 2
- B. 3
- C. 7
- D. 8

Answer: A
