

Microsoft

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

NEW QUESTION 1

- (Exam Topic 1)
You need to design the resort portal's email registration process.
Which solutions should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	<div>Auto-populate the invitation code field on the sign-in screen from the email link.</div> <div>Embed the invitation code in the email link URL.</div> <div>Send the customer their username and temporary password in the email link.</div>
Validate the user's email.	<div>Two-factor authentication</div> <div>Azure Active Directory authentication</div> <div>Social provider sign-in</div> <div>Invitation code sign-up</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 2

- (Exam Topic 1)
You need to create the FAQ solution content What should you do first?

- A. AI Builder
- B. Suggest topics
- C. Automate
- D. Trigger phrases

Answer: B

Explanation:
You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.
> Import Suggested Topics from FAQ webpage.
> Add a topic.
> Enable the topics Reference:
<https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx>

NEW QUESTION 3

- (Exam Topic 1)
You need to design the guest check-in solution.
Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
You need to design the guest check-in solution.

Requirement	Technology
Develop the base check-in solution.	<div>Xamarin app</div> <div>Power Apps portal</div> <div>Model-driven app</div> <div>Canvas app</div>
Access the check-in solution on the check-in devices.	
Access the check-in solution on the check-in devices.	<div>Traditional desktop application</div> <div>Web browser</div> <div>Power Apps mobile app</div> <div>Dynamics 365 for phones and tablets</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Canvas app,
Power Apps mobile app
<https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps>

NEW QUESTION 4

- (Exam Topic 2)

You need to set up the new service request completion process.

Which two components should you include in the solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. connection reference
- B. business process flow
- C. Power Automate flow
- D. connection

Answer: AC

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/create-connection-reference>

NEW QUESTION 5

- (Exam Topic 2)

You need to implement the requirement for the VP of sales. What should you do?

- A. Use a test account with a base security role with QV security added.
- B. Add the System Administrator security role to your user account.
- C. Use a test account with only QV security added.
- D. Add QV security to your user account.

Answer: A

Explanation:

A VP of sales requires a test environment to demonstrate to potential clients the security policies that are included in their initial offering.

Currently, testing the new QV functionality outside the development environment is not possible due to corporate security policies requiring the same security role across all environments.

Note: One of the security best practices in Dynamics 365 is to use the base security role as a baseline and apply that role to all Users. The base security role will include all the common/basic permissions that are required to have access to the system.

To set up the base security role for the first time

- create a new empty security role.
- add the minimum privileges required to access the system.
- add the privileges required for the basic functionalities.
- test the role with the test user account.
- add the permissions to the entities that all users can access (e.g. reference data).

Reference: <https://linzawwin.blogspot.com/2020/07/minimum-privileges-required-to-log-in.html>

NEW QUESTION 6

- (Exam Topic 2)

You need to add the missing components to the Verification Process Automation solution. Which two components should you add? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Service Request statuscode field
- B. Dataverse connection reference
- C. Qualification statuscode field
- D. On-premises data gateway reference
- E. Outlook connection reference

Answer: CE

Explanation:

C: A service request can have one or more Qualification records associated with it. E: The new process for completing a service request must automate the following:

- Set the Service Request record status to Complete when work on all Qualification records is finished.
- Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

NEW QUESTION 7

- (Exam Topic 2)

You need to capture the Date Completed value from the website using a desktop flow. Which method should you use?

- A. Use optical character recognition (OCR) on the screen to locate and extract the value.
- B. Display an input dialog and prompt the user to enter the value.
- C. Extract the value from the window the browser is using.
- D. Retrieve the value from the HTML element in the webpage.

Answer: C

Explanation:

Record the name of the QV team member who performed the work and the date completed.

NEW QUESTION 8

- (Exam Topic 2)

You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Control

Process qualification records for a service request.

Switch

Condition

Apply to Each

Evaluate a qualification.

Do until

Condition

Apply to Each

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Apply to each

You can use the Apply to each action to process a list of items periodically. Box 2: Do until

The Do Until control in Power Automate is a loop that repeatedly forces an action until a certain condition becomes true.

Reference: <https://docs.microsoft.com/en-us/power-automate/apply-to-each> <https://blog.enterprisedna.co/do-until-loop-control-in-power-automate/>

NEW QUESTION 9

- (Exam Topic 2)

You need to be able to move a Power Automate desktop flow used in the verification process to the testing environment. What should you do?

- A. Share a copy of the desktop flow with a member of internal IT.
- B. Use the Export option in the flow to get the flow identifier and provide it to internal IT.
- C. Send a copy of the desktop flow to a member of internal IT.
- D. Create the desktop flow in a solution and provide it to internal IT.

Answer: D

Explanation:

Internal IT reports that the solution import to the test environment failed because of missing dependencies related to the flow for completing service requests.

Flows with PowerApps steps

Flows that were created via Power Automate in the PowerApps menu or flows that have PowerApps steps added have a different issue then other Power Automate flows. As of the writing of this blog these flows are not able to be imported into another environment. This means that if you create flows with Power Apps steps within them you will need to recreate them in your destination environment.

Reference: <https://www.spyglassmtg.com/blog/power-platform-solution-export-and-import-issues>

NEW QUESTION 10

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator.

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. Microsoft Excel template
- B. Entities component of a solution
- C. Microsoft Virtual Studio
- D. Templates area

Answer: B

Explanation:

Entity: Refers to a table in Dataverse. Table and entity are often used interchangeably for data access. Edit public views through tables

➤ Expand Data, select Tables, select the table you want, and then select the Views area.

➤ On the toolbar, select Add view. Add view to table

➤ On the Create a view dialog, enter a name and, optionally, a description, and then select Create. Reference:

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION 10

- (Exam Topic 3)

A company plans to implement chatbots by using Power Virtual Agents. The company has the following requirements for the bots:

- Users in the accounting department must be able to create a bot for frequently asked questions.
- The support desk users must be able to use the bot.

The users must not be able to change environment parameters in the Microsoft Power Platform environment. You need to configure the permissions for the bots. Which actions should you implement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Users can create a bot.	<div><div>Assign users the Maker permissions.</div><div>Assign users to a security role.</div><div>Share the bot with a security group.</div><div>Assign users the Maker permissions.</div><div>Assign users the System Administrator role.</div></div>
Support desk users can use the bot.	<div><div>Share the bot with a security group.</div><div>Assign users to a security role.</div><div>Share the bot with a security group.</div><div>Assign users the Maker permissions.</div><div>Assign users the System Administrator role.</div></div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Action
Users can create a bot.	<div><div>Assign users the Maker permissions.</div><div>Assign users to a security role.</div><div>Share the bot with a security group.</div><div>Assign users the Maker permissions.</div><div>Assign users the System Administrator role.</div></div>
Support desk users can use the bot.	<div><div>Share the bot with a security group.</div><div>Assign users to a security role.</div><div>Share the bot with a security group.</div><div>Assign users the Maker permissions.</div><div>Assign users the System Administrator role.</div></div>

NEW QUESTION 12

- (Exam Topic 3)

You plan to create classic workflows for process automation on the Account table. The process automation has the following requirements:

- If the Account Name column changes, a custom column named Previous Name must be updated with the original value.
- If the Credit Limit column changes, an email must be sent to the record owner with the new value.
- Asynchronous processes must be used whenever possible. You need to implement the process automation.

What is the minimum number of workflows you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Workflow type	Number of workflows
Background	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>
Real-time	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Workflow type	Number of workflows
Background	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>
Real-time	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>

NEW QUESTION 14

- (Exam Topic 3)
You are creating tables for use with Microsoft Power components.
The display names of the tables must not be changed when the solution is promoted to the user acceptance testing environment.
You need to apply this restriction to the solution, Where should you make the changes?

- A. Power Apps
- B. Default solution
- C. Segmented solution
- D. Unmanaged solution
- E. Managed solution

Answer: C

NEW QUESTION 17

- (Exam Topic 3)
You are a consultant. A client asks you to remove several solutions in one of their Microsoft Dataverse environments
The client wants to know what effect removing the solutions will have on the rest of the system. You need to explain the results of removing the solutions.
Which components be affected? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	<div><div></div><div>The solution only.</div><div>The solution and the lookup column.</div><div>The solution, the table, and any data in the table.</div></div>
A managed solution patch contains an update to a column label. The column is used in several forms and views.	<div><div></div><div>The solution and the updated column label.</div><div>The solution, the column, and any data in the column.</div><div>The solution, the table, and the updated column label.</div></div>
A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.	<div><div></div><div>The solution only.</div><div>The solution and the site map.</div><div>The solution, the table, and any data in the table.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 21

- (Exam Topic 3)
You are developing a canvas app.
You need to apply business rules to the app without writing code.
Which three actions can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Validate data and show error messages.B Enable or disable fields.
- B. Set field requirement levels.
- C. Set field values.
- D. Show or hide fields

Answer: ACD

Explanation:

The following actions are not available on Canvas apps:

- Show or hide columns
- Enable or disable columns
- Create business recommendations based on business intelligence Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

NEW QUESTION 24

- (Exam Topic 3)

A company plans to implement a voice-enabled Power Virtual Agents bot. The company has the following requirements for the bot:

- Recognize when a caller states Tennis or any variation of the word.
- Provide options when a caller states the name of a sport. You need to configure the bot.

Answer Area

Requirement	Feature
Recognize when caller states Tennis .	<div>Entity</div> <div>Entity</div> <div>Topic</div> <div>Variable</div>
Provide options when caller states name of sport.	
Provide options when caller states name of sport.	<div>Topic</div> <div>Entity</div> <div>Topic</div> <div>Variable</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Feature
Recognize when caller states Tennis .	<div>Entity</div> <div>Entity</div> <div>Topic</div> <div>Variable</div>
Provide options when caller states name of sport.	
Provide options when caller states name of sport.	<div>Topic</div> <div>Entity</div> <div>Topic</div> <div>Variable</div>

NEW QUESTION 26

- (Exam Topic 3)

A company has a canvas app that includes the following screens: Screen1 and Screen2. The OnVisible property for Screen1 contains the following expression.

Set(AgeGroups, ["1-25", "26-54", "55+"])

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input type="radio"/>
You can use the Update function to change values in AgeGroups.	<input type="radio"/>	<input type="radio"/>

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input checked="" type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input checked="" type="radio"/>
You can use the Update function to change values in AgeGroups.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 30

- (Exam Topic 3)

You create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams. Users report that they are unable to view the app in Teams. You need to ensure that users can access the app. What should you do?

- A. Share the app with a security group by using the Maker portal.
- B. Share the app with a security group in Teams.
- C. Request that a tenant administrator pin the app to the app bar in Teams.
- D. Publish the app by using the Maker portal.
- E. Share the app with individual users by using the Maker portal.

Answer: C

Explanation:

When you create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams, the app needs to be added to the app bar in Teams before it can be accessed by users. This can only be done by a tenant administrator. To ensure that users can access the app, you would need to request that the tenant administrator pin the app to the app bar in Teams.
Sharing the app with a security group by using the Maker portal (A) or in Teams (B) would allow users in that group to access the app, but they would still need to be able to find and open the app.
Here are some references from Microsoft that may be helpful in understanding how to make Power Apps app available in Teams:

- > Microsoft docs: Add a Power Apps app to a Microsoft Teams channel
- > Microsoft docs: Pin a Power Apps app to the app bar in Microsoft Teams
- > Microsoft docs: Distribute Power Apps for Microsoft Teams

NEW QUESTION 33

- (Exam Topic 3)

You create a new Power Virtual Agents chatbot for an organization. Testing and production deployment of the chatbot are not complete. You need to ensure that appropriate users can access the chatbot.
Which methods should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Method
Test the chatbot with unlicensed internal users	<div><div></div><div>Use the demo website</div><div>Share the chatbot to each user individually</div><div>Share the chatbot to a security group containing all users</div></div>
Allow other licensed internal users to edit the chatbot	<div><div></div><div>Share the chatbot to each user individually</div><div>Share the chatbot to a security group containing all users</div><div>Deploy the chatbot to Microsoft Teams in your tenant</div></div>
Deploy the chatbot to production for public consumption	<div><div></div><div>Embed the chatbot code in an iFrame on your company's public website</div><div>Deploy the chatbot to Microsoft Teams in your tenant</div><div>Deploy the chatbot to AppSource</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Use the demo website

When publishing the bot to the web, you can publish to a prebuilt demo website (which you can use to share the bot with your teammates and stakeholders) and to your own live website.

Box 2: Share the chatbot to a security group containing all users.

A license for each user, also known as a "per user license" (or "Power Virtual Agent User License" as referred to on the Microsoft 365 admin center), should be assigned to individual users who need access to create and manage chatbots.

To simplify user license management, you can assign licenses to an Azure Active Directory (Azure AD) security group.

Box 3: Embed the chatbot code in an IFrame on your company's public website

You can add your bot to a live website as an IFrame. Your live website can be a customer-facing external website or an internal site, like a SharePoint or Yammer site.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels> <https://docs.microsoft.com/en-us/power-virtual-agents/requirements-licensing>

NEW QUESTION 38

- (Exam Topic 3)

You configure an alert in Power BI.

You need to alert users when the value of a tile exceeds a threshold. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Where should you configure the Power BI alert so that it triggers the process?

Power BI
Common Data Service
Power Automate
Power BI admin portal

Who can see alerts configured for Power BI?

The person who created the alert.
The dashboard owner and the person who created the alert.
Everyone who has access to the dashboard.
Everyone who has access to the Power BI instance.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts>

NEW QUESTION 40

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Relevance Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Relevance Search brings the following benefits:

- Finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."
- Includes the ability to search documents found in Notes and Attachments on Emails and Appointments

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 44

- (Exam Topic 3)

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- It must be in the local language.
- Only fulltime employees may access the chatbot. You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Chatbot in local language	<div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div>
Employee access	<div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Chatbot in local language	<div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div>
Employee access	<div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div>

NEW QUESTION 48

- (Exam Topic 3)

You need to build a Power BI dashboard for sales managers to track opportunities.

When a new sale closes that is greater than \$1 million, a notification must pop up and an email must be sent to the leadership team.

You need to ensure the email is sent without editing the Microsoft Dataverse.

Which two elements should you configure? Each correct answer is part of the solution. NOTE: Each correct selection is worth one point.

- A. alerts in Power BI
 B. a calculated column in the Dataverse
 C. a custom connector
 D. a paginated report to save to Microsoft OneDrive
 E. a Power Automate flow

Answer: AE

Explanation:

In order to build a Power BI dashboard for sales managers to track opportunities and send notifications and emails when a new sale closes that is greater than \$1 million, you should configure:

* A. alerts in Power BI: You can set up alerts in Power BI that will trigger when a specific condition is met. For example, you can set an alert to trigger when the value of a specific field in the "Opportunities" table exceeds \$1 million.

* E. a Power Automate flow: To send an email to the leadership team when an alert is triggered, you can create a Power Automate flow that is triggered by the Power BI alert. The flow can then use the "Send an email" action to send an email to the leadership team with the necessary information about the sale that exceeded \$1 million.

References:

- > <https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-alerts>
- > <https://docs.microsoft.com/en-us/power-platform/admin/alerts-overview>

NEW QUESTION 52

- (Exam Topic 3)

You are creating a business rule to implement new business logic.

You must apply the business logic to a canvas app that has a single screen named Screen1. You need to configure the scope for the business rule.

Which scope should you use?

- A. All Forms
 B. Entity
 C. Screen1
 D. Global

Answer: B

Explanation:

Note: Some terminology has changed. Entity is now Table. If you're building a Canvas app, you must use table (entity) as the scope.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 53

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- > 0 - 17
- > 18 - 25
- > 26 - 35
- > 36 - 55
- > 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item.

Use Age group for Identify in the question.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 55

- (Exam Topic 3)

A bank uses Power BI visualizations to help determine whether they should loan money to a customer. The bank has three different visuals that are part of a Power BI report. The bank uses a set of four risk variables that indicate whether the customer is creditworthy.

You must create a mechanism so that bank employees can change the values of the four risk variables. Changes to the value of any variable must cause the three visualizations to update.

You need to create the solution.

Which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Update the visualizations when users change the values of the risk variables.	<div><div></div><div>Embed a canvas app in a Power BI report.</div><div>Embed a Power BI report in a model-driven app.</div><div>Embed a model-driven app in a Power BI report.</div></div>
Ensure that users can adjust the values of the four risk variables that contribute to a customer's credit risk.	<div><div></div><div>Use Power BI tiles.</div><div>Use Power Apps visuals.</div><div>Use the Power BI service.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Embed a Power BI report in a model-driven app

You can embed a Power BI report in a model-driven app main form. Box 2: Use the Power BI service.

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed. With Power BI Desktop or Microsoft Excel, Power Query for authoring reports and Power BI for sharing dashboards and refreshing data from model-driven apps,

your users have a powerful way to work with your app's data.

Reference:

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/embed-powerbi-report-in-system-form>

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/use-power-bi>

NEW QUESTION 59

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Categorized Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming,"

or "streamed."
Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 64

- (Exam Topic 3)
A company uses a Power Apps app with Microsoft Dataverse.
The company requires the import of records into Dataverse. Duplicate records in the data must be deleted without user intervention.
You create a duplicate detection rule.
You need to configure the rule for the data import. Which option should you configure?

- A. Enable the Templates for Data Import option.
- B. Enable the When a record is created or updated option.
- C. Disable the Allow Duplicates option.
- D. Enable the During data import option.

Answer: D

Explanation:

When configuring a duplicate detection rule in Power Apps with Microsoft Dataverse, to automatically delete duplicate records during a data import, you should enable the "During data import" option. This option allows the detection rule to automatically delete duplicates as they are imported into the system, without requiring user intervention.

References:

- > <https://docs.microsoft.com/en-us/power-platform/admin/create-duplicate-detection-rule>
- > <https://docs.microsoft.com/en-us/power-platform/admin/data-integration-duplicate-detection>

NEW QUESTION 68

- (Exam Topic 3)
You are customizing a model-driven app for a company. You create a Theme template to ensure the company logo and colors are properly used within these apps.
The theme must meet the following requirements:
> Updated to add the logo
> Downloaded by the makers to create the app
You need to configure the assets. To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Configurations

Edit the theme in System settings and upload a jpg file.

Replace an existing UI item's hexadecimal number.

Upload the theme elements as new web resources.

Use the component library.

Answer Area

Requirement	Configuration
Update logo.	
Change model-driven app colors.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Upload the theme elements as new web resources.
Each type of icon is stored as a web resource. Create a web resource first and then set the icons to use them. Alternatively, you can add the icon by creating a new web resource when you define the table properties.
Box 2: Replace an existing UI item's hexadecimal number. Copy and alter the existing theme
The easiest and quickest way to create a new theme is to clone and alter an existing theme. Then save, preview, and publish it.
> Sign in to Power Apps, select Settings icon (upper right), and then select Advanced settings.
> Select Customizations, and then select Themes.
> Under All themes, select the theme you want to clone, such as the CRM Default Theme. Select Clone on the command bar.
> Replace an existing UI item's hexadecimal number, such as the Title Text Color, with the hexadecimal value that represents the color you want.
For example, the CRM Default Theme was cloned and changed using mostly varying shades of green color. The following screenshots show the new colors for navigation and highlighting. A custom logo was also added that will appear in the upper left corner of an app.

THEME

NEW QUESTION 71

- (Exam Topic 3)
You are a Dynamics 365 for Customer Service administrator.
You must create a form for team members to use. The form must provide the ability to:

- > Lock a field on a form.
- > Trigger business logic based on a field value.
- > Use existing business information to enhance data entry.

You need to implement business rule components to create the form.
Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Components	Requirement	Component
Actions	Lock a form field.	
Conditions	Trigger business logic based on a field value.	
Recommendation	Leverage existing business information to enhance data entry.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Action
- > Condition
- > Recommendation

NEW QUESTION 74

- (Exam Topic 3)
You create a model-driven app for an automobile parts help desk.
A help desk agent uses a form to gather information about customers' automobiles in two custom tables. The names of the tables are Client and Automobile,

The form must prepopulate the following information about the customer from the client table:

- First name
- Last name

The agent must be able to type the following information about the automobile:

- Automobile make
- Automobile model

You need to implement the form.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Prepopulate client information	<div>Relationship</div> <div>Dataflow</div> <div>Relationship</div> <div>Alternate key</div> <div>Virtual table</div>
Enter automobile information	<div>Table</div> <div>Table</div> <div>View</div> <div>Connector</div> <div>Power Automate flow</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Prepopulate client information	<div>Relationship</div> <div>Dataflow</div> <div>Relationship</div> <div>Alternate key</div> <div>Virtual table</div>
Enter automobile information	<div>Table</div> <div>Table</div> <div>View</div> <div>Connector</div> <div>Power Automate flow</div>

NEW QUESTION 77

- (Exam Topic 3)

You plan to create a dataflow by using Power Query to transform the data. You observe that some cells display an error instead of the expected data. You need to obtain more details about the errors. What should you do?

- A. Select the row that includes the cell with the error.
B. Use the Flow Checker.
C. Select the cell with the error.
D. Use the App Checker.
E. Use the Advanced Editor.

Answer: C

Explanation:

When you select the cell with the error, a tooltip will appear with more details about the error. This will help you identify the cause of the error and take the necessary steps to fix it.

NEW QUESTION 78

- (Exam Topic 3)

A veterinary office plans to use Microsoft Power Platform to streamline customer experiences. The customer creates a canvas apps to manage appointments. On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, a text field must appear so that staff members can add details about the pet. You need to create a dynamically visible field. What should you configure?

- A. business rule
B. business process flow
C. workflow

Answer: A

Explanation:

A business rule can be used to configure the visibility of a field based on the value selected in another field. In this case, a business rule could be created to make the text field for additional pet details visible when the "Other" option is selected in the dropdown field for the type of pet. This can be done by going to the Power Apps portal, navigating to the Common Data Service, and creating a new business rule for the entity that contains the appointment form. Within the rule, you can set the visibility of the text field to be dependent on the value selected in the dropdown field. Reference:

<https://docs.microsoft.com/en-us/power-platform/model-driven-apps/model-driven-business-rules>

It's important to note that the above feature is only available in the PowerApps Model Driven App and not in Canvas App.

NEW QUESTION 80

- (Exam Topic 3)

You plan to create user interface (UI) flows to automate several web-based business processes that you currently perform manually. You need to ensure that users can create and run web UI flows.

Which three components must you install and configure on user's devices? Each correct answer presents part of the solution. NOTE Each correct selection is worth one point.

- A. UI Flows application
- B. Selenium IDE
- C. Latest version of Microsoft Edge
- D. On-premises data gateway
- E. Latest version of Mozilla Firefox

Answer: ABC

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/setup>

NEW QUESTION 83

- (Exam Topic 3)

You are configuring a new Power Apps portal. You have two web roles, one for authenticated users and one for anonymous users. You grant the Anonymous Users role to users.

A test user reports that they can access the home page but cannot view a page linked from the home page. You need to determine why the test user cannot view the portal page.

What is the cause of the issue?

- A. Maintenance mode is enabled on the portal.
- B. The setting to make the page available to everyone is disabled.
- C. The Authenticated Users Web role does not have permission to view the page.
- D. Inherited permissions are not enabled for the linked page.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/webpage-access-control>

NEW QUESTION 87

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- > 0 - 17
- > 18 - 25
- > 26 - 35
- > 36 - 55
- > 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use age for Identify in the question and then add branches for each group that use conditional logic.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead, create a custom Age group entity and synonyms for each individual age in the corresponding item. Use Age group for Identify in the question.

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

To do this, you need to create a custom entity. Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 91

- (Exam Topic 3)

A customer has a support website that includes FAQ pages, knowledge articles, and support content. You plan to leverage an existing Power Virtual Agents bot to

enhance and streamline existing support functionality for the existing support portal.

You need to create topics from existing website content. The process must minimize human errors during topic creation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Hover over the topic and select the Automate icon.
- Capture suggested topics.
- Add selected topics to the chatbot.
- Enable the topics.
- Identify the pre-filled trigger phases.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Select Suggest topics on the Topics page to extract content from FAQ/support pages or online files.
 - > Add the suggested topics to your bot.
 - > Enable the topics.
- <https://docs.microsoft.com/en-us/power-virtual-agents/advanced-create-topics-from-web>

NEW QUESTION 94

- (Exam Topic 3)

A Company plans to send escalation emails to all customers with overdue invoices. You are creating a Microsoft Power Automate flow to determine whether to send an escalation email.

The system must send an alert for all invoices that are seven days or more overdue. You need to configure the flow.

Which expression should you use?

- A. `TriggerEmail() = 'OverdueDate' >= 7;`
- B. `'OverdueDate' >= '7'?TriggerEmail():false`
- C. `@GreaterOrEquals(TriggerEmail()?['OverdueDate']: '7')`

- A. Option A
- B. Option B
- C. Option C

Answer: C

Explanation:

Example: `equals(triggerOutputs()?['body/PDFStatus/Value'],'Ready to Generate')` Reference:
<https://evolvous.com/microsoft-power-automate-trigger-condition/>

NEW QUESTION 99

- (Exam Topic 3)

A company uses model-driven apps.

Users in the sales department enter the first name, last name, and phone number of customers in the app. The users request a single screen in the app to enter the customer data.

You need to configure the app. What should you do?

- A. Create a canvas app.
- B. Modify the site map.
- C. Create a Power Automate flow.
- D. Use a Power Virtual Agents app.

Answer: B

Explanation:

To configure a model-driven app in order to provide a single screen for the sales department users to enter the customer data, you should modify the site map of the app. A site map is a hierarchical representation of the different areas and functionality of the app, and it can be modified to create a new screen or view that combines the necessary fields for the customer data entry.

Once the site map is modified, you can add the necessary fields (first name, last name, and phone number) to the new screen or view, and make it accessible to the sales department users.

References:

- > <https://docs.microsoft.com/en-us/power-platform/admin/model-driven-apps-overview>
- > <https://docs.microsoft.com/en-us/power-platform/admin/modify-site-map>

NEW QUESTION 100

- (Exam Topic 3)

The owner of a company needs to know who signs into the system. You need to ensure that the owner can view the user audit logs.

Where does each action need to be performed? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Action	Location
Activate user auditing.	<div><div>▼</div><div><div>System Settings</div><div>Personal Settings</div><div>Customize the System</div><div>Microsoft 365 Compliance</div></div></div>
View the user audit logs.	<div><div>▼</div><div><div>Advanced Find</div><div>Individual record</div><div>User Summary report</div><div>Microsoft 365 Compliance</div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity>

NEW QUESTION 103

- (Exam Topic 3)

You make the following customizations to a Microsoft Dataverse Environment

- Create a new table
- Add data to the new table.
- Delete an unused area from the site map.

The components must be transported to a different environment.

You need to determine the method required to transport each component.

Which method should you use? To answer, drag the appropriate methods to the correct components. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	Component	Method
<div><div>Configuration Migration tool</div><div>Solution</div><div>SolutionPackager tool</div></div>		<div><div>New table</div><div>Data for the new table</div><div>Site map</div></div>	<div><div></div><div></div><div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Methods	Answer Area	Component	Method
<div><div>Configuration Migration tool</div><div>Solution</div><div>SolutionPackager tool</div></div>		<div><div>New table</div><div>Data for the new table</div><div>Site map</div></div>	<div><div>Solution</div><div>Configuration Migration tool</div><div>SolutionPackager tool</div></div>

NEW QUESTION 106

- (Exam Topic 3)

You plan to automate several different processes by using Power Automate. Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Process	Component
Attended UI flow	Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Component
Unattended UI flow		
Flow that uses a custom connector	Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Component
Flow that uses a prebuilt connector		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

1: Custom connector (REST API access) 2: Unattended UI flow

NEW QUESTION 110

- (Exam Topic 3)

A company uses Power Apps.

Users must be able to view only the address1 columns in the Account table.

You need to ensure other address columns are not visible to users when creating views and filters. What should you do?

- A. Disable the Search option for the columns.
- B. Create business rules to hide the other address columns.
- C. Delete the other address columns from the table.
- D. Use column-level security to remove read access to all users.

Answer: D

NEW QUESTION 113

- (Exam Topic 3)

A company creates a canvas app.

The app requires users to enter their social security number. The app should only display the last four digits when the user tabs to a different column.

You need to configure the app. Which option should you use?

- A. Power Fx
- B. Business rule
- C. Business process flow
- D. Power BI DAX

Answer: A

NEW QUESTION 114

- (Exam Topic 3)

You ate a Dynamics 365 help desk administrator

You need to create a dashboard that displays information on help desk cases that ate handled each week. Which dashboard components should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area	Requirement	Component type
	Add a tag chart by using opened cases.	System chart Personal chart Area chart
	Add a stacked column chart shared with your team.	System chart Personal chart Area chart
	Add a Microsoft Power BI visualization.	System chart Personal chart Area chart
	Add a chart from a view that a user creates.	System chart Personal chart Area chart
	Add a doughnut chart that shows cases by owner.	System chart Personal chart Area chart

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

System Personal Personal

Personal System

NEW QUESTION 119

- (Exam Topic 3)

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design. You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable the lock orientation setting.
- B. Configure the height and width properties by using a formula.
- C. Disable the Scale to fit setting.
- D. Configure the height and width properties by using drag handles.

Answer: BC

Explanation:

To create a canvas app that uses a responsive design in Power Apps, you should perform the following actions:

* B. Configure the height and width properties by using a formula: By using a formula to set the height and width properties, you can ensure that the app will respond to changes in screen size and orientation. For example, you can use the Width() and Height() functions to set the width and height properties based on the size of the screen.

* C. Disable the Scale to fit setting: The Scale to fit setting, when enabled, makes the app's content fit on the screen by scaling it down. To create a responsive app, this setting must be disabled.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/responsive-design> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-width>

NEW QUESTION 124

- (Exam Topic 3)

A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.

A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.

The table must be added to a solution to be promoted once the change is made.

Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted. You need to add the change to a solution for promotion.

Options

Add column

Add existing

Add required components

Add subcomponent

Answer Area

Action

Option

Add the Devices table to the solution.

Add the status column changes only to the solution.

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 129

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app.

You need to ensure that sales team members can access the app. Where should you configure app permissions?

- A. Security Roles
- B. Manage Roles
- C. Dynamics administration center
- D. Dynamics 365 home

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-r> Manage access to apps by using security roles. You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.

- * 1. Go to Settings > My Apps.
- * 2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
- * 3. Enter the following in the Manage Roles dialog box:
 - a) App URL Suffix
 - b) Roles
 - c) Select Save.
- * 4. Refresh the My Apps page.
- * 5. Go to the Apps Being Edited view, and publish the app again. Reference:
<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/manage-access-app>

NEW QUESTION 133

- (Exam Topic 3)
You plan on implementing complex business logic in Microsoft Dataverse tables by using Power Automate flows. You realize that the functionality required to implement the business logic is not available in a Power Automate flow. The new business logic must work in multiple Dataverse tables. In addition, the operation must return a value after it finishes and must be able to run from an existing Dataverse action. You need to recommend the method to implement the missing logic. What should you recommend?

- A. Scheduled workflow
- B. Bound action
- C. Custom API
- D. Unbound action

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/power-automate/dataverse/bound-unbound> <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/custom-api>

NEW QUESTION 136

- (Exam Topic 3)
You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data. Four of the templates must be available to all users. The remaining template must be available only to you. You configure the appropriate security roles for users. You need to determine how to upload the Excel templates. Which method should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Availability	Method
Available to everyone	<div><div></div><div><div>In the Settings menu, select Document Templates.</div><div>In the view for the email records, select Excel Templates.</div><div>In the Settings menu, select Email Templates.</div></div></div>
Available only to yourself	<div><div></div><div><div>In the Settings menu, select Document Templates.</div><div>In the view for the email records, select Excel Templates.</div><div>In the Settings menu, select Email Templates.</div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated with medium confidence
Box 1: In the Settings menu, select Document Templates
Templates uploaded from the Settings page are available to all users. You don't need to take any further action. Administrators can use the Settings page to upload the Excel template. A template uploaded in Settings is available to all users.
For admins: Upload the Excel template
> Go to Settings > Templates > Document Templates.

- Click Upload Template.
- Drag the Excel file into the dialog box or browse to find and upload the file.
- Upload Template dialog box.
- Click Upload.

Box 2: In the view for the email records, select Excel templates

Note: For non-admins or admins wanting to create a personal template: Upload the Excel template

Open a page with a list of records, for example, the list of Sales Opportunities. Go to Sales > Opportunities > My Open Opportunities.

- On the menu bar, click Excel Templates > Create Excel Template.
- Click Excel Template > Upload.
- Click Upload to add the Excel template.
- Drag the file into the dialog box or browse to find and upload the file.
- Click Upload.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/analyze-your-data-with-excel-templates>

NEW QUESTION 137

- (Exam Topic 3)

A company uses a model-driven app. The app uses a workflow to send email. Emails are sent to new customers that enter an email address for the first time in the app.

Customers report that they do not receive an email after entering an email address. You need to troubleshoot the issue.

In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Edit the workflow.
- Review the tab with the process sessions.
- Clear the option to delete the workflow retention jobs.
- Run the workflow.

Answer area

-
-
-
-

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

- Edit the workflow.
- Review the tab with the process sessions.
- Clear the option to delete the workflow retention jobs.
- Run the workflow.

Answer area

- Edit the workflow.
- Review the tab with the process sessions.
- Clear the option to delete the workflow retention jobs.
- Run the workflow.

NEW QUESTION 141

- (Exam Topic 3)

You use Power BI Desktop to configure Power BI reports and dashboards.

You need to create a canvas app that displays account information and include the app in a Power BI report. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. Publish the report to the Power BI service.
- B. Connect to Common Data Service from Power BI Desktop.
- C. Connect Common Data Service from Power BI Desktop
- D. Selected required fields from the Accounts table.
- E. From the Power Apps Insert menu, add a Power BI
- F. From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data.

Answer: CDE

NEW QUESTION 144

- (Exam Topic 3)

You are creating a canvas app.

A user will click a button on each screen of a Power Apps app to proceed to the next screen. You need to implement an action that selects the next screen that the user sees.

Which event should you handle?

- A. OnLoad
- B. OnCheck
- C. ScreenTransition
- D. OnSelect

Answer: D

Explanation:

Add navigation

- * 1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
- * 2. With the arrow still selected, select the Action tab, and then select Navigate.
- * 3. The OnSelect property for the arrow is automatically set to a Navigate function.

- * 4. When a user selects the arrow, the Target screen fades in.
- * 5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
- * 6. Navigate(Source, ScreenTransition.Fade)
- * 7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen. Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-screen-context-variables>

NEW QUESTION 148

- (Exam Topic 3)

You create a Power Virtual Agents bot.

You observe that the bot is not able to recognize input from some users. You need to configure the bot response for unrecognized input from users.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Transfer to an agent.
- B. Use a fallback topic.
- C. Display a system-defined error message.
- D. Connect to a different channel.

Answer: BC

Explanation:

- * B. Use a fallback topic: Power Virtual Agents provides the capability to handle unrecognized inputs by using fallback topics. A fallback topic is a topic that is triggered when the bot is unable to recognize the user input. You can configure fallback topics by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Topics" tab and create a new topic with a fallback trigger. Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/topics-triggers#fallback-triggers>
- * C. Display a system-defined error message: This is another option to handle unrecognized inputs by displaying a predefined message that inform the user that the bot was unable to understand their input.

NEW QUESTION 152

- (Exam Topic 3)

You ate a Dynamics 365 Customer Engagement administrator. You create workflows to automate business processes. You need to configure a workflow to meet the following requirements:

- Be triggered when a condition is met.
- Run immediately.
- Perform an action when a condition is met.

How should you configure the workflow? To answer, select the appropriate configuration in the answer area. NOTE: Each correct selection is worth one point.

Answer Area	Workflow Requirement	Configuration Option
	Be triggered when a condition is met.	<div>Publish workflow. Subject contains data. Trigger when a Microsoft Flow button is pressed.</div>
	Run immediately.	<div>Approve the workflow. Configure the workflow to run now. Configure child workflow to run now.</div>
	Perform an action when a condition is met.	<div>Send an email. View chart. Update a security role.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- 1) Be triggered when a condition is met - Subject contains data
- 2) Run Immediately - Configure the workflow to run now
- 3) Perform an action when a condition is met - send an email

NEW QUESTION 155

- (Exam Topic 3)

You are using the Data import wizard to import records into the account table from a CSV file. The CSV-to-table mapping is as following:

- Name column represents the account and maps to the Account column.
- TIE Parent Name column represents the holding company of the account with subsidiaries underneath Records that are imported into the table are only related to other records in the file.

You need to configure the import to create the relationship between records. What should you do?

- A. Map Parent Name in the CSV file to the Parent Account colum
- B. Select Account as lookup criteria
- C. Lookup the record IDs Of the records in the ParentAccount colum
- D. Add the record IDs new column in the fil
- E. Map the new column to the ParentAccount column.

- F. Map Parent Name in the file to the Parent Account colum
- G. Select Parent Account as lookup criteria
- H. Create an alternate key the account table by using the Account Name colum
- I. DO not map parent Name in file.

Answer: C

Explanation:

Add a new column for the self-referential mapping.
Reference: <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/import-data>

NEW QUESTION 158

- (Exam Topic 3)
A company plans to create a Power Virtual Agents chatbot. The bot has the following requirements:

- Prompt for a location of the customer and the call must be routed to a support agent for the location.
- Transfer support calls at each location to a support bot that uses the Bot Framework. You need to configure the bot.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct select is worth one point.

NEW QUESTION 161

- (Exam Topic 3)
A company uses three apps to complete several business processes. You need to identify solutions to help the company perform regression testing when the apps are updated. Which two tools should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Power Automate automated flow
- B. Windows recorder (V1)
- C. Power Automate desktop flow
- D. Windows Steps Recorder

Answer: BD

NEW QUESTION 163

- (Exam Topic 3)
A company uses a model-driven app. The app uses a Power Virtual Agents chatbot. The company has two locations in different countries/regions with separate environments for each location. Each location has a development environment, a testing environment, and a production environment. The company uses the Application Lifecycle Management (ALM) process for the environments. You need to create the different Power Virtual Agents bot environments. How many Power Virtual Agents bot environments are required?

- A. 1
- B. 2
- C. 3
- D. 6

Answer: D

Explanation:

When a company uses a model-driven app that incorporates a Power Virtual Agents chatbot, and has multiple locations with different environments for each location, it is necessary to create separate Power Virtual Agents bot environments for each location.

For each location, 3 different environments are required: development, testing, and production. This is in line with the Application Lifecycle Management (ALM) process that the company uses.

In total, 6 Power Virtual Agents bot environments are required: 2 locations x 3 environments per location = 6. It's worth mentioning that Power Virtual Agents allows to export and import the bot, so once you configure the bot in one environment, you can import the bot to the other environments, this way you don't need to start from scratch.

References:

- <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/bot-lifecycle>
- <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/export-import>

NEW QUESTION 165

- (Exam Topic 3)

You are creating a new business process flow to qualify leads.

You create an action. The action is not available inside the Action Step. You need to make the action available to the Action Step.

Which two steps must you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Activate the action.
- B. Select Run as an on-demand process
- C. Add at least one step to the action.
- D. Ensure that the entity for the action matches the corresponding entity for the business process flow stage.

Answer: CD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april18/microsoft-flow/add-action-business>

NEW QUESTION 168

- (Exam Topic 3)

A company has a custom website.

You need to embed a Power Virtual Agents chatbot into the website. What should you use?

- A. Webpage URL
- B. Form ID
- C. Bot ID
- D. IFrame

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels>

NEW QUESTION 169

- (Exam Topic 3)

You create functionality for a company. The functionality includes a Microsoft Dataverse table with a form for data entry. The functionality will be distributed to other lines of business in the company, each with its own Dataverse environment.

New forms must not be created in order for updates to the functionality to work correctly. You need to package the new functionality for distribution.

What should you do?

- A. Use a patch solution and disable the ability to create new forms for the table.
- B. Use a managed solution and include only the needed form.
- C. Use an unmanaged solution and include only the needed form.
- D. Use a managed solution and disable the ability to create new forms for the table.

Answer: B

Explanation:

Managed solutions are used to deploy to any environment that isn't a development environment for that solution. This includes test, UAT, SIT, and production environments. Managed solutions can be serviced independently from other managed solutions in an environment. As an ALM best practice, managed solutions should be generated by exporting an unmanaged solution as managed and considered a build artifact. Additionally:

You can't edit components directly within a managed solution.

Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm>

NEW QUESTION 171

- (Exam Topic 3)

A customer tracks events by using a custom entity.

The custom entity includes a custom field for the venue of the events. The customer must be able to display the events by venue in a calendar.

You need to ensure that all events display by venue in the calendar. To which component should you add a control?

- A. Form
- B. view
- C. Field
- D. Chart

Answer: B

Explanation:

If you use unified interface, you can display any record in a calendar view via the calendar control.

- > Go to Settings->Customization->Customize the System
- > Open the configuration for the entity that you want to use the calendar control (Opportunities in our example)
- > Click the View tab
- > Click “Add Control” and select the calendar control.
- > Click the dot for every interface from which you want the calendar control to be available.

Reference:

<https://crmtipoftheday.com/1206/view-any-dynamics-365-record-on-a-calendar/>

NEW QUESTION 172

- (Exam Topic 3)

You need to recommend a role for users to perform several required tasks. The solution must use the principle of least privilege.

Which roles should you recommend? To answer, drag the appropriate roles to the correct functions. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Roles	Answer Area								
	<table><thead><tr><th>Function</th><th>Role</th></tr></thead><tbody><tr><td>Create new users.</td><td>Role</td></tr><tr><td>Assign roles to users.</td><td>Role</td></tr><tr><td>Perform backups for an instance.</td><td>Role</td></tr></tbody></table>	Function	Role	Create new users.	Role	Assign roles to users.	Role	Perform backups for an instance.	Role
Function	Role								
Create new users.	Role								
Assign roles to users.	Role								
Perform backups for an instance.	Role								
Office 365 global administrator									
Office 365 service administrator									
Dynamics 365 service administrator									
Dynamics 365 system administrator									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Office 365 Global Administrator

You may think that the Dynamics 365 system administrator would have power to do all the actions needed to manage Dynamics 365, but this is not the case.

What's different in Microsoft cloud deployments is that licenses and user accounts are managed in Office 365 by an Office 365 Global Administrator. This role is analogous to a network administrator for an on premises deployment. The Global Administrator is the only role to create new user accounts and assign subscription licenses for Dynamics 365 (and other Office 365 apps such as Skype, Power BI and SharePoint).

Box 2: Dynamics 365 system administrator

The Dynamics 365 system administrator may assign roles and permissions to the Dynamics 365 user within an instance of Dynamics 365. The Dynamics 365 system administrator also controls all the settings in Dynamics 365.

Box 3: Dynamics 365 admin

The Dynamics 365 admin can perform backups and restores. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/use-service-admin-role-manage-tenant>

<https://community.dynamics.com/crm/b/govandthecity/posts/understanding-dynamics-365-and-office-365-admi>

NEW QUESTION 174

- (Exam Topic 3)

A company creates a Microsoft Teams app that stores data in two tables in a Microsoft Dataverse for Teams environment.

Users require access to the app and the app data. You need to configure access.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Access	Action
Access to the data	<div>Share the data and assign permissions.</div> <div>Assign a permission set for each table in the app.</div> <div>Create a security role and assign permissions by table.</div> <div>Share the data and assign permissions.</div>
Access to the app	<div>Publish the app to a Teams channel.</div> <div>Share with a security group.</div> <div>Share with users.</div> <div>Publish the app to a Teams channel.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Access	Action
Access to the data	<div>Share the data and assign permissions. </div> <div>Assign a permission set for each table in the app.</div> <div>Create a security role and assign permissions by table.</div> <div>Share the data and assign permissions.</div>
Access to the app	<div>Publish the app to a Teams channel. </div> <div>Share with a security group.</div> <div>Share with users.</div> <div>Publish the app to a Teams channel.</div>

NEW QUESTION 178

- (Exam Topic 3)

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields. You need to create forms for each of the following case types:

Case type	Requirement
Case type A	A new case form that includes a timeline
Case type B	A new case form that includes a business process flow
Case type C	A new case form that can display case data on an interactive dashboard
Case type D	A new mobile-friendly case form that requires minimal fields for record creation
Case type E	A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Form types	Answer Area												
<div>quick create</div> <div>main</div> <div>quick view</div> <div>card</div>	<table><thead><tr><th>Case type</th><th>Form type</th></tr></thead><tbody><tr><td>Case type A</td><td>Form type</td></tr><tr><td>Case type B</td><td>Form type</td></tr><tr><td>Case type C</td><td>Form type</td></tr><tr><td>Case type D</td><td>Form type</td></tr><tr><td>Case type E</td><td>Form type</td></tr></tbody></table>	Case type	Form type	Case type A	Form type	Case type B	Form type	Case type C	Form type	Case type D	Form type	Case type E	Form type
Case type	Form type

<https://docs.microsoft.com/en-us/dynamics365/customer-service/create-design-forms-customer-service-hub>

NEW QUESTION 181

- (Exam Topic 3)

You are creating a Power Virtual Agents chatbot for a Microsoft Power Platform power apps portal app. The job title of users must be stored automatically when users log in. The job title must always appear in the chatbot.

You need to configure the job title functionality.

Which mechanism should you use?

- A. artificial intelligence
- B. variable
- C. entity
- D. topic

Answer: B

Explanation:

After enabling the Authentication, you will now have access to Two variables, bot.UserDisplayName

bot.UserId

Reference:

<https://powerusers.microsoft.com/t5/Power-Virtual-Agents-Community/Getting-User-Details-To-Use-In-Power>

NEW QUESTION 186

- (Exam Topic 3)

The business team provides the following list of features that they would like you to implement:

- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.
- Edit the Address composite field.
- Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Group by or sort columns in the current view.	<div>Yes</div> <div>No</div>
Configure a business rule to show an error meessage.	<div>Yes</div> <div>No</div>
Edit values in calculated fields	<div>Yes</div> <div>No</div>
Edit the Address composite field.	<div>Yes</div> <div>No</div>
use the editable grid on mobile phones.	<div>Yes</div> <div>No</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Group by or sort columns in the current view.	<div>Yes</div> <div>No</div>
Configure a business rule to show an error meessage.	<div>Yes</div> <div>No</div>
Edit values in calculated fields	<div>Yes</div> <div>No</div>
Edit the Address composite field.	<div>Yes</div> <div>No</div>
use the editable grid on mobile phones.	<div>Yes</div> <div>No</div>

NEW QUESTION 188

- (Exam Topic 3)

You have a business process flow (BPF) that interacts with the Account entity. You configure a new version for the BPF and add a new stage at the beginning. You need to identify the impact of the new version on the existing account records.

What is the outcome in each scenario? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
What happens to existing accounts?	<div>Existing accounts show the old BPF.</div> <div>Existing accounts show the new BPF.</div> <div>Existing accounts only show the new stage.</div>
What happens to new accounts?	<div>No BPF is linked to a new account.</div> <div>The new BPF shows only the new stage for a new account.</div> <div>The new BPF is showing in a new account.</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated
Box 1: Existing accounts show the new BPF.

When an entity record is being created and if there are multiple BPFs defined on that entity. The system would do the following:

If the ProcessId field is set to Guid.Empty. The system will skip defaulting the BPF on that instance.

If the ProcessId field is set to specific BPF entity reference. The system will default to the specified BPF. If the ProcessId field on the record is not set. The system will default the BPF.

Box 2: No BPF is linked to a new account.

Note: A business process flow definition is represented as a custom entity and an instance of a process is stored as a record within that entity. Each record is associated with a data record (such as an Account, Contact, Lead, or Opportunity) and in case of cross-entity processes, with a data record for each participating entity.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/business-process-fl>

NEW QUESTION 192

- (Exam Topic 3)

You are a Dynamics 365 administrator for a veterinarian clinic.

On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.

You need to create a dynamically visible field. What should you configure?

- A. field visibility on the form
- B. business process flow
- C. workflow
- D. business rule

Answer: D

Explanation:

References:

<https://www.sherweb.com/blog/dynamics-365/configuring-business-rules-within-microsoft-dynamics-365-crm/>

NEW QUESTION 195

- (Exam Topic 3)

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots. Where should you store the model data?

- A. Global variables
- B. Custom entities
- C. Topics
- D. Multiple choice options

Answer: A

NEW QUESTION 197

- (Exam Topic 3)

A company has a model-driven app.

The app must meet the following requirements:

- Prevent users from saving a record if validation from a custom action fails.
- Query and update a list of records.

You need to configure processes for the app without using code.

Which processes should you use? To answer, drag the appropriate processes to the correct requirements. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 201

- (Exam Topic 3)

You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports. You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Share the Power BI report to all users.
- B. Add the Power BI report to the Site Map dashboards.
- C. Create a PCF file.
- D. Use the native reports in model-driven apps.
- E. Add the Power BI report to a dashboard in the model-driven app.

Answer: BE

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/add-powerbi-visual>

NEW QUESTION 206

- (Exam Topic 3)

You create a Power Automate flow as part of a managed solution. The flow alerts users when files are uploaded to a SharePoint location.

Files are uploaded to SharePoint at a much higher rate than expected. Users report that they receive too many notifications about uploaded files.

You need to stop the flow and correct the issue.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Disable the flow in the managed solution	<div><div></div><div>Disable the flow from the Power Automate portal</div><div>Disable the flow from the Azure portal</div><div>Disable the flow from the Power Automate solution</div></div>
Verify changes to the flow	<div><div></div><div>Run the Flow checker and then turn on the updated flow</div><div>Use the Test feature on the updated flow and then turn on the flow</div><div>Turn on the flow and then use the Test feature for the updated flow</div><div>Run the Flow checker and then use the Test feature on the updated flow</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 210

- (Exam Topic 3)

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. Microsoft Visual Studio
- B. Maker portal
- C. Advanced Find
- D. System Settings

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION 215

- (Exam Topic 3)

A company is implementing Power Apps and Power Automate.

Several components are created within Power Apps, Microsoft Dataverse, and Power Automate. These components must be promoted from the development environment to the user acceptance test environment in a single solution package.

You need to create the solution package for promotion. Where should you create the package?

- A. Office 365 admin center
- B. Azure DevOps
- C. Power Apps designer
- D. Microsoft Power Platform admin center
- E. Azure portal

Answer: D

Explanation:

A solution package is a bundle of components, such as Power Apps, Power Automate, and Microsoft Dataverse, that can be promoted from one environment to another. To create the solution package for promotion in a company that is implementing Power Apps and Power Automate, the package should be created in the Microsoft Power Platform admin center.

In the Power Platform admin center, you can create a solution package that includes the necessary components and export it as a .zip file. This file can then be imported into the desired environment, such as the user acceptance test environment, to promote the components.

References:

- <https://docs.microsoft.com/en-us/power-platform/admin/solutions/create-solution>
- <https://docs.microsoft.com/en-us/power-platform/admin/solutions/import-solution>
- <https://docs.microsoft.com/en-us/power-platform/admin/solutions/export-solution>

NEW QUESTION 218

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use multiple choice for Identify in the question and create options that represent of the age groups. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 222

- (Exam Topic 3)

You manage the Dynamics 365 environment for a company.

You need to ensure that there are no leads for a customer before you create a new opportunity for the customer.

How can you use duplicate detection rules to achieve this goal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Duplicate detection rule criteria	Value
Base record type	<div>▼</div> <div>Lead</div> <div>Account</div> <div>Opportunity</div>
Base record field	<div>▼</div> <div>Topic</div> <div>Account</div> <div>Originating Lead</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Duplicate detection rule criteria	Value
Base record type	<div>▼</div> <div>Lead</div> <div>Account</div> <div>Opportunity</div>
Base record field	<div>▼</div> <div>Topic</div> <div>Account</div> <div>Originating Lead</div>

NEW QUESTION 225

- (Exam Topic 3)

A user needs to create a Power Apps portal app.
The user is getting a permission denied error when creating the portal app.
You need to configure permissions to create the portal app.
Which three permissions should you configure? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. In the Power Platform admin center, ensure that the user account has read-write access.
- B. In Azure Active Directory, assign the Contributor role to the application at the subscription scope.
- C. In Azure Active Directory, ensure that the user has permission to register an app.
- D. In the Power Platform admin center, change the portal app owner to the user.
- E. In the Power Platform admin center, ensure that the user has the System administrator security role.

Answer: ACE

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-common-problems> <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-portal>
<https://docs.microsoft.com/en-us/azure/active-directory/develop/howto-create-service-principal-portal#required>

NEW QUESTION 229

- (Exam Topic 3)

You create a canvas app.
The app requires access to data that is stored in collections. The app must provide the following actions:

- Create a new collection variable.
- Remove table values from a collection. You need to configure functions for the app.

Which functions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Action	Function
Create a new collection variable.	<div>Collect</div> <div>Set</div> <div>Select</div> <div>Collect</div> <div>AddColumns</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area
