NEW QUESTION 137

A company is investigating the service-level agreements (SLAS) provided by Microsoft 365. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
The SLA commits to providing 100% uptime and email delivery.	<input type="radio"/>	<input type="radio"/>
Every Microsoft 365 application has an individual SLA commitment.	<input type="radio"/>	<input type="radio"/>
Microsoft offers a service credit if the SLA is not upheld.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft’s commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee. The SLA for Exchange Online, which is the email service in Microsoft 365, states that Microsoft will provide at least 99.9% availability of email delivery within one minute. However, this is an average over a month and not for any one email message. If there is an average delay of greater than 10 minutes over a month, then Microsoft will consider it a breach of the SLA.

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft’s commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee. However, not every Microsoft 365 application has an individual SLA commitment. Some applications are grouped together under a single SLA, such as Office 365 apps (Word, Excel, PowerPoint, etc.), SharePoint Online, OneDrive for Business, etc. Other applications have their own separate SLAs, such as Dynamics 365 apps (Sales, Customer Service, Marketing, etc.), Azure Active Directory Premium P1/P2 plans, etc.

YES: Microsoft offers a service credit if the SLA is not upheld for Microsoft Online Services such as Azure, Dynamics 365, Office 365, and Intune. The service credit is prorated based on the service affected and the duration of the outage.

NEW QUESTION 174

You are a Microsoft 365 administrator for a company.

Several users report that they receive emails which have a PDF attachment. The PDF attachment launches malicious code.

You need to remove the message from inboxes and disable the PDF threat if an affected document is opened. Which feature should you implement?

- A. Microsoft Exchange Admin Center block lists
- B. Sender Policy Framework
- C. Advanced Threat Protection anti-phishing
- D. zero-hour auto purge
- E. DKIM signed messages with mail flow rules

Answer: D

Explanation:

Zero-hour auto purge (ZAP) is an email protection feature in Office 365 that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes. ZAP is available with the default Exchange Online Protection (EOP) that's included with any Office 365 subscription that contains Exchange Online mailboxes. ZAP doesn't work in standalone EOP environments that protect on-premises Exchange mailboxes
